☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

(Signature required) Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment

7 Easy Ways to Bid

1 Internet

Simply go to www.pearsoncmg.com

Simply go to www.HA.com, find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

2 eMail

You can also

You can also email your bids to us at Bid@HA.com. List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

4 In Person

Come to the auction and view the lots in person and bid live on the floor.

5 FAX
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

6 Live By Phone

Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

7 Live using HERITAGE Live!®
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit HA.com/Live and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.

Dear Bidder:

Welcome to New York! Heritage Auctions is extremely pleased to present this U.S. Coins Signature Auction, held in conjunction with the Invitational PNG New York event. The sale promises to deliver many memorable moments for numismatists, dealers, rare coin specialists, and collectors alike – featuring more than 5,000 lots, including a gathering of more than 2,100 floor lots in four action-filled sessions. The Premier Session will be held Thursday evening, October 9, with more than 600 lots of exceptional quality and interest available to bidders at the show, as well as to those who participate remotely.

The sale includes U.S. coins of every series, from early American colonials to modern issues. Two stellars – both a Coiled Hair gilt example and a Flowing Hair gold coin – highlight a notable group of patterns. An 1803 Small 3, Large Reverse Stars Draped Bust half dollar (the Overton-104 variety) in MS62 NGC represents one of the few Mint State examples known of this scarce variety. Early type enthusiasts will be further enticed by a 1795 AU58 PCGS Flowing Hair Two Leaves dollar, with delightful toning and strong remaining mint luster.

Other important consignments include outstanding selections from our pedigreed collections:

THE LA JOLLA LADY'S COLLECTION

A compact, high-end collection of exquisite proof gold highlights The La Jolla Lady's Collection. A single proof of remarkable eye appeal represents each gold denomination from the dollar to the double eagle, all in near-Gem or Gem proof condition. Examples include an 1858 three dollar gold in PR65 PCGS (the Trompeter coin) and a rare, seldom-available 1872 Liberty double eagle in PR64 PCGS.

THE PANNONIA COLLECTION, PART TWO

Additional selections from the Pannonia Collection follow up on the exciting Long Beach sale, where many incredible rarities from this collection changed hands. The current New York offering includes an amazing 1907 Saint-Gaudens High Relief double eagle graded MS67 NGC, a wonderful 1796 B-2 Small Eagle quarter graded MS64 PCGS (one of just 6,146 pieces minted), and a spectacular Standard Silver quarter dollar, Judd-880, graded PR66 Deep Cameo PCGS – the only Deep Cameo graded by PCGS of this rare and desirable pattern.

THE VALLEY VIEW LIFE COLLECTION, PART THREE

Still more selections from the Valley View Life Collection are included in our New York event, headed by the rare 1880 Coiled Hair four dollar Stella. A gilt example (Judd-1661), this attractive pattern is housed in an ANACS AU50 Details holder and is a rare opportunity to acquire the Coiled Hair type, which is rare in any condition.

In all, more than 200 different consignors provided an excellent assortment of coins to make what promises to be a rousing success for all.

Whether you attend the Premier or Floor Sessions, or prefer to participate remotely, bidding is simple both before the auction and during the sale. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with Heritage LIVE!™ (our proprietary, award-winning online platform). Of course, if you are attending the show, we encourage you to stop by our booth on the Bourse, view the lots on-site, and bid in person from the auction floor.

Please visit our Manhattan gallery at 445 Park Avenue, at 57th Street, and meet Numismatist Sarah Miller. Sarah can assist you with buying, selling, consigning, or just answer questions that you may have.

We should also note that while Todd is based in Dallas and visits New York often, Greg is based in New York and devotes considerable time to meeting with clients in the Northeast.

Good luck and have a great time in the Big Apple!

Sincerely,

A handwritten signature in blue ink, appearing to read "Greg", with a stylized, flowing script.

Greg Rohan
President

SESSION ONE

COLONIALS

3001 1652 Pine Tree Threepence VG10 PCGS. Noe-34, W-630, Salmon 1-A, R.4. 17.0 gns. Pellets at trunk. A later die state with a break filling most of ET in MASATHVSETS, while S is mostly off of the planchet. The obverse is misaligned toward 12 o'clock, and the EN in ENGLAND is indistinct, both as usual for Noe-34. The reverse is struck off-center toward 6 o'clock, and the reverse peripheral letters are primarily off of the flan. Most of the details of the tree on the obverse, and the date and denomination III on the reverse, are present and clearly detailed on the dusky grayish-brown surfaces. Listed on page 39 of the 2015 *Guide Book*. PCGS# 21

3002 1652 Pine Tree Shilling, Small Planchet — Holed — NCS. Fine Details. Noe-17, W-840, Salmon 3-B, R.3. A 2 mm hole is located directly west of the 1 in the date. On the obverse, it rests between the E and T in MASATHVSETS. A cream-gray Pine Tree type coin with even wear except for two small areas on the obverse, below the left-side branches and above the hole. Listed on page 39 of the 2015 *Guide Book*. PCGS# 24

3003 (1670-75) St. Patrick Farthing VF20 PCGS Secure. Breen-212, W-11500. The legends and types are clear on this moderately granular and slightly glossy olive-gray example. One of Breen's "Masonic Punctuation" varieties with a trio of dots at 3 o'clock on the reverse. The brass splasher is well centered on the crown. Listed on page 41 of the 2015 *Guide Book*. PCGS# 42

**St. Patrick Farthing, Choice VF
W-11500, Large Brass Splasher**

3004 (1670-75) St. Patrick Farthing VF35 PCGS Secure. Breen-212, W-11500. One of the various "Masonic punctuation" die varieties with a dot trio on the reverse border above the church. Uncertain objects beneath the king are described as "sea beasts" in the Breen *Encyclopedia*. The brass splasher is large yet misses the lower half of the crown. A nicely detailed mahogany-brown piece with unblemished and mildly wavy surfaces. The St. Patrick farthings were imported from Ireland to serve in New Jersey colonial commerce. Listed on page 41 of the 2015 *Guide Book*. PCGS# 42

**(1670-75) St. Patrick Farthing, VF Details
Halo Reverse, Breen-206, W-11500**

3005 (1670-75) St. Patrick Farthing, Halo Reverse — Environmental Damage — PCGS Genuine. VF. Breen-206, W-11500. The variety is somewhat difficult to verify, due to extensive environmental damage, but PCGS has determined this piece to be an example of the "Halo" type. The major devices are well-detailed, and rich colors are pleasingly blended over both sides. A rare and valuable variety which carries an impressive premium. PCGS# 82

3006 (1670-75) St. Patrick Halfpenny VF20 PCGS. Vlack 5-D, W-11540. For this New Jersey import, the halfpenny is much scarcer than the farthing. The brass splasher is faintly evident on the left side of the crown. An evenly circulated tan-brown example with minor granularity and a couple of moderate marks on the middle left reverse figure. Listed on page 41 of the 2015 *Guide Book*. Ex: Orlando FUN Signature (Heritage, 1/2006), lot 402, which realized \$2,760. PCGS# 46

3007 (c. 1828) American Plantations 1/24 Part Real, Restrike MS62 PCGS. Newman 5-D, W-1160, R.5. The best-known restrike variety with a prominent die break through the A in FRAN(CE) to the I in HIB(ERNIA). Sharply struck and mark-free with the oxidized gunmetal-gray and olive surfaces customary for the type. One spot noted beneath the R in BRI(TAIN). Listed on page 41 of the 2015 *Guide Book*. PCGS# 52

3008 (1694) London Elephant Token, Thick Planchet XF40 PCGS. Hodder 2-B, W-12040, R.2. The most typically-seen Thick Planchet variety. A chocolate-brown example with somewhat ragged edges but smooth, evenly worn central devices and legends. PCGS# 55

3009 1722 Rosa Americana Halfpenny, DEI GRATIA, UTILE AU55 PCGS. M. 3.9-C.4, W-1222, R.5. Medium olive-brown patina. A nicely struck representative that has light rub in the centers. A hint of verdigris below the R in REX, and a wispy scratch near 6 o'clock, otherwise exemplary. Listed on page 42 of the 2015 *Guide Book*. Ex: Orlando FUN Signature (Heritage, 1/2003), lot 5014. PCGS# 104

- 3010 1760 Hibernia-Voce Populi Halfpenny, P Below Bust XF40 PCGS. N. 11, Z. 14-L, W-13960, R.3.** The P below Bust type is a difficult and important variant within the Voce Populi series. Olive-brown and chocolate-brown toning embraces minutely granular surfaces. The few wispy field marks are of little significance. Listed on page 49 of the 2015 *Guide Book*.
Ex: *Oak Collection of American Colonial Coinage (Heritage, 9/2005)*, lot 166. PCGS# 268

- 3011 1766 Pitt Halfpenny VF25 PCGS. Betts-519, Breen-251, W-8350, R.3.** A golden-brown representative of this interesting America-related token. Protected regions display steel-gray patina. No marks are remotely consequential. A small curved clip at 5 o'clock is as made. Listed on page 50 of the 2015 *Guide Book*. PCGS# 236

- 3012 1766 Pitt Halfpenny, Silvered XF40 PCGS. Betts-519, Breen-251, W-8350.** The Pitt tokens were undoubtedly struck in England, but could have been commissioned by merchants on either side of the Atlantic. Sir William Pitt, the elder, is honored for his efforts to repeal the hated Stamp Act. The surfaces are moderately granular but only minimally abraded. The cheek and shoulder betray light wear. Some of the silver plating persists throughout the peripheral legends. Population: 2 in 40, 2 finer (9/14). Listed on page 50 of the 2015 *Guide Book*.
Ex: *Long Beach Signature (Heritage, 9/2003)*, lot 5057. PCGS# 239

**1778-1779 Rhode Island Ship Token, AU50
Wreath Below, Copper, Betts-563, W-1740**

- 3013 1778-1779 Rhode Island Ship Token, Wreath Below, Copper AU50 PCGS. Betts-563, W-1740, R.4.** Although their history is not well-documented, these popular Revolutionary War-era tokens are now thought to have been created as a propaganda device by the British, intended for a Dutch audience, in their quest to ensure that the Dutch remain neutral in the British conflict with the American Colonies. This is a well-struck, evenly worn, unabraded example with rich walnut-brown toning over both sides. Housed in an old green label PCGS holder. Listed on page 50 of the 2015 *Guide Book*. PCGS# 576

**1773 Virginia Halfpenny, MS63 Brown
Very Rare Newman 13-V**

- 3014 1773 Virginia Halfpenny, No Period MS63 Brown PCGS. N. 13-V, W-1640, R.7.** Eight harpstrings. A very rare die marriage first reported by Ted Craig in the April-June 1962 issue of the *Colonial Newsletter*. One diagnostic is the repunched hindquarters of the lowest left lion within the shield. The king's nose points to the middle of the R in REX. A Connecticut copper of similar rarity would likely sell for five figures. Minimally abraded and nicely struck with a deep medium brown obverse and ample faded red on the reverse. Listed on page 45 of the 2014 *Guide Book*. PCGS# 243

**1776 Pewter Continental Dollar
CURRENCY, Newman 2-C**

- 3015 1776 Continental Dollar, CURRENCY, Pewter — Genuine — NCS. Newman 2-C, W-8455, R.3.** In our opinion, this coin has the details of a Poor specimen that is severely corroded. Limited portions of the surfaces exhibit XF sharpness and retain the initial silver-gray color, but a majority of the coin is darkly toned, granular, and featureless due to flaking. On the reverse, WE ARE ONE is complete and several other legends are partial. The obverse displays AL CURRE along with glimpses of other letters. PCGS# 794

- 3016 1787 Massachusetts Cent, Arrows in Left Talon XF45 PCGS. Ryder 4-D, W-6110, High R.3.** A walnut-brown Commonwealth Copper with crisp definition and only a few trivial contact marks on the right obverse field. Massachusetts cents are seldom encountered above the XF grade level. Listed on page 59 of the 2015 *Guide Book*. PCGS# 302

**1787 Connecticut Copper, XF45
Muttonhead, Miller 1.2-C**

- 3017 1787 Connecticut Copper, Muttonhead XF45 PCGS. M. 1.2-C, W-2720, R.3.** The late, lapped die state with only fragments of the peripheral legends. The well-known *Guide Book* subtype with a large mailed bust right and a "Topless Liberty" reverse. A sharp and unabraded ebony-brown example with moderately granular surfaces. An old attribution letter "D" is inked onto the right obverse field beneath the chin. Listed on page 61 of the 2014 *Guide Book*.

Ex: *Long Beach Signature* (Heritage, 6/2000), lot 7007; *Columbus Central States Signature* (Heritage, 4/2002), lot 7731. PCGS# 343

- 3018 1787 ETLIB INDE Small Head Right Connecticut Copper Fine 12 NGC Details. M. 1.1-A, W-2710, R.3.** Ex: The New Old England Collection. Double struck, but the anvil (reverse) die remained stationary while the hammer (obverse) die rotated between strikes. The portrait and left obverse legend are jumbled, although the remainder of the coin does not show a double image. The double strike created an unusually wide and somewhat oval-shaped coin. The medium brown surfaces are nearly free from verdigris, but the centers are wavy from two large, dull reverse abrasions. Listed on page 61 of the 2015 *Guide Book*.

- 3019 1787 New Jersey Copper, No Sprig Above Plow AU50 Brown NGC. M. 48-g, W-5275, R.1.** The familiar variety with a heavy diagonal die crack across the shield. Glimpses of luster emerge from the golden-tan and medium brown surfaces. Struck on a planchet with myriad small flaws, as made. Listed on page 70 of the 2015 *Guide Book*. PCGS# 506

- 3020 1786 Vermont Copper, VERMONTENSIMUM VF20 PCGS. RR-8, Bressett 6-E, W-2030, R.4.**

The scarcest of three Landscape varieties, attributed most easily by a double-punched 1 in the date. This is a richly toned mahogany-brown example with a strong impression from the dies and good centering on the planchet. A planchet flaw is noted on the lower left obverse field, just above the left side of the plow; while a smaller one rests near 9 o'clock on the edge, passing through the left side of M in VERMONT. Several even smaller, similar flaws are seen on the reverse, but there are no post-striking defects worthy of mention. PCGS# 545

- 3021 1787 Auctori Plebis Token AU50 NGC. Breen-1147. W-8770, R.3.** An elusive early die state example, with the prominent die crack in the upper reverse field not yet formed. This piece is lightly struck on the obverse, as is typical of the issue, but displays glossy auburn-brown surfaces that are free of any noticeable environmental impairments. The reverse is well-detailed, with only a touch of high-point wear. Census: 4 in 50, 9 finer (9/14). PCGS# 601

- 3022 1783 Nova Constellatio Copper, Pointed Rays, Small US AU50 PCGS. Crosby 2-B, W-1865, R.2.** A tan-brown example with sharp details. A couple of small rim dings, a few pinpoint abrasions, and a small area of gray obverse verdigris at 7 o'clock are of little importance to the experienced specialist. Listed on page 54 of the 2015 *Guide Book*.

Ex: *Central States Signature* (Heritage, 5/2004), lot 5048, which realized \$1,035. PCGS# 801

- 3023 1783 Nova Constellatio Copper, Blunt Rays AU50 PCGS. Crosby 3-C, W-1875, R.3.** CONSTELLATIO is misspelled as CONSTELLATIO on this 1783 issue. The design motifs are boldly rendered, with a thick die break noted near 9 o'clock on the reverse extending through R and the lower part of E in LIBERTAS. Other than a couple of tiny spots, the chocolate-brown surfaces are distraction-free. Population: 10 in 50, 31 finer (9/14). PCGS# 807

- 3024 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU50 PCGS. Crosby 3-B, R.2.** A richly detailed and nearly unabraded medium brown example. The wreath has a die break above the date, as is often encountered on this variety. However, the obverse lacks the cracks and crumbling characteristic of the late die state. Listed on page 54 of the 2015 *Guide Book*.

Ex: *Milwaukee Central States Signature* (Heritage, 5/2004), lot 5049, which realized \$1,150. PCGS# 813

- 3025 1787 Fugio Cent, Club Rays, Rounded Ends VF30 PCGS. N. 4-E, W-6685, R.3.** An impressively detailed example with even, light wear and no noticeable marks. The russet and powder-blue surfaces are mildly granular. Listed on page 88 of the 2015 *Guide Book*. Population: 25 in 30, 52 finer (8/14).

Ex: *FUN Signature* (Heritage, 1/2011), lot 3069. PCGS# 904

- 3026 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF30 NGC. N. 19-SS, R.5.** This example has medal-turn die alignment that is typical for the scarce die pair. A pleasing representative of the die pair, this Fugio cent has light brown surfaces with a few minor verdigris spots. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

**1787 Fugio Cent, MS62 Brown
STATES UNITED, Pointed Rays, W-6820**

- 3027 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown PCGS. N. 12-X, W-6820, R.3.** The Fugio cents were struck under Congressional contract from hand prepared dies, resulting in many different die varieties. This coin represents the W-6820 variety, which was well-represented in the Bank of New York hoard and is thus reasonably available in high grade today. This well-detailed MS62 piece offers lilac-brown surfaces that show some of the often seen planchet flaws that were common to this issue. The characteristic die break is seen to the right of the sun. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

**1787 Fugio Cent, MS63 Brown
STATES UNITED, Pointed Rays, W-6855**

- 3028 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS63 Brown PCGS. N. 13-X, W-6855, R.2.** The W-6855 was heavily represented in the Bank of New York hoard, making the issue relatively available and a favorite choice of type collectors. This attractive Select example exhibits sharply detailed design elements and prominent clash marks on the obverse. The chocolate-brown surfaces show a few planchet flaws and die cracks. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

- 3029 1787 Fugio Cent, UNITED STATES, Cinquefoils AU58 ANACS. N. 11-B, W-6785, R.4, Clashed Dies.** The dies are severely clashed, with much of the ring pattern from the reverse transferred to the obverse die. The strike is otherwise bold on each side, with glossy chocolate-brown patina overall. A couple small planchet flaws are noted near the obverse rim at 12 and 2 o'clock, and another on the reverse at four o'clock. A few tiny areas of verdigris are present in the crevices. PCGS# 889

- 3030 1787 Fugio Cent, STATES UNITED, Raised Rim Fine 15 PCGS. N. 19-Z, W-6975, R.5.** A collectible chocolate-brown example of the scarce Raised Rim subtype. No abrasions are remotely worthy of comment. Wear is uneven but generally moderate. Each side has one minor mint-issued planchet flaw. Listed on page 88 of the 2015 *Guide Book*. Population: 7 in 15, 31 finer (8/14).
Ex: FUN Signature (Heritage, 1/2011), lot 3069. PCGS# 895

**1787 Fugio Cent, New Haven Restrike in Silver
Unc Details
Rare Newman 104-FF, W-17570**

- 3031 1787 Fugio Cent, New Haven Restrike, Silver — Tooled — NCS Details. Unc. N. 104-FF, W-17570, R.6.** The Newman 104-FF version of the so-called New Haven restrikes in silver of the 1787 Fugio cents display slender rings on the reverse. This deep charcoal-silver example is essentially unabraded. The tooling alluded to by NCS is subtle and seemingly resides in the right obverse field, where a form of "smoothing" appears to have occurred. A rare issue, with just 50 pieces produced by (or for) Horatio Rust circa 1859. Listed on page 87 of the 2015 *Guide Book*. PCGS# 915

- 3032 1787 Fugio Cent, New Haven Restrike, Copper MS63 Red and Brown ANACS. N. 104-FF, W-17560, R.3.** One of the more plentiful New Haven Restrikes, coined in the early 1860s. The narrow rings of the reverse are key identifiers. This piece displays luminous coppery-orange and burgundy color, with pale brass-yellow in the central regions. The surfaces are free of environmental impairments. PCGS# 917

- 3033 1787 Fugio Cent, New Haven Restrike, Copper MS65 Red and Brown PCGS. N. 104-FF, W-17560.** The borders display orange-gold coloration, while the centers show shades of forest-green, ruby-red, and tan-brown. This well-defined Gem is free from marks or spots and struck from moderately rusted dies. The central obverse is convex, as made. This collector issue was made circa 1860, and is listed on page 88 of the 2015 *Guide Book*. PCGS# 917

**1783 Chalmers Shilling, VF Details
Short Worm, W-1785**

- 3034 1783 Chalmers Shilling, Short Worm — Reverse Damage — NGC Details. VF. Breen-1011, W-1785, High R.4.** Maryland silversmith John Chalmers believed it was his public duty to rid the locality of worn-out Spanish-American silver coin. Chalmers' various private silver issues must have been accepted in commerce, since they are virtually unknown in Uncirculated grades. The present steel-gray example has a scrape effacing the reverse peripheral ornament, but the remainder of the coin is unmarked. Wear is even except for a smooth area on the lower left reverse. Listed on page 51 of the 2015 *Guide Book*. PCGS# 596

- 3035 1783 Chalmers Shilling, Long Worm — Planchet Flaw — NCS. VG Details. Breen-1012, W-1790, R.4.** An unevenly struck steel-gray representative. The right-side borders are softly brought up, as is the central reverse. The left obverse, and a majority of the reverse periphery, have Fine or better sharpness. Unimportant flan flaws are evident on the lightly impressed areas. A rare early private silver issue. Listed on page 51 of the 2015 *Guide Book*. PCGS# 595

**1789 Mott Token, MS62 Brown
Thin Planchet, Engrailed Edge**

- 3036** 1789 Mott Token, Thin Planchet, Engrailed Edge MS62 Brown PCGS. Breen-1025. An Early American store card, the Mott token was collected as a colonial type for many decades. However, the similarity of the eagle to Reich's 1807 five dollar design confirms a 19th century production. A lustrous and unabraded medium brown copper. An early die state without a break from the clock corner. The central reverse exhibits strike-throughs (as made) and the reverse is misaligned toward 5 o'clock. Housed in a green label holder. Listed on page 74 of the 2015 *Guide Book*. PCGS# 607

- 3037** (1792-94) Kentucky Token, Engrailed Edge AU58 PCGS. Breen-1162, W-8805, R.6. Described by Breen as "very rare," this is an uncommonly attractive coin for both the type and the grade. The surfaces do not reveal any sizeable abrasions, and even small distractions are few in number. Rich, deeply set, brown colored patina overlays both sides, and every feature is sharply impressed. An important offering for the specialist. Listed on page 75 of the 2015 *Guide Book*. Population: 9 in 58, 11 finer (9/14). Ex: *FUN Signature (Heritage, 1/2007)*, lot 221. PCGS# 617

- 3038** (1792-94) Kentucky Token, LANCASTER Edge MS64 Brown PCGS. Breen-1156, W-8810, R.5. A particularly nice example of this popular token. Light brown surfaces, with few flaws and only a couple of fly specks. Breen refers to these coins as Starry Pyramid Halfpence due to their Masonic symbolism, but they are better known as Kentucky Tokens because the Kentucky star on the reverse completes the pyramid in place of the all-seeing eye. The tokens were struck in England and imported by East Coast merchants to fill a need for small change. Listed on page 75 of the 2015 *Guide Book*. Ex: *San Francisco Signature (Heritage, 7/2005)*, lot 5031. PCGS# 623

**Kentucky Token (1792-94), MS65 Brown
Breen-1156, LANCASTER Edge**

- 3039** (1792-94) Kentucky Token, LANCASTER Edge MS65 Brown NGC. Breen-1156, W-8810, R.5. Ex: Eric P. Newman. Kentucky tokens were produced in quantity, but the vast majority of survivors are of the plain edge variety. The LANCASTER edge variant is among the more plentiful lettered edge varieties, but is nonetheless highly elusive, especially in Mint State. This beautifully preserved, glossy Gem is tied with one other for the finest numerically at NGC (4/14), and displays satiny and virtually undisturbed light brown surfaces. The strike is essentially sharp, save for some minor softness on a couple of reverse stars. PCGS# 623

- 3040** 1783 Georgivs Triumpho Token XF45 PCGS. Baker-7, W-10100, R.3. Produced in quantity, likely for circulation in the British Isles, though their reference in an American newspaper article in 1787 confirms that they also circulated in America prior to the establishment of the U.S. Mint. This example is only lightly circulated, retaining much detail and exhibiting smooth, light brown surfaces. No environmental impairments are observed upon close examination. Population: 19 in 45, 45 finer (9/14). PCGS# 664

**1791 Washington Cent, MS64 Brown
Baker-15, Large Eagle**

- 3041** 1791 Washington Large Eagle Cent MS64 Brown NGC. Baker-15, W-10610, R.2. A crisply struck tan-brown example of this important Washington variety, struck with intentions of securing a private coining contract with the U.S. government. Glimpses of mint red emerge from the legends and shield. A small flan flaw is noted on the cheekbone. Listed on page 81 of the 2015 *Guide Book*. Ex: *FUN Signature (Heritage, 1/2007)*, lot 255, which realized \$3,450. PCGS# 702

- 3042** 1791 Washington Small Eagle Cent MS62 Brown PCGS. Baker-16, W-10630, R.3. A well struck and undisturbed Mint State example of this interesting private pattern issue. The richly toned fields display subtle olive and orange hues when they are rotated beneath a light. A small vertical tick on the lower cheek serves as a pedigree marker. Listed on page 81 of the 2015 *Guide Book*. Ex: *Long Beach Signature (Heritage, 9/2005)*, lot 456. PCGS# 705

- 3043 1795 Washington Grate Halfpenny, Large Buttons, Lettered Edge AU50 PCGS Secure. Baker-29, W-10990, R.6.** The lettered edge variety is much rarer than Baker-29B or Baker-29AA. Struck later than the usually encountered reeded edge pieces, since a die break obscures much of the F in FIRM. This walnut-brown example is unblemished, and the strike is good except on the first ON in LONDON. Listed on page 83 of the 2015 *Guide Book*. PCGS# 743

1795 Washington Liberty & Security Penny
Fine Details, Baker-32
Classic Rarity

- 3044 1795 Washington Liberty & Security Penny, ASYLUM Edge — Environmental Damage — PCGS Genuine. Fine Details. Baker-32, W-11085, R.7.** Struck in 1795, the edge reads: AN ASYLUM FOR THE OPPRESS'D OF ALL NATIONS, although this is not visible within the PCGS holder. A dark greenish-brown coin, though there are elements of deep lavender toning interwoven on each side. A heavily granular appearance on the upper half of the obverse indicates the environmental damage that PCGS refers to. Listed on page 84 of the 2015 *Guide Book*. PCGS# 764

Washington Success Medal, MS62
Large Size, Plain Edge

- 3045 Undated Washington Success Medal, Large Size, Plain Edge MS62 NGC. Baker-265A, W-10905, R.5.** A prominent die crack between 11 and 3 o'clock crosses the hair and nose of Washington. The crack distinguishes Baker-265A from Baker-265D and the restrike Baker-266B. This glossy olive-green example has exemplary surfaces and the usual incompleteness of impression on the all-seeing eye. Listed on page 84 of the 2015 *Guide Book*. PCGS# 779
- 3046 Undated Washington Success Medal, Small Size, Plain Edge AU55 PCGS. 267A, W-10877, R.5.** A pleasing example of this scarce type. Struck in brass with a plain edge. The unabraded olive-tan surfaces are smooth and lightly worn. The upper obverse shows a cracked planchet. Listed on page 84 of the 2015 *Guide Book*. Population: 2 in 55 (1 in 55+), 9 finer (9/14). PCGS# 782

HALF CENTS

1793 Half Cent, C-3, B-3, VF Details
Elusive One-Year Type

- 3047 1793 C-3, B-3, R.3 — Environmental Damage, Tooled — NGC Details. VF.** The first half cent issue from the newly operational United States Mint in 1793 was produced to the extent of 35,334 pieces, most of which circulated extensively alongside the various foreign coppers of the period. As a result, most examples are well-worn and suffer from some degree of environmental damage. This piece displays the usual granular surfaces, but retains substantial detail for the grade level. All legends are clear, including the date and fraction. Close examination reveals some old, faint pinscratches on the lower reverse, though these are nearly undetectable to the unaided eye. Our EAC grade VG8.
- 3048 1794 High Relief Head, C-9, B-9, R.2 — Environmental Damage — NGC Details. VF.** The popular High Relief head of Liberty is instantly recognized, here with the usual reverse. This lightly corroded example exhibits light brown high-points and rich steel and olive-brown fields. Our EAC grade Fine 12. PCGS# 35063
- 3049 1795 Lettered Edge, C-1, B-1, R.2, VG10 PCGS. Manley Die State 1.0.** A tan-brown half cent with sharp definition for the designated grade, although the date and STATES are slightly fainter than the other legends. A few light hair-thin marks are noted near the cap and profile, and the lower reverse has a couple of slender laminations. Our EAC grade Good 6. PCGS# 35067
- 3050 1806 Large 6, Stems, C-4, B-4, R.1 MS61 Brown NGC. Manley Die State 2.** Rich purple, blue, and sea-green hues encompass each side of this lovely representative, while satiny luster illuminates the patina. The strike is strong on the obverse, though several wreath leaves are not fully brought up. Relatively few surface abrasions are present, considering the grade. Struck from mildly rotated dies. Our EAC grade AU50. PCGS# 35200
- 3051 1808 C-3, B-3, R.1, AU55 PCGS. Manley Die State II.** Light, vertical rust streaks are faintly visible in the right field, and light reddish-brown surfaces reveal traces of original mint luster in the hidden areas. This Choice About Uncirculated representative, from a mintage of 400,000 coins, is sharply struck with minor softness on the upper leaves. Our EAC grade XF45. PCGS# 35206
- 3052 1828 13 Stars, C-3, B-2, R.1, MS64 Brown PCGS. CAC. Manley Die State 3.0.** An intensely lustrous Red and Brown example with nicely preserved surfaces that show a moderate number of carbon flecks along with minimal abrasions for the grade. Our EAC grade MS62. Population: 2 in 64 Brown, 0 finer (8/14). PCGS# 35261
- 3053 1850 C-1, B-1, R.2, MS64 Brown NGC.** Among business strike Braided Hair half cents, 1849, 1850, and 1857 are scarcer dates, especially 1850. This splendid example has delicate blue highlights on its glossy chocolate-brown surfaces. Our EAC grade MS60. Census: 14 in 64 Brown, 5 finer (8/14). PCGS# 35321

3054 1855 C-1, B-1, R.1, MS65+ Brown PCGS. Iridescent bronze-gold luster engulfs unusually frosty surfaces on each side of this high-end Gem representative. The central devices are boldly impressed, though some of the stars and portions of the border dentils are not fully defined, as is typically seen on business strike examples of this issue. Our EAC grade MS62. PCGS# 35333

3055 1855 C-1, B-1, R.1, MS64 Red PCGS. An orange-gold Choice half cent that has scintillating luster and minimal contact. A loupe is needed to locate minute flecks and pale gray spots. Well struck at the centers, although the right borders are lightly impressed. Our EAC grade MS64.

Ex: *Central States Signature (Heritage, 4/2011)*, lot 3953. PCGS# 35335

LARGE CENTS

3056 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4, AG3 ANACS. The wreath and portrait are well outlined. The trefoil below the bust is distinct, and most letters in UNITED STATES OF AMERICA are readable. The powder-blue and tan-brown surfaces display minimal marks but are somewhat granular along the reverse periphery. Our EAC grade Fair 2. PCGS# 35462

1793 Wreath Cent, XF Details Lettered Edge, Presumed S-11c, B-16c

3057 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Improperly Cleaned — NCS Details. XF. Presumably S-11c, the lettered edge variety with a single leaf after DOLLAR. The edge is not visible within the holder. A richly toned mahogany-brown example with noteworthy bluish-purple accents on each side. Generally well-centered and well-struck with a large rim cud observed at 9 o'clock on the reverse, and some uneven definition of other dentils. Our EAC grade Fine 12. PCGS# 35477

1793 Liberty Cap Cent, Fair 2 S-13, Rarest 1793 Type

3058 1793 Liberty Cap, S-13, B-20, Low R.4, Fair 2 PCGS. The 93 in the date is easily discerned, and the triple leaf near the O in OF confirms the reverse die. LIBERTY is sharp except for the Y. The reverse is well worn but most of the wreath emerges upon thorough examination. The deep brown surfaces are moderately granular and the obverse has a few thin marks above the date and near the chin. A rare first-year type. Our EAC grade Poor 1. PCGS# 35489

1794 S-22 Cent, Choice VF Head of 1794, Well-Defined

3059 1794 Head of 1794, S-22, B-6, R.1, VF35 PCGS. The familiar Mounds Reverse variety, identified by a buckled field near the O in OF. The golden-brown surfaces display steel-blue undertones when rotated beneath a light. An attractively detailed example. No marks are of interest except for an unobtrusive rim ding on the reverse at 8 o'clock. Our EAC grade VF20.

Ex: *FUN Signature (Heritage, 1/2009)*, lot 174. PCGS# 35531

3060 1796 Liberty Cap, S-86, B-7, R.5, VG10 PCGS. A well-worn, but unimpaired example of this rare variety, this 1796 Liberty Cap large cent displays primarily smooth surfaces, with deep burgundy-brown patina in the recesses and lighter shades of the same over the relief elements. The detail remains strong for the grade, particularly on the obverse, though ONE CENT is faint, partly due to die wear. Our EAC grade VG8. PCGS# 35765

3061 1796 Reverse of 1795, Single Leaves, S-92, B-28, R.3 — Environmental Damage — PCGS Genuine. XF Details. This piece is sharply detailed in the central regions, though the borders show the usual softness. Olive-brown patina blankets each side. The obverse is fairly smooth on the high points, though the reverse exhibits some fine granularity in the central regions. A still-pleasing example of this early Draped Bust variety. Our EAC grade VG10. PCGS# 35813

3062 1798 First Hair Style, S-162, B-23, R.4, VF25 PCGS. An appealing example with smooth surfaces that display little porosity and are entirely free of distracting marks. Well-centered on the planchet with mostly well-struck motifs and even, honest wear from circulation. Only A in STATES and O in OF are softly struck. Our EAC grade Fine 12. PCGS# 36050

3063 1802 S-227, B-5, R.2, XF40 PCGS. Smooth burgundy-brown patina complements bold design definition on each side, with only slight wear evident over the high points of the design. The border dentils are complete on the reverse, but grow weak near 3 o'clock on the obverse. Overall, this is an attractive, problem-free Draped Bust type coin. Our EAC grade VF25. PCGS# 36296

3064 1803 Small Date, Small Fraction, S-254, B-13, R.1, XF40 PCGS. Die State II. A plentiful variety, ideal for type representation. This piece, however, is a remarkable representative; complete border dentils are seen on both sides, and the central devices exhibit sharp definition, as well. The color is exceptional, displaying glossy shades of chocolate, auburn, and reddish-brown, with no signs of environmental impairments. A long planchet flaw is noted between 3:30 and 4 o'clock near the obverse rim, giving the overall appearance of a heavy crack, but position further north than the late die state crack that later develops near the tip of the bust. Our EAC grade VF20. PCGS# 36377

3065 1803 Small Date, Small Fraction, S-255, B-14, R.1, XF40 PCGS. A medium olive-brown example with bold strike definition and a broad rim cud noted on the reverse above STA. The smooth surfaces are only slightly abraded. Our EAC grade VF25. PCGS# 36380

**1804 Large Cent, XF Details
S-266c, B-1**

- 3066** 1804 S-266c, B-1, R.2 — Corroded — NCS Details. XF. Breen Die State IV with an additional lengthy cud over MERIC. This is a charcoal-brown example with uniform granularity across both sides. All of the major design motifs are completely evident, save for portions of STATES OF. An affordable example of this early key date. Our EAC grade VG7. PCGS# 36422

**1814 S-295 Large Cent, Good 6
Struck 40% Off Center**

- 3067** 1814 Plain 4, S-295, B-2, R.1 — Struck 40% Off Center — Good 6 PCGS. A scarce Classic Head large cent struck substantially off center at 2 o'clock, although the 1814 date remains fully on the coin. Smooth surfaces retain some gloss, with only minor marks and strong detail for the assigned grade. Rich, chocolate-brown patina covers both sides of the coin.

- 3068** 1816 N-2, R.1, MS63 Brown PCGS. Glossy, lustrous dark chocolate-brown obverse and a two-tone reverse with much mint red at the bottom and dark chocolate color at the top. Noticeable rim crumble between stars 8 to 10 and the N of ONE widely recut at the left base on the reverse. A small, oblong area of ebony toning on the obverse near star 13. Nice first-year example of the Coronet Head design. Our EAC grade MS60. PCGS# 36526

- 3069** 1818 N-10 MS64 Red and Brown PCGS. CAC. This near-Gem piece displays luminous coppery-red luster shining through a thin veil of burgundy toning, while the underlying surfaces are remarkably well-preserved. The central devices are crisply impressed, though some of the stars are not fully defined, a side effect of the late die state that contributes a bold circumnavigating die crack around the obverse margins. LIBERTY is lightly recut, most noticeable on the I and E, a diagnostic of this variety. Our EAC grade AU58. Population: 4 in 64 Red and Brown, 2 finer (8/14). PCGS# 36629

- 3070** 1820 Large Date, N-11, R.2, MS64 Brown NGC. Die State A, with no lapping, but with a prominent, circumnavigating die crack connecting the obverse stars and the date. The devices are razor-sharp, and the nearly unabraded surfaces exhibit glossy, burgundy-brown patina, with wisps of auburn throughout the recesses. A highly appealing example of this moderately available variety. Our EAC grade MS60. PCGS# 36667

**1820 Cent, MS64+ Red and Brown
N-13, Large Date**

- 3071** 1820 Large Date, N-13, R.1, MS64+ Red and Brown PCGS. CAC. The usual die state for this Randall Hoard variety with a bold crack encircling the obverse periphery. Although designated as Red and Brown, the color approaches full Red, with only minor mellowing on each field. Virtually unabraded, but a lens reveals minor carbon. The strike is bold on the motifs, and slightly soft only on stars 5 and 6. Our EAC grade MS60. PCGS# 36674

- 3072** 1820 Large Date, N-13, R.1, MS65 Red and Brown PCGS. The 82 in the date is wide, and the tops of L and Y in LIBERTY are recut. An attractive Gem example of this popular Randall Hoard date, highly suitable for type purposes. The highly lustrous surfaces are abrasion-free but show a slight degree of carbon, preventing an even finer grade designation. Our EAC grade MS62. Population: 84 in 65 (1 in 65+) Red and Brown, 6 finer (8/14). PCGS# 36674

**1837 Large Cent, MS66 Brown, N-10
None Numerically Finer at PCGS**

- 3073** 1837 Head of 1838, N-10, R.1, MS66 Brown PCGS. CAC. The beaded hair cords and low 7 in the date identify the popular N-10 variety. The pleasing chocolate brown surfaces of this remarkable Premium Gem are free of mentionable distractions and show no sign of carbon. The central design elements are sharply detailed, but just the lightest touch of softness shows on some star centers. Our EAC grade MS60.

Ex: *Houston Signature (Heritage, 12/2009)*, Lot 50. PCGS# 37135

- 3074** 1841 N-7, R.2, MS65 Brown PCGS. Grellman die state a. Well-struck with the typically weak obverse star centers, and some softness noted on the second A in AMERICA. An intensely lustrous Gem showing a great deal of reddish coloration along with the deep maroon-brown toning over both sides. Both sides are free of marks, and display a modest degree of carbon. Our EAC grade MS62. Population: 5 in 65 Brown, 1 finer (8/14). PCGS# 405809

- 3075** 1844 N-4, R.1, MS64 Brown PCGS. Grellman Die State d. Mint-red luster percolates from the protected areas, while the smooth surfaces show medium brown color with ice-blue accents. Stars 4 through 9 are a touch soft, as is the wreath bow. The design elements are otherwise sharp. Our EAC grade AU55. PCGS# 397728

3076 1845 N-10, R.3, MS64 Red and Brown PCGS. CAC. Grellman Die State a. The strike definition is impressively crisp and full on this attractive near-Gem example. A lustrous example with beautifully clean surfaces and scattered carbon flecks that keep it from an even finer grade. Our EAC grade MS63. PCGS# 397768

3077 1846 Small Date, N-2, R.2, MS65 Brown PCGS. Grellman Die State c. Traces of repunching are evident left of the 1 in the date, and a vertical depression shows in the reverse field from the top of the wreath past the second S in STATES, identifying the N-2 variety. This well-detailed Gem displays light brown surfaces with traces of original red and lilac patina and significant amounts of mint luster. Our EAC grade MS60. Population for all Small Date varieties: 6 in 65 Brown, 5 finer (9/14). PCGS# 403856

**1846 Cent, MS63 Brown
N-14, Tall Date**

3078 1846 Tall Date, N-14, R.3, MS63 Brown PCGS. Die State a. The N-14 variety exhibits light recutting of the 1 in the date, visible just above the left foot of the primary numeral. This representative exhibits some minor striking softness on the stars, the lower hair curls, and the upper wreath leaves, though the main motifs are well-defined. Glossy burgundy-brown patina blankets each side, giving this piece ample visual appeal for the grade. Our EAC grade AU55. Population: 3 in 63 Brown, 5 finer (9/14). PCGS# 403892

**1851 Large Cent, N-39, MS67 Red and Brown
Popular, Widely Collected Type Coin**

3079 1851 N-39, R.3, MS67 Red and Brown NGC. Grellman Die State a. An outstanding example of this widely collected type coin. As one can infer from the grade, the surfaces on this piece are pristine. Sharply struck throughout, the obverse is mostly brown with a significant outline of original mint red around the devices. The reverse is just the opposite: mostly red with an occasional dab of brown here and there. Highly glossy on both sides, the only mark of any note is a thin planchet flaw that runs parallel to the front of the coronet. Our EAC grade MS63. Census: 3 in 67 Red and Brown, 0 finer (8/14).
Ex: Long Beach Signature (Heritage, 9/2002), lot 5179; FUN Signature (Heritage, 1/2004), lot 4177. PCGS# 406771

**1853 Cent, N-13, MS65 Red
Frosty Mint Luster**

3080 1853 N-13, R.1, MS65 Red PCGS. As a date, the 1853 large cent is among the more easily obtainable dates of the period in full Red grades, though its availability in that color category drops off sharply finer than MS65. This Gem representative displays sharp central devices, though the border denticles and a few of the stars exhibit some usual softness. Frosty copper-red luster engulfs each side, with just a few minute carbon specks noted upon close examination. Our EAC grade MS63. Population: 68 in 65 (1 in 65+) Red, 15 finer (8/14). PCGS# 403930

3081 1853 N-25, R.1, MS65 Red and Brown PCGS. CAC. Die State b. A typical example of this middle die state, with substantial coppery-red luster remaining amid subtle burgundy overtones. The central devices are well-defined, though the stars and portions of the border denticles are not fully brought up. A few small carbon specks are observed, none of which are obvious to the unaided eye. PCGS has certified just seven numerically finer Red and Brown examples (9/14). Our EAC grade MS62. PCGS# 403926

3082 1855 Upright 55, N-4, R.1, MS65 Red and Brown PCGS. Grellman Die State a. Two die lumps on Liberty's jaw left of the ear are the most prominent diagnostic for this relatively common variety. A well-struck, unabraded specimen with tremendous mint luster and a small splash of carbon on the top of the first 5 in the date; another is on the lower portion of E in ONE on the central reverse. Neither is overly distracting. Our EAC grade MS62. PCGS# 46953

FLYING EAGLE CENTS

1857 Flying Eagle Cent, MS65 Rare 'Clashed With 50C' Example

- 3083 1857 Obverse Die Clash with Seated Half, Snow-9, FS-402, MS65 NGC.** According to the *Guide Book of Flying Eagle and Indian Cents*, in a section entitled "Producing the Snow-9 Half Dollar Clashed Die": "It is 1857, and a coining press has been used recently to strike Liberty Seated fifty-cent pieces. A fifty-cent obverse die is in the hammer position and a fifty-cent reverse die is in the anvil position. ... The fifty-cent reverse die is replaced with a one-cent Flying Eagle obverse die. With the newly-fitted one cent obverse die in place in the anvil, opposite the fifty-cent obverse still in place in the hammer position, the press is run through a cycle, and the fifty-cent obverse die in the hammer position strikes the one-cent die in the anvil position. Clash marks occur on both obverse dies."

This amazing Gem example, the result of the process described above by Richard Snow, is sharply struck and displays clean, flawlessly-preserved surfaces. It is highly lustrous and displays beautiful light golden-tan coloration. PCGS# 37375

- 3084 1858 Large Letters MS64 PCGS.** Low Leaves Reverse, Open E in ONE. Vibrant luster cartwheels over the golden-tan surfaces, and the design elements are boldly impressed, notably on the lower wreath. A few tiny ticks are scattered over each side, but they do not detract. Good for type. NGC ID# 2277, PCGS# 2019
- 3085 1858 Small Letters MS64 PCGS.** Low Leaves. Open E in ONE. This scarce subtype representative exhibits glistening pastel shades of sea-green, cherry-red, and peach-orange. The luminous surfaces are minimally marked and well-struck. Strong eye appeal. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3086 1859 MS64 PCGS.** Satiny tan-gold luster blankets each side of this boldly struck one-year type representative. A few microscopic carbon specks are detected with magnification, though the overall eye appeal is pleasing. NGC ID# 227E, PCGS# 2052
- 3087 1860 MS65 PCGS.** A gorgeous, well-struck Gem with champagne-gold surfaces that are distraction-free on both sides. Lustrous and visually impressive in every respect. A lovely, conditionally scarce representative. NGC ID# 227F, PCGS# 2058
- 3088 1860 MS65 PCGS. CAC.** Razor-sharp design definition and frosty bronze-gold luster are the hallmarks of this coin, though a lack of any significant surface flaws adds to the immense visual appeal. A challenging date in high grades, with just 53 examples certified numerically finer by PCGS (8/14). NGC ID# 227F, PCGS# 2058
- 3089 1860 MS66 PCGS.** A beautiful Premium Gem example of this early, brief type (Copper-Nickel composition, Oak Wreath With Shield reverse), that was only produced from 1860 through 1864. Fully struck with scintillating, cartwheel luster and lovely autumn-tan coloration. Population: 44 in 66 (2 in 66+), 9 finer (8/14). NGC ID# 227F, PCGS# 2058
- 3090 1861 MS65 PCGS.** This lustrous Gem exhibits golden-tan color and sharp strike definition with four full diamonds on Liberty's hair ribbon. Examination with a loupe fails to show any marks worthy of mention, and carbon is minimal. NGC ID# 227G, PCGS# 2061

- 3091 1861 MS65 PCGS.** Bright, lustrous honey-golden surfaces with a streak of deeper golden across the obverse. Sharply struck with clean, unmarked surfaces. NGC ID# 227G, PCGS# 2061
- 3092 1861 MS65 PCGS. CAC.** An elusive date in the Indian cent series, this issue is seldom encountered in Gem or finer grades. This piece has brilliant pale gold surfaces, satin luster, and excellent design definition. NGC ID# 227G, PCGS# 2061
- 3093 1864 Copper-Nickel MS65 PCGS. CAC.** An uncommon issue at the MS65 grade level or better. This CAC-approved Gem is highly lustrous and displays attractive tan-gold toning. Liberty's upper headress feathertips are softly struck, but the other design elements are boldly-detailed. A carefully preserved, blemish-free coin. Just 22 pieces are graded higher by PCGS (8/14). NGC ID# 227K, PCGS# 2070
- 3094 1864 Bronze No L MS65 Red PCGS. CAC.** This is a boldly struck, well-preserved example of the No L bronze Indian Cent. Each side is awash in blended bronze-gold and rose-red hues, with frosty underlying surfaces. A scattering of tiny carbon specks is detected on the reverse when viewed under a lens. PCGS has encapsulated 37 numerically finer pieces within the Red color designation (8/14). NGC ID# 227L, PCGS# 2078

1865 Indian Cent, MS66 Red and Brown Scarcer Plain 5 Variety, Conditionally Rare

- 3095 1865 Plain 5 MS66 Red and Brown PCGS. CAC.** A sharply struck specimen with rich golden-red and reddish-tan coloration and amazingly vibrant, scintillating mint luster. The surfaces are impressively mark-free and show minimal carbon specks. Not many examples of this scarcer Plain 5 variety have achieved the Premium Gem grade, regardless of color designation, at either service. Population: 2 in 66 Red and Brown, 0 finer (8/14). PCGS# 92083

1868 Indian Cent, MS65 Red Impressive, Conditionally Rare Example

- 3096 1868 MS65 Red PCGS.** The satiny mint-red and champagne-gold surfaces are bright and pleasing, with smooth, unmarked fields and sharply struck devices. This issue is conditionally rare at the current MS65 grade level, despite a high mintage of 10.2 million coins. Population: 38 in 65 (1 in 65+) Red, 3 finer (8/14). NGC ID# 227S, PCGS# 2093
- 3097 1869/69 Snow-3, FS-301, MS64 Red and Brown PCGS. CAC.** Once believed to be an 1869/68, this popular overdate is most easily recognized by the remnants of the undertype 69 below the primary digits. The lightly marked surfaces of this well-detailed Choice example display a mix of lilac, brown, and original red toning. Population: 17 in 64 (1 in 64+) Red and Brown, 11 finer (8/14). PCGS# 37475

**1873 Doubled LIBERTY Cent, XF40
FS-101, Key Guide Book Variety**

- 3098 1873 Doubled LIBERTY, Snow-1, FS-101, XF40 PCGS.** The famous Guide Book variety with broad die doubling on LIBERTY, the eye, and the spines of the upper headdress feathers. Only the 1888/7 commands a greater premium. The present chocolate-brown cent has moderate wear but each letter in LIBERTY is clearly doubled. A lens reveals scattered small marks and a narrow obverse lamination at 10 o'clock. PCGS# 37504

- 3099 1874 MS65 Red NGC.** A simply beautiful Gem. The untuned centers sparkle within mottled russet and lavender peripheral shadings. Some light color is also seen over the central reverse of this visually stunning specimen. Census: 19 in 65 Red, 3 finer (8/14). NGC ID# 227Z, PCGS# 2120

- 3100 1881 MS67 Red and Brown NGC.** This coin is needle-sharp and highly lustrous, with deep cherry-red and rose-orange surfaces, no abrasions, and just a few tiny carbon specks. This is the finest-certified Red and Brown example of the issue at NGC and PCGS combined, and only five Red examples are numerically equal (8/14).
Ex: ANA Signature (Heritage, 3/2003), lot 5133; Baltimore Signature (Heritage, 7/2003), lot 5341; New York Bullet Sale (Heritage, 11/2003), lot 108. NGC ID# 2288, PCGS# 2140

- 3101 1888/7 Snow-1 Good 4 PCGS.** Remnants of the undertype 7 are just barely visible beneath the final primary digit in the date, identifying this popular variety. The FS-301 is "the #1 cherrypick among Indian Head cents" according to Bill Fivaz and J.T. Stanton. This well-worn example retains all major design elements intact in outline, with a few interior details still present. PCGS# 37543

**1889 Indian Cent, MS65 Red
Premium Quality for the Grade**

- 3102 1889 MS65 Red PCGS. CAC.** This exceptionally lustrous and fully struck example actually seems undergraded at the Gem Red grade level. A handful of tiny carbon specks are seen on both sides, but the well-preserved surfaces are free of distracting marks or abrasions of any kind. Population: 40 in 65 (1 in 65+) Red, 8 finer (8/14). NGC ID# 228H, PCGS# 2174

- 3103 1892 MS65 Red PCGS.** Eagle Eye Photo Seal, card included. Deep rose-red and coppery-orange hues accent frosty luster in the margins, while the centers exhibit lighter bronze-gold color, delivering a profound cameo appearance on the obverse. The strike is sharp throughout the headdress feathers and the wreath leaves, and only a few insignificant luster grazes on the cheek preclude a higher numeric grade. Population: 53 in 65 Red, 13 finer (8/14). NGC ID# 228L, PCGS# 2183

- 3104 1894 MS65 Red PCGS.** A gorgeous Gem Indian cent with deep red-orange coloration distributed over both sides, leaving slight lilac accents on a few of the highest design points. Sharply struck and abrasion-free, with a few minor clash marks noted along with a mere handful of flyspecks on each side. Population: 70 in 65 (2 in 65+) Red, 29 finer (8/14). NGC ID# 228N, PCGS# 2189

- 3105 1894 MS65 Red PCGS. CAC.** This full Red Gem representative displays frosty luster in shades of coppery-red, orange, and bright olive, with a crescent of deeper auburn color along the upper reverse border. The strike is sharp, and a few tiny ticks on the cheek are all that preclude an even finer grade. Close examination reveals a few tiny, scatter carbon specks. Population: 70 in 65 (2 in 65+) Red, 29 finer (8/14). NGC ID# 228N, PCGS# 2189

**1894 Indian Cent, MS66 Red
None Numerically Finer at PCGS**

- 3106 1894 MS66 Red PCGS.** The 1894 Indian cent is a slightly better date in the upper Mint State grades, especially when compared to the more often seen 20th century issues. This Premium Gem example displays vibrant coppery-gold luster, with well-defined design elements. Abrasions are nearly nonexistent, though a few tiny carbon specks are seen upon close examination, primarily on the reverse. Population: 30 in 66 (2 in 66+) Red, 0 finer (9/14). NGC ID# 228N, PCGS# 2189

- 3107 1899 MS65+ Red PCGS. CAC.** One of the flashiest and most appealing Indian cents that we have had the pleasure to examine. Sharply struck with intense mint frost and attractive toning variations on each side. NGC ID# 228U, PCGS# 2204

- 3108 1900 MS66 Red PCGS. CAC.** The 1900 Indian Head cent is one of the most challenging dates of the era to locate in higher Mint State grades. This is a wonderful Premium Gem, with red fields and sharp details. Housed in a green label holder. Population: 79 in 66 (8 in 66+) Red, 8 finer (8/14).
Ex: Long Beach Signature (Heritage, 9/2010), lot 3191. NGC ID# 228V, PCGS# 2207

**1900 Indian Cent, MS66+ Red
Fiery Luster**

- 3109 1900 MS66+ Red PCGS. CAC.** Despite trivial carbon flecks, this extraordinary Premium Gem has a bold strike and fiery luster that creates exceptional eye appeal. Both sides are light orange with faint traces of peripheral gold toning. Despite an extremely large mintage, few similar or finer examples survive. Population: 80 in 66 (8 in 66+) Red, 8 finer (9/14). NGC ID# 228V, PCGS# 2207

3110 1903 MS66 Red PCGS. A beautifully toned Premium Gem example with blended hues of lime-gold and cherry-red on the obverse, and similar coloration across the reverse. Well-struck and impeccably preserved, with almost no carbon detected whatsoever on either side. Population: 76 in 66 (3 in 66+) Red, 7 finer (8/14). NGC ID# 228Y, PCGS# 2216

3111 1908 MS66 Red PCGS. The original red surfaces of this spectacular Premium Gem are free of mentionable flaws and both sides radiate vibrant mint luster. The design elements are well-detailed and eye appeal is outstanding. Population: 52 in 66 (2 in 66+) Red, 1 finer (8/14). NGC ID# 2295, PCGS# 2231

3112 1908 MS66 Red PCGS. A beautiful piece with fiery mint-red and cherry-red toning blended together on each side. Vibrantly lustrous with bold strike definition, save for a handful of the headdress feathertips. Population: 53 in 66 (2 in 66+) Red, 1 finer (9/14). NGC ID# 2295, PCGS# 2231

**1908 Indian Cent, MS66+ Red
Incredibly Eye-Appealing**

3113 1908 MS66+ Red PCGS. CAC. Frosty mint bloom in rich shades of rose and coppery-red encompass nearly flawless surfaces on each side of this boldly struck, Plus-graded Premium Gem. A lack of perceptible carbon spotting only increases the already immense visual appeal. Population: 52 in 66 (2 in 66+) Red, 1 finer (8/14). NGC ID# 2295, PCGS# 2231

3114 1908-S MS64 Red PCGS. A trivial mark on the Indian's cheek prevents a higher grade to this brilliant orange S-Mint cent that represents the first minor coinage issue in California. NGC ID# 2296, PCGS# 2234

**1909 Indian Head Cent, MS66+ Red
Final-Year Type Coin**

3115 1909 MS66+ Red PCGS. CAC. A substantial quantity of 1909 Indian Head cents were put aside by contemporary collectors as final-year souvenirs. Resultingly, the issue is available up to and including the Gem level. In MS66 examples are scarce, and finer pieces are extremely rare; PCGS has certified only five coins in higher grades (8/14). This blazing Red representative possesses exceptional visual appeal. Fully struck, wonderfully preserved, and almost devoid of any carbon. NGC ID# 2297, PCGS# 2237

3116 1909-S MS64 Brown PCGS. Lustrous tan undertones complement umber-brown shades on this rare Indian Head cent, notable as the lowest mintage of the series with just 309,000 pieces produced, and scarcer than either of its 1909-S Lincoln cent counterparts. Only minor contact marks and two or three small flecks of carbon are seen on this pleasing near-Gem example. Population: 57 in 64 Brown, 8 finer (9/14). NGC ID# 2298, PCGS# 2238

3117 1909-S MS64 Red and Brown NGC. Strong eye appeal offsets slight softness on the Indian's bonnet feathers, although this lustrous cent is otherwise boldly struck. Attractive coppery-orange and umber toning confirm its near-Gem status, perhaps the optimal collector grade for this scarce San Francisco cent. There are no distracting marks, spots, or impairments visible with or without a glass. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

**1859 Indian Cent, PR64
One-Year Proof Type**

3118 1859 PR64 PCGS. This is a high-end example that boasts deeply mirrored fields. Each side has taken on rich reddish-gold patina with no evidence remaining of the original "white" color of the copper-nickel alloy. Fully detailed throughout with a few tiny, grade-limiting specks of carbon on the reverse.

Ex: Long Beach Signature (Heritage, 9/2002), lot 5366; FUN Signature (Heritage, 1/2003), lot 5473. NGC ID# 2299, PCGS# 2247

**1859 Indian Cent, Sharp PR64
Beautifully Preserved**

3119 1859 PR64 PCGS. CAC. As a one-year type, the proof variant of the 1859 Indian cent is virtually as popular as its business strike counterpart. This near-Gem example displays razor-sharp design elements set against glassy fields that show blended hues of coppery-orange and olive color. A small toning spot is noted near 10 o'clock on the reverse, and a tiny carbon speck is hidden in the lower-left wreath leaves. Housed in a first generation holder, this is an immensely appealing proof type coin. NGC ID# 2299, PCGS# 2247

3120 1860 PR64 PCGS. An exquisitely struck near-Gem that has lovely olive-brown color and immaculate surfaces. Free from carbon flecks, and attractive. A tiny depression — perhaps a minor planchet flaw — beneath the D in UNITED is the only noticeable mark, and it requires a loupe.

Ex: Orlando FUN Signature (Heritage, 1/2003), lot 5477. NGC ID# 229A, PCGS# 2253

3121 1861 PR64 NGC. A majority of the 1,000 Indian Head cent proofs struck in 1861 went unsold and were subsequently destroyed, making this a key issue in the series. Ice-blue and sea-green accent primarily dark copper-orange color. Housed in a prior generation holder. Census: 36 in 64 (1 in 64 ★), 28 finer (8/14). NGC ID# 229B, PCGS# 2256

3122 1861 PR64 NGC. The mintage of 1,000 pieces is deceiving, since most of this proof issue were either destroyed as unsold or released into circulation. Estimates of two hundred or so survivors correspond to the combined number of grading events at both services. This lustrous, fully struck proof is Choice for the issue, which is usually of marginal quality. The lustrous surfaces are reflective and display a moderate degree of contrast with the frosted motifs. Peach-orange color with tangerine accents show only one or two minuscule flecks. Census: 36 in 64 (1 in 64 ★), 28 finer (9/14). NGC ID# 229B, PCGS# 2256

3123 1862 PR64 PCGS. Full details from a bold strike support the near-Gem grade assigned to this tawny tan proof cent. The fields display modest reflectivity, and show a few marks including a some discoloration on the feather opposite the first A of AMERICA and noticeable carbon at the top of N in CENT. Other small carbon flecks are visible under magnification. NGC ID# 229C, PCGS# 2259

3124 1862 PR66 NGC. An unmistakable proof striking with fully defined motifs and tremendously glassy reflectivity in the fields. Other than scattered flyspecks, the golden-tan surfaces are distraction-free. Census: 33 in 66 (6 in 66+, 1 in 66 ★), 4 finer (8/14). NGC ID# 229C, PCGS# 2259

3125 1863 PR64 PCGS. A razor-sharp near-Gem with pleasing red-orange coloration, lavender accents, and undisturbed surfaces. The reverse is lightly strike doubled. This is a fully struck, deeply mirrored proof with substantial contrast between the reflective fields and frosted motifs. A tiny bit of green verdigris sits at the upper right serif of the E in UNITED, visible under magnification. Just 460 pieces were struck in proof format. NGC ID# 229D, PCGS# 2262

3126 1864 Copper Nickel PR63 Cameo NGC. A fully struck and impressively mirrored peach-gold specimen. Glimpses of violet-red visit the reverse margin. Scattered small to moderate flecks determine the grade. A proof production of just 370 pieces. PCGS# 82265

1864 Bronze No L Cent, PR65 Red and Brown Elusive in Finer Grades

3127 1864 Bronze No L PR65 Red and Brown PCGS. Dappled olive-brown toning overlays both sides, but plenty of golden-orange mint luster is still readily evident. The sharply struck devices and moderately glowing fields leave little doubt about this coin's proof status, although we note that the latter characteristic is only visible at direct light angles. There are no noteworthy distractions. Population: 34 in 65 Red and Brown, 13 finer (9/14).

Ex: *Long Beach Bullet* (Heritage, 2/2002), lot 156; *FUN Signature* (Heritage, 1/2003), lot 5489. NGC ID# 229F, PCGS# 2277

3128 1865 PR64 Red PCGS. Eagle Eye Photo Seal. The color is exceptionally vibrant on both sides with original crimson-orange shadings that are particularly praiseworthy in the centers. With razor sharp striking definition and glowing surfaces that are fully brought up in all areas, this coin has the eye appeal of an even higher grade. A few swirls of steel-gray color are noted here and there, but they are only really appreciable under a loupe. Population: 14 in 64 Red, 9 finer (9/14). NGC ID# 229H, PCGS# 2284

3129 1869 PR65 Red and Brown NGC. Orange, magenta, and royal blue shades cover the obverse of this dramatically toned proof cent, while the reverse displays glassy, pumpkin-orange color with blue overtones. Just 600 proofs were struck, and few are finer than this sharp and distinctive Gem. Census: 39 in 65 (2 in 65 ★) Red and Brown, 5 finer (9/14). NGC ID# 229M, PCGS# 2295

3130 1870 PR64 Red PCGS. A little tan tinged haziness overlays the otherwise fully lustrous pink-red surfaces of this sharp near-Gem. There is a contact mark in the left obverse field before the Liberty's throat. Population: 31 in 64 Red, 31 finer (8/14). NGC ID# 229N, PCGS# 2299

1877 Indian Cent, PR64 Red and Brown Attractive Key Date Specimen

3131 1877 PR64 Red and Brown NGC. The key date status of its 1877 business strike counterpart is essentially transferred over to the 1877 proofs, by association. This is a lovely piece with warm red-brown patina over each side, in addition to sharp strike definition and carefully preserved surfaces. The fields are not highly reflective, due to the deep toning. NGC ID# 229W, PCGS# 2319

3132 1882 PR66 Brown PCGS Secure. Deep violet-red toning covers the high points, while the fields exhibit even deeper shades of lavender-green. A fully struck proof with clean surfaces that lack even a hint of contact or improper care. Population: 35 in 66 Brown, 14 finer (8/14). NGC ID# 22A3, PCGS# 2333

3133 1884 PR66 Red and Brown PCGS. This lovely Premium Gem is well-struck with smooth surfaces and a pleasing combination of satiny luster elements and mild prooflikeness in the fields. Reddish-tan on the obverse with strong lilac accents noted on the reverse high points. Population: 53 in 66 Red and Brown, 16 finer (9/14). NGC ID# 22A5, PCGS# 2340

3134 1890 PR65 Red PCGS. The design elements of this delightful Gem are sharply detailed throughout and the fields are brightly reflective. The original red surfaces have mellowed to orange-brown in a few places. Population: 22 in 65 Red, 2 finer (9/14). NGC ID# 22AC, PCGS# 2359

3135 1900 PR66 Red and Brown PCGS. CAC. This fully struck proof specimen is deeply toned and seemingly immaculate. From a mintage of 2,262 coins, and conditionally scarce at this level. Each of the major services has rated four Red and Brown examples finer at PR67. Population: 23 in 66 (1 in 66+) Red and Brown, 4 finer (8/14). NGC ID# 22AN, PCGS# 2388

3136 1901 PR66 Red PCGS. Hints of violet and blue appear on the rich orange surfaces of this Premium Gem proof that was struck during the first year of operations in the new third Mint building at Philadelphia. Population: 26 in 66 Red, 7 finer (8/14). NGC ID# 22AP, PCGS# 2392

**1904 Indian Cent, PR65 Red Cameo
Beautiful Coloration**

- 3137 1904 PR65 Red Cameo PCGS. CAC.** Moderate cameo contrast is seen on both sides, but is most prominent on the obverse, where the profoundly reflective fields contrast nicely with the noticeably frosted devices. Each side displays vivid magenta-red and sunset-golden iridescence. There are a few minor carbon flecks on the obverse, but no contact marks are evident.
Ex: *Palm Beach Signature (Heritage, 3/2005)*, lot 5129. PCGS# 82401

LINCOLN CENTS

- 3138 1909-S VDB MS63 Brown PCGS.** Well-struck throughout, and free of marks or abrasions of any kind. Vertical toning streaks over the right side of the obverse seemingly limit the grade assessment of this high-end Select Mint State representative. NGC ID# 22B2, PCGS# 2426
- 3139 1909-S VDB MS64 Red and Brown PCGS.** A lustrous and lightly toned key date representative that features pumpkin-gold surfaces. Each side of this Choice example offers well-struck devices with minor blending over Lincoln's ear. Minimally marked for the grade. NGC ID# 22B2, PCGS# 2427
- 3140 1909-S VDB MS64 Red and Brown PCGS.** A lovely near-Gem representative of this famous key issue. Coppery-red and mint-green toning adorns the carefully preserved surfaces. Free of distracting marks and showing minimal carbon on each side. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, MS65 Red and Brown
Key Date in the Lincoln Cent Series**

- 3141 1909-S VDB MS65 Red and Brown PCGS. CAC.** This is the definitive key date in the series, usually found at the top of any Lincoln cent collector's want list because of its low-mintage of 484,000 coins and its controversial history. This Red and Brown Gem is lightly toned and highly lustrous. The devices are well-detailed with a touch of softness on the designer's initials. PCGS has certified only 35 numerically finer submissions (8/14). NGC ID# 22B2, PCGS# 2427

**1909-S VDB Lincoln Cent, MS65 Red and Brown
Appealing, Impressive Key Date Example**

- 3142 1909-S VDB MS65 Red and Brown PCGS. CAC.** Lustrous deep orange surfaces host traces of bluish patina on this impressive Gem. While designated Red and Brown, this is a full Red specimen with slightly mellowed color. Here is an appealing specimen that will make a nice addition to an advanced collection. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Lincoln Cent, MS65 Red
Frosty, Attractive Key Date Example**

- 3143 1909-S VDB MS65 Red PCGS.** This first-year issue must have been saved in relatively large numbers from the low mintage of 484,000 coins, considering the high number of examples that still exist in Mint State. Gems are scarce, however, and few pieces survive in even finer grades. This is a lustrous, frosty example, with well-defined motifs and unmarked surfaces. A few wispy flyspecks seem to keep it from grading finer. NGC ID# 22B2, PCGS# 2428
- 3144 1911 MS66 Red PCGS.** An impressive early Lincoln cent, this example shows brilliant, frosty orange mint luster and exceptional surfaces as the grade suggests. PCGS has only certified 12 finer examples (8/14). NGC ID# 22B7, PCGS# 2443

**1912-S Cent, MS65 Red
Softly Frosted, Semikey Issue**

- 3145 1912-S MS65 Red PCGS.** This S-mint issue is accessible through near-Gem condition, while finer examples are scarcely seen. Splashes of magenta and lime-green color complement the softly frosted, copper-orange surfaces, contributing a strong degree of eye appeal. Sharply defined and carefully preserved. Population: 66 in 65 (3 in 65+) Red, 0 finer (8/14). NGC ID# 22BC, PCGS# 2458

**1914-D Lincoln Cent, MS62 Brown
Low-Mintage, Conditionally Rare Key Issue**

- 3146 1914-D MS62 Brown PCGS.** A surprisingly rare issue, the 1914-D had an original mintage of nearly 1.2 million pieces, yet it remains even scarcer than the much more well-known key 1909-S VDB in mint condition. This example displays clean surfaces with satin luster and light saddle-brown toning. Tick marks on Lincoln's nose, cheek, and forehead are the only grade-limiting surface flaws on either side of the coin. NGC ID# 22BH, PCGS# 2471

**1914-D Cent, MS62 Brown
Early Series Key**

- 3147 1914-D MS62 Brown PCGS. CAC.** The 1914-D is a challenging issue in Mint State and an acknowledged key in the Lincoln cent series. The pleasing brown surfaces of this attractive MS62 specimen show a few hints of olive and lilac. The design elements are sharply rendered, only minor contact marks are present, and there is no sign of carbon. NGC ID# 22BH, PCGS# 2471

**1914-D Lincoln Cent, MS64 Brown
Richly Patinated**

- 3148 1914-D MS64 Brown PCGS.** The 1914-D Lincoln cent is a well-known key date in the series, but is actually scarcer in Mint State than is the more popular 1909-S VDB. This Choice example displays blended hues of cherry-gold, forest-green, and royal-purple color over the obverse, while the reverse is a blend of olive and coppery-red hues. A bold strike and well-preserved surfaces complete the appeal. Population: 49 in 64 (1 in 64+) Brown, 11 finer (9/14). NGC ID# 22BH, PCGS# 2471

**1914-D Lincoln Cent, MS63 Red and Brown
Important Key Date Example**

- 3149 1914-D MS63 Red and Brown NGC.** This is a well-struck piece with lustrous, abrasion-free surfaces and scattered carbon flecks near the obverse and reverse peripheries. A larger carbon spot in the right obverse field seemingly limits the grade of this otherwise impressive Mint State specimen. This is an important key issue in the series, with fewer high-grade examples extant than the much better-known 1909-S VDB. NGC ID# 22BH, PCGS# 2472

**1915-S Lincoln Cent, MS64 Red
Better S-Mint Issue**

- 3150 1915-S MS64 Red PCGS. CAC.** The 1915-S Lincoln cent is a challenging date in high grades, but fully Red examples are scarce at all levels of Mint State. This Choice example displays bold design definition, with satiny orange-gold luster shining through hints of deeper color on each side. A few small carbon specks are present, as is expected at this grade level. Population: 59 in 64 (1 in 64+) Red, 32 finer (9/14). NGC ID# 22BM, PCGS# 2485

- 3151 1916-S MS64 Red PCGS.** A flashy mint-red cent from San Francisco with unmarked surfaces and very modest amounts of scattered carbon. A conditionally scarce issue that becomes rare any finer. NGC ID# 22BR, PCGS# 2494

- 3152 1919 MS67 Red PCGS.** A remarkable Superb Gem example with rich orange-red toning and flashy mint luster that makes the coin appear to be freshly-minted. Both sides are impressively clean and nearly carbon-free. Population: 68 in 67 (2 in 67+) Red, 16 finer (8/14). NGC ID# 22BY, PCGS# 2515

- 3153 1919-D MS65 Red PCGS.** Splashes of magenta and blue-green toning occur over otherwise copper-orange surfaces that show satin luster and sharply struck devices. From a mintage exceeding 57 million coins, PCGS has certified only 60 examples in MS65 Red (one in MS65+) and 13 pieces finer (8/14). NGC ID# 22BZ, PCGS# 2518

- 3154 1923-S MS64 Red and Brown PCGS. CAC.** Boldly struck with fine satin luster and even red-brown toning. Somewhat scarce at this grade level, and rare any finer. NGC ID# 22CB, PCGS# 2547

- 3155 1927 MS67 Red PCGS.** Pumpkin-gold color graces the surfaces of this Registry Set candidate. A full strike, radiant luster, and the absence of any mentionable imperfections make this an immensely desirable example. Population: 41 in 67 (1 in 67+) Red, 0 finer (8/14). NGC ID# 22CM, PCGS# 2578

**1929-D Cent, MS66 Red
Conditionally Rare and Among the Finest-Known**

- 3156 1929-D MS66 Red PCGS. CAC.** Lange (2005) notes that striking deficiency is endemic to this issue and that, therefore, even Uncirculated examples are disappointing in terms of their overall quality. The current offering, however, is a lovely Premium Gem showing intense mint luster and decent if not full strike definition. The gleaming surfaces are mark-free, with a few minor specks that are non-distracting. A potentially important opportunity for the Registry Set collector. Population: 28 in 66 (1 in 66+) Red, 0 finer (8/14). NGC ID# 22CV, PCGS# 2599

- 3157 1933 MS67 Red PCGS. CAC.** The obverse of this Superb Gem is primarily orange-red, with a few tiny splashes of cherry-red on the collar, while the reverse displays blended shades of orange, lime-green, and yellow. A few small silver-gray spots appear near 8 o'clock on the reverse. Population: 45 in 67 (1 in 67+) Red, 0 finer (9/14). NGC ID# 22D7, PCGS# 2629

**1936-S Cent, MS67 Red
Conditionally Unsurpassed Example**

- 3158 1936-S MS67 Red PCGS.** Although David Lange (2005) notes that this issue was "widely hoarded by the roll and remains common in all grades," his comment does not really apply to MS67 coins, of which there are fewer than 50 pieces currently known to PCGS. This sharply struck example displays exquisite mint-orange toning and lacks any surface marks or flaws that would contradict the Superb Gem assessment by PCGS. Population: 49 in 67 Red, 0 finer (8/14). NGC ID# 22DG, PCGS# 2656

**1936-S Lincoln Cent, MS67 Red
Tied for Finest-Graded**

- 3159 1936-S MS67 Red PCGS.** Well-struck with flashy mint luster and pleasing red-orange coloration. An impressive Superb Gem example of this San Francisco issue from an original mintage of 29 million coins, only a tiny percentage of which have achieved this lofty ranking at both of the major grading services combined. Population: 49 in 67 Red, 0 finer (8/14). NGC ID# 22DG, PCGS# 2656

- 3160 1936-S MS67 Red PCGS.** A remarkably preserved example of this Depression-era cent issue from the San Francisco Mint. Well-struck with fine satiny mint luster and blemish-free surfaces. Population: 50 in 67 Red, 0 finer (8/14). NGC ID# 22DG, PCGS# 2656

- 3161 1937 MS67+ Red PCGS.** A well-struck Superb Gem with amazingly clean surfaces and lovely mint-orange toning highlighted by shimmering mint luster. Conditionally rare at this grade level and definitely a target for the serious Registry Set collector. 4 in 67+ Red, 1 finer (8/14). NGC ID# 22DH, PCGS# 2659

**1943-D/D Lincoln Cent, MS66
Popular Repunched Mintmark, FS-501**

- 3162 1943-D/D FS-501, MS66 PCGS Secure.** The remains of the undertype D are visible to the lower left of the primary mintmark. This repunched mintmark variety is difficult to locate and always commands a stiff premium. The present coin is a delightful Premium Gem with sharply detailed design elements and well-preserved lustrous surfaces. Population: 27 in 66, 7 finer (8/14). PCGS# 37819

- 3163 1949-D MS67 Red PCGS. CAC.** Well-struck with intense fire-red toning and radiant satiny mint luster. The surfaces are amazingly clean and nearly pristine. The Registry Set collector should take note of this high-grade specimen. None are rated finer at either service (9/14). NGC ID# 22EW, PCGS# 2773

3164 1950 MS67 Red PCGS. Rich copper-orange color complements vibrant mint luster overall, while the central devices exhibit well-defined details. The surfaces are attractively free of carbon spotting and other noticeable imperfections. This Superb Gem will earn a second look from the Registry collector, as none have graded finer at PCGS (8/14). NGC ID# 22EY, PCGS# 2779

3165 1950-S MS67 Red PCGS. Tied for the finest that PCGS has certified, this impressive Superb Gem 1950-S Lincoln cent has frosty orange luster and bold design motifs. Population: 77 in 67 (1 in 67+) Red, 0 finer (8/14). NGC ID# 22F2, PCGS# 2785

1952 Lincoln Cent, MS67 Red
Conditionally Rare With Interesting Features

3166 1952 MS67 Red PCGS. A deeply lustrous orange-red Superb Gem with full strike definition that includes a sizeable crack across the side of Lincoln's head. Other anomalies include a die lump on Lincoln's neck, and a planchet streak (or an "inner rim") in the far right obverse field. A coin that is conditionally rare and deserving of further study! Population: 15 in 67 Red, 0 finer (8/14). NGC ID# 22F6, PCGS# 2797

3167 1953 MS66+ Red PCGS. CAC. This Premium Gem has a bold strike with brilliant orange luster and frosty surfaces. Not long ago, such coins held little value and little interest with collectors. However, since the advent of the PCGS Set Registry program, all that has changed as collectors now recognize these condition rarities. PCGS has only certified 12 finer examples (8/14). NGC ID# 22F9, PCGS# 2806

3168 1954 MS66+ Red PCGS. An extremely rare Lincoln cent in Superb Gem condition with original full Red color, this borderline Superb example is just a whisper away from such recognition. The surfaces display smooth, glowing fire-red patina. Boldly struck, there are no signs of carbon and just a few small ticks to define the Premium Gem grade with the PCGS Plus for eye appeal and high quality. NGC ID# 22FC, PCGS# 2815

3169 1955 Doubled Die Obverse, FS-101 — Environmental Damage — NGC Details. AU. One of the most dramatic Mint blunders of the 20th century, this *Guide Book* variety is widely sought in all grades. This example displays rich auburn-brown patina, with nearly complete detail. A few small patches of verdigris near the borders preclude a numeric grade from NGC.

3170 1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS. Well-struck, carefully preserved, and definitely high-end for the MS62 grade designation. The satiny brownish-green surfaces only show minuscule marks. One of the most dramatic and popular doubled die varieties in all of U.S. numismatics. PCGS# 37910

3171 1955 Doubled Die Obverse, FS-101, MS63 Brown ANACS. This popular doubled die variety is one of the most dramatic in all of U.S. numismatics. This medium-brown example is boldly struck and free of distracting surface marks. PCGS# 37910

SMS LINCOLN CENT

3172 1967 SMS MS67 Cameo PCGS. Ruby-red accents accompany intense, flame-orange coloration over the mirrored surfaces of this SMS cent. Enough mint frost on the devices earns the Cameo designation. A tiny lint mark beneath Lincoln's chin and a single, tiny carbon spot beneath the S of TRUST, midway to the portrait, are the only mentionable marks when viewed with a loupe. Population: 27 in 67 Cameo, 1 finer (9/14). PCGS# 83296

PROOF LINCOLN CENTS

3173 1909 PR66 Red and Brown NGC. This Premium Gem matte proof Lincoln is notable for its bold strike and carefully preserved Red and Brown surfaces, which show but a single small carbon fleck near IN and no significant distractions. High quality for this proof issue is challenging to find, with PCGS and NGC combining for just five numerically finer examples (9/14). NGC ID# 22KS, PCGS# 3304

3174 1910 PR65 Red and Brown PCGS. This second-year issue would make an excellent choice for type purposes, as it boasts the highest mintage of the matte proof Lincoln cents (1909-1916), and it is available at reasonably high grade levels for not too much money. This piece exhibits razor-sharp definition and a dramatic array of cherry-red, sunset-orange, and khaki-green coloration. A faint left obverse fingerprint fragment does not unduly detract from the outstanding appeal of this pleasing Gem example. Population: 58 in 65 (1 in 65+) Red and Brown, 31 finer in Red and Brown (8/14). NGC ID# 22KT, PCGS# 3307

3175 1912 PR65 Red and Brown NGC. A fully struck Gem that offers exceptional eye appeal. The obverse has a medium brown center and an orange-gold border. The reverse features an apple-green field and cherry-red legends. Encapsulated in a prior generation holder. NGC ID# 22KV, PCGS# 3313

3176 1914 PR65 Red and Brown PCGS. Razor-sharp design definition and fully squared rims are the hallmarks of this Gem proof piece. Intermingled coppery-orange, olive, and burgundy-red hues encompass the matte surfaces beneath a thin veil of light brown patina. A pleasing example, housed in an old green label holder. Population: 58 in 65 Red and Brown, 36 finer (9/14). NGC ID# 22KX, PCGS# 3319

1915 Lincoln Cent, PR66 Brown
Rich Original Patina

3177 1915 PR66 Brown PCGS. A conditionally rare example of this late matte proof issue, this Premium Gem 1915 cent displays needle-sharp design definition and nearly flawless surface preservation. Iridescent olive and green-gold toning encompasses each side, showing deeper hues of forest-green and amber in select areas. Population: 21 in 66 (3 in 66+) Brown, 4 finer (9/14). NGC ID# 22KY, PCGS# 3321

**1916 Lincoln Cent, PR64 Red and Brown
Final Matte Proof Issue**

3178 1916 PR64 Red and Brown PCGS. 1916 was the final year of the matte finish on proof coins, the surface texture being unpopular with collectors who favored the old brilliant finish. This proof 1916 Lincoln cent exhibits bright golden-orange color around the peripheral regions, with mottled burgundy-red toning over the centers. The underlying surfaces are well-preserved, and the strike is equally satisfactory. NGC ID# 22KZ, PCGS# 3325

3179 1936 Type Two — Brilliant Finish PR65 Red PCGS. CAC. Remarkable mirroring in the fields and light frost over the fully struck devices provides this Gem proof with a degree of cameo contrast, though it is not noted on the holder. Pumpkin-gold colors each side, and marks appear only with the use of a glass. NGC ID# 22L3, PCGS# 3335

**1936 Type Two Cent, PR66 Red
Attractively Coloration**

3180 1936 Type Two — Brilliant Finish PR66 Red NGC. This is a gorgeous Premium Gem specimen from the second proof type produced in 1936: the so-called Brilliant Finish. This example demonstrates razor-sharp striking on all of the Lincoln cent's familiar features, including Lincoln's beard, hair, and ear. Vivid orange-red toning dominates on both sides, but areas of bright silvery-gold also occur, especially on Lincoln's cheek, neck, and collar. Census: 10 in 66 Red, 2 finer (8/14).
Ex: Dallas Signature (Heritage, 10/2008), lot 244; Baltimore Signature (Heritage, 3/2009), lot 347. NGC ID# 22L3, PCGS# 3335

**1937 Lincoln Cent, PR67 Red
Deep Mirrors**

3181 1937 PR67 Red PCGS. Deep cherry-red coloration and lovely proof luster are evident on the carefully preserved surfaces of this Superb Gem Lincoln cent. Only 9,320 pieces were minted, and a mere 24 non-Cameo representatives have been certified at the PR67 Red grade level by NGC and PCGS combined, with none finer (8/10).
Ex: FUN Signature (Heritage, 1/2007), lot 1887; Long Beach Signature (Heritage, 9/2010), lot 3398. NGC ID# 22L4, PCGS# 3338

3182 1938 PR67 Red PCGS. Blazing Red surfaces with dazzling eye appeal are the hallmark of this pristine example, among the few finest certified at either PCGS or NGC. Population: 33 in 67 Red, 0 finer (8/14). NGC ID# 22L5, PCGS# 3341

3183 1938 PR65 Red Cameo PCGS. CAC. Rich orange color dominates the surfaces on each side, save for an infrequent whisper of lilac in the fields. This is a fully struck and exceptionally mirrored Gem proof. Population: 8 in 65 Cameo, 13 finer (8/14). NGC ID# 22L5, PCGS# 83341

3184 1939 PR67 Red PCGS. Both sides of this magnificent Superb Gem proof are awash with golden-orange brilliance. All design elements are fully brought up. Population: 29 in 67 Red, 0 finer (8/14). NGC ID# 22L6, PCGS# 3344

**1939 Cent, PR66 Red Cameo
Conditionally Rare as a Cameo**

3185 1939 PR66 Red Cameo NGC. The well-preserved surfaces of this Premium Gem piece have a tremendously glassy appearance that is rare for proofs of this decade. The frosted design motifs are wonderfully sharp and full, while the mark-free fields exhibit deep, watery reflectivity. Census: 2 in 66 Cameo, 0 finer (8/14). NGC ID# 22L6, PCGS# 83344

- 3186 1942 PR66 ★ Red NGC. CAC.** Mint-green elements complement flashy, pumpkin-gold surfaces. The fields exhibit a high degree of reflectivity, and the overall eye appeal is outstanding, as recognized by both NGC and CAC. Census: 78 in 66 (5 in 66 ★) Red, 1 finer (8/14).
Ex: Houston Signature (Heritage, 12/2010), lot 7436. NGC ID# 22L9, PCGS# 3353
- 3187 1953 PR66 Red Deep Cameo PCGS.** Gorgeous, Deep Cameo contrast makes this Premium Gem proof highly appealing. The mint-red and mark-free surfaces feature predictably full definition over the devices. Population: 7 in 66 Deep Cameo, 5 finer (8/14). NGC ID# 22LD, PCGS# 93368
- 3188 1960 Large Over Small Date, FS-101, PR68 Red PCGS.** All digits in the date reveal characteristics of both logotypes, while doubling is also noted on LIBERTY. Gorgeous orange-gold color accompanies the needle-sharp strike. Both sides present a seemingly pristine appearance. Population: 15 in 68 Red, 1 finer (9/14).
Ex: Milwaukee Central States Signature (Heritage, 5/2004), lot 5841. PCGS# 38168

TWO CENT PIECES

- 3189 1865 Plain 5 MS65 Red PCGS.** A vividly lustrous and beautifully toned Gem example of this early issue. Sharply struck with minimal carbon on both sides, and several faint clash marks observed on the lower reverse field. PCGS# 38249
- 3190 1865 Fancy 5 MS65 Red PCGS.** A lustrous honey-gold Gem type coin. Well struck and essentially devoid of contact. A fingerprint fragment is on the obverse exergue. Interesting rim cud is noted on the reverse at 7:30 and 8:30. PCGS# 38258
- 3191 1871 MS65 Red and Brown PCGS. CAC.** This issue is rarely seen in Uncirculated condition, and the current Red and Brown Gem is very scarce as graded. Intense satiny mint luster highlights pleasing reddish-gold coloration that adorns carefully preserved, blemish-free surfaces. Population: 34 in 65 Red and Brown, 0 finer (8/14). NGC ID# 22NF, PCGS# 3610

1872 Two Cent Piece, MS62 Brown Last Business-Strike Mintage

- 3192 1872 MS62 Brown NGC.** The business-strike mintage of two cent pieces declined to just 65,000 pieces in 1872, and the denomination was discontinued after a proof-only mintage the following year. This attractive MS62 example displays well-detailed design elements and lightly marked brown surfaces that show a few hints of original red. Census: 16 in 62 Brown, 24 finer (8/14). NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

- 3193 1870 PR65 Red and Brown PCGS.** Smooth surfaces and rich red-brown toning are attributes of this Gem two-cent piece. Boldly struck and lustrous, with blemish-free surfaces. Population: 64 in 65 (1 in 65+) Red and Brown, 17 finer (8/14). NGC ID# 274Z, PCGS# 3643
- 3194 1870 PR65 Red and Brown PCGS.** This Gem proof exhibits copper-brown surface coloration and vivid magenta accents. The fields are moderately reflective, and carbon specks are minimal. Housed in an old green label holder. Population: 64 in 65 (1 in 65+) Red and Brown, 17 finer (8/14). NGC ID# 274Z, PCGS# 3643

1873 Two Cent, PR65 Red and Brown Closed 3, Proof-Only Date

- 3195 1873 Closed 3 PR65 Red and Brown PCGS.** The proof-only 1873 has Open 3 and Closed 3 logotype varieties, similar to several other denominations of the date. Closed 3 proofs are considered originals, while the Open 3 pieces are regarded as restrikes. However, the latter could also have been struck in 1873, contemporary with the Seated Open 3 proofs. A sharply struck Gem with dappled gunmetal-gray and orange-gold fields. Lacquered. Certified in a green label holder. NGC ID# 2753, PCGS# 3652

1873 Two Cent Piece, PR65 Brown The Open 3 Variant

- 3196 1873 Open 3 PR65 Brown PCGS.** While sometimes difficult to differentiate, the Open 3 feature on this piece is obvious as such. Richly colored in deep red, maroon, and mahogany shades. The strike is bold and the fields are moderately reflective, despite the rich patina. Only a few minute carbon specks are observed upon close examination. Population: 6 in 65 Brown, 2 finer (9/14).
Ex: FUN Signature (Heritage, 1/2003), lot 5875. NGC ID# 2754, PCGS# 3654

THREE CENT SILVER

1856 Three Cent Silver, MS65 Wonderfully Patinated

- 3197 1856 MS65 PCGS.** Variegated shades of blue, green, orange, and red coalesce over each side of this conditionally rare Type Two three cent silver piece. The date and olive leaves show signs of slight strike incompleteness, and typical clash marks occur mostly on the obverse. Impressively preserved. Population: 23 in 65, 4 finer (8/14). NGC ID# 22Z5, PCGS# 3672

- 3198 1859 MS65 PCGS. CAC.** The quality conscious collector will find much to love about this Gem representative, as the strike is well-executed and the surfaces display rich, frosty luster. Delicate toning in shades of sea-green, amber-gold, and deep blue encompass each side, with the deeper hues seen toward the borders. Population: 33 in 65, 17 finer (8/14). NGC ID# 22Z8, PCGS# 3677

PROOF THREE CENT SILVER

- 3199 1859 PR64 PCGS.** Delicate blue and violet resides on the mirrored surfaces of this diminutive proof, with considerable field-to-device contrast. Faint hairlines are evident on the reverse, limiting the grade. Population: 54 in 64, 23 finer (8/14). NGC ID# 27C6, PCGS# 3708
- 3200 1862 PR65 PCGS.** An appealing Type Three representative with sharp design features and elegant original toning across each side, in hues of deep gold-brown, blue-gray, and medium green. A lovely piece with clean, unmarked surfaces. Population: 17 in 65, 13 finer (9/14). NGC ID# 27C9, PCGS# 3711

THREE CENT NICKELS

- 3201 1871 MS66 PCGS. CAC.** Housed in an old green PCGS holder, this sparkling Premium Gem example is brilliant and well-preserved, with clean, vibrant surfaces. Clash marks but no post-strike distractions are evident on the obverse. Population: 31 in 66 (3 in 66+), 1 finer (8/14). NGC ID# 22NN, PCGS# 3737
- 3202 1889 MS66 PCGS.** A satiny Premium Gem with untuned surfaces that seem pristine on each side. The devices are fully struck. Population: 34 in 66, 12 finer (8/14). NGC ID# 275J, PCGS# 3758

1889 Three Cent Nickel, MS67 Tied for the Finest Certified

- 3203 1889 MS67 PCGS.** Despite being moderately well-saved as the final issue of the denomination, the 1889 three cent nickel is nonetheless elusive in Gem condition, and rare in MS67, yielding to its low mintage of only 18,100 coins. This frost-white representative showcases virtually flawless surfaces and shimmering original luster. Sharply impressed design elements only add to the immense visual appeal. Population: 12 in 67, 0 finer (8/14). NGC ID# 275J, PCGS# 3758

PROOF THREE CENT NICKELS

- 3204 1872 PR66 Cameo PCGS. CAC.** This delightful Premium Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply reflective fields. The well-preserved surfaces show no mentionable distractions and eye appeal is terrific. Population: 9 in 66 Cameo, 0 finer (9/14). PCGS# 83768
- 3205 1876 PR66 Cameo PCGS.** An extraordinary Premium Gem that displays impressive Cameo contrast, this proof from the centennial year exhibits delicate champagne toning and crisp design details. Population: 19 in 66 Cameo, 0 finer (8/14). PCGS# 83772

1877 Three Cent Nickel, PR64 Scarcest Proof-Only Date

- 3206 1877 PR64 PCGS.** An almond-gold and powder-blue near-Gem. The strike is full and detractors are absent. The earliest and scarcest of the three proof-only dates. The *Guide Book* asserts a mintage of 900 pieces, greater than the traditional production of 510 pieces derived from sales of 1877 silver proof sets. Encapsulated in a green label holder. NGC ID# 275X, PCGS# 3773
- 3207 1878 PR67 Cameo PCGS.** A razor-sharp strike and vibrant luster confirm the quality of this proof-only Superb Gem. Lightly variegated almond-gold toning further attests to the originality. Population: 24 in 67 (3 in 67+), 1 finer (9/14).
Ex: Long Beach Signature (Heritage, 6/2010), lot 330; FUN Signature (Heritage, 1/2011), lot 3217. PCGS# 83774
- 3208 1882 PR67+ PCGS. CAC.** The obverse is softly gold-toned, the reverse largely untuned silver-white, but both sides are pristine and virtually distraction-free, a great-looking example of this late-date proof issue. Population: 91 in 67 (1 in 67+), 7 finer (8/14). NGC ID# 2764, PCGS# 3778

SHIELD NICKELS

1866 Shield Nickel, MS66 Excellent First-Year Rays Type Coin

- 3209 1866 Rays MS66 PCGS.** The 1866 Shield nickel represents the first year of the popular short-lived Rays design, an important consideration for type purposes. This spectacular Premium Gem is sharply detailed on the obverse, but the reverse shows some softness on the lower stars and legend. The lightly marked lustrous surfaces show a few hints of pale gold toning. Population: 37 in 66 (2 in 66+), 0 finer (8/14). NGC ID# 22NX, PCGS# 3790
- 3210 1867 Rays MS64 PCGS. Fletcher-3.** The 1 in the date is repunched north, most prominently on the flag. One of numerous repunched date 1867 die varieties, which indicates the large number of dies required to strike the hard alloy of the recently introduced nickel denomination. An unabraded near-Gem with light caramel-gold toning and a soft impression at the centers. NGC ID# 22NY, PCGS# 3791
- 3211 1867 Rays MS64 NGC.** Soft, silvery-gray luster blankets both sides of this Choice example. The obverse is sharply struck, though the reverse exhibits some of the usual softness on the lower-right rays and stars. Die cracks are minimal for the type. NGC ID# 22NY, PCGS# 3791
- 3212 1867 No Rays MS66 PCGS.** Easily obtainable in lower grades, the 1867 No Rays Shield nickel becomes decidedly rare at the MS66 grade level. This representative displays unusually sharp definition on the wreath leaves and stars, with grade-consistent surface preservation. The usual array of fine die cracks is present on the obverse. Population: 16 in 66 (1 in 66+), 0 finer (8/14). NGC ID# 22NZ, PCGS# 3794
- 3213 1868 MS66 PCGS.** This issue had the second-highest business strike mintage of the series, at 28.8 million pieces, yet it is extremely scarce at the current Premium Gem grade level and virtually unobtainable any finer. This well-struck example displays dazzling mint luster and several thick die cracks on the obverse, located near the borders. The bright, intensely frosty surfaces are lightly toned and blemish-free on both sides. Population: 30 in 66 (4 in 66+), 1 finer (8/14). NGC ID# 22P2, PCGS# 3795
- 3214 1876 MS65 PCGS. CAC.** A few of the peripheral design details are softly struck, including 76 in the date and R in TRUST. A glowing satin finish accompanies the ice-green and silvery-gray toning. Population: 45 in 65, 12 finer (9/14). NGC ID# 22PB, PCGS# 3805
- 3215 1882 MS66 PCGS.** This is the obverse with a partially filled 2 in the date that will attract variety collectors. A spectacular Premium Gem, this example shows brilliant light gray luster with sharp details and reflective fields. Population: 75 in 66 (3 in 66+), 6 finer (8/14). NGC ID# 22PC, PCGS# 3812
- 3216 1883/2 FS-303 MS62 NGC.** Fragments of prior digits are noted between the 88 and the 83 in the date. Diagonal die lines above the dentils beneath the date provide a further diagnostic. The middle die state with a crack between 6 and 7 o'clock that touches the bases of the 18. A dusky chestnut-gold with vibrant luster and a few small spots on the reverse margin. PCGS# 38414

- 3217 1883 MS66 PCGS.** A brilliant and frosted example, sharply struck and brightly lustrous. Always in demand for type, this final-year issue is seldom seen finer, with PCGS showing just 11 coins certified numerically higher (9/14). NGC ID# 22PE, PCGS# 3813

PROOF SHIELD NICKELS

- 3218 1866 Rays PR64 PCGS.** In constant demand for proof type as the only available With Rays Shield nickel, because the 1867 Rays issue is virtually unobtainable for most collectors. This near-Gem example shows a speckling of cloudy gray toning over reflective, silver-gray surfaces and no problems. NGC ID# 276G, PCGS# 3817

1867 No Rays Shield Nickel, PR66 Among the Finest Certified

- 3219 1867 No Rays PR66 PCGS.** The removal of the rays from the reverse design seems to have aided in the Mint's ability to fully strike five cent pieces in the hard nickel alloy, as most proof nickels of this year exhibit well-struck design elements. This representative is no exception, and also boasts highly reflective fields and nearly perfect surface preservation. A light golden hue warms each side, giving this Premium Gem a pleasing level of eye appeal. Mint records show 625 examples of this issue were distributed as part of silver proof sets, though an unknown number of additional pieces were also sold as part of minor proof sets; as the latter sets did not contain any precious metal, the Mint was not required to record their sales. Population: 9 in 66, 0 finer (8/14). NGC ID# 22PF, PCGS# 3821
- 3220 1870 PR66 PCGS.** This proof Shield nickel is sharply, almost fully struck, with dynamic reflectivity in the fields and attractive apple-green and pastel rose toning combinations. From a mintage of just 1,000 coins, and conditionally rare at the current Premium Gem level. None are graded finer at either service. Population: 15 in 66 (1 in 66+), 0 finer (9/14). NGC ID# 276L, PCGS# 3824
- 3221 1870 PR66 PCGS Secure.** An impressively clean, fully struck specimen, untuned and free of the frequently-seen clash marks or uneven details. A lovely, essentially flawless example, problem-free on both sides. Population: 15 in 66 (1 in 66+), 0 finer (8/14). NGC ID# 276L, PCGS# 3824
- 3222 1871 PR66 Cameo PCGS.** Remarkable white-on-black contrast typifies this Premium Gem proof, from a reported mintage of 960 coins. Each side shows deeply mirrored fields, thickly frosted devices, and no mentionable marks. A strong Registry candidate. Population: 17 in 66 (3 in 66+) Cameo, 0 finer (8/14). PCGS# 83825

**1875 Shield Nickel, PR66 Cameo
Bright, Brilliant, Impressive Specimen**

- 3223 1875 PR66 Cameo PCGS.** Unusually bright and brilliant, this Shield nickel is also one of the finest-known representatives of this proof issue of 700+ pieces. Fully struck and distraction-free: three or four wispy die striations on the reverse should not be misinterpreted as pinscratches or hairlines. Population: 9 in 66 Cameo, 1 finer (8/14). PCGS# 83829

**1877 Shield Nickel, PR63
Proof-Only Issue**

- 3224 1877 PR63 PCGS.** A proof only issue, struck to the limited extent of 900 coins, the 1877 proof Shield nickel is essential for a complete date set. This is a pleasing mid-grade example, with well-defined motifs and iridescent golden-gray toning overall. The fields are moderately reflective, though the mirroring is not deep enough to qualify for a Cameo designation from PCGS. A few faint carbon specks are noted when observed beneath a loupe. NGC ID# 276U, PCGS# 3831

- 3225 1878 PR64 PCGS.** A rare issue in the series, with only proof strikings and no business strikes. Although not as rare as its 1877 proof-only predecessor, demand for the date is strong and Choice specimens are eagerly sought. This example is semiprooflike and highly lustrous, with slightly deeper mirroring on the obverse. Well struck as expected, with a scattering of tiny marks on the reverse that determines the near-Gem grade. NGC ID# 276V, PCGS# 3832

- 3226 1878 PR64 PCGS. CAC.** Honey-gold and stone-gray colors blend throughout this intricately struck, mark-free specimen. A strong loupe locates moderate peripheral carbon. A popular proof-only date. NGC ID# 276V, PCGS# 3832

- 3227 1881 PR67 NGC.** Housed in an old-style NGC holder, this is a highly impressive Superb Gem that is fully struck and seemingly as struck on both sides. A beautiful, shimmering piece with deeply reflective fields. Census: 23 in 67 (1 in 67 ★, 1 in 67+★), 1 finer (9/14). NGC ID# 276X, PCGS# 3836

- 3228 1882 PR66+ PCGS. CAC.** A small die marker below the first 8 in the date will intrigue variety collectors. This outstanding Premium Gem proof is fully brilliant, displaying a hint of cameo contrast beneath faint champagne toning. PCGS has only certified 37 finer proofs (8/14). NGC ID# 276Y, PCGS# 3837

LIBERTY NICKELS

**1883 No Cents Liberty Nickel, MS67
Tied for Finest Certified at PCGS**

- 3229 1883 No Cents MS67 PCGS.** The No Cents variety of the 1883 Liberty nickel was widely saved at the time of issue due to illegitimate rumors that the issue would be recalled because of the "missing" denomination. As a result, this issue is fairly plentiful in Mint State condition, but examples achieving the Superb Gem grade level are seldom encountered. This piece displays remarkably vibrant, gold-tinted mint luster that seems to almost glow when turned in-hand. Select stars exhibit some minor weakness, though the central devices are sharp and the overall visual appeal is exceptional. Population: 21 in 67, 0 finer (9/14). NGC ID# 2772, PCGS# 3841

- 3230 1883 No Cents MS67 ★ NGC.** Among the finest examples at PCGS and NGC combined, this amazing first-year Superb Gem is an ideal representative for Registry Set specialists and type collectors alike. The fully struck surfaces gleam with brilliance and feature distinct prooflike reflectivity in the fields. Census: 68 in 67 (4 in 67 ★), 0 finer (8/14). NGC ID# 2772, PCGS# 3841

- 3231 1885 AU58 NGC.** This is a well-struck near-Mint coin with champagne-gray toning and semiprooflike fields on each side. Faint hairlines keep this pleasing, abrasion-free representative from receiving a Mint State designation. An impressive AU58 example of this important key date. NGC ID# 2773, PCGS# 3846

- 3232 1885 AU58 PCGS.** The number of grading events at the services for this key date are split about equally between business strikes and proofs, a testament to how scarce the survivors are from a business strike mintage of 1,476,490 pieces. This near-Mint example shows a few light marks as evidence of its brief time in circulation, but retains a nice amount of mint luster and much of the original bold strike. NGC ID# 2773, PCGS# 3846

- 3233 1886 AU58 PCGS. CAC.** This well-detailed near-Mint example shows just a trace of wear on the high points of the design and retains significant amounts of mint luster under shades of pink and gray toning. NGC ID# 22PK, PCGS# 3847

- 3234 1886 MS62 PCGS.** A splendid Mint State piece, this key issue has a typical strike; the ear of corn at the lower left reverse is flat. Both sides exhibit attractive light gold toning. NGC ID# 22PK, PCGS# 3847

**1886 Liberty Nickel, MS64
Key-Date Issue**

- 3235 1886 MS64 PCGS. CAC.** While not quite as popular as the 1885, the 1886 Liberty nickel is one of the big key-date issues in the series, boasting a low mintage of little more than 3.3 million pieces. This near-Gem example displays a light golden hue over each side, with satiny underlying luster and minimal abrasions for the grade. The strike is weak on the border regions and the lower portion of the wreath, as is typical of this issue, though the clean surfaces balance the overall appeal. PCGS has seen 46 numerically finer submissions (8/14). NGC ID# 22PK, PCGS# 3847

**1890 Liberty Nickel, MS66
None Numerically Finer at PCGS**

- 3236 1890 MS66 PCGS.** Frequently encountered in lower grades, the 1890 Liberty nickel becomes scarce in MS65, and finer coins are distinctly rare. This Premium Gem example displays satiny luster beneath a veil of pale amber-gold toning. The obverse is sharply struck throughout, and the reverse exhibits only a touch of softness on the lower-left wreath leaves, as usual. A lack of noticeable abrasions completes the eye appeal. Population: 16 in 66 (4 in 66+), 0 finer (8/14). NGC ID# 22PM, PCGS# 3851

**1893 Liberty Nickel, MS66
Only One Numerically Finer at PCGS**

- 3237 1893 MS66 PCGS.** Comparable to many Liberty nickel issues from this period, the 1893 is available in grades through MS64, but becomes elusive in finer condition, and rare at the MS66 level. This representative displays softly frosted luster beneath blended pastel hues of light golden and lavender-gray. No significant abrasions are observed upon close examination, and the strike is essentially sharp, with the sole exception of the lower-left wreath leaves, as usual. Population: 20 in 66 (1 in 66+), 1 finer (8/14). NGC ID# 277R, PCGS# 3854

**1904 Liberty Nickel, MS66+
Vibrant Mint Luster**

- 3238 1904 MS66+ PCGS. CAC.** Heavily frosted luster is virtually uninterrupted as it swirls beneath a thin veil of light champagne toning. The strike is lacking on the lower-left portion of the wreath and some of the obverse stars, as is typical, though the design elements are otherwise well-defined. This issue is only marginally scarce at the Premium Gem level, but finer coins are distinctly rare. Population: 83 in 66 (4 in 66+), 0 finer (9/14). NGC ID# 277F, PCGS# 3865

- 3239 1912 MS66 PCGS.** This well-detailed Premium Gem represents the final collectible date of the Liberty design. The lustrous surfaces show a few hints of lavender-gray and champagne-gold toning. Population: 30 in 66 (1 in 66+), 0 finer (8/14). NGC ID# 277N, PCGS# 3873

- 3240 1912-D MS64 PCGS.** A sleeper issue in near-Gem condition, the scarcity of Choice examples is contrary to its 8 million-piece mintage. Nice mint bloom reveals multiple shades of orange, gold, and olive hues. The strike is nearly full with sharp star centers and hair strands. Even the bow and left-side ear of corn are boldly detailed. A few microscopic dark flecks are visible with a loupe on the attractive, unmarked surfaces. NGC ID# 277P, PCGS# 3874

- 3241 1912-D MS65 PCGS.** Jade-green and peach-gold shades endow this lustrous branch mint Gem. Well struck, unmarked, and housed in a first-generation PCGS holder. The sole Denver issue of the series. *Ex: Orlando FUN Signature (Heritage, 1/2007), lot 2128, which realized \$2,185.* NGC ID# 277P, PCGS# 3874

- 3242 1912-S MS62 PCGS.** Housed in a green-label PCGS holder, this Mint State nickel has typical satin surfaces with indistinct design features, also standard for the issue. Struck during the first year of San Francisco coinage in this composition; mint personnel were unaccustomed to the challenges of nickel coinage. NGC ID# 277R, PCGS# 3875

- 3243 1912-S MS64 PCGS.** Soft luster shines through the rich, pewter-gray toning with amber-gold and lilac accents. The near-Gem surfaces show few marks or abrasions, with a touch of weakness on Liberty's hair and the usual softness on the wreath bow, ear of corn, and left interior leaves. NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS65
Lowest-Mintage Issue**

- 3244 1912-S MS65 PCGS.** The San Francisco Mint only struck Liberty nickels in the design's final year of issue, and a mintage of 238,000 coins is by far the lowest in the series. The 1912-S is one of the most in-demand 20th century issues, and this Gem is a lovely representative. Lustrous nickel-gray surfaces exhibit sharp detail on the wreath leaves and corn husks. A small graze on Liberty's cheek likely precludes a higher grade. PCGS has seen just 15 examples numerically finer (8/14). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

- 3245 1883 No Cents PR66 ★ Cameo NGC. CAC.** An impressive proof specimen with contact-free surfaces and near-full definition save for a bit of weakness on the left reverse ear of corn. The strong white-on-black contrast evident on both sides is highly attractive and unusual for this typically non-contrasted type. Census: 5 in 66 ★ Cameo, 22 finer (8/14). PCGS# 83878

**1883 Liberty Nickel, PR67 Cameo
Earlier No Cents Variant**

- 3246 1883 No Cents PR67 Cameo PCGS.** One of three nickel types produced in 1883, the No Cents Liberty nickel is famous for its tendency to be gold-plated and passed off as a five dollar gold piece. This example of the proof variant displays noticeable field-motif contrast beneath a blush of light golden toning. The strike is essentially sharp, save for the lower-left portion of the wreath, which is typically soft. Population: 15 in 67 Cameo, 0 finer (9/14). PCGS# 83878

**1883 No Cents Liberty Nickel, PR66 Ultra Cameo
Exceptional Representative of Brief First-Year Type**

- 3247 1883 No Cents PR66 Ultra Cameo NGC.** This first-year issue is well-known for having been gold-plated and passed as gold five-dollar coins. The word CENTS was added to clarify the denomination of these new pieces during the first year of production, with three times as many 1883 CENTS coins produced as the NO CENTS. This is a lovely example with the expected full strike definition and exceptional surface preservation. Deep Ultra Cameo contrast is boldly evident on each side. Census: 6 in 66 Ultra Cameo, 2 finer (8/14). PCGS# 93878

- 3248 1885 PR65 PCGS.** The importance of the key date business strike issue profoundly impacts the desirability of the low-mintage proofs of the same date. This well-struck specimen is untuned and distraction-free on both sides. A conservatively graded example that displays pleasing, mild cameo contrast. NGC ID# 277T, PCGS# 3883

- 3249 1885 PR66 PCGS.** A beautifully preserved Premium Gem example of the proof variant of this key-date issue. Moderate mirroring in the fields illuminates pastel hues of lavender, gold, and ice-blue. The strike is razor-sharp and the surfaces are seemingly flawless, even under close examination. Housed in an old green label holder. PCGS has encapsulated only 18 numerically finer non-Cameo representatives (8/14). NGC ID# 277T, PCGS# 3883

- 3250 1885 PR66 NGC.** More available in proof format than as a business strike, the key 1885 issue is of interest to date and type collectors as well as proof specialists. This Premium Gem example is brightly lustrous with medium mirrors and mild cameo contrast. Fully struck and brilliant with a hint of gold on the rims, the coin offers tremendous eye appeal and technical quality. NGC ID# 277T, PCGS# 3883

**1886 Nickel, PR67 Cameo
None Numerically Finer at NGC**

- 3251 1886 PR67 Cameo NGC.** The 1886 Liberty nickel is conditionally very rare at the Superb Gem level. This spectacular coin is crisply struck with mirrored fields and mild mint frost on the devices, leaving an attractive cameo effect on both sides. Even under a loupe, the surfaces seem virtually pristine. Census: 6 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (8/14). PCGS# 83884

1889 Liberty Nickel, PR67
None Numerically Finer at PCGS

3252 1889 PR67 PCGS. The 1889 is one of the more easily obtainable proof Liberty nickels in the PR67 grade, though even it is rare at this level, with PCGS having so-certified only 10 coins, with none finer (9/14). This piece displays bold design definition, with moderate mirroring in the fields and subtle cartwheel luster when turned in-hand. Tinges of amber-gold toning appear periodically around the margins. NGC ID# 277X, PCGS# 3887

3253 1891 PR66 Cameo PCGS. Untoned surfaces reveal pleasing field-motif contrast. Sharply defined save for the usual weakness in the corn ear left of the bow knot. Population: 27 in 66 (4 in 66+) Cameo, 1 finer (8/14). PCGS# 83889

3254 1891 PR66+ Cameo NGC. The Cameo contrast is impressive and the fields are intensely glassy on each side. A well-struck specimen with slight milkiness noted on the lower obverse. Census: 34 in 66 Cameo (2 in 66+ Cameo, 2 in 66 ★ Cameo), 7 finer (9/14). PCGS# 83889

1891 Nickel, PR66 Ultra Cameo
Strong Field-Motif Contrast

3255 1891 PR66 Ultra Cameo NGC. Significant white-on-black contrast appears when this attractive Premium Gem nickel is viewed from above. Full details appear on all the devices, although the oft-seen lack of detail on the corn ear to the left of the bow is compounded by thick mint frost. Deeply reflective with just a blush of light golden color, this example ranks high among proof survivors of the issue with just three examples certified numerically finer by NGC and none so by PCGS. Census: 4 in 66 Ultra Cameo, 3 finer (8/14). PCGS# 93889

1892 Nickel, PR66+ Cameo
Excellent Field-Motif Contrast

3256 1892 PR66+ Cameo PCGS Secure. CAC. The 1892 proof is a fairly plentiful issue in the context of proof Liberty nickels, though it is seldom seen in high grades with a Cameo designation. This is a fully struck piece with significant field-device contrast evident on both sides. Traces of light golden peripheral toning attractively frame the unabraded surfaces. Population: 29 in 66 (5 in 66+) Cameo, 5 finer (8/14). PCGS# 83890

1893 Liberty Nickel, PR67 Cameo
Unobtainable in Higher Numeric Grades

3257 1893 PR67 Cameo NGC. This magnificent Superb Gem exhibits razor-sharp definition on all design elements and the mirrored fields contrast boldly with the frosty devices to produce an attractive cameo effect. No mentionable distractions are noted and a few hints of pale gold toning enhance the outstanding eye appeal. Census: 11 in 67 Cameo (4 in 67 ★ Cameo), 0 finer (8/14). PCGS# 83891

1894 Nickel, PR66+ Cameo
Elusive With Field-Device Contrast

3258 1894 PR66+ Cameo PCGS. CAC. Sharp, satiny devices provide just enough contrast with the mirrored fields to qualify for the Cameo designation from PCGS, while each side is graced by just a touch of light golden toning. Cameo representatives of this issue are elusive in all grades, and are rarely encountered at this level. Population: 19 in 66 (3 in 66+) Cameo, 6 finer (9/14). PCGS# 83892

- 3259 1900 PR66 Cameo PCGS. CAC.** A great Cameo proof coin with razor-sharp strike definition and pleasing light golden toning on the design motifs. Immaculately preserved with tremendous contrast evident between frosted devices and deeply watery fields. Population: 24 in 66 (4 in 66+) Cameo, 12 finer (8/14). PCGS# 83898
- 3260 1901 PR66 Cameo PCGS. CAC.** This spectacular Premium Gem displays sharply detailed design elements and deeply mirrored fields that contrast intensely with the frosted devices. Well-preserved brilliant surfaces add to the outstanding eye appeal. Population: 22 in 66 (3 in 66+) Cameo, 9 finer (9/14). PCGS# 83899
- 3261 1903 PR66 Cameo PCGS. CAC.** An extremely important contrasted Premium Gem proof, this Cameo example has delicate gold toning over its fully mirrored fields and satin devices. Population: 47 in 66 (4 in 66+) Cameo, 15 finer (8/14). PCGS# 83901
- 3262 1904 PR67 NGC.** Razor-sharp definition is evident on all design elements and the deeply mirrored fields of this delightful Superb Gem display delicate shades of blue and lavender toning. Census: 16 in 67 (1 in 67 ★, 1 in 67+★), 0 finer (8/14). NGC ID# 278E, PCGS# 3902
- 3263 1907 PR66 Cameo PCGS. CAC.** An exceptionally important Premium Gem Cameo proof, struck at a time when cameo contrast was considered undesirable. Few pieces survive with any degree of contrast. This brilliant proof has fully mirrored fields and bold design motifs. Population: 17 in 66 Cameo, 4 finer (8/14). PCGS# 83905
- 3264 1909 PR66+ Cameo PCGS.** This Premium Gem Cameo proof exhibits delicate champagne toning over its deep mirrors and sharp design features. Cameo contrast is highly unusual for coins from the early 1900s. Population: 63 in 66 (1 in 66+) Cameo, 23 finer (8/14). PCGS# 83907
- 3265 1909 PR67 Cameo NGC.** Among 20th century Liberty nickels, this issue has the highest population of proofs. Pale gold patina graces both sides of this Superb Gem, which has heavy contrast for the series. Census: 28 in 67 Cameo (2 in 67+ Cameo, 4 in 67 ★ Cameo), 8 finer (8/14).
Ex: *Dallas Signature (Heritage, 10/2006), lot 486.* PCGS# 83907

1909 Nickel, PR67 Cameo
Attractively Toned

- 3266 1909 PR67 Cameo PCGS. CAC.** Warm orange-gold and pale lavender hues grace the deeply mirrored fields and heavily frosted devices of this Superb Gem Cameo. The strike is generally well-executed, though the usual softness appears on the lower-left wreath leaves. Surface marks or hairlines are essentially nonexistent, as the grade demands. Population: 22 in 67 (2 in 67+) Cameo, 1 finer (8/14). PCGS# 83907

- 3267 1909 PR65 Deep Cameo PCGS.** The contrast is spectacular on this attractive proof type coin, particularly on the obverse. The surfaces are essentially untuned with deep mirrors and heavily frosted devices. A distinctive and desirable survivor. Population: 1 in 65 Deep Cameo, 7 finer (8/14).
Ex: *Long Beach Signature (Heritage, 5/2007), lot 460.* PCGS# 93907
- 3268 1912 PR66 Cameo PCGS.** Delicate shades of pale gold toning enhance the well-preserved surfaces of this spectacular Premium Gem, with sharply detailed frosted design elements that contrast boldly with the deeply mirrored fields. Population: 28 in 66 (2 in 66+) Cameo, 6 finer (9/14). PCGS# 83910
- 3269 1912 PR66 Cameo PCGS.** Fully struck with dark, deeply-mirrored fields and nicely frosted devices. A slight toning streak is noted in the right obverse field, and a slight coating of milky color lies over the reverse. Population: 26 in 66 (2 in 66+) Cameo, 6 finer (8/14).
Ex: *Central States Signature (5/2007), lot 1574.* PCGS# 83910
- 3270 1912 PR66 Cameo PCGS. CAC.** The design elements of this spectacular Premium Gem are sharply detailed and richly frosted, creating bold cameo contrast with the reflective fields. Population: 26 in 66 (2 in 66+) Cameo, 6 finer (8/14). PCGS# 83910

BUFFALO NICKELS

- 3271 1913-D Type Two MS65 PCGS.** The second type for the first-year Buffalo nickel, with a minor change to the lower reverse design. A few elements are softly struck, but the golden-olive surfaces are lustrous and abrasion-free. NGC ID# 22R2, PCGS# 3922
- 3272 1913-D Type Two MS65 PCGS. CAC.** The 1913-D Type Two Buffalo nickel is prized by series enthusiasts and type collectors alike. This sharply detailed Gem displays well-preserved lustrous surfaces under shades of ice-blue, gray, and champagne-gold toning. NGC ID# 22R2, PCGS# 3922
- 3273 1913-S Type Two MS64 PCGS.** An attractive first-year example of this Type Two design variation. The satiny, olive-gray surfaces are remarkably clean for the grade, with just one small contact mark noted on the bison's flank. NGC ID# 22R3, PCGS# 3923

1915 Nickel, MS67
Unsurpassed Eye Appeal

- 3274 1915 MS67 PCGS. CAC.** Lilac and reddish-gold patina enhances the satin luster of this immaculate Superb Gem nickel, one of the 50 or so coins that represent the highest numerical grade awarded by either service. The high quality of the Mint's production for this issue makes it popular for type as well as for date collectors. This coin's satinlike reflectivity is reminiscent of a proof, although it is clearly a circulation strike. Population: 42 in 67 (2 in 67+), 0 finer (9/14). NGC ID# 22R7, PCGS# 3927

- 3275 1915-D MS65 PCGS. CAC.** Generally well struck with some granular field textures noted on each side, and slight weakness observed on the bison's hair detail. Light gold and gray colors are blended across the mark-free surfaces. NGC ID# 22R8, PCGS# 3928

**1915-S Nickel, MS66
Only Three Numerically Finer**

- 3276 1915-S MS66 PCGS.** The majority of this issue experienced heavy circulation, with many pieces eventually becoming dateless due to wear. High-grade Mint State survivors exist, but striking quality is somewhat varied, with a great portion of the known representatives exhibiting weak definition or signs of die erosion. Certified at the Premium Gem grade level, this piece shows above-average sharpness, with only minor softness seen on the bison's shoulder and the Indian's braid. Hints of pale rose and ice-blue accent soft champagne toning over each side. Population: 30 in 66, 3 finer (8/14). NGC ID# 22R9, PCGS# 3929
- 3277 1916 MS66 PCGS. CAC.** Pale greenish-gray toning adorns the vibrantly lustrous surfaces of this remarkable Premium Gem. Somewhat softly struck but well-preserved and mark-free. NGC ID# 22RA, PCGS# 3930
- 3278 1916-D MS65 NGC.** Satiny luster graces the golden-gray surfaces of this Denver Buffalo nickel. The design elements show good detail with softness over the central obverse, as well as the bison's head and shoulder. Census: 47 in 65 (1 in 65 ★), 5 finer (8/14). NGC ID# 22RB, PCGS# 3932
- 3279 1918/7-D FS-101 Fine 12 PCGS.** This is an unusually attractive mid-grade example of this popular *Guide Book* variety, exhibiting even pewter-gray patina and strong detail for the grade. The overdate feature is bold and the surfaces are undeniably original. PCGS# 38446
- 3280 1918/7-D FS-101 Fine 15 PCGS.** Original battleship-gray surfaces exhibit deeper olive overtones in the recesses, giving this piece a pleasing old-time appearance. Detail is strong for the grade, and the overdate feature is plain. An attractive mid-grade example of this popular *Guide Book* variety. PCGS# 38446
- 3281 1918/7-D FS-101 — Damage — PCGS Genuine. VF Details.** The surfaces are dark and porous, a coin that most likely was buried for a considerable period of time. There are also a couple of heavy scrapes on the surfaces. The good news is, the overdate remains clear and bold, and the surfaces retain a decent amount of detail throughout, despite the smoke-gray patina. PCGS# 38446

**1918-S Buffalo Nickel, MS64
Underrated Issue in High Grade**

- 3282 1918-S MS64 PCGS.** The 1918-S Buffalo nickel is surprisingly difficult to locate in high grade, much more so than its Denver Mint counterpart. This impressive Choice example exhibits well-detailed design elements, with just a touch of softness on the hair above the braid and the bison's shoulder. The lightly marked surfaces show a mix of bluish-gray and greenish-gold toning. PCGS has graded 35 numerically finer examples (8/14). NGC ID# 22RK, PCGS# 3940
- 3283 1919 MS66 PCGS.** An exceptional Premium Gem, this 1919 nickel has a bold strike and frosty luster, showing wisps of champagne toning over its light gray surfaces. PCGS has only certified 13 finer examples (8/14). NGC ID# 22RL, PCGS# 3941
- 3284 1920 MS66 PCGS. CAC.** A fully struck example with gleaming mint luster and essentially brilliant, mark-free surfaces. A conditionally scarce issue at this Premium Gem grade level. NGC ID# 22RP, PCGS# 3944

**1920-S Buffalo Nickel, MS64
Elusive in Finer Grades**

- 3285 1920-S MS64 PCGS.** The 1920-S is a scarce, early Buffalo nickel, especially in high grade and with a decent strike. This piece exhibits decent definition on the reverse, but the Indian's braid is softly defined on the obverse. Bright mint luster shines through the light reddish patina seen on each side. NGC ID# 22RS, PCGS# 3946

1920-S Nickel, MS64
Elusive Issue in Better Grades

- 3286 1920-S MS64 PCGS.** A satiny Mint State example with choice surfaces and exceptional eye appeal. Although not fully struck, this example is sharper than most survivors encountered today. The central obverse and reverse have some design weakness, while the peripheral details are far better than usual. The tops of all letters in LIBERTY are clearly defined and separated from the border. On the reverse, the mintmark is bold and complete. Lovely golden toning over satiny gray surfaces. This is an outstanding example that is sure to be a welcome addition to your collection. NGC ID# 22RS, PCGS# 3946

- 3287 1921 MS66 PCGS.** Vibrant mint luster and sharply detailed design elements are the calling cards of this delightful Premium Gem, with virtually pristine surfaces that show a few hints of ice-blue toning. PCGS has graded 22 numerically finer examples (9/14). NGC ID# 22RT, PCGS# 3947

1921-S Buffalo Nickel, MS63
Bright, Satiny Surfaces

- 3288 1921-S MS63 PCGS. CAC.** The mintage of only 1.5 million pieces explains the scarcity of the 1921-S in all grades. The usual lack of full details also makes it a major strike rarity in the series. This piece shows the expected bluntness on the bison's head, but the obverse is much sharper by contrast. Pale golden-yellow toning covers the bright, satiny mint luster, and the only visual distractions are a few scattered carbon specks on the lower-right obverse. Ex: ANA Signature (Heritage, 3/2011), lot 3250. NGC ID# 22RU, PCGS# 3948

- 3289 1923 MS66 PCGS.** This well-detailed Premium Gem exhibits just a touch of the usual softness on the hair above the braid and the Bison's fur. The well-preserved surfaces display vivid shades of greenish-gold and ice-blue toning. PCGS has graded 14 numerically finer examples (8/14). NGC ID# 22RV, PCGS# 3949

- 3290 1923 MS66 PCGS. CAC.** An essentially perfect example of this date, with shimmering luster, bold details and superb eye appeal. Lightly toned in a golden-green color. Far nicer than the average 1923 Philadelphia Mint nickel. Ex: Central States Signature (Heritage, 5/2005), lot 6155. NGC ID# 22RV, PCGS# 3949

- 3291 1925-S MS63 NGC.** Satiny champagne surfaces exhibit brilliant luster on this nicely detailed 1925-S nickel. LIBERTY is separated from the border, and the bison has better than usual definition for this issue. NGC ID# 22S4, PCGS# 3956

1926 Nickel, MS67
Lustrous, Pristine Example

- 3292 1926 MS67 PCGS.** A large mintage of nearly 45 million pieces was accomplished in 1926, and there are plenty of low-grade survivors. Superb Gems are relatively rare, however, considering that high production figure, and none are graded any finer than MS67 at PCGS. This example is fully struck, or nearly so, with fabulously vibrant luster and clean, seemingly pristine surfaces. Lovely light toning variations are mingled together on each side, increasing the coin's overall visual appeal considerably. Population: 35 in 67 (1 in 67+), 0 finer (8/14). NGC ID# 22S5, PCGS# 3957

- 3293 1929-DMS66 NGC.** An elusive issue in Gem (and better) condition, with poor strikes limiting a number of otherwise worthy examples. The present piece offers substantially above-average definition and vibrant luster beneath predominantly gold-orange patina that shows occasional iridescent accents. Census: 13 in 66, 1 finer (8/14). Ex: Baltimore MD Signature (Heritage, 7/2003), lot 6272; Summer FUN Signature (Heritage, 6/2008), lot 461. NGC ID# 22SF, PCGS# 3967

- 3294 1929-D MS66 PCGS. CAC.** Only two coins of this Denver date have reached the lofty MS67 level — one at PCGS, the other at NGC — an indication of how few boldly struck examples exist of the otherwise easily available issue. This MS66 representative shows a strike that is far above average. Amber-gold toning bespeaks originality over the silver-lilac surfaces. Population: 54 in 66 (3 in 66+), 1 finer (9/14). NGC ID# 22SE, PCGS# 3967

1930 Buffalo Nickel, MS66
Doubled Die Reverse, FS-801

- 3295 1930 Doubled Die Reverse, FS-801 MS66 PCGS Secure.** The 1930 Doubled Die Reverse Buffalo nickel is known as the "5-Legged Buffalo" because of the strong doubling on the bison's front leg. This attractive Premium Gem offers well-detailed design elements and well-preserved surfaces that radiate vibrant mint luster on both sides. Population: 5 in 66, 0 finer (8/14). PCGS# 38462

**1930-S Nickel, MS66+
Rich Mint Luster**

3296 1930-S MS66+ PCGS. CAC. Struck from mildly worn dies, as is typical of Buffalo nickels from this period, this high-end Premium Gem exhibits silky silver-gray luster with hints of ice-blue color throughout each side. The usual striking softness is seen on the hair above the braid and the bison's shoulder, but only to a limited extent, with the overall eye appeal being excellent. PCGS has graded only five numerically finer examples (9/14). NGC ID# 22SJ, PCGS# 3970

3297 1931-S MS66 PCGS. CAC. Boldly struck overall with highly lustrous surfaces that display an unusually frosty texture for the normally-satiny Buffalo nickel type. Surface marks are virtually nonexistent. Only four examples are rated numerically finer by PCGS as of (8/14). NGC ID# 22SK, PCGS# 3971

3298 1931-S MS66 PCGS. CAC. Silky iridescent luster engulfs each side of this beautifully preserved representative. Close examination reveals areas of die erosion, though the only area of notable striking weakness is seen on the Indian's hair braid, as usual. PCGS has certified only four numerically finer examples (8/14). NGC ID# 22SK, PCGS# 3971

3299 1936-D 3 1/2 Leg, FS-901, Fine 12 NGC. Die polishing has removed much of the bison's right front leg from the die face. While not as famous as the 1937-D Three-Legged variety, this variety is also listed in the *Guide Book* and is actually significantly scarcer overall. This piece displays muted olive-gray patina and strong detail for the grade. PCGS# 38471

PROOF BUFFALO NICKELS

1913 Type One Buffalo Nickel, Sharp PR65

3300 1913 Type One PR65 PCGS. While not especially rare in terms of the numbers originally struck (a healthy 1,520 pieces were produced), the Type One proof is an important coin as it represents a one-year type for proof Buffalo nickel collectors. Light, even olive-gray toning covers each side, with a sparkling, satiny-textured, matte surface below. A lovely Gem proof.
Ex: Long Beach Signature (Heritage, 2/2003), lot 6084. NGC ID# 278R, PCGS# 3988

3301 1913 Type Two PR64 NGC. This boldly defined Choice matte proof nickel is destined for a complete or 20th century type set, or for a specialized Buffalo collection. Both sides display an attractive gold and lilac patina with pleasing iridescent toning over the satin surfaces. The Type Two proofs are somewhat scarcer than their 1,514-piece production suggests, since some were melted as unsold at the end of the mintage year and others have been confused as business strikes. NGC ID# 278S, PCGS# 3990

3302 1913 Type Two PR65 PCGS. Perhaps a little less "matte" than some of the 1913 Type One and Type Two examples, this lustrous Gem proof is nevertheless attractive with excellent eye appeal. The expected bold strike provides full details except at LIBERTY, which shows minor incompleteness. Reddish-gold toning completes the appeal. NGC ID# 278S, PCGS# 3990

3303 1914 PR66 NGC. A sharp impression and attractive, fine-grained satin proof surfaces give this Premium Gem proof substantial eye appeal. There are no overt distractions anywhere on the smooth surfaces or bold devices. A small production of 1,275 proofs shows a strong survival rate, although not all examples are as well-produced and appealing as this untuned beauty. NGC ID# 278T, PCGS# 3991

3304 1914 PR66 PCGS. Lustrous, silver-gray sheen reveals whispers of medium-intensity golden patina that are slightly more extensive on the reverse. Problem-free save for a tiny, out-of-the-way fleck near 9 o'clock on the obverse rim, both sides show full details and mark-free surfaces. The 1914 is a perfect candidate to represent the Buffalo nickel in a proof type set, since it is the most plentiful of the 1913-1916 issues.

Ex: Long Beach Signature (Heritage, 2/2003), lot 314. NGC ID# 278T, PCGS# 3991

3305 1915 PR65 PCGS. A satiny, softly lustrous matte proof with clear-gold hues over the well struck silver-gray surfaces. The bold strike provides full details on the motifs. A loupe reveals microscopic flecks within the legend and above the bison, with another slightly larger speck between the Indian's feathers. An appealing Gem example. NGC ID# 278U, PCGS# 3992

**1916 Buffalo Nickel, PR66
Beautifully Preserved**

3306 1916 PR66 PCGS. The final proof issue of the matte finish, the 1916 Buffalo nickel was struck to the limited extent of only 600 pieces due to a lack of demand from collectors. Survivors of this issue, by extension, are the scarcest of all proof Buffalo nickels. This representative exhibits bold design definition and nearly perfect surfaces. Iridescent hues of olive-gold and pale lavender-blue grace each side, beautifully complementing the matte surfaces. PCGS has certified only 37 numerically finer examples (9/14). NGC ID# 278V, PCGS# 3993

3307 1936 Type One — Satin Finish PR65 PCGS. The satin finish was quickly replaced with the brilliant finish because of complaints that the former too closely resembled business strikes. Only 4,420 proofs were struck prior to the changeover. This Gem shows power-blue toning over the obverse, while the reverse features apricot-orange patina. Razor-sharp throughout. NGC ID# 278X, PCGS# 3994

- 3308 1936 Type One — Satin Finish PR65 PCGS.** A lustrous, dove-gray Gem struck early in the year with a Satin finish. Proofs produced later in 1936 exhibit a brilliant appearance that contemporary collectors preferred. The devices are fully detailed, as expected. Housed in a green label holder. NGC ID# 278X, PCGS# 3994
- 3309 1936 Type One — Satin Finish PR65 NGC.** Abundant luster gleams from the satin-smooth fields and devices of this splendid Gem Type One proof. The strike is full and impressive even for this normally well-produced issue. Slightly iridescent, the overall golden-lilac patina is equally attractive on both sides with no carbon flecks or other distractions anywhere on the coin. NGC ID# 278X, PCGS# 3994
- 3310 1936 Type One — Satin Finish PR66 PCGS.** Rich ocean-blue centers are bounded by ruby-red and sun-gold margins. Well struck and free from contact. A pair of tiny flecks noted on the field near the chin and nose. A scarce and popular proof type. NGC ID# 278X, PCGS# 3994
- 3311 1936 Type One — Satin Finish PR66 NGC. CAC.** Satiny luster glistens over each side. The design features are expectedly full, and the nickel-gray surfaces are devoid of any mentionable blemishes. A technically and aesthetically impressive representative. NGC ID# 278X, PCGS# 3994
- 3312 1936 Type Two — Brilliant Finish PR65 PCGS.** Virtually untuned and silver-mirrored from rim-to-rim, this brilliant-finish proof is a Gem example in every respect. Full details on the Indian's hair above the braid knot and on the bison from head to tail make this an excellent representative of the type. Perfect for an MS65 set. NGC ID# 278Y, PCGS# 3995
- 3313 1936 Type Two — Brilliant Finish PR65 NGC.** Deeply mirrored, gleaming reflective surfaces are alive with liquid iridescence throughout both sides of this fully struck Type Two brilliant proof. Lemon-yellow, lilac, and sky-blue tones intermingle with prismatic shades when the coin is rotated in light. There are no spots, marks, or distractions on this well-preserved, conservatively graded proof. NGC ID# 278Y, PCGS# 3995
- 3314 1936 Type Two — Brilliant Finish PR65 PCGS. CAC.** A high degree of reflectivity graces the fully brilliant surfaces. This Gem is uniformly sharp and undeniably high-end for the grade. Housed in an old green label holder used between October and November 1989. NGC ID# 278Y, PCGS# 3995
- 3315 1936 Type Two — Brilliant Finish PR66 NGC.** Both the finish and the appearance of this Premium Gem Buffalo nickel are brilliant. The fields are pleasingly mirrored, though the field-device contrast falls short of a Cameo designation. Pristine and razor-sharp. NGC ID# 278Y, PCGS# 3995
- 3316 1937 PR65 PCGS.** Brilliant, bold, and deeply reflective, this immaculate proof is extremely sharp. The detail on the Indian's hair and the bison's head, back, and shoulder is impressive. There are no grade-limiting spots or marks on this proof, which features just a faint golden tinge over the glittering surfaces. Destined for a top-quality nickel or type collection. NGC ID# 278Z, PCGS# 3996
- 3317 1937 PR66 PCGS.** Icy-silver surfaces show exceptionally deep, watery mirrors and brilliant, reflective motifs. This is a fully struck brilliant proof, entirely untuned — an immaculate Premium Gem with no visible distractions of any kind. The reverse is rotated 15 degrees left. NGC ID# 278Z, PCGS# 3996
- 3318 1937 PR66 NGC. CAC.** This Premium Gem proof exhibits excellent striking definition and somewhat watery mirrors. Glimpses of subtle green-gold patina supplement the already-considerable visual appeal.
Ex: FUN Signature (Heritage, 1/2009), lot 890. NGC ID# 278Z, PCGS# 3996

- 3319 1937 PR67 NGC.** The final-year proof issue in the Buffalo nickel series often serves as a type because of its sharp strike characteristics and availability in almost any grade. This Superb Gem is all-brilliant, deeply mirrored, and carefully preserved. NGC has seen 45 examples numerically finer (8/14). NGC ID# 278Z, PCGS# 3996
- 3320 1937 PR67 PCGS. CAC.** Ice-blue and peach tints adorn this magnificently struck and prominently mirrored Superb Gem. Brilliant proof Buffalo nickels were only issued in 1936 and 1937, although matte and satin proofs were produced earlier in the series. Struck from noticeably rotated dies. Certified in a green label PCGS holder.
Ex: Dallas Signature (Heritage, 10/2006), lot 605. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

- 3321 1939 Reverse of 1938 MS67 Full Steps PCGS.** Largely untuned surfaces show fully struck details not only on the central steps, but even on the side porticos, usually seen mushy. One of the finest of this first-year key Jefferson nickel, the present Superb Gem Full Steps piece is one of only 15 such at PCGS (9/14). NGC ID# 22T8, PCGS# 84003

1939 Jefferson Nickel, MS67 FS-801, Doubled Monticello

- 3322 1939 Doubled Monticello, FS-801, MS67 PCGS.** A seemingly pristine Superb Gem, this representative boasts smooth, satiny luster in shades of ice-blue and pale champagne toning. While not quite worthy of a Full Steps designation, this coin is nonetheless an important piece for the advanced collector due to its ranking as one just seven examples of the Double Monticello variety certified by PCGS at the MS67 grade level (1 in 67+), with none finer (9/14). This ranking trumps all PCGS-certified Full Steps examples from a numeric standpoint, as the finest of those is a sole MS66+ coin. This piece will please many condition-conscious collectors. PCGS# 38481
- 3323 1948-D MS67 Full Steps PCGS.** This exquisite Superb Gem Denver Mint Jefferson nickel has a bold strike with five-and-a-half steps to Monticello. Both sides are brilliant and satiny beneath outstanding gold and iridescent toning. Population: 13 in 67 Full Steps, 0 finer (8/14). NGC ID# 22U9, PCGS# 84035
- 3324 1951 MS66 Full Steps PCGS.** This Premium Gem exhibits nickel-gray surfaces and softly frosted luster. Fully struck with only a handful of small ticks scattered over each side. Population: 16 in 66 Full Steps, 1 finer (8/14). NGC ID# 22UG, PCGS# 84043
- 3325 1964 MS66 Full Steps NGC.** Lightly gold-toned with softly frosted underlying luster. A small cut under Jefferson's eye is the only fault warranting individual mention. NGC ID# 22VG, PCGS# 84075

PROOF JEFFERSON NICKELS

- 3326 1971 No S PR68 Cameo PCGS.** A beautifully contrasted white-on-black proof nickel from the scarce No S variety. Fully struck and pristine on both sides. Population: 65 in 68 Cameo, 12 finer (8/14). NGC ID# 22YN, PCGS# 84204
- 3327 1971 No S PR68 Cameo PCGS.** Listed at No. 30 in Scott Schechter and Jeff Garrett's *100 Greatest Modern U.S. Coins*, this brilliant proof is deeply mirrored with strong cameo contrast and few (if any) discernible flaws. An impeccable full strike. Only a dozen coins are certified numerically finer at PCGS (9/14). NGC ID# 22YN, PCGS# 84204

BUST HALF DIMES

- 3328 1834 3 Over Inverted 3, V-5, LM-1, FS-301, R.2 MS64 PCGS.** An important variety with the 3 first sunk upside down, and then corrected, creating the 3 over Inverted 3 obverse die that was combined with two different reverse dies. This Choice Mint State piece has brilliant, frosty silver luster with an absence of toning. Population: 2 in 64, 1 finer (8/14). PCGS# 38705
- 3329 1834 V-4, LM-4 MS64 PCGS.** Fully brilliant silver surfaces and satin luster are entirely devoid of toning on this Choice Mint State half dime. A delicate diagonal die crack crosses Liberty's profile from her bust to her cap. PCGS# 38703
- 3330 1834 V-4, LM-4, R.1, MS64 PCGS. CAC.** An attractive Choice example of this popular date, with sharply detailed design elements and lustrous surfaces under shades of greenish-gold and lavender-gray toning. Population: 78 in 64, 63 finer (9/14). PCGS# 38703
- 3331 1835 Large Date, Large 5C, V-4, LM-7, R.3, MS64 PCGS.** Sharply struck and almost entirely brilliant with a dark spot between AM(ERICA). This Choice example is surprisingly clean for the grade. A clash mark occurs in front of Liberty's portrait. PCGS has certified only 57 numerically finer submissions, all varieties included (8/14). PCGS# 38711
- 3332 1836 Small 5C, V-6, LM-5, R.2, MS63 PCGS. CAC.** Iridescent pink and apricot hues highlight olive-green toning overall. The surfaces show sharply detailed devices and ample luster beneath the toning, imbuing this Select Capped Bust half dime with strong eye appeal. Including all varieties, PCGS has seen 10 examples in MS63 and 30 coins finer (8/14). PCGS# 38728

SEATED HALF DIMES

- 3333 1842 MS66 NGC. V-4.** Light orange-brown and olive-green patina mottles both sides, accented with touches of ice-blue. Original mint luster remains vibrant over the fully struck and virtually immaculate surfaces. Overall, this is a Registry-quality Premium Gem. NGC and PCGS have collectively certified 12 in MS66 and only one finer (8/14). NGC ID# 2332, PCGS# 4330
- 3334 1845 MS65 PCGS Secure.** The level of preservation is impressive. Minimally marked surfaces display appealing golden-gray patina overall with iridescent accents in shades of sea-green, powder-blue, rose, and orange. Well-struck and very scarce in Gem condition. Population: 23 in 65, 24 finer (8/14). NGC ID# 2337, PCGS# 4335

1846 Half Dime, VF35 Scarce Key-Date Issue

- 3335 1846 VF35 PCGS. V-1.** The 1846 half dime had a low mintage of only 27,000 pieces and is considered one of the key dates in the Seated half dime set. The typical piece is well-worn, grading VF or lower, with Mint State examples being prohibitively rare. This Choice VF coin displays strong detail for the grade, with deep lavender-gray patina. A few small abrasions are noted upon close examination. Population: 5 in 35, 23 finer (9/14). NGC ID# 2338, PCGS# 4336
- 3336 1853 No Arrows MS64 PCGS.** Struck early in the year, this No Arrows half dime was minted at the old-tenor weight standard before the February 1853 Coinage amendment. This Choice Mint State piece is brilliant and untuned, frosty and lustrous. Population: 17 in 64, 16 finer (8/14). NGC ID# 233M, PCGS# 4351
- 3337 1853 No Arrows MS64 NGC. CAC. V-1A.** A boldly struck, near-Gem example of the earlier No Arrows variant. Splashes of orange-gold, pale pink, and blue-gray toning encompass each side, attesting to the originality of the satiny underlying luster. Housed in a prior generation holder. Census: 42 in 64 (1 in 64 ★), 25 finer (9/14). NGC ID# 233M, PCGS# 4351
- 3338 1853-O No Arrows VF20 PCGS.** This is the only collectible No Arrows denomination from the New Orleans Mint, though the issue is very scarce even in lower grades. Like most examples, the date is lightly impressed. At the correct angle, steel-gray patina turns to iridescent orange and blue hues. Population: 5 in 20, 35 finer (8/14). NGC ID# 233N, PCGS# 4352

1857 Half Dime, Sharply Struck MS67

- 3339 1857 MS67 NGC. CAC.** Faint clash marks appear on the reverse, but there are no detectable cracks. The obverse hub was retouched in early 1857, and a small dent on the inner point of star 3 identifies this coin as being struck after the changes were made. The strike is much sharper than is typically seen, with the border dentils showing the only notable weakness. Vivid teal and orange-gold toning intermingles over each side, giving this virtually perfect Superb Gem a high degree of eye appeal. Census: 7 in 67, 1 finer (9/14). NGC ID# 233S, PCGS# 4365
- 3340 1859-O MS65 PCGS.** Of the original 560,000 half dimes minted in New Orleans in 1859, CoinFacts estimates that only 12 coins survive in Gem condition or better. The strike is typical of the facility, yet the beautifully toned and highly lustrous surfaces show only a handful of unimportant ticks. Population: 7 in 65, 4 finer (8/14). NGC ID# 233X, PCGS# 4370

- 3341 1869-S MS64+ PCGS. CAC.** A stellar example for the grade, with exemplary preservation displayed by snow-white surfaces. The design motifs are boldly struck overall, even if softness is noted along the lower left side of the shield, as well as on the upper left portion of the reverse wreath. Highly lustrous with delightfully clean surfaces. Population: 12 in 64 (1 in 64+), 4 finer (9/14). NGC ID# 234S, PCGS# 4395

**1872-S Mintmark Below Bow Seated Half Dime, MS67
Remarkably Well-Struck and Virtually Pristine
Tied for Finest-Graded at PCGS**

- 3342 1872-S Mintmark Below Bow MS67 PCGS.** A beautiful Superb Gem with intensely frosty untuned surfaces and remarkably crisp strike definition. No many examples of this type can boast such pinpoint definition throughout, on both sides. The surfaces are nearly flawless, save for a few faint clash marks. Just a great coin in every respect. Population: 8 in 67 (1 in 67+), 0 finer (8/14). NGC ID# 2352, PCGS# 4401
- 3343 1872-S Mintmark Above Bow MS66 PCGS.** A brightly lustrous example with mottled greenish and champagne patina that partially adorns the satiny surfaces. Sharply struck and distraction-free. Population: 18 in 66 (1 in 66+), 5 finer (8/14). NGC ID# 234Z, PCGS# 4402

PROOF SEATED HALF DIMES

- 3344 1859 PR64 PCGS.** Remarkably toned in shades of lavender, orange, rose, and sea-green, this near-Gem is one of 800 proofs struck in 1859 — the second year the Mint marketed proofs to the public. Fully struck and attractive. PCGS has certified only 37 examples finer (8/14). NGC ID# 235P, PCGS# 4438
- 3345 1862 PR66 NGC. V-3.** Ex: Eric P. Newman Collection. A patina of orange, russet, and teal envelops both sides of this Premium Gem example. The coin exhibits a sharp strike, with well defined design elements. A small, as-made lint mark appears in the right obverse field between Liberty's face and the cap. Census: 15 in 66 (1 in 66 ★), 13 finer (9/14). NGC ID# 235X, PCGS# 4445
- 3346 1862 PR66 Cameo NGC.** A beautiful, brilliant proof half dime with highly reflective fields and snow-white frosted devices. A mere 550 coins were struck, and this Premium Gem is one of the finer known survivors. Census: 7 in 66 Cameo, 8 finer (9/14). PCGS# 84445

**1865 Half Dime, PR66 Cameo
Elusive This Well-Contrasted**

- 3347 1865 PR66 Cameo PCGS. CAC. V-1.** The proof 1865 half dime had a somewhat typical mintage of 500 pieces, though the low mintage of its business strike counterpart (13,000 coins) increases demand for the proof variant among date collectors. This representative exhibits substantial frost over the devices, while the fields display ample mirroring and contrast. No marks are immediately obvious, and the coin is essentially brilliant, save for traces of light golden color that are seen when turned in-hand. Population: 9 in 66 Cameo, 2 finer (9/14). PCGS# 84448
- 3348 1867 PR66 PCGS. CAC. V-2.** Peripheral hues of pale lavender surround aquamarine centers on this high-end proof representative. The strike is bold, and the satiny devices deliver near-cameo contrast with the deeply mirrored fields. Population: 13 in 66, 5 finer (8/14). NGC ID# 2364, PCGS# 4450
- 3349 1868 PR66 Cameo NGC.** A nicely struck specimen, this Premium Gem Cameo proof exhibits untuned surfaces displaying reflective fields and mildly frosted devices. Liberty's hair and the upper-left portion of the wreath reveal minor incompleteness. Several interesting die lines appear on each side, along with a few minor hairlines. Census: 4 in 66 Cameo (1 in 66 ★ Cameo), 2 finer (9/14). Ex: Dallas Signature (Heritage, 11/2007), lot 365. PCGS# 84451

**1869 Half Dime, PR67 Cameo
Rich Multicolor Toning**

- 3350 1869 PR67 Cameo NGC.** This tiny Superb Gem exhibits remarkable contrast between the frosted devices and the richly toned fields. On the obverse, golden patina graces the figure of Liberty, while deeper violet, blue, and green-gold toning covers the moderately reflective surfaces. On the reverse, the wreath is part silver-gray and part champagne-gold, while the remainder of that side has more opaque patina in similar colors. Census: 8 in 67 Cameo (3 in 67 ★ Cameo), 2 finer (9/14). Ex: Long Beach Signature (Heritage, 2/2007), lot 2843. PCGS# 84452

**1871 Half Dime, PR65 Ultra Cameo
Starkly Contrasted**

- 3351** 1871 PR65 Ultra Cameo NGC. V-1. Similar in rarity to its 1872 counterpart, the proof 1871 half dime is a fairly available date overall, but becomes scarce with a Cameo designation. This piece ranks as one of the just five examples to receive an Ultra Cameo designation, the other four being PR67 coins (9/14). Thickly frosted devices contrast fully with the deeply mirrored fields, revealing no signs of noticeable contact marks. Some die rust is seen on the figure of Liberty and in the field around the head, though the strike is nonetheless well brought up. PCGS# 94454

1872 Half Dime, Bright PR66 Cameo

- 3352** 1872 PR66 Cameo PCGS. V-2. The proof 1872 half dime is a rather plentiful issue in the context of proof Seated half dimes, but pieces exhibiting cameo contrast are distinctly scarce, and are truly rare in Gem or finer grades. This Premium Gem representative displays softly frosted devices set against glassy fields, with a thin veil of golden toning over each side. The strike is crisp and the surfaces are attractively preserved. Population: 3 in 66 Cameo, 2 finer (9/14). PCGS# 84455

EARLY DIMES

**1797 16 Stars Dime, JR-1, VG8
Rich Original Patina**

- 3353** 1797 16 Stars, JR-1, R.4, VG8 NGC. The admission of Tennessee to the Union in 1796 brought about the addition of a 16th star to the obverse of the dime, though it quickly became apparent that so many stars crowded the design, so the Mint reverted to placing only 13 stars on the obverse later in the year (symbolic of the 13 original colonies). This piece is representative of the earlier 16 star obverse variety. Moderate wear is seen over each side, with the reverse borders being weak. Original olive-gray patina blankets the surfaces, complementing a lack of adjustment marks. The date is weak, a result of a die break over the left-hand numerals. PCGS# 38748

- 3354** 1805 5 Berries, JR-1, R.3, VG10 PCGS. A pleasing lower-grade type coin, this well-circulated 1805 Draped Bust dime exhibits even wear with moderate definition remaining on the central devices. Pale golden-gray patina blankets each side. PCGS# 38768

- 3355** 1805 4 Berries, JR-2, R.2, VF25 PCGS. The cheek displays light steel-gray toning, while the remainder of this early type coin displays almond-gold shades. Marks are minor, although we note a tiny dig atop the second vertical shield stripe. The strike is good except on the lower half of the shield. Certified in a green label holder. PCGS# 38769

BUST DIME

- 3356** 1811/09 JR-1, R.3, VF30 NGC. The entire 65,180-coin mintage of the 1811 dime was produced with an overdated 1809 obverse die and a leftover reverse die of the same year. The overdate feature is plain on this example, with the underlying 0 gracing each side of the second primary 1. Deep olive and lavender-gray patina blankets each side, while the central devices retain significant detail for the grade. From an early die state, as evidenced by the presence of only one die crack on the reverse; in later stages, the reverse die shatters. PCGS# 38772

SEATED DIMES

1838 No Drapery Dime, MS65 Appealing Type Representative

- 3357 1838 No Drapery, Large Stars MS65 PCGS. Fortin-113, R.4.** A thread-like die defect between ONE and DIME on the reverse confirms the attribution. This is a fully struck, pleasing representative of the short-lived No Drapery type. Satiny luster highlights rich shades of amber and golden-gray toning on the obverse, while the reverse has lighter shades of same around the lower-right border, and dusky lavender-gray overall. A lack of major abrasions completes the outstanding aesthetic appeal. Population: 41 in 65, 18 finer (8/14). NGC ID# 237U, PCGS# 4568

- 3358 1841-O MS63 PCGS.** Dappled shades of greenish-gold, blue, and gray toning blanket the lightly marked surfaces of this attractive Select specimen. The design elements are well-detailed and bright mint luster shines through the patina. Population: 5 in 63, 7 finer (8/14). NGC ID# 2385, PCGS# 4580

1842 Seated Dime, MS65 Only Three Numerically Finer at PCGS

- 3359 1842 MS65 PCGS. Fortin-106, R.2.** The 1842, with a mintage of more than 1.8 million pieces, is one of the more plentiful Seated half dime issues of the period, though it is still itself scarce in all grades, and rare in Gem or finer condition. This piece displays hints of iridescent color beneath a thin veil of light golden toning, with frosty luster and boldly struck design elements. Population: 12 in 65, 3 finer (9/14). NGC ID# 2386, PCGS# 4581

- 3360 1843-O VF35 PCGS. Fortin-101, Low R.4.** According to Gerry Fortin, this is a "very scarce date to obtain in VF or better." Golden-violet patina blankets the surfaces of this typically struck New Orleans product, and numerous small marks are peppered throughout. Population: 9 in 35, 17 finer (8/14). NGC ID# 2389, PCGS# 4584

- 3361 1845 MS65 NGC. Fortin-105a, R.4.** All four date digits nearly touch the base and die cracks crisscross over the E in STATES. Shades of turquoise-blue and plum intermingle over both sides of this Premium Gem, creating outstanding eye appeal. Despite a mintage of over 1.7 million pieces, NGC and PCGS have certified a combined 14 coins in 65, with only 12 submissions finer (8/14). NGC ID# 238B, PCGS# 4586

- 3362 1845-O XF45 PCGS. Fortin-101b, R.5.** Large Thick O. Cherry-red, ice-blue, and sea-green hues coalesce within the protected regions, leaving the interiors largely silver-gray. An elusive issue in all grades, PCGS has certified only nine coins in XF45 and 10 examples finer (8/14). NGC ID# 238C, PCGS# 4587

- 3363 1845-O AU50 PCGS. Fortin-101b, Large Thick O.** A remarkably challenging issue, despite the moderately high original mintage of 230,000 pieces. Pearl-gray and caramel-gold surfaces reveal a few ticks and trivial hairlines, under magnification. Conditionally scarce and rare any finer. Population: 5 in 50, 5 finer (8/14). NGC ID# 238C, PCGS# 4587

- 3364 1845-O AU50 PCGS. Fortin-101a, R.4.** The New Orleans Mint struck 230,000 Seated dimes in 1845. Extant examples are sometimes available in the lower circulated grades, but XF and AU examples are scarce, and Mint State pieces are rare. This AU representative displays bright steel-gray centers, with deeper olive-gray toning in the border recesses, more prominent on the obverse. Slight high-point friction is present, though the detail remains nearly complete. Population: 5 in 50, 5 finer (8/14). NGC ID# 238C, PCGS# 4587

- 3365 1846 VF35 PCGS. Fortin-101, R.4.** The Philadelphia Mint struck a paltry 31,300 dimes in 1846, the lowest mintage in the Seated series from its inception in 1838 until 1863. This circulated example exhibits battleship-gray patination with an expected amount of wear and abrasions over each side. Population: 8 in 35, 34 finer (8/14). NGC ID# 238D, PCGS# 4588

- 3366 1848 MS64 NGC. Fortin-101, R.3.** The large size, downward sloping date fills the entire exergual space on this example. Both sides have frosty silver-gray luster with delicate violet-gold toning. A sharp strike yields full design definition. Census: 8 in 64, 6 finer (8/14). NGC ID# 238F, PCGS# 4590

- 3367 1856-S XF40 PCGS. Fortin-101, R.5.** Minor repunching on the upper loop of the mintmark affirms the early die state. This S-mint representative features sharp striking detail with full star centers. Light steel-gray toning covers each side. A nice problem-free example from an underrated issue. Population: 5 in 40, 27 finer (8/14). NGC ID# 238W, PCGS# 4613

- 3368 1858-S VF35 PCGS. Fortin-102, R.5.** A level date and medium S mintmark identify this variety. The 1858-S dime is scarce in all grades because of its low mintage (60,000 coins) and high rate of attrition. This survivor exhibits light steel-gray patina with rose-violet and apricot-orange overtones. The motifs retain a significant amount of original design detail, and abrasions are evenly scattered over each side. Population: 3 in 35, 32 finer (8/14). NGC ID# 2393, PCGS# 4618

1861-S Seated Dime, AU58 Important Rarity at Any Grade Level

- 3369 1861-S AU58 PCGS.** With a mintage of 172,500 coins this Seated dime issue is scarce at any level of preservation and rare in Mint State. Mere traces of high-point friction and a few wispy hairlines on each side are all that separate this attractive near-Mint specimen from an Uncirculated grade assignment. Essentially brilliant with creamy silver-white surfaces and boldly detailed design elements. Population: 1 in 58, 8 finer (8/14). NGC ID# 239G, PCGS# 4634

- 3370 1863-S AU50 PCGS. Fortin-101.** This scarce San Francisco issue is challenging in all grades, though it is also more available than its P-mint counterpart. The surfaces show golden-gray patina and a bold impression. Population: 4 in 50, 19 finer (8/14). NGC ID# 239L, PCGS# 4638

3371 1870-S AU53 PCGS. Traces of luster are evident on each side of this important piece that is finer than the average certified example that grades just XF40. Both sides have dusky grayish-gold toning. Population: 2 in 53, 21 finer (9/14). NGC ID# 23A3, PCGS# 4652

3372 1879 MS66 Prooflike NGC. This lovely Seated dime has brilliant silver surfaces, showing frosty devices and mirrored fields, creating moderate cameo contrast. Census: 1 in 66 Prooflike, 7 finer (8/14). PCGS# 74687

3373 1885-S VF30 PCGS. Fortin-101, Low R.5. One of the key dates in the Seated dime series, this issue claims a low mintage of only 43,690 coins. Few examples survive, as they circulated heavily on the West Coast. This San Francisco representative offers light-gray surfaces with minimal marks. The devices show a predictable amount of wear over the high points, yet much design detail remains. Population: 4 in 30, 46 finer (8/14). NGC ID# 23B2, PCGS# 4695

3374 1886 MS66 PCGS. CAC. This is a beautifully preserved example, with a frosty obverse and deeply prooflike reverse. The strike is slightly soft on the upper-left portion of the wreath, as usual, though Liberty's head and the shield are sharp. Light golden toning warms each side. Population: 36 in 66 (1 in 66+), 8 finer (8/14). NGC ID# 23B3, PCGS# 4696

1886-S Seated Dime, MS65 Vibrant Luster, Attractively Toned

3375 1886-S MS65 PCGS. CAC. The 1886-S Seated Liberty dime claims a mintage of 206,524 pieces and few examples were saved by contemporary collectors. The well-preserved surfaces of this attractive Gem are blanketed in shades of lavender-gray and greenish-gold toning, with vibrant mint luster underneath. Population: 6 in 65, 15 finer (8/14). NGC ID# 23B4, PCGS# 4697

1889 Seated Dime, MS66+ Rarely Encountered Finer

3376 1889 MS66+ PCGS. CAC. Fortin-113, R.3. An easily obtainable date overall, the 1889 Seated dime becomes scarce at the MS66 grade level, and finer coins are decidedly rare. This Plus-graded example displays heavily frosted luster beneath shades of olive, gold, and pale lavender toning. The strike is sharp and the surfaces are carefully preserved. Population: 30 in 66 (2 in 66+), 5 finer (9/14). NGC ID# 23B9, PCGS# 4702

1889 Seated Dime, Fortin-110, MS67 Tied for Finest-Graded

3377 1889 MS67 NGC. CAC. Fortin-110, R.4. Vivid electric-blue, violet-orange, and green-gold hues encompass each side, with vibrant mint luster delivering an exceptional visual display when tilted beneath a light. The strike is bold and the preservation is immaculate. This is a later die state of Fortin's clashed die reverse variety, exhibiting numerous thread-like die cracks around the peripheries. Census: 8 in 67, 0 finer (8/14). Ex: Long Beach Signature (Heritage, 9/2007), lot 979. NGC ID# 23B9, PCGS# 4702

3378 1890-S MS65 PCGS. CAC. Satiny and boldly struck with mottled shades of reddish and green patina near the peripheries, this Gem example is impressively preserved and free of surface distractions. The mintage of 1.4 million business strikes was heavily circulated, and examples grading MS65 or finer are extremely rare. Population: 12 in 65, 1 finer (8/14). NGC ID# 23BC, PCGS# 4705

PROOF SEATED DIMES

3379 1867 PR65 PCGS. Citrine, emerald, and aquamarine toning dazzles on this Gem proof Seated dime. Ample watery reflectivity makes for appreciable, if not Cameo-level contrast. Population: 7 in 65, 2 finer (9/14). NGC ID# 23CR, PCGS# 4760

3380 1882 PR64 PCGS. CAC. This Choice proof dime is housed in an early, small-format PCGS holder and appears to be a candidate for resubmission, due to its obvious contrast. Both sides are brilliant with wisps of peripheral blue and gold toning. NGC ID# 23D7, PCGS# 4779

3381 1882 PR66 PCGS. Fortin-101, R.3. A spectacular Premium Gem from a generous proof mintage of 1,100 pieces, this coin displays sharply detailed design elements and deeply mirrored fields, with hints of pale gold and amber toning. Population: 19 in 66, 13 finer (8/14). NGC ID# 23D7, PCGS# 4779

3382 1883 PR65 Cameo PCGS. Marginal blue, violet, and golden-brown toning blends to all-brilliant centers. A thick layer of frost blankets the razor-sharp design elements, contrasting starkly against watery fields. From a mintage of 1,039 proofs. Population: 17 in 65 Cameo, 15 finer (8/14). PCGS# 84780

3383 1885 PR66+ PCGS. Attractively toned in magenta and ice-blue with golden-gray and olive-green overtones, this Premium Gem proof is remarkably preserved and high-end for the grade. From a mintage of 930 coins. Population: 26 in 66 (2 in 66+), 11 finer (8/14). NGC ID# 23DA, PCGS# 4782

3384 1890 PR66 PCGS. CAC. Attractive mottled champagne-orange and olive patina confirm the originality of this conditionally scarce Premium Gem proof. The coin's strike definition is impressive and nearly full, and the surfaces are well-preserved. Few examples have achieved this lofty grade designation, and Superb Gems are especially rare. Population: 15 in 66, 7 finer (8/14). NGC ID# 23DE, PCGS# 4787

BARBER DIMES

- 3385 1895-S MS64 PCGS.** Shimmering luster emerges through steel-blue and rose toning on both sides of this Choice Barber dime. The strike is full, and two small ticks, one level with the C in AMERICA and another above Liberty's lip, are the only factors preventing a higher grade. Population: 36 in 64 (3 in 64+), 9 finer (8/14). NGC ID# 23DX, PCGS# 4808

1895-S Barber Dime, MS65+ Partially Prooflike and Attractively Toned

- 3386 1895-S MS65+ NGC.** Razor-sharp definition on all design elements and well-preserved surfaces with prooflike reflectivity in the fields are the calling cards of this remarkable high-end Gem. Attractive shades of greenish-gold and lavender-gray toning enhance the terrific eye appeal. Census: 4 in 65 (1 in 65+), 2 finer (9/14). NGC ID# 23DX, PCGS# 4808

- 3387 1896 MS65 PCGS.** Full strike definition and flawless surface preservation are hallmarks of this pleasing Gem example. Swirling luster illuminates a variegated combination of olive-green and gold toning. Population: 16 in 65, 12 finer (9/14). NGC ID# 23DY, PCGS# 4809

1897 Dime, MS67 Among the Finest Certified

- 3388 1897 MS67 NGC.** Availability of 1897 Barber dimes begins a gradual decline in succeeding Gem grades, with fewer than a dozen Superb Gems known. This beautifully preserved piece exhibits rich blue and lavender accents beneath overall golden-gray toning, with satiny mint luster shining through. The strike is sharp, and the eye appeal is immense. NGC and PCGS combined have certified just 11 examples in this grade, with none numerically finer (9/14). PCGS# 4812

- 3389 1901 MS66 PCGS.** Easily obtainable in lower grades, the 1901 dime becomes rare at the Premium Gem level. Satiny luster shines through blended green-gold, amber, and aquamarine hues on each side of this boldly struck representative, with no mentionable surface abrasions observed upon close examination. Population: 15 in 66 (1 in 66+), 1 finer (9/14). NGC ID# 23EF, PCGS# 4824

- 3390 1902-S MS64 PCGS. CAC.** The design motifs are crisply produced and light hues of champagne-gray and specks of olive patina grace the semiprooflike fields. This San Francisco issue had a not-high mintage of just over 2 million coins, and is surprisingly scarce in all Mint State grades. Population: 14 in 64 (1 in 64+), 16 finer (9/14). NGC ID# 23EL, PCGS# 4829

1903 Barber Dime, Flynn RPD-002, MS66

Fully Struck, Well-Preserved Example Noteworthy Repunched Date Variety

- 3391 1903 MS66 PCGS. CAC. Flynn RPD-002.** A fully struck piece with noteworthy sharpness on all of the denticles in addition to the major devices. A satiny, unmarked example with touches of peripheral toning on each side. A hair-thin line is noted on the nose. A nicely repunched date variety, not currently listed in *Cherrypickers'*. NGC ID# 23EM, PCGS# 4830

- 3392 1905-S MS66 PCGS.** This Premium Gem is intensely lustrous and sharply struck, with well-preserved surfaces that exhibit dappled green and dark-olive patina near the borders. A popular high-mintage issue that is favored by type specialists. Population: 10 in 66, 3 finer (8/14). NGC ID# 23EW, PCGS# 4837

- 3393 1906-S MS66 PCGS.** A sharply struck and attractively toned representative of this issue, struck during the year of the Great Earthquake in San Francisco. Well-preserved and distraction-free, with strong mint luster. Among the better-graded examples from this date and mint; and just three are rated finer by PCGS. Population: 22 in 66 (2 in 66+), 3 finer (8/14). NGC ID# 23F2, PCGS# 4841

1907-D Dime, MS66 Conditionally Rare Denver Issue

- 3394 1907-D MS66 PCGS.** The Denver Mint produced slightly more than 4 million Barber dimes in 1907, making the issue reasonably available in lower Mint State grades, but quite elusive at the MS66 grade level. The obverse of this spectacular Premium Gem features a brilliant center, surrounded by rings of pastel green and blue toning. The reverse remains essentially brilliant. The design elements are well-detailed and the brightly lustrous surfaces show no mentionable distractions. Population: 8 in 66, 3 finer (8/14). NGC ID# 23F4, PCGS# 4843

- 3395 1908-D MS66 PCGS. Ex: Brian Loncar Collection, Part II.** The 1908-D is a common date in lower grades, but becomes distinctly rare in Gem and finer condition. This MS66 example displays sharp motifs and frosty luster. Blended hues of olive-gold and deeper sun-red surround pale powder-blue centers. Population: 9 in 66, 7 finer (8/14).
Ex: *Long Beach Signature* (Heritage, 2/2005), lot 6295. NGC ID# 23F8, PCGS# 4847

3396 1909-S MS65 PCGS. An even 1 million business strikes were produced at the San Francisco Mint, just three years after the Great Earthquake that rocked that city and destroyed much of it in 1906. This issue is scarce in Mint State, and rare any finer than MS65. The current example is well-struck with satiny luster and smooth, blemish-free surfaces. Both sides are blanketed in even cobalt-green coloration. Population: 7 in 65, 9 finer (8/14). NGC ID# 23FE, PCGS# 4853

3397 1909-S MS65 PCGS. A brilliant, stone-white dime with boldly struck design features and lustrous, unmarked surfaces. This coin is one of the finest-known examples of the issue, and only a dozen pieces are graded even finer at both of the major services combined. Population: 7 in 65, 9 finer (8/14). NGC ID# 23FE, PCGS# 4853

PROOF BARBER DIMES

1898 Barber Dime, PR67 Cameo Visually Captivating and Conditionally Scarce

3398 1898 PR67 Cameo PCGS. Although not as rare as the later proof issues from this series in Cameo condition, the 1898 is definitely scarce at the PR67 grade tier with Cameo surfaces, and rare any finer. This is a beautifully contrasted example with pinpoint strike definition and awesome depths of watery reflectivity in the fields. An essentially pristine, visually captivating Superb Gem. PCGS# 84882

1900 Barber Dime, PR67 Deeply Toned, Conditionally Rare Specimen

3399 1900 PR67 PCGS. A deep blanket of lavender-green patina covers each side of this infrequently-encountered Superb Gem example. The motifs are struck with razor-sharp precision. When the piece is rotated beneath a lamp, the toning turns to lighter iridescent hues of apple-green, blue, and pastel violet. A virtually pristine, conditionally rare specimen. Population: 11 in 67 (1 in 67+), 1 finer (8/14). NGC ID# 23GD, PCGS# 4884

1901 Dime, PR67 Cameo Brilliant, High-Contrast Proof

3400 1901 PR67 Cameo NGC. Ex: Sweet Collection. A richly frosted proof from the final year before the Mint stopped using the Cameo proofing technique. Untoned and brilliant-white, this immaculate Superb Gem proof is fully struck with remarkably deep mirrors. None are certified finer in Cameo. Census: 7 in 67 Cameo, 0 finer (9/14). PCGS# 84885

3401 1902 PR66 NGC. A beautifully preserved, razor-sharp example, this proof 1902 dime also boasts glassy fields and deep toning in shades of olive-gold, amber-red, violet, and aquamarine. Census: 24 in 66, 16 finer (8/14). NGC ID# 23GF, PCGS# 4886

3402 1905 PR65 PCGS. CAC. The brightly reflective fields of this Gem proof Barber dime are toned in attractive shades of gold, gray, and blue. The design elements are sharply detailed and no mentionable distractions are evident. Population: 41 in 65, 55 finer (8/14). NGC ID# 23GJ, PCGS# 4889

3403 1906 PR66 PCGS. CAC. A stunning Premium Gem proof, this Barber dime is fully toned in emerald, sea-green, and violet. The fields are fully mirrored around lustrous devices. Full contrast is evident beneath the thick toning that prevents a Cameo designation. Population: 20 in 66 (2 in 66+), 12 finer (8/14). NGC ID# 23GK, PCGS# 4890

3404 1907 PR66 NGC. Even though the business strike variant was produced in excess of 22 million coins, the proof 1907 dime saw one of the lowest proof mintage figures for the series (575 coins). This boldly struck, beautifully preserved Premium Gem displays complementary amber-gold and sky-blue hues melting into deeply mirrored fields on each side. Census: 28 in 66, 21 finer (9/14). NGC ID# 23GM, PCGS# 4891

1914 Barber Dime, PR67 One of the Finest-Known Examples

3405 1914 PR67 PCGS. CAC. Fully struck with glassy, attractively toned surfaces that are exquisitely preserved and virtually flawless. Sea-green and coppery-red colors blend together around and between silvery-white areas, especially near the center of the obverse. A great coin, and one of the finest-graded specimens from a small mintage of 425 coins. Population: 9 in 67, 1 finer (8/14). NGC ID# 23GV, PCGS# 4898

MERCURY DIMES

- 3406 1916 MS67 Full Bands PCGS.** A stellar representative of this first-year issue. Somewhat scarce at the MS67 level, and rare any finer. Fully struck with scattered areas of light patina and blemish-free, satiny surfaces. NGC ID# 23GX, PCGS# 4905
- 3407 1916 MS67 Full Bands PCGS.** This first-year issue had a high business strike mintage, and examples were obviously saved from circulation by numismatists and non-numismatists alike. This snow-white Superb example is awash with intense mint frost over each side. It is sharply struck and carefully preserved, with beautifully clean surfaces. NGC ID# 23GX, PCGS# 4905
- 3408 1916 MS67 Full Bands PCGS. CAC.** A deeply toned Superb Gem with multicolored patina that is sure to please the connoisseur of originality. Fully struck and free of even the tiniest spot or blemish on both sides. NGC ID# 23GX, PCGS# 4905
- 3409 1916 MS67+ Full Bands PCGS. CAC.** A high-end Superb Gem from the first year of the Mercury design, this piece offers sharply detailed design elements, with Full Bands definition on the fascies, and brightly lustrous well-preserved surfaces. PCGS has certified 10 numerically finer examples (8/14). NGC ID# 23GX, PCGS# 4905
- 3410 1918 MS66 Full Bands PCGS. CAC.** Both sides of this boldly detailed Premium Gem display frosty silver luster beneath beautifully mottled champagne, gold, and pale blue toning. Population: 42 in 66 Full Bands, 4 finer (8/14). NGC ID# 23H5, PCGS# 4917
- 3411 1920-D MS66 PCGS. CAC.** A surprisingly scarce issue in high grades, despite the substantial mintage in excess of 19 million coins. A brilliant, intensely lustrous, unabraded piece with sharp definition on the obverse and some typical softness noted on the reverse. Population: 12 in 66, 0 finer (9/14). NGC ID# 23HC, PCGS# 4930

1924-S Mercury Dime, MS64 Full Bands Razor-Sharp Throughout

- 3412 1924-S MS64 Full Bands PCGS.** The 1924-S is one of the better-struck dates from the San Francisco Mint, but Full Bands examples are rare in Gem condition. This near-Gem example exhibits faint traces of light golden color over otherwise brilliant, satiny luster, while the design elements are remarkably bold throughout. PCGS has encapsulated only 19 numerically finer Full Bands representatives (8/14). NGC ID# 23HL, PCGS# 4947

1925-D Mercury Dime, MS65 Full Bands Beautiful, Conditionally Scarce Example

- 3413 1925-D MS65 Full Bands PCGS.** A beautifully preserved Gem with lovely original patina in hues of champagne-russet and gold near the peripheries and pale green over the fields and centers. Fully struck with clean, abrasion-free surfaces and splendid mint luster. Population: 33 in 65 (1 in 65+) Full Bands, 30 finer (8/14). NGC ID# 23HN, PCGS# 4951
- 3414 1931-D MS67 Full Bands PCGS. CAC.** The mostly brilliant impeccably preserved surfaces of this delightful Superb Gem show a few spots of green, blue, and amber toning and the sharply detailed design elements exhibit Full Bands definition on the fascies. Population: 55 in 67 (1 in 67+) Full Bands, 0 finer (8/14). NGC ID# 23J8, PCGS# 4985

1931-S Dime, MS65 Seldom Seen Full Bands Example

- 3415 1931-S MS65 Full Bands PCGS.** With a mintage of only 1.8 million pieces, the 1931-S is among the more elusive Mercury dime issues of the period in Mint State condition, and Full Bands representatives are scarce in Gem or finer condition. This MS65 example displays frosty ice-blue and pale golden luster, with a few tiny navy accents seen near the obverse rims. Sharp motifs and primarily clean surfaces contribute to the eye appeal. NGC ID# 23J9, PCGS# 4987
- 3416 1942-S MS67+ Full Bands PCGS. CAC.** A remarkably bright, brilliant piece with fully struck motifs and immaculate surfaces. Only a handful of coins are graded finer at PCGS and NGC combined. NGC ID# 23K7, PCGS# 5043
- 3417 1943-D MS68 Full Bands PCGS. CAC.** This coin is among the finest survivors from an original mintage of nearly 72 million coins. Frosty and brilliant centers progress to wildly iridescent peripheries, and the eye appeal is superb. Population: 27 in 68 Full Bands, 0 finer (8/14). NGC ID# 23K9, PCGS# 5047
- 3418 1944 MS66 Full Bands PCGS. Gold CAC.** A lustrous and essentially pristine Premium Gem. Lightly toned stone-gray, aside from rich arcs of russet-red and orange toning on the upper obverse and (especially) right reverse margins. Certified in a green label holder. NGC ID# 23KB, PCGS# 5051

- 3419 1944 MS67 Full Bands PCGS.** This late issue in the Mercury dime series is surprisingly scarce with Full Bands definition, especially at this advanced numeric grade level. This is an intensely lustrous, brilliant Superb Gem with immaculate surfaces. NGC ID# 23KB, PCGS# 5051

PROOF MERCURY DIMES

- 3420 1936 PR65 PCGS. CAC.** 1936 is the first and lowest mintage date of the seven-year run of proof Mercury dimes. This well-struck Gem offers pastel caramel-gold and ice-blue toning and is housed in a gold label holder. NGC ID# 27DG, PCGS# 5071
- 3421 1936 PR66 NGC.** Sharply struck with gleaming and near-brilliant fields. This is an attractive Premium Gem example of the first proof Mercury dime issue. NGC has graded 92 numerically finer specimens (8/14).
Ex: Long Beach Signature (Heritage, 6/2010), lot 959. NGC ID# 27DG, PCGS# 5071

1937 Mercury Dime, PR68 Impressive, Beautifully Preserved Specimen

- 3422 1937 PR68 PCGS.** The near-perfection of this monumental Superb Gem is confirmed by the full strike impression and the amazingly clean, virtually pristine surfaces. Golden border accents increase the eye appeal of the piece. This issue had a mintage of 5,756 coins, the second-smallest in the brief seven-year proof series of Mercury dimes. Population: 28 in 68 (1 in 68+), 0 finer (8/14). NGC ID# 27DH, PCGS# 5072

1938 Dime, PR68 Multihued Peripheral Toning

- 3423 1938 PR68 NGC.** Vivid bands of royal-blue, violet, lemon-gold, and lime-green toning surround much of the obverse peripheries and are seen to a lesser extent around the reverse rims, leaving the centers brilliant. The strike is full, and the fields display substantial mirroring, though not particularly deep. From a proof mintage of 8,728 coins. Census: 43 in 68 (4 in 68 ★), 1 finer (8/14). NGC ID# 27DJ, PCGS# 5073

1940 Mercury Dime, PR68 Tied for Finest at PCGS

- 3424 1940 PR68 PCGS.** Ex: Brian Loncar Collection. The obverse of this PR68 piece exhibits an attractive starburst appearance in the fields due to the metal flow. Areas of iridescent light tan toning are present on both sides. Strong luster adds to the eye appeal of this exceptional, beautifully preserved specimen. Population: 23 in 68, 0 finer (9/14). NGC ID# 27DL, PCGS# 5075
- 3425 1942 PR68 PCGS.** The mostly brilliant surfaces of this impeccably preserved Mercury dime are deeply mirrored and show a few hints of emerald-green and cerulean-blue toning. The design elements are sharply rendered and eye appeal is terrific. Population: 57 in 68 (2 in 68+), 0 finer (8/14). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIMES

1946 Roosevelt Dime, MS68 Vibrant Toning

- 3426 1946 MS68 PCGS.** Assembling a high-grade set of the 48 silver Roosevelt dime issues is nearly an impossible task, beginning with the 1946 that is seldom found finer than MS66, and rarely finer than MS67. This impressive Superb Gem displays vibrant green, rose, and gold toning with brilliant underlying luster. Population: 3 in 68, 0 finer (9/14). NGC ID# 23KJ, PCGS# 5082
- 3427 1951-S MS68 PCGS.** A crescent of caramel-gold toning embraces about three-quarters of the obverse and reverse rims, framing frosty white surfaces of this exceptional Superb Gem dime. Boldly struck as expected for this high Mint State grade, tied for finest at either PCGS or NGC. PCGS Population: 10 in 68, 0 finer (9/14). NGC ID# 23L4, PCGS# 5099

**1952-S Dime, MS68 Full Bands
Beautiful Rainbow Crescent**

- 3428 1952-S MS68 Full Bands PCGS.** The Registry collector's dream coin, this MS68-graded 1952-S Roosevelt dime ranks with just two others as the finest certified Full Bands example at PCGS, and is rivaled at NGC in this grade by just a single coin, with none finer (8/14). A vivid crescent of cherry-red, forest-green, sun-gold, and amber toning surround much of the obverse periphery from 6 to 2 o'clock, leaving the remainder of each side essentially brilliant. As the grade suggests, the preservation is nearly perfect. NGC ID# 23L7, PCGS# 85102

- 3429 1956 MS67 Full Bands PCGS.** This Superb Gem is an important Registry Set candidate with cobalt-blue and violet toning over the obverse. The reverse features a uniform layer of ice-blue coloration. Fully struck and virtually flawless. Population: 16 in 67 (2 in 67+) Full Bands, 1 finer (8/14). NGC ID# 23LH, PCGS# 85112

- 3430 1962-D MS67+ Full Bands PCGS.** Aside from a few splashes of peach-orange toning, this remarkably preserved Superb Gem remains entirely brilliant, and the devices are boldly impressed. PCGS has certified 47 examples in MS67 Full Bands, however this is the sole coin with a Plus designation. None are certified finer (814). This is a rare opportunity for the Registry Set specialist. NGC ID# 23LX, PCGS# 85125

PROOF ROOSEVELT DIME

**1970 No S Roosevelt Dime, PR69 Cameo
Registry Set Necessity**

- 3431 1970 No S PR69 Cameo PCGS.** A must-have for the Registry Set specialist, this essentially perfect Cameo ranks with just four others as the finest certified of the No S variety at PCGS (9/14), and stands a full grade point and a Cameo designation finer than the PR68 coin represented in the current highest-rated Major Varieties Proof Registry Set for the series. The mirrors display profound depth, and the softly frosted devices provide pleasing contrast. Traces of light golden color complement the sharp design elements. NGC ID# 27F5, PCGS# 85248

TWENTY CENT PIECES

- 3432 1875-CC AU50 ANACS.** The 1875-CC twenty cent piece is widely popular as the only Carson City issue of the denomination that is generally considered collectible. This AU representative shows deep multicolor toning in shades of orange-gold, olive, and amber-red, while the surfaces are attractively preserved, and the design elements retain strong detail for the grade. NGC ID# 23R6, PCGS# 5297

- 3433 1875-CC MS62 PCGS.** The 1875-CC twenty cent piece is only collectible issue of this short-lived odd denomination from the Carson City Mint. This well-detailed MS62 example displays slightly subdued mint luster and lightly marked surfaces under delicate shades of lavender toning. NGC ID# 23R6, PCGS# 5297

**1875-S Twenty Cent, Lustrous MS65
Great Type Coin**

- 3434 1875-S MS65 NGC.** Rose-gray, sky-blue, and aquamarine hues adorn this boldly struck Gem silver type coin. Luster dominates both sides, which are smooth aside from a solitary hair-thin mark on the right obverse field. LIBERTY is raised on the shield, the edge is plain, and the eagle faces the other way, yet in commerce the similar-sized denomination was often confused with a quarter. Ex: *Summer FUN Signature* (Heritage, 7/2009), lot 433. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECE

- 3435 1875 PR62 PCGS.** From a proof mintage of 2,790 pieces, this first-year of denomination twenty cent piece offers sharply detailed design elements and moderately reflective fields, with a scattering of minor hairlines and contact marks. NGC ID# 27GZ, PCGS# 5303

EARLY QUARTER

- 3436 1806 B-3, R.1, VF20 NGC.** Tompkins Die State 2/4. This lightly toned representative is mostly silver-white but has glimpses of tan near the rims. The centers are softly brought up, but splendid detail on the wingtips suggests there is less circulation wear than the designated grade suggests. A few faint hairlines but there are no distracting marks. Ex: *Long Beach Signature* (Heritage, 2/2011), lot 3531. PCGS# 38929

BUST QUARTERS

- 3437 1825/4/(2) B-2, R.2 — Cleaning — PCGS Genuine. AU Details.** Ex: Browning 2. A layer of gunmetal-blue patination blankets the strongly detailed surfaces of this popular *Guide Book* variety. Wispy hairlines from the cleaning occur beneath the toning but hardly do anything to affect this Capped Bust example's appeal. PCGS# 38975

- 3438 1825/4/(2) "L" Counterstamp, B-2, R.2, AU55 NGC.** This complicated attribution includes an older 1825/4 designation, now noted as 1825/4/2/ by some authorities. Research suggests that these mysterious counterstamped quarters originated from the Economite hoard in Pennsylvania. The fields are light-gray but smooth. The peripheries display mottled olive and tan patina. An attractive and interesting Choice AU example. PCGS# 38975

SEATED QUARTERS

1840-O No Drapery Quarter, MS62 Triple Repunched 'O' in the Date

- 3439 1840-O No Drapery MS62 NGC. Briggs 2-B.** Per Briggs, " 'O' of date is triple punched; first slightly north from the upper right outside curve; second 0.2 mm south of main 'O' of date." The granular surfaces are lightly toned and exhibit a typical New Orleans Mint strike. Minimally marked for the grade. Census (all varieties): 16 in 62, 12 finer (8/14). NGC ID# 23SG, PCGS# 5393

- 3440 1845 MS64 PCGS. CAC. Briggs 3-C.** A small underlying 5 is visible at the upper edges of the large primary 5 in the date, while the 4 is also mildly recut. Luminous surfaces illuminate soft hues of rose-gold, mint-green, and sky-blue, while the strike is above-average for the issue. Surface abrasions are light and evenly dispersed. Population: 19 in 64, 4 finer (8/14). NGC ID# 23SV, PCGS# 5408

1847 Seated Quarter, MS64 Elusive Early Philadelphia Issue

- 3441 1847 MS64 PCGS.** Like most pre-1853 Seated quarter issues, the 1847 is somewhat scarcer overall than its current values might suggest. Circulated examples are only infrequently seen, and Mint State pieces are rare in all grades. This Choice example displays blended champagne and golden-gray toning over each side, with satiny underlying luster. Some tinges of pale blue color are also noted periodically around the rims. The strike is boldly impressed and the eye appeal is pleasing. Population: 9 in 64, 2 finer (9/14). NGC ID# 23SX, PCGS# 5410

- 3442 1852-O VF25 PCGS.** A melange of jade, mint-green, yellow, and orange colors the obverse peripheries, while blue and violet toning hugs the reverse borders. For a circulated coin, this O-mint quarter possesses strong eye appeal and surprisingly few marks. Population: 7 in 25, 32 finer (8/14). NGC ID# 23T9, PCGS# 5420

- 3443 1853 Arrows and Rays MS62 PCGS.** An important one-year type coin, this satiny Mint State piece has faint, grade-limiting hairlines on brilliant silver surfaces with a few splashes of deep golden-brown toning. NGC ID# 23U4, PCGS# 5426

1862-S Quarter, AU58 Rare at This Grade Level

- 3444 1862-S AU58 PCGS. Briggs 1-A.** The 1862-S quarter had a moderately low mintage of only 67,000 coins, and these circulated extensively. Extant pieces are most often seen in the lower circulated grade range, but even these are scarce; AU examples are rare, with Mint State pieces equally so. This near-Mint representative displays above-average design definition, with substantial frosty luster remaining in the recesses. Mottled golden-gray toning encompasses each side, attesting to the originality of the surfaces. Population: 7 in 58, 16 finer (8/14). NGC ID# 23TW, PCGS# 5457

- 3445 1865-S XF40 PCGS.** This final-year No Motto quarter is one of only 41,000 examples struck at the California branch mint in 1865. The interstices retain a surprising amount of luster, and the design features still show strong detail, though evidence of brief circulation occurs over the high points. Minimally marked and mostly untuned. Population: 6 in 40, 20 finer (8/14). NGC ID# 23U3, PCGS# 5462

- 3446 1877-S MS65 PCGS.** The design elements of this impressive Gem are well-detailed, with just a touch of softness on some star centers and the drapery. The lustrous surfaces are blanketed in shades of champagne-gold and powder-blue toning. Population: 30 in 65, 21 finer (8/14). NGC ID# 23V7, PCGS# 5506

1878-S Seated Quarter, MS62 Rare Issue in Mint State

- 3447 1878-S MS62 PCGS.** This is a lower-mintage issue of 140,000 pieces that has a poor rate of survival and is rare in Mint State. The current MS62 example is brilliant and nicely preserved, with mildly reflective fields and bold strike definition that only leaves a bit of central weakness on three or four of the obverse stars. Surface marks are few and all are strictly trivial in nature. Population: 3 in 62, 11 finer (8/14). NGC ID# 23VA, PCGS# 5510

1880 Seated Quarter, MS66
Attractive, Premium Quality Example

3448 1880 MS66 PCGS. CAC. A dazzling, brilliant piece showing thick mint frost across each side and impeccably preserved silver-white surfaces. Only a pair of the upper right obverse stars show incomplete centers, and even Liberty's hair is better-than-average. A beautiful coin and one that is conditionally scarce at the Premium Gem grade level, with few known any finer at either service. Population: 35 in 66 (1 in 66+), 15 finer (8/14). NGC ID# 23VC, PCGS# 5512

3449 1889 MS64 PCGS. This is the final date in a series of low-mintage Philadelphia issues between 1879 and 1889, with a production of just 12,000 circulation strikes. The strike is generally well-defined, and only Liberty's head, star 8, and the olive leaves appear lightly impressed. A lustrous and brilliant Choice representative. NGC ID# 23VM, PCGS# 5522

PROOF SEATED QUARTERS

1868 Quarter, PR65
Attractive Patina

3450 1868 PR65 PCGS. CAC. Briggs 2-B. Ex: Bruce Scher. A moderately low proof mintage of 600 1868 quarters ensures the scarcity of high-grade survivors. This example displays razor-sharp detail and excellent preservation, with mirrored fields that showcase rich orange-gold and aquamarine hues on the obverse, and blended ocean-blue and lavender-gray over the reverse. A small die lump near the B in LIBERTY serves as a diagnostic point for proofs of this issue. Population: 10 in 65 (1 in 65+), 4 finer (8/14). NGC ID# 23WZ, PCGS# 5567

3451 1872 PR65 NGC. The lightly toned but mostly brilliant surfaces of this Gem proof yield moderately frosted design features that out against the mirrored fields, resulting in pleasing contrast. Sharply struck with few signs of contact. Census: 29 in 65, 11 finer (8/14). NGC ID# 23X5, PCGS# 5571

3452 1872 PR65 Cameo PCGS. An elegant appearance charms the viewer of this lovely Cameo Gem proof quarter. Fully struck and well-preserved, with impressively deep reflectivity in the fields and sharply frosted design motifs. Population: 8 in 65 Cameo, 6 finer in Cameo (8/14). PCGS# 85571

3453 1876 PR65 PCGS. Splashes of purple, magenta, and apricot-orange toning intermingle over the obverse, while the reverse is only lightly toned and mostly brilliant. If not for the patina, this Gem proof would likely warrant a Cameo designation. From a generous mintage of 1,150 proofs. Population: 17 in 65 (1 in 65+), 15 finer (8/14). NGC ID# 23X8, PCGS# 5577

3454 1880 PR65 Cameo PCGS. Type Two Reverse. Thickly frosted motifs and deeply mirrored fields yield outstanding Cameo contrast on this 1880 Gem proof quarter. The eye appeal is compounded by the crisply detailed design elements. A few unobtrusive handling marks over the untuned surfaces likely preclude an even higher grade. Population: 7 in 65 Cameo, 31 finer (8/14).
Ex: Houston Signature (Heritage, 11/2007), lot 60531.
From The Pannonia Collection, Part Two. PCGS# 85581

3455 1882 PR66 PCGS. Briggs 2-B. A medley of warm sky-blue, lavender, light gray, and beige-gold patina adorns both sides of this proof quarter, being slightly deeper on the reverse. An exacting strike leaves sharp delineation on the design elements, and both surfaces are free of distracting marks. Population: 19 in 66 (1 in 66+), 11 finer (8/14).
Ex: Long Beach Signature (Heritage, 2/2009), lot 1122. NGC ID# 23XE, PCGS# 5583

3456 1885 PR64+ Cameo PCGS. CAC. Briggs 3-B. With the scarcity of high-grade business strikes, the proof 1885 Seated quarter is often chosen for date representation. This Plus-graded near-Gem boasts frosty devices and fully mirrored fields. A faint blush of light golden toning is observed over each side. Population: 11 in 64 (1 in 64+) Cameo, 31 finer (8/14). PCGS# 85586

BARBER QUARTERS

3457 1892 MS65 PCGS. CAC. Type One Reverse. An ideal first-year type coin, this Gem 1892 Barber quarter exhibits splashes of rich teal toning in the recesses on each side (most prominent on the reverse), with frosty golden-gray luster over the remainder of the surfaces. The strike is sharp throughout, and the preservation is outstanding. NGC ID# 23XT, PCGS# 5601

1894 Barber Quarter, Attractive MS66
One Coin Finer at PCGS

3458 1894 MS66 PCGS. CAC. The 1894 Barber quarter is readily available up to Mint State, and finer examples become scarce. This issue is an unquestionable condition rarity in Premium Gem condition, and PCGS reports only 11 coins in MS66 with just a single coin finer (8/14). Luminous luster shines through pastels shades of blue-green and orange toning. Both the strike and eye appeal are bold. NGC ID# 23XZ, PCGS# 5607

- 3459 1900-S MS64 Prooflike NGC.** This impressive Choice example offers well-preserved brilliant surfaces that show prooflike reflectivity throughout. The design elements exhibit razor-sharp definition throughout and eye appeal is outstanding. This is the only Prooflike example certified by NGC (9/14). NGC ID# 23YM, PCGS# 5627

**1901-O Quarter, Frosty MS64
Exceptionally Sharp**

- 3460 1901-O MS64 PCGS. CAC.** The 1901-O often takes second place next to its S-mint counterpart, yet the New Orleans issue is a better date in its own right. This Choice example is remarkably well-struck for the facility, with full detail on Liberty's hair, the shield, and the arrow fletchings. Frosty luster blankets the fully brilliant and eye-appealing surfaces, and marks are negligible. Population: 13 in 64, 12 finer (8/14). NGC ID# 23YP, PCGS# 5629

- 3461 1901-S — Reverse Scratched — ANACS. Good Details, Net Fair 2.** All peripheral stars and letters are distinct from the rim. The date and mintmark are unmistakable. A pearl-gray key-date example with several lengthy pinscratches on the reverse, perhaps made by an unbelieving finder. NGC ID# 23YR, PCGS# 5630

**1901-S Quarter, Good 4
'King of the Barber Quarters'**

- 3462 1901-S Good 4 PCGS.** A low mintage (72,664 coins), extensive circulation in West Coast commerce, and minimal interest in mintmarked coins among contemporary collectors make this the king of the Barber quarters. This well-worn example shows light gray patina with darker steel-gray toning in the recesses. The RIB in PLURIBUS and the U in UNUM are visible. Both the date and mintmark are clear. A smooth coin, virtually devoid of interior detail. NGC ID# 23YR, PCGS# 5630

**1905-S Quarter, MS65
Conditionally Rare**

- 3463 1905-S MS65 NGC.** The 1905-S is one of the less plentiful S-mint Barber quarters. Only 1.8 million pieces were produced, most of which entered circulation and stayed there. Gems are surprisingly rare with finer pieces equally so. This lustrous piece displays light grayish-blue patina with orange-gold and lavender accents, and the design elements are sharply defined throughout. What appears to be a squiggly toning streak extends from Liberty's cheek beneath the nose into the field. Census: 7 in 65, 7 finer (9/14). Ex: ANA Signature (Heritage, 7/2005), lot 6066. NGC ID# 23Z4, PCGS# 5641

**1908-O Barber Quarter
Rare Premium Gem Example**

- 3464 1908-O MS66 PCGS.** The obverse of this piece shows soft lilac-gray color, with peripheral lime-green, ice blue, and orange-brown hues, and the reverse displays mostly brilliant surfaces. The well-defined design elements show only a touch of softness at the centers. Overall, a well-preserved example of a conditionally challenging issue. Population: 13 in 66 (2 in 66+), 1 finer (8/14). NGC ID# 23ZE, PCGS# 5651

**1911-S Quarter, MS66
Rare Any Finer**

- 3465 1911-S MS66 NGC. CAC.** A number of examples of this date have been certified at the MS66 grade level compared to other issues of the period, though its rarity in finer condition keeps demand for these Premium Gem examples quite high. The example here offered shows nearly undisturbed, satiny surfaces, with a small tick on the shield being the only flaw of note. Traces of light golden color are seen over otherwise brilliant surfaces, while the design elements are sharply impressed. Census: 80 in 66 (3 in 66+), 9 finer (8/14). NGC ID# 23ZR, PCGS# 5661

- 3466 1913-S Good 6 PCGS.** From an extremely low 20th century mintage of 40,000 pieces, the 1913-S Barber quarter is prized by collectors in all grades and conditions. This evenly worn example retains all lettering in the legends and date intact, but LIBERTY is worn smooth. NGC ID# 23ZW, PCGS# 5666

PROOF BARBER QUARTERS

- 3467 1892 PR65 Cameo PCGS.** Type Two Reverse. Razor-sharp definition shows on all design elements and the frosty devices contrast boldly with the deeply mirrored fields. No mentionable distractions are evident. Population: 17 in 65 (1 in 65+), 28 finer (9/14). PCGS# 85678
- 3468 1892 PR65+ Cameo NGC.** CAC. Type Two Reverse. Traces of light golden color accent each side of this starkly contrasted Cameo proof. The strike is tack-sharp, and only a few wispy hairlines in the fields preclude an even finer grade. Census: 26 in 65 Cameo (1 in 65+ Cameo), 42 finer (8/14). PCGS# 85678

1894 Barber Quarter, PR67 Beautifully Preserved Specimen

- 3469 1894 PR67 NGC.** At first glance, this elegant Superb Gem proof appears satiny, but closer examination reveals a considerable degree of watery reflectivity in the obverse fields. The reverse displays a full coating of earth-toned olive and pastel orange patina that fails to subdue the equally lively reflectivity in the reverse field areas. Fully struck and carefully preserved, with no surface marks that are visible to the unaided eye. Census: 26 in 67 (2 in 67 ★), 5 finer (8/14). NGC ID# 2429, PCGS# 5680

1896 Quarter, PR67 Cameo An Immensely Appealing Proof

- 3470 1896 PR67 Cameo NGC.** CAC. Fantastically reflective in the carefully preserved fields with moderate frost across the devices, this crisply detailed Superb Gem also boasts subtle golden accents at the margins, while a hint of violet toning appears at the word TRUST on the obverse. From a mintage of 762 pieces, but rarely found this well-preserved. Census: 26 in 67 Cameo (2 in 67+ Cameo, 1 in 67+★ Cameo), 9 finer (9/14). Ex: Dallas Signature (Heritage, 10/2008), lot 707. PCGS# 85682
- 3471 1900 PR64 PCGS.** Delicately toned in orange and russet hues, this near-Gem proof displays expectedly razor-sharp definition and a moderate degree of contrast. A tick on Liberty's nose and another below the eye limit the grade. Population: 55 in 64, 62 finer (8/14). NGC ID# 242F, PCGS# 5686

1900 Barber Quarter, PR67 Cameo Needle-Sharp Motifs

- 3472 1900 PR67 Cameo NGC.** This turn-of-the-century Barber quarter displays blinding reflectivity over silver-white surfaces on the obverse and amidst light lemon-gold toning on the reverse. The mint frost on the reverse devices appears somewhat thicker and on its own would likely have garnered an Ultra Cameo designation. A nice, mark-free example. Census: 16 in 67 Cameo (2 in 67 ★ Cameo), 6 finer (8/14). PCGS# 85686

1901 Barber Quarter, PR67 Cameo Brilliant Fields, Frosty Devices

- 3473 1901 PR67 Cameo NGC.** The 1901 quarter comes with a proof mintage of 813 pieces, of which a fairly large number have survived to the present day. As expected, Cameos are in the minority, especially in the higher grade levels. This piece is exquisitely struck, with well-preserved surfaces that exhibit just a trace of milky-gray reverse color. Census: 18 in 67 Cameo (4 in 67 ★ Cameo), 5 finer (8/14). Ex: ANA Signature (Heritage, 3/2008), lot 549. PCGS# 85687

- 3474 1904 PR66 PCGS.** Deep reflectivity in the fields illuminates splashes of sun-gold, aquamarine, and pale lavender toning, with the colors more vibrant on the obverse. The strike is crisp and the surfaces are free of discernable marks. Population: 29 in 66, 10 finer (8/14). NGC ID# 242K, PCGS# 5690

- 3475 1906 PR66 NGC.** Vivid multicolor toning in hues of sun-gold, violet, royal-blue, aquamarine and pale rose beautifully highlight glassy fields and razor-sharp design elements. A small, well-hidden mark near Liberty's ear appears to be the only grade-limiting flaw on this immensely appealing Premium Gem. Census: 48 in 66, 39 finer (8/14). NGC ID# 242M, PCGS# 5692

- 3476 1909 PR65 PCGS.** Beautifully preserved surfaces and razor-sharp details are defining attributes of this Gem proof quarter. Vivid splashes of gold, violet, green, and royal-blue melt into both sides, while the fields display heavy mirroring when tilted under a light. Visually appealing and high-end for the grade. NGC ID# 242R, PCGS# 5695

- 3477 1909 PR66 Cameo NGC.** This date saw a large business strike mintage of 9.3 million pieces, but the proof issue consisted of a meager number of 650 specimens. Only 37 examples from that mintage have been graded as Cameo coins, at NGC. This is a tremendously appealing Premium Gem with razor-sharp devices and beautifully clean surfaces. Speckled violet-red patina is prominently evident on each side, where the fields are highly reflective and the central motifs are frosted. Census: 9 in 66 Cameo, 12 finer (8/14). PCGS# 85695

3478 1910 PR65 Cameo NGC. The Mint struck 551 Barber quarter proofs in 1910, one of the lower emissions in the series. This blazing Gem proof shows bold white-on-black contrast and pinpoint definition over the design elements. Census: 10 in 65 Cameo, 52 finer (8/14). PCGS# 85696

3479 1912 PR65 Cameo NGC. Both sides of this late-date Barber quarter proof offer pleasing cameo contrast. A handful of light toning spots occur in the left obverse field, and dusky champagne patina covers the upper-right quadrant of the reverse. Census: 14 in 65 Cameo (1 in 65+ Cameo), 20 finer (8/14). PCGS# 85698

3480 1914 PR64 PCGS. Mottled forest-green and stone-gray toning encompass this intricately struck and flashy near-Gem. Just 380 pieces were issued, the lowest mintage proof quarter since 1858.
Ex: *Long Beach Signature* (Heritage, 1/2004), lot 5792. NGC ID# 242W, PCGS# 5700

STANDING LIBERTY QUARTERS

3481 1917 Type One MS66 Full Head PCGS. A sharply detailed Premium Gem example of the short-lived Type One design, with Full Head definition and well-preserved lustrous surfaces that show no mentionable distractions. A few hints of pale gold toning enhance the outstanding eye appeal. NGC ID# 242Z, PCGS# 5707

1917-S Quarter, MS65 Full Head First-Year Type Two Example

3482 1917-S Type Two MS65 Full Head PCGS. A delightful Gem example from the first year of the Type Two design, with well-detailed design elements and Full Head definition. The well-preserved lustrous surfaces show just a few hints of pale gold toning. Housed in a green label holder. Population: 62 in 65 (1 in 65+) Full Head, 23 finer (8/14). NGC ID# 2436, PCGS# 5719

1918 Quarter, MS66 Full Head Exceptional Type Representative

3483 1918 MS66 Full Head PCGS. The issue is frequently encountered with Full Head detail, but this Premium Gem is about as good as it gets. Liberty's head, the chain main, and rivets are all fully defined, as are the vertical shield lines and the eagle's wing feathers. Each side glistens beneath a veil of faint violet patina, further enhancing the eye appeal. This is a truly exceptional type representative. Population: 42 in 66 (1 in 66+) Full Head, 12 finer (8/14). NGC ID# 2437, PCGS# 5721

1918-D Quarter, MS65 Full Head Noted Strike Rarity

3484 1918-D MS65 Full Head PCGS. The 1918-D is a noted strike-rarity in the series, and this attractive Gem does show some of the typical softness on Liberty's torso and the eagle's feathers. However, this piece exhibits Full Head definition and well-preserved lustrous surfaces with pleasing highlights of champagne-gold toning. Population: 52 in 65 (2 in 65+) Full Head, 20 finer (8/14). NGC ID# 2438, PCGS# 5723

1918/7-S Quarter, XF Sharpness Sole Overdate of Series

3485 1918/7-S FS-101 — Reverse Scratched — ANACS. XF Details, Net VF20. The crossbar and downstroke of the underdigit 7 is blatant inside the 8. This moderately circulated example has a blended sea-green and gunmetal obverse. The reverse is lavender-red and olive-gray. Essentially unabraded apart from a small, bright pinscratched cluster above the first L in DOLLAR. PCGS# 395949

3486 1919-D AU58 NGC. CAC. As usual, Liberty's head is not fully defined, though the coin is remarkably well-struck otherwise, with only a hint of highpoint friction on the central devices. This luminous silver-gray coin shows a clear date, though the numerals are flat.
Ex: *Central States Signature* (Heritage, 4/2008), lot 910. NGC ID# 243C, PCGS# 5730

3487 1921 AU58 NGC. CAC. Light splashes of gold and orange color visit lustrous silver surfaces toned faintly in gray. Scarcely worn, but with typical striking softness on Liberty's head. The shield and eagle's wing feathers are better-defined than often seen.
Ex: *Long Beach Signature* (Heritage, 6/2010), lot 713. NGC ID# 243H, PCGS# 5740

**1921 Standing Liberty Quarter, MS64
Important Series Key Date**

- 3488 1921 MS64 PCGS.** Barely more than 1.9 million quarters were struck in 1921, making this date an absolutely and conditionally rare key issue in the Standing Liberty series. This is a pleasing near-Gem example with untoned surfaces that are beautifully preserved and free of distracting marks. NGC ID# 243H, PCGS# 5740

**1921 Quarter, MS66
Impressive and Appealing**

- 3489 1921 MS66 PCGS.** Just shy of Full Head status, with a few weak shield rivets, this untuned Premium Gem is intensely lustrous and impressively preserved, showing just two or three minute ticks that are indistinguishable to the unaided eye. A visually appealing example of this important, low-mintage key date. Population: 23 in 66, 1 finer (8/14). NGC ID# 243H, PCGS# 5740

- 3490 1923-S AU55 PCGS.** Bright, untuned surfaces exhibit frosty luster and few noteworthy marks. The high points of this Choice AU example show areas of strike shallowness and friction from brief circulation, yet it remains nice example from one of the most elusive dates in the Standing Liberty series. NGC ID# 243K, PCGS# 5744

- 3491 1924 MS66 PCGS. CAC.** This spectacular Premium Gem displays well-preserved brilliant surfaces that radiate vibrant mint luster and sharply detailed design elements throughout. Eye appeal is extraordinary. Population: 31 in 66 (6 in 66+), 14 finer (8/14). NGC ID# 243L, PCGS# 5746

**1924-D Quarter, MS67
Conditionally Rare**

- 3492 1924-D MS67 PCGS. CAC.** This 1924-D Standing Liberty quarter shows the characteristically soft detail on the head and date, but the well-preserved surfaces exhibit vibrant mint luster and pleasing shades of golden-brown and ice-blue toning. Visual appeal is unusually strong for the issue. Population: 7 in 67, 0 finer (8/14). NGC ID# 243M, PCGS# 5748

**1924-D Quarter, MS65 Full Head
Sharp Throughout**

- 3493 1924-D MS65 Full Head PCGS.** The 1924-D Standing Liberty quarter is a challenging issue in Gem Full Head grades, with finer representatives being rare. This example displays not only a sharp Full Head, but also above-average definition on the shield lines and rivets, stars, and the leading edge of the eagle's left (facing) wing. Faint lavender and light golden hues grace well-preserved surfaces on each side. Population: 49 in 65 Full Head, 18 finer (8/14). NGC ID# 243M, PCGS# 5749

- 3494 1927-D MS65 Full Head NGC. CAC.** The 1927-D is a challenging issue in Gem-quality Full Head, though it is somewhat overshadowed by the exceedingly rare 1927-S in that grade. This example exhibits some of the usual weakness on the shield rivets, Liberty's toes, and the leading edge of the eagle's left (facing) wing, though the overall definition is above-average for the issue. Soft lavender-gray and ice-blue hues encompass each side, with deeper russet accents seen periodically around the peripheries. Census: 45 in 65 Full Head, 9 finer (8/14). NGC ID# 243V, PCGS# 5763

- 3495 1929-S MS66 Full Head NGC. CAC.** The 1929-S is one of the few San Francisco issues in the Standing Liberty quarter series that can be easily obtained in Full Head grades, though its availability declines somewhat in Premium Gem condition, and finer pieces are rare. This Example displays shimmering mint bloom beneath splashes of olive, orange-gold, and pale champagne toning. The surfaces are nearly pristine, though Liberty's abdomen and the lower-left shield rivets show some of the usual weakness. Housed in a prior generation holder. NGC has certified only 32 numerically finer Full Head examples (9/14). NGC ID# 2444, PCGS# 5777

- 3496 1930-S MS66 Full Head PCGS.** Radiant, frost-white mint bloom engulfs each side of this Premium Gem Full Head quarter. The shield and stars exhibit above-average definition for the issue, and only a few minutes ticks on each side preclude an even finer grade. PCGS has encapsulated only 19 numerically finer Full Head examples (8/14). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

1932-D Washington Quarter, MS64+ Elusive Key-Date Denver Issue

- 3497 1932-D MS64+ PCGS. CAC.** Of the two key-date issues in the Washington quarter series, the 1932-D had a slightly higher mintage than did the 1932-S (more than 436,000 pieces versus 408,000 pieces), but it is also the scarcer issue by a significant margin in Mint State grades. This high-end Choice example displays razor-sharp design definition and nearly unabraded surfaces. Faint hues of champagne, ice-blue and pale lavender toning accent the frosty, vibrant surfaces. Finer pieces are scarcely seen. NGC ID# 2448, PCGS# 5791

1934 Light Motto Quarter, MS67 Immaculate and Beautifully Toned

- 3498 1934 Light Motto, FS-401, MS67 PCGS.** The so-called Light Motto variety of this issue displays soft definition on IN GOD WE TRUST. This Superb specimen also shows intense mint luster and beautiful sky-blue and pale gold toning, accented by trace amounts of mint-green color. The surfaces are immaculate on both sides. The serious Registry Set collector of this series should pay close attention to this lot. Population: 21 in 67 (3 in 67+), 0 finer (8/14). PCGS# 146000
- 3499 1935-D MS67 PCGS.** A mere hint of lemon-gold and lilac toning hovers over the brilliant-white surfaces of this pristine Superb Gem quarter. No examples are certified numerically finer at either PCGS or NGC, nor are any likely to exceed the eye appeal of this brightly lustrous coin. Population: 21 in 67 (1 in 67+), 0 finer (9/14). NGC ID# 244E, PCGS# 5798
- 3500 1935-S MS67 PCGS.** A fully brilliant Superb Gem that boasts potent luster and a bold strike. Immaculate except for a stray faint mark on the cheek. Population: 29 in 67, 0 finer (8/14). NGC ID# 244F, PCGS# 5799

- 3501 1937-S MS67 PCGS.** For the Registry Set collector, this Superb Gem is a must-have. Vibrant frost-white mint bloom envelops nearly pristine surfaces on each side, and a razor-sharp strike completes the immense visual appeal. Population: 32 in 67 (2 in 67+), 0 finer (8/14). NGC ID# 244M, PCGS# 5805

- 3502 1938 MS67 PCGS. CAC.** A fabulous Superb Gem example of this early date, with fully struck motifs and bright satiny mint luster. The mark-free surfaces display appealing pastel coloration, in an iridescent rainbow pattern on each side. Population: 52 in 67 (4 in 67+), 0 finer (8/14). NGC ID# 244N, PCGS# 5806

1950-S/D Washington Quarter, FS-601, MS66+ Flashy, Intensely Lustrous Example

- 3503 1950-S/D FS-601, MS66+ PCGS.** An intensely lustrous quarter with freckles of russet and olive patina on each side that fail to diminish the powerfully flashy sheen from the well-preserved, mark-free surfaces. One of two overmintmarks in the Washington quarter series; listed on page 176 of the 2015 *Guide Book*. Population: 36 in 66 (2 in 66+), 5 finer (8/14). PCGS# 145639

1959-D Quarter, MS67 Exceptional High-Grade Example

- 3504 1959-D MS67 PCGS.** A large mintage of more than 62 million pieces was achieved by the Denver Mint in this end-of-the-decade year. Very few of the survivors have been graded as Superb Gems, however, making this example an exceptional coin for the serious Registry Set collector. Well-struck with full satin luster, light peripheral toning, and clean, unmarked surfaces. Population: 14 in 67, 0 finer (8/14). NGC ID# 246J, PCGS# 5867

PROOF WASHINGTON QUARTERS

- 3505 1936 PR66 PCGS.** Both sides show delightful champagne toning with dark peripheral patina on the obverse. This is an exceptional piece, nearly the finest that PCGS has certified. In fact, the service has graded just eight finer examples (8/14). The surfaces are exceptionally attractive, and the overall design definition is especially bold.
Ex: ANA *Signature* (Heritage, 3/2008), lot 5975. NGC ID# 27HN, PCGS# 5975
- 3506 1936 PR66 NGC.** From a first-year proof mintage of only 3,837 pieces, this sharply detailed Premium Gem displays streaky tan patina over the reflective surfaces. Only 21 coins have been certified in higher numeric grades at NGC (8/14). NGC ID# 27HN, PCGS# 5975

3507 1955 PR68 Deep Cameo PCGS. This magnificent PR68 Washington quarter possesses incredible eye appeal to complement the high technical grade. The razor-sharp frosty design elements create profound cameo contrast with the deeply mirrored fields and the brilliant surfaces are impeccably preserved. Population: 23 in 68 Deep Cameo, 0 finer (9/14). NGC ID# 27HZ, PCGS# 95987

EARLY HALF DOLLARS

3508 1803 Large 3, Small Reverse Stars, O-101, R.3, VF35 NGC. Original olive-gray patina encompasses both sides, but is noticeably deeper on the obverse. The borders are sharp, and the overall central detail is bold for the grade. An attractive Draped Bust type coin, with no discernable adjustment marks. PCGS# 39270

3509 1806 Knob 6, Large Stars XF40 PCGS. O-105, R.2. The T in LIBERTY is boldly recut, and the top arrow feather is extended into the eagle's tail on this plentiful variety. The obverse features the Knob 6 date style. This example has lovely surfaces with pewter-gray patina and peripheral gray-green toning. PCGS# 39304

3510 1806 Pointed 6, No Stem — Improperly Cleaned — NGC Details. AU. O-109, R.1. The only Pointed 6, No Stem die marriage for the year 1806, the O-109 is perennially popular and *Guide Book*-listed. The pinkish-gray surfaces on this piece are a bit lackluster, and a noticeable scrape runs from near star 3 to Liberty's lower hair curls. On the other hand, the surfaces are well-detailed and show evidence of clashing on the lower obverse, and the stars are drawn toward the rims, a later die state.

1807 Draped Bust Half, O-102, XF45 Deep Original Patina

3511 1807 Draped Bust, O-102, R.2, XF45 PCGS. CAC. A moderately available variety from the final year of the Draped Bust type. This Choice XF example displays original olive and lavender-gray patina over each side, with smooth surfaces and no discernable adjustment marks. The denticles are complete on the reverse, but grow weak around the upper obverse border. Central definition remains pleasing for the grade. PCGS# 39339

BUST HALF DOLLARS

3512 1807 Capped Bust, Large Stars, 50 Over 20 AU50 ANACS. O-112, R.1. A popular *Guide Book* variety, with the outer loop of an underlying 2 plainly visible to the left of the upright of the 5 in 50 C. This example exhibits mottled lavender-gray, golden-green, and steel-blue toning over each side, with unusually sharp definition in border denticles, stars, and Liberty's hair. An upper-end coin for the grade. PCGS# 39356

3513 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU50 NGC. CAC. The 5 in the denomination is punched over a 2, and the 1 in the date shows both serifs. Dappled olive-green and golden-orange toning hugs the peripheries and yields to light silver-gray centers. Mild blending from a brief stay in circulation occurs over the devices, and a few ticks are scattered over somewhat granular surfaces. Census: 8 in 50, 45 finer (8/14). PCGS# 39356

3514 1811 Large 8, O-103, R.3, AU55 PCGS. This brilliant, untoned Choice AU half dollar is a middle die state that shows extensive obverse and reverse clash marks, but no evidence of the late-state die crack through the date. Scattered marks are consistent with the grade. PCGS# 39423

1811 Half Dollar, Lightly Toned AU58 O-106, Small 8 Variety

3515 1811 Small 8, O-106, R.3, AU58 PCGS. A diagonal die line off the right margin of the shield and a series of die cracks around the reverse legends confirm the Overton 106 variety. Faint powder-blue toning complements golden-gray overall. The design elements exhibit good definition, though Liberty's lower hair curls and a majority of the eagle show mild strike incompleteness. Exceptionally smooth surfaces for the grade. PCGS# 39429

3516 1817/3 O-101, R.3 — Environmental Damage — PCGS Genuine. AU Details. This piece is well-struck, with only light wear over the high points of the design. Deep charcoal-blue toning encompasses much of each side, growing even deeper around the right obverse stars, and accounting for the details grade from NGC. The overdate feature is bold. PCGS# 39511

3517 1820 Square Base 2, Large Date, No Knob, O-106, R.1, AU55 PCGS. CAC. The O-106 variety is attributed by a die line at the top of ME in AMERICA. This partly lustrous Choice AU example exhibits a ring of golden-orange and purple-blue toning around the borders, while the interiors retain their brilliance. The devices are well-detailed with slight high-point friction. PCGS# 39569

3518 1824/4 O-110 AU53 PCGS. CAC. PCGS incorrectly calls this an 1824/1 overdate. Both sides have light silver surfaces with splashes of pale gold toning. PCGS Population for O-110: 2 in 53, 7 finer (8/14). PCGS# 39644

1824 Half Dollar, O-113, MS64 In a First Generation Holder

3519 1824 O-113, R.1, MS64 PCGS. CAC. An easily obtainable variety, characterized in part by an irregular die break above the eagle's left (facing) shoulder and a shallow die bulge on Liberty's neck in front of the hair curl. The strike is sharp on the central devices, though several of the stars lack complete centrals. Radiant luster illuminates a faint blush of golden toning, while the surfaces exhibit only a few minute, grade-consistent flaws. PCGS# 39634

**1825 Half Dollar, O-102, MS64
Semiprooflike Obverse Fields**

3520 1825 O-102, R.1, MS64 PCGS. One of the more plentiful varieties of this issue. As a date, the 1825 half dollar is only marginally available at the MS64 grade level, and finer pieces are rare. This Choice example displays substantial semiprooflike mirroring in the obverse fields and vibrant luster over the reverse. The strike is bold and there are minimal abrasions. Rich ocean-blue, violet, and orange-gold toning blankets each side, beautifully completing the visual appeal. PCGS# 39648

3521 1827/6 O-102, R.1, AU58 PCGS. This overdate is visible without magnification. Such naked-eye varieties among the most popular varieties with collectors since they are so easy to spot. This near-Mint example has delicate champagne toning over nicely detailed motifs, showing virtually full luster. PCGS# 39752

3522 1827 Square Base 2, O-120a, R.3, AU58+ PCGS. An essentially brilliant near-Mint half dollar with faint champagne toning on both sides, and accompanying gold splashes near the borders. The reverse has a light die crack through part of the legend on this late die state example. PCGS# 39718

3523 1829 Small Letters, O-108a, R.3, MS62 NGC. CAC. The top of the 5 in 50 is recut and the second A in AMERICA is filled. This Uncirculated Capped Bust half is undeniably high-end for the grade. Sharply struck and carefully preserved, beautiful multicolor toning embraces each side, and luster radiates throughout. PCGS# 39788

3524 1830 Small 0, O-117, R.2, MS63 NGC. Two die lines form a cross on Liberty's forecurl, and the 5 in the denomination is slightly recut. Apricot-gold and lilac-gray shades adorn this coruscating and unmarked Select half dollar. The strike shows minor blending on the high points. Among the nicest survivors of this collectible Overton marriage. PCGS# 39828

**1831 Capped Bust Half, MS64
O-102, Lustrous Rose-Gray Patina**

3525 1831 O-102, R.1, MS64 PCGS. CAC. Identified by a partially filled N of UNITED and with the center line of stripe 1 in the shield thick and bowed, this variety is known for crude crossbars in the shield and indistinct edges on the left and right shield edges. Weakness at the second T of STATES and the scroll beneath is typical of the O-102 die pair. The near-Gem grade of this lustrous, rose-gray half dollar is significant because just three examples of the variety are known numerically finer according to Donald Parsley's most recent reference and Steve Herman's current Auction Prices Realized. PCGS# 39838

**1831 Capped Bust Half, MS64
O-104, Concentric Ring Toning**

3526 1831 O-104, R.1, MS64 NGC. Beautiful concentric ring toning progresses from lavender-orange centers to blue, green, and violet peripheries. Vibrant luster radiates throughout. The strike is incomplete over the lower reverse, but the remaining motifs are well-detailed. Housed in a former generation holder. Including all varieties, NGC has certified just 53 coins numerically finer (8/14). PCGS# 39840

3527 1834 Large Date, Small Letters, O-105, R.1, MS63 NGC. Recutting on the ATES of STATES and a prominent line between that word and OF are diagnostic for the Overton variety. Butter-gold toning endows much of this unabraded and lustrous example, though the centers are mostly brilliant.
Ex: Rosemont Central States (Heritage, 4/2008), lot 1084. PCGS# 39909

3528 1836 50/00, Lettered Edge, O-116, R.2, AU58 NGC. The 5 in the denomination is punched over an underlying 0. Golden-gray patina reveals spectacular multicolor iridescence when examined with a loupe, and remaining luster shines through the toning. The stars and hair curls are lightly impressed, as are the arrow fletchings and wing tips. PCGS# 39964

REEDED EDGE HALF DOLLARS

**1838 Reeded Edge Half Dollar, MS63
Excellent Type Coin, GR-13**

3529 1838 MS63 PCGS. CAC. GR-13, R.1. The reverse die was modified in several subtle ways in 1838, including changing the denomination from 50 CENTS to HALF DOL. This attractive Select example is sharply detailed in most areas, but the slightest touch of softness shows on some star centers. The surfaces are blanketed in mellow shades of steel-blue and golden-brown toning and only a few minor contact marks are evident. Eye appeal is outstanding. Population: 65 in 63, 63 finer (9/14). NGC ID# 24G5, PCGS# 6177

1839-O Half Dollar, GR-1, Lustrous AU55

- 3530** 1839-O AU55 PCGS. GR-1, R.1. A late die state, with numerous die cracks on each side. This is the most available variety of the issue, though any 1839-O half dollar is elusive in the finer AU grades and increasingly so in Mint State. This Choice AU representative displays bright silvery-gray centers with light golden toning around the peripheries. High-point wear is almost nonexistent. The mintmark is recut north, a diagnostic of this variety, the only use of both dies. Population: 26 in 55, 51 finer (8/14). NGC ID# 24G7, PCGS# 6181

SEATED HALF DOLLARS

- 3531** 1841 MS62 PCGS. WB-101. Upon close inspection, violet-gray patina turns to wonderful pastel shades of mint-green, powder-blue, lilac, rose, and orange. This sharply impressed and almost prooflike example shows radiant luster beneath the toning and just a few shallow marks scattered over each side. The visual appeal is strong. Population: 2 in 62, 11 finer (8/14). NGC ID# 24GR, PCGS# 6236

**1848 Seated Half, MS64
First Generation 'Rattler' Holder**

- 3532** 1848 MS64 PCGS. WB-101. This sharply struck near-Gem represents a better date in the Seated half series with a mintage of only 580,000 coins. Liberty's portrait is fully defined, as is the eagle. Only faint incompleteness occurs on a few obverse stars. Light russet toning colors the peripheries, and the centers are brilliant and lustrous. Unquestionably high-end for the grade and housed in a first generation holder. Population: 6 in 64, 4 finer (8/14). NGC ID# 24HC, PCGS# 6260
- 3533** 1848-O AU58 PCGS. CAC. WB-101, Die Pair 5, R.3. Subtle earth tones are pleasingly draped over the still-lustrous surfaces of this attractive near-Mint specimen. A boldly detailed example showing just a small degree of softness on Liberty's head and the nearby stars. A conditionally scarce representative of this New Orleans issue that is rare in Mint State. Population: 13 in 58, 22 finer (8/14). NGC ID# 24HD, PCGS# 6261

**1849 Seated Half Dollar, WB-104, MS64
One Coin Numerically Finer at PCGS**

- 3534** 1849 MS64 PCGS. CAC. WB-104, R.3. The 1 in the date is faintly repunched, with the upper flag of the underlying digit visible to the north of the primary. As a date, the 1849 half dollar is scarce in Mint State, and coins grading finer than this example are prohibitively rare. This piece exhibits bold design definition and satiny luster. The obverse displays delicate toning in shades of lime-green, champagne, and orange-gold, while the reverse is encompassed by mottled amber and olive-gray hues. Mild strike doubling is noted on the date and stars, a common characteristic of this variety. Population: 17 in 64, 1 finer (8/14). NGC ID# 24HE, PCGS# 6262

- 3535** 1849-O MS61 PCGS. WB-101, Die Pair 13, R.3. This Bugert variety shows a slender die crack diagonally up from Liberty's shoulder to the chin, continuing from the back of her head to the rim near star 8. The reverse mintmark position is high and to the left. This example does not display the other diagnostic cracks or die rust lumps on the reverse as described by Bugert, except for traces of a crack from the lower left foot of H in HALF through the two lowest leaves; indicating a very early state of the reverse die. This piece, which is rarely offered in Uncirculated condition as a date, remains untuned with mildly scuffy surfaces that restrict the numeric assessment.
Ex: FUN Signature (1/2006), lot 2714. NGC ID# 24HF, PCGS# 6263

**1850-O WB-101 Seated Half, MS64
Conditionally Scarce New Orleans Issue**

- 3536** 1850-O MS64 PCGS. WB-101, Die Pair 7, R.3. The mintage of nearly 2.5 million pieces was plentiful for a New Orleans Seated half dollar, although few examples were saved of the issue in high grades. The present coin is well struck for a New Orleans half, with bold star centers and Liberty's portrait is sharp from head to foot. The reverse is prooflike, with the eagle boldly rendered. Attractive aqua, violet, and orange-gold toning covers both sides. Population: 26 in 64 (1 in 64+), 6 finer (9/14). NGC ID# 24HH, PCGS# 6265
- 3537** 1853 Arrows and Rays AU58 PCGS. This piece combines the popularity of a one-year type issue with the similarly popular near-Mint grade. Both sides are brilliant and untuned with trivial marks on the silver surfaces. Light clash marks enhance the importance of this example. NGC ID# 24JJ, PCGS# 6275

3538 1853 Arrows and Rays MS61 NGC. Soft, frosty silver luster resides beneath delicate champagne toning on this pleasing Arrows and Rays half dollar struck after the provisions of the February 1853 coinage act were implemented. The large mintage led to extensive die use as indicated by the cracked obverse of this piece. NGC ID# 24JJ, PCGS# 6275

3539 1854 Arrows MS62 PCGS. The design elements of this attractive MS62 example are sharply detailed in most areas, but some flatness is evident on some star centers. The lightly marked surfaces show a few clash marks and die cracks. Population: 29 in 62, 66 finer (8/14). NGC ID# 24JL, PCGS# 6279

1861-O Half Dollar, Colorful MS64 Struck Under the Authority of the Confederacy

3540 1861-O MS64 PCGS Secure. WB-104, Die Pair 15, R.2. Struck under the authority of the Confederate States of America, this Choice Seated half features the so-called "Speared Olive Bud" variety with two parallel lines that run through the olive bud. Curiously, officials at the mint dusted off obverse 1, which had previously been used for the federal and state issues, to strike the last of the 1861-O halves. Swirling luster illuminates surfaces toned in variegated shades of blue, green, red, orange, and yellow. The devices are sharply defined with minor softness on stars 5 through 8. Including all varieties, PCGS has certified 31 coins in MS64 and only 14 examples finer (8/14). NGC ID# 24J8, PCGS# 6303

3541 1869 MS63 PCGS. WB-101. Sharply struck throughout, with a pale lavender and golden-orange patina. Scattered light abrasions on each side limit the grade. Population: 14 in 63, 18 finer (8/14). Ex: *New York Signature* (Heritage, 7/2004), lot 6510; *Long Beach Signature* (Heritage, 9/2004), lot 6662. NGC ID# 24JX, PCGS# 6325

1869-S Half Dollar, MS64 Conditionally Rare Issue

3542 1869-S MS64 PCGS Secure. WB-101, Die Pair 3, R.3. A late die state, as evidenced by reverse die cracks and faint signs of die fatigue around the obverse periphery. As a date, this issue is scarce in all grades and rare in Mint State. This piece displays satiny luster with soft golden toning overall. Some usual weakness is noted on Liberty's forehead and the adjacent star, as well as on the reverse around IN GOD, though the motifs are otherwise crisp. The surfaces are attractively well-preserved, with no unsightly abrasions. Population: 7 in 64, 3 finer (8/14). NGC ID# 24JY, PCGS# 6326

3543 1873-CC Arrows VF25 PCGS. WB-103, Die Pair 7, R.4. Large CC. A pleasing VF example of this scarce Bugert variety, with ample details for the grade. Slate-gray toning yields to olive patina near the peripheral devices. A slight reeding mark is noted on the left reverse field. NGC ID# 24L8, PCGS# 6344

3544 1876-CC MS63 PCGS. WB-102, Die Pair 12, R.3. This is the only use of reverse 1. It shows a medium CC mintmark and a distinct "alpha" lintmark in the feathers below the shield. The motifs are thickly frosted and the fields are remarkably mirrored, providing this sharp Select piece with undeniable prooflikeness. Light toning occurs peripherally and leaves the centers fully brilliant. Population: 21 in 63, 33 finer (8/14). NGC ID# 24KH, PCGS# 6353

3545 1877-S MS64 PCGS. CAC. WB-104, Die Pair 16, R.4. This Choice example is boldly struck, with notable definition on the olive leaves and Liberty's head. As is seen on many high-grade examples of this variety, the fields display significant semiprooflike mirroring. Abrasions, however, are minimal, and pale golden toning blankets each side. PCGS has seen 53 numerically finer submissions (8/14). NGC ID# 24KM, PCGS# 6357

PROOF SEATED HALF DOLLARS

3546 1863 PR63 NGC. From a mintage of only 460 proofs, this Select representative offers amazing multicolor toning mottled over each side. Shades include purple-pink, jade-green, and golden-brown. The strike is needle-sharp, and the fields are deeply mirrored on the reverse. Census: 37 in 63, 45 finer (8/14). NGC ID# 27TP, PCGS# 6417

1865 Seated Liberty Half, PR64 Only 500 Pieces Struck

3547 1865 PR64 PCGS. Only 500 proof Seated Liberty half dollars were struck in 1865, the last year of the Civil War. This attractive Choice example exhibits sharply detailed design elements and reflective fields that show only minor signs of contact. A few hints of golden-tan and sky-blue toning are evident on both sides. Population: 50 in 64, 20 finer (8/14). NGC ID# 27TS, PCGS# 6419

3548 1879 PR64 Cameo NGC. Proofs from this issue (1,100 specimens) are in high demand because of the low business strike mintage. Fully brilliant and deeply contrasted, this near-Gem proof possesses outstanding eye appeal and is devoid of any mentionable imperfections. Census: 15 in 64 Cameo (1 in 64+ Cameo, 1 in 64 ★ Cameo), 29 finer (8/14). PCGS# 86440

3549 1888 PR63 PCGS. The razor-sharp definition on each side is impressive, even for a proof specimen. Pleasing, mild field-to-device contrast is evident, although not dramatic enough to result in a Cameo grade designation from PCGS. A few wispy field hairlines limit the grade. NGC ID# 27UP, PCGS# 6449

BARBER HALF DOLLARS

1892 Barber Half, MS65 Attractive First-Year Type Coin

3550 1892 MS65 PCGS. CAC. A beautifully toned example of this first-year Philadelphia issue, this Gem displays hues of green-gold, lavender, and aquamarine beneath dusky silvery-gray toning on each side. The strike is bold, with special notice given to the eagle's talons and right (facing) shoulder. This issue is moderately available in lower Mint State grades, but the certified population drops off noticeably at the Gem level, and finer pieces are scarce. NGC ID# 24LF, PCGS# 6461

3551 1892 Tripled Die Reverse, FS-801, MS65 PCGS. Although not indicated as such on the insert, this Gem representative features the popular tripled die reverse *Cherrypickers'* variety, with strong doubling on the outer legends, several stars, ribbon ends, and arrows. Violet-gray patina graces the razor-sharp devices, while the fields show variegates shades of sea-green, ice-blue, and orange toning. All varieties included, PCGS has graded only 54 numerically finer coins (8/14). PCGS# 145290

1892-O Half Dollar, MS64 Rarely Seen Finer

3552 1892-O MS64 PCGS. CAC. The 1892-O Barber half dollar is a challenging issue in all grades, but is especially sought within the Mint State range. This piece displays frosty golden-gray toning over each side, with wisps of ice-blue and peach color seen when turned in-hand. The surfaces are unusually well-preserved for the grade, though significant weakness of strike is seen on the central eagle feathers and select obverse stars. This softness is not uncommon on this New Orleans issue, and is not overly detracting on this example. Population: 46 in 64 (4 in 64+), 20 finer (8/14). NGC ID# 24LG, PCGS# 6462

3553 1893 MS64 PCGS. Brilliant with strong cartwheel luster. Subtle silver-blue and antique-gold accents visit each side of this attractive near-Gem Barber half. Great detail and eye appeal with only a few generally wispy marks. Population: 38 in 64 (2 in 64+), 26 finer (9/14). NGC ID# 24LK, PCGS# 6465

3554 1893-O MS64 NGC. Ex: Eric P. Newman Collection. One of several elusive O-mint Barber halves, this earlier issue is scarce at the near-Gem level and a rarity any finer. The frosty tan-gray surfaces of this example reveal scattered areas of blue-green, orange, plum, and yellow toning. Census: 33 in 64, 8 finer (9/14). NGC ID# 24LL, PCGS# 6466

3555 1894-S MS64 PCGS. This impressive Choice specimen exhibits sharply detailed design elements and satiny mint luster under shades of greenish-gold and lavender toning. Population: 43 in 64, 14 finer (9/14). NGC ID# 24LR, PCGS# 6470

3556 1897-O VF35 PCGS. With a mintage of just 632,000 coins, the 1897-O Barber half is an elusive date in all grades, and becomes increasingly scarce the higher one advances the grading scale. This Choice VF example exhibits dusky shades of steel and battleship-gray color, with light, even wear and no noteworthy surface flaws. NGC ID# 24LZ, PCGS# 6478

3557 1897-S XF45 ANACS. Ex: Bently Collection. A scarcer issue in virtually all grades, the 1897-S had a mintage of less than 1 million coins. This Choice XF example exhibits bright golden-gray patina with shades of deeper amber toning in the recesses around the border. The devices retain strong detail, despite slight high-point wear. NGC ID# 24M2, PCGS# 6479

1898 Barber Half Dollar, MS65 One of the Finest-Known Examples

3558 1898 MS65 NGC. CAC. An immaculate Gem example of this conditionally rare issue. A mintage of nearly three million coins has not resulted in a large number of high-grade survivors. This piece is well struck and displays variegated original patina. One of the finest-known examples. Census: 15 in 65, 2 finer (8/14). NGC ID# 24M3, PCGS# 6480

1901 Barber Half, MS65 Elusive This Well-Preserved

3559 1901 MS65 PCGS. CAC. Mottled olive, gold, and pale rose hues grace each side of this well-struck 1901 Barber half. The reverse contributes some smoky hues along with mottled silver areas, but the strike is quite sharp throughout. Despite its status as a relatively high-mintage P-mint issue, the 1901 is elusive in Gem and finer grades. Population: 10 in 65, 6 finer (8/14). NGC ID# 24MC, PCGS# 6489

**1907 Half, MS65+
Conditionally Elusive**

3560 1907 MS65+ PCGS Secure. Widely perceived as a common date, the 1907 half dollar becomes quite scarce in MS65, and finer examples are decidedly rare. Besides excellent preservation, this Plus-graded Gem also boasts frosty golden-gray luster, with faint hints of pale olive color throughout each side. Slight softness is noted on the eagle's left (facing) leg feathers, though this is hardly detectable with the unaided eye. Population: 30 in 65 (2 in 65+), 5 finer (8/14). NGC ID# 24MY, PCGS# 6508

3561 1908-D MS65 PCGS. Hues of pale tan-gold toning warm much of each side of this Gem 1908-D half dollar. The strike is sharp on the eagle's talons and on the upper-right portion of the shield, and only a few faint luster grazes on the cheek preclude a finer grade. Population: 28 in 65 (1 in 65+), 12 finer (8/14). NGC ID# 24N5, PCGS# 6513

3562 1909 MS64 PCGS. This intensely lustrous Barber half dollar has brilliant silver surfaces and no toning on either side. A few trivial flakes and minuscule toning specks fail to diminish its eye appeal. NGC ID# 24N8, PCGS# 6516

**1909 Barber Half, MS65
Smooth and Appealing**

3563 1909 MS65 PCGS. CAC. A layer of delicate powder-blue and lavender toning embraces the surfaces, while vibrant luster shimmers throughout. The design features are generally well-struck with mild softness on star 3 and over the lower reverse. Exceptionally smooth and appealing. Population: 55 in 65, 13 finer (8/14). NGC ID# 24N8, PCGS# 6516

3564 1909-O MS63 NGC. A semikey date in the Barber half series. The arrow fletchings and claws are exceptionally well-struck, while Liberty's forecurl exhibits typical indistinctness. The borders are lightly toned, and the remaining surfaces are satiny and brilliant. A small planchet void occurs on Liberty's neck. Census: 9 in 63, 42 finer (8/14). NGC ID# 24N9, PCGS# 6517

3565 1910 AU58 PCGS. Less than half a million Barber half dollars were minted at Philadelphia in 1910, and this issue is elusive in all grades. Only the 1913, 1914, and 1915 Barber half dollars are scarcer among Philadelphia issues. This near-Mint example represents a popular collecting grade. Both sides have nearly full luster with brilliant silver surfaces and a trace of champagne toning to enhance the eye appeal. NGC ID# 24NB, PCGS# 6519

**1910 Barber Half Dollar, MS65
Extremely Rare Any Finer**

3566 1910 MS65 PCGS. The 1910 half is seemingly underrated in Gem Mint State condition, with such pieces being nearly as rare as those of the 1913 to 1915 Philadelphia issues. This representative displays sharp definition and shimmering, satiny luster. Traces of light golden toning are seen over each side, while the underlying surfaces are attractively preserved. Population: 24 in 65 (1 in 65+), 6 finer (8/14). NGC ID# 24NB, PCGS# 6519

3567 1911-D MS65 PCGS. Exceptional surface preservation, as mandated by the Gem grade assessment, is the hallmark of this highly appealing representative, though the specialist will also appreciate the soft pastel hues seen over frosty luster on each side. The strike is slightly soft on the eagle's right (facing) shoulder and talons, not unusual for the type in general. Population: 23 in 65, 12 finer (8/14). NGC ID# 24NE, PCGS# 6522

3568 1912-D MS65 NGC. Though slightly over 2.3 million half dollars were struck at Denver in 1912, the date was not saved in quantity. Survivors can be challenging to locate at the MS65 level and the coins are a condition rarity at the MS66 level. This lovely, lustrous Gem displays toning in shades of olive-green, tan, golden-brown, green-gray with hints of red, and exhibits a strong strike overall. A few specks of debris are present near 12 o'clock on the obverse rim. Census: 30 in 65, 8 finer (8/14). NGC ID# 24NH, PCGS# 6525

3569 1912-D MS65 NGC. A bold strike characterizes this lovely Gem, offering frosty devices and reflective fields imparting light cameo contrast. Both sides are brilliant and untuned. Census: 30 in 65, 8 finer (8/14). NGC ID# 24NH, PCGS# 6525

**1912-D Barber Half, MS65
Intensely Lustrous and Nearly Pristine**

3570 1912-D MS65 PCGS. CAC. This heavily-circulated issue saw a total business strike production of 2.3 million coins, few of which were held back from service in the channels of commerce. Examples are scarce at MS65, and rare any finer. This is a well-struck specimen that displays intense, shimmering mint luster and essentially flawless surfaces. Bits of mottled patina occur near the left periphery on each side, but the piece remains mostly brilliant-white in appearance. Population: 56 in 65, 16 finer (8/14). NGC ID# 24NH, PCGS# 6525

1913-D Barber Half, MS65
Conditionally Rare Denver Issue

3571 1913-D MS65 PCGS. The 1913-D half dollar is a slightly scarcer date in the Barber series; it can be found with little difficulty in MS63 and MS64, but Gems are rare, and only a few finer coins have been certified by the two leading services. This representative showcases shimmering, frosty luster, with blushes of lime-green and amber-orange color in the fields, primarily on the reverse. The strike is soft on the usual elements (the eagle's talons and shoulders), but the well-preserved surfaces balance the visual appeal. Population: 12 in 65, 5 finer (8/14). NGC ID# 24NL, PCGS# 6528

3572 1914 AU53 PCGS. The mintage of just 124,300 pieces — lowest for the series — makes this Philadelphia date a prime target of Barber half collectors. Silver-gray surfaces display nice remaining mint luster despite the minimal circulation. Bold detail remains. NGC ID# 24NN, PCGS# 6530

1914 Half Dollar, MS64
Lowest Mintage in the Series

3573 1914 MS64 PCGS. The 1914 enjoys the lowest production total in the Barber half dollar series (124,230 coins). Collectors will be able to locate examples across most grades levels, though Choice representatives are very scarce, and finer coins are decidedly rare. This example is highly lustrous and remarkably clean for the grade. Light patina graces each side, and the devices are largely well-struck. Population: 44 in 64 (3 in 64+), 12 finer (8/14). NGC ID# 24NN, PCGS# 6530

3574 1915-D MS64 PCGS. Mingled shades of cerulean-blue and golden-brown toning blanket the lustrous surfaces of this attractive Choice example, with sharply detailed design elements and outstanding eye appeal. NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

3575 1902 PR64 PCGS. A pleasing representative of this early 20th century proof issue, produced to the tune of a mere 777 pieces. Hints of olive patina cling to some of the obverse motifs, while the reverse is essentially untoned. A sharply struck, contact-free near-Gem. NGC ID# 24P6, PCGS# 6549

WALKING LIBERTY HALF DOLLARS

1916-S Walking Liberty Half Dollar, MS64
Highly Desirable First-Year Issue

3576 1916-S MS64 PCGS. Somewhat softly struck with pleasing satin luster and light amounts of golden-russet peripheral patina seen on each side. The surfaces are remarkably smooth and distraction-free for the near-Gem grade level. This first-year issue had a low mintage of barely over 500,000 coins, making it highly desirable to collectors. NGC ID# 24PN, PCGS# 6568

3577 1917 MS65 PCGS. CAC. An impressive second-year example with gleaming satiny mint luster and light speckled charcoal-russet patina near the peripheries and into the fields on both sides. A well-preserved Gem with nearly full strike definition including Liberty's branch hand and head. NGC ID# 24PP, PCGS# 6569

3578 1917 MS65 NGC. CAC. This lovely Gem exhibits bold design motifs and frosty luster that shines through the light champagne toning on each side. NGC has only certified 45 finer examples (8/14). NGC ID# 24PP, PCGS# 6569

3579 1918-D AU58 PCGS. Better-struck than usual, with only minor weakness on the central eagle's feathers and Liberty's branch hand. Actual wear is nearly nonexistent, with each side displaying bright silvery-gray luster. A pleasing near-Mint example of this better Denver issue. NGC ID# 24PW, PCGS# 6575

1918-S Half Dollar, MS64
Challenging in Finer Grades

3580 1918-S MS64 PCGS. Faint wisps of light golden toning accent frosty luster on each side of this piece. The 1918-S is known for weak strikes, and this softness is seen to a moderate extent on this representative, most notably on Liberty's leg and the central eagle's feathers. Surface abrasions are minimal, however, and the eye appeal is pleasing. PCGS has certified only 35 numerically finer examples (8/14). NGC ID# 24PX, PCGS# 6576

1918-S Walking Liberty Half, MS64
Lustrous and Lightly Marked

- 3581 1918-S MS64 PCGS. CAC.** This impressive Choice specimen exhibits a better-than-average strike for an early series issue, with noticeable separation between Liberty's finger and thumb. Vibrant mint luster radiates from both sides and the well-preserved surfaces are enlivened by shades of champagne-gold and lavender-gray toning. PCGS has graded 35 numerically finer examples (8/14). NGC ID# 24PX, PCGS# 6576

1919 Half Dollar, MS63
Better Philadelphia Issue

- 3582 1919 MS63 PCGS.** The PDS trio of 1919 issues command nearly as much respect as their counterparts dated 1921, particularly in better Mint State grades. This coruscating stone-gray example displays unmarked matte surfaces. The strike is sharp, since Liberty's head is full and the branch hand shows finger separation. NGC ID# 24PY, PCGS# 6577

- 3583 1919-D — Cleaning — PCGS Genuine. AU Details.** The 1919-D Walking Liberty half dollar is a condition rarity and rarely encountered in high grade with sharp definition. This brilliant and satiny AU coin is typically struck with little detail over Liberty's head or branch hand. The eagle's breast and leg are also indistinct. Light toning occurs over the designer's initials on the reverse. NGC ID# 24PZ, PCGS# 6578

- 3584 1920 MS64 PCGS. CAC.** The design elements of this early series Walker are unusually well-detailed, with distinct separation showing between Liberty's thumb and finger. Shades of golden-brown, steel-blue, and amber toning blanket the lustrous surfaces. NGC ID# 24R3, PCGS# 6580

- 3585 1920-D AU58 PCGS.** The silvery-gray surfaces of this near-Mint example reveal bold strike definition on Liberty's branch hand, and both sides of the coin are unabraded. A few wispy hairlines in the fields and even high-point wear on the motifs define the grade of this pleasing representative. NGC ID# 24R4, PCGS# 6581

1920-S Half Dollar, MS64
Better San Francisco Issue

- 3586 1920-S MS64 PCGS.** Mint State examples of the 1920-S half dollar are distinctly elusive when compared to those of the later 1920s issues, and especially so in the context of the series. Choice examples are among the most often seen, but finer coins are scarcely encountered. This satiny representative displays pale champagne and ice-blue hues over the obverse, while the reverse is awash in mottled olive and amber-gold toning. Liberty's branch hand and the central eagle's feathers are softly struck, not uncommon for this San Francisco issue. NGC ID# 24R5, PCGS# 6582

1921 Walking Liberty Half, AU50
Low-Mintage Key Date Example

- 3587 1921 AU50 PCGS.** With a tiny mintage of 246,000 pieces, this issue is a formidable key issue in the Walking Liberty series, and very challenging at almost any grade level. This is a lightly-worn, well-defined example with essentially untoned surfaces that display fewer marks than average for a lightly-circulated coin. NGC ID# 24R6, PCGS# 6583

- 3588 1921-D — Cleaning — PCGS Genuine. AU Details.** This famous D-mint Walker boasts the lowest mintage in the entire series with a production total of only 208,000 coins. The surfaces are somewhat subdued from the noted cleaning, but traces of satin luster appear at the borders. NGC ID# 24R7, PCGS# 6584

- 3589 1921-S VF30 PCGS.** Although the mintage of 548,000 pieces is the highest of the scarce 1921 PDS trio of key dates, the San Francisco issue is more challenging than the other issues with each rung of the condition ladder. This nice VF example shows very few marks on its dove-gray surfaces and strong detail for the grade. Deeper toning outlines the motifs. NGC ID# 24R8, PCGS# 6585

- 3590 1927-S AU58 PCGS. CAC.** Liberty's head and branch hand are typically weak, along with the eagle's trailing leg feathers. Both sides exhibit modest friction and attractive accents of pastel coloration. Surface marks are minimal. NGC ID# 24RA, PCGS# 6587

3591 1928-S AU58 PCGS. Light russet toning adheres to the peripheries, leaving the interiors largely brilliant. The strike exhibits softness over the central obverse and reverse, Liberty's branch hand and the eagle's breast and leg in particular. This near-Mint coin is minimally marked for the issue. NGC ID# 24RB, PCGS# 6588

3592 1928-S AU58 PCGS. Produced just before the brunt of the Great Depression, the 1928-S was not saved in substantial numbers, with the result that Mint State examples of this date are among the more elusive in the series. This near-Mint piece retains substantial silvery luster, with virtually complete detail. As usual, Liberty's head and branch hand are slightly soft, though this piece remains remarkably appealing for the grade. NGC ID# 24RB, PCGS# 6588

1928-S Walker, MS64 Flashy and Brilliant

3593 1928-S MS64 PCGS. The West Coast mint was the sole facility engaged in the production of Walking Liberty halves in 1928, and representatives are known for their problematic strike. This entirely brilliant and lustrous near-Gem shows typical softness over Liberty's head and branch hand. The eagle's right (facing) leg is also indistinct. Nevertheless, the eye appeal remains strong. PCGS has seen just 62 submissions in higher numeric grades (8/14). NGC ID# 24RB, PCGS# 6588

1929-D Half Dollar, MS65

3594 1929-D MS65 PCGS. A lustrous and lovely cream-gray Gem. The strike is sharp except on the fingers of the branch hand. Minor grazes on the right obverse field are all that limit the grade. Among the lowest mintage Denver issues. Available well worn, but very scarce in the present quality. NGC ID# 24RC, PCGS# 6589

3595 1929-S MS64 PCGS. The strike is sharp, and Liberty's head and branch hand show good detail. Shimmering luster covers the fully brilliant and mildly granular surfaces. Any grade-defining marks are well-hidden and undistracting. NGC ID# 24RD, PCGS# 6590

1933-S Half Dollar, MS65 Razor-Sharp Throughout

3596 1933-S MS65 PCGS. CAC. Though not particularly rare, the 1933-S half dollar is one of the more elusive issues of the period in Mint State condition. This issue is also known for being one of the most well-manufactured issues in the series from the San Francisco Mint, and this Gem representative beautifully portrays this quality with a bold full strike and rich, satiny luster. Pale amber-gold toning encompasses each side, growing deeper toward the margins, and a small reed mark hidden amid the eagle's breast feathers is the only abrasion of note. NGC ID# 24RE, PCGS# 6591

3597 1934 MS67+ PCGS. This plus-designated Superb Gem is mostly brilliant with satiny silver surfaces and lovely champagne toning, exhibiting splashes of gold and bluish-green near the borders. PCGS has only certified eight finer examples (8/14). NGC ID# 24RE, PCGS# 6592

3598 1934-D MS65 PCGS. A satiny, untoned Gem with creamy luster and uniform silvery-gray toning. A small abrasion located just above IN on the obverse field seemingly precludes a finer grade assessment. NGC ID# 24RG, PCGS# 6593

1934-S Walking Liberty Half, MS65 Elusive Middle-Series Issue

3599 1934-S MS65 PCGS. The 1934-S is a scarce and highly regarded coin from the middle series of Walkers. This is a fully struck piece whose frosted mint luster is covered with a light layer of gray-rose patina. Among the Middle Date series, this is ranked as first of the 19 issues, quite a testament to the scarcity of the issue. NGC ID# 24RH, PCGS# 6594

**1935 Half Dollar, MS67
One Coin Numerically Finer at PCGS**

3600 1935 MS67 PCGS. CAC. The 1935 Walking Liberty half dollar saw a large mintage exceeding 9 million coins, but few examples can match the quality and appeal of this Superb Gem. Its lustrous surfaces display well-defined devices, save for minor incompleteness in the centers. Each side is minimally marked. Population: 48 in 67 (5 in 67+), 1 finer (9/14). NGC ID# 24RJ, PCGS# 6595

3601 1935-D MS65 PCGS. CAC. Softly struck in the centers, but showing a pleasingly original appearance and well-preserved, mark-free surfaces. A lustrous, attractive, conditionally scarce Gem example. NGC ID# 24RK, PCGS# 6596

3602 1935-S MS65 PCGS. A lustrous, brilliant Gem with shimmering surfaces that display minimal marks or abrasions of any kind. A conditionally scarce issue that has seen a surprisingly small number of high-grade coins certified by NGC and PCGS, despite the sizeable mintage of 3.8 million pieces. NGC ID# 24RL, PCGS# 6597

**1935-S Walking Liberty Half, MS66
Conditionally Challenging Issue**

3603 1935-S MS66 PCGS. Known for being weakly struck, this issue presents a challenge for collectors hoping to acquire a high-end example of the middle date Walking Liberty half dollars (1934-1940). At the current Premium Gem level, the 1935-S is moderately scarce, with more coins graded MS66 than the 1935 (Philadelphia) or the 1934-S issues; but with fewer coins rated at that level than any other of the middle dates, regardless of the mint of origin. Lovely shimmering mint frost illuminates the untuned pearl-white surfaces. The motifs are boldly struck, with better-than-usual definition noted on Liberty's head and branch hand. Just three pieces are graded finer by PCGS (8/14). NGC ID# 24RL, PCGS# 6597

3604 1936-S MS66 PCGS. CAC. Frosty San Francisco luster radiates from beneath a layer of light golden patina that delivers CAC-recognized visual appeal. Although the branch hand is somewhat ill-defined, the skirt lines and head detail are sharp. PCGS has seen only 10 numerically finer examples. NGC ID# 24RP, PCGS# 6600

3605 1938 MS67 PCGS. This delightful Superb Gem displays well-detailed design elements, with just a trace of the usual softness on Liberty's wreath hand and the eagle's leg. The well-preserved surfaces radiate vibrant mint luster. Population: 81 in 67 (1 in 67+), 1 finer (9/14). NGC ID# 24RU, PCGS# 6604

3606 1938-D MS65 PCGS. A luminous Gem example of this semikey Denver issue, this piece showcases excellent surface preservation and warm lemon-gold toning. Liberty's branch hand is not fully brought up, as is typical for the issue. Housed in an old green label holder. Ex: *Dallas Signature* (Heritage, 11/2005), lot 2850; *Boston Signature* (Heritage, 8/2010), lot 9783. NGC ID# 24RV, PCGS# 6605

3607 1938-D MS65 PCGS. An impressive, well-struck Gem with full separation on Liberty's thumb and brilliant surfaces that display minimal marks. This Denver Mint issue becomes scarce at the MS66 grade level. NGC ID# 24RV, PCGS# 6605

3608 1938-D MS65 PCGS. This Denver issue has the lowest business strike mintage of any Walking Liberty half dollar from 1923 through 1947. This lovely Gem example is boldly struck, with weakness noticeable only on the eagle's trailing leg feathers. Minimally marked and essentially untuned; an attractive silver-white specimen. NGC ID# 24RV, PCGS# 6605

3609 1941-S MS66 PCGS. A strongly lustrous example of this popular and challenging short-set Walker issue. This example is well-struck overall with whispers of milky toning against otherwise silver-white surfaces. PCGS has graded a mere nine finer examples (11/12). Ex: *Long Beach Signature* (Heritage, 5/2008), lot 1445; *Long Beach Signature* (Heritage, 6/2011), lot 3777; *Houston Signature* (Heritage, 11/2012), lot 4069. NGC ID# 24S5, PCGS# 6613

3610 1941-S MS66 NGC. CAC. Slight thumb separation and strong detail on Liberty's head characterize the needle-sharp strike on this amazing Premium Gem. Each side is fully brilliant with shimmering luster and no mentionable flaws. NGC has seen only 21 coins numerically finer (8/14). NGC ID# 24S5, PCGS# 6613

**1941-S Walking Liberty Half, MS66+
Conditionally Rare Any Finer**

3611 1941-S MS66+ PCGS. CAC. The 1941-S Walking Liberty half is the foremost condition rarity from the 1940s in the series. Only nine pieces have graded numerically finer than this Plus-graded example at PCGS (8/14), and those Superb Gems go for five-digit sums on the rare occasions when they appear at auction at all. This MS66+ example with the CAC sticker offers most of the benefits of an MS67, while avoiding the hefty prices. The strike is well brought up on the head and lower skirt lines of Liberty, but softness appears on the central hand and thumb, and oppositely on the lower eagle's feathers. The surfaces show excellent preservation overall, mostly brilliant on the reverse with pale golden-brown on the obverse. A great-looking coin. NGC ID# 24S5, PCGS# 6613

**1941-S Half Dollar, MS66+
Rarely Encountered Finer**

- 3612 1941-S MS66+ PCGS. CAC.** Only slight central weakness is noted at Liberty's hand, with all other details boldly defined on this lovely Premium Gem. The surfaces are frosty and nearly brilliant, with just a tinge of light golden toning over each side. PCGS has only certified nine numerically finer examples of this issue (9/14). NGC ID# 24S5, PCGS# 6613

**1945-D Half Dollar, MS67+
Fully Brilliant, Strong Eye Appeal**

- 3613 1945-D MS67+ PCGS. CAC.** A mintage just shy of 10 million coins ensures the availability of the 1945-D across almost all grade levels. Only in Superb Gem does the issue truly become scarce, and Plus-designated coins make up just a small fraction of the certified population in that grade. This coin is tied for the finest certified at PCGS (8/14). The impeccably preserved surfaces gleam with mint brilliance, and the design motifs are pinpoint-sharp save for the faintest trace of softness over the eagle's right (facing) leg. NGC ID# 24SG, PCGS# 6625

- 3614 1946 MS67 PCGS.** The Superb Gem status of this lovely example is immediately confirmed by an in-hand view of both sides. Fully brilliant, sharply struck and immaculately preserved, simply a great Walking Liberty half dollar that would suit even the finest date set of the series; or a high-grade type set of 20th century U.S. coinage. Population: 54 in 67 (3 in 67+), 0 finer (8/14). NGC ID# 24SJ, PCGS# 6627

**1946-S Half Dollar, MS67
Repunched Mintmark, Fox-102**

- 3615 1946-S MS67 PCGS. CAC. Fox-102.** The trumpet tail mintmark is clearly repunched southeast. The variety belongs in *Cherrypickers'* but is presently unlisted in that reference. This well preserved, lustrous, and nicely struck Superb Gem has honey-gold borders and stone-white centers. Essentially impossible to secure any finer. Population: 56 in 67 (2 in 67+), 0 finer (9/14). NGC ID# 24SL, PCGS# 6629

- 3616 1947 MS67 PCGS.** The design elements of this magnificent Superb Gem are sharply detailed and the brilliant surfaces radiate vibrant mint luster on both sides. No mentionable distractions are evident and visual appeal is outstanding. Population: 52 in 67 (3 in 67+), 0 finer (8/14). NGC ID# 24SM, PCGS# 6630

**PROOF WALKING LIBERTY
HALF DOLLARS**

- 3617 1936 PR64 PCGS.** The Mint's all-brilliant technique for proofs in 1936 produced coins with mirrored finishes and no mint frost on the motifs. This near-Gem example is sharply struck and medium-mirrored, with a few delicate field lines that determine the grade. An untoned, fully brilliant example of the lowest proof mintage in the Walker series. NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR65
Warm Light Golden Color**

- 3618 1936 PR65 PCGS.** The year 1936 saw the first regular proof half dollar production since 1915, with a mintage of 3,901 pieces. Adolph Weinman's graceful designs proved popular in proof format among collectors, and annual mintages would only climb from this point forward. This Gem example boasts glassy fields and fully defined motifs, with a light champagne hue over each side. Housed in an old green label holder. NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half Dollar
Attractive Gem Proof**

- 3619 1936 PR65 NGC.** While the mirrors are not quite as strong on this Gem as they are on certain other proofs of this “rebound” year, proof status is undeniable thanks to the crisp detail on Liberty’s hand and the eagle’s feathers, plus the sharply squared rims. Watery silver fields have a few faint suggestions of blue, gold, and gray color. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR66
Old Green Holder**

- 3620 1936 PR66 PCGS.** Ex: Bently Collection. From the always popular first year of the resumption of proof coinage, and the lowest mintage in the series, this 1936 Premium Gem half displays luminous surfaces that show just a touch of light golden color, deepening toward the rims. Sharply struck design elements and impeccable preservation contribute to the pleasing overall eye appeal. Housed in an old green label holder. PCGS has seen only 33 numerically finer pieces (8/14). NGC ID# 27V4, PCGS# 6636
- 3621 1937 PR67 PCGS.** Dazzling mint brilliance and deeply reflective fields characterize this essentially flawless Superb Gem proof. Of the 5,728 Walking Liberty proofs struck in 1937, PCGS has certified only 10 coins in higher numeric grades (8/14).
Ex: *New York Signature* (Heritage, 6/2005), lot 5881. NGC ID# 27V5, PCGS# 6637
- 3622 1937 PR67 NGC.** An outstanding example of this early proof Walker issue, strongly defined with untuned and highly reflective surfaces. This representative’s eye appeal is considerably finer than the norm. NGC has certified 24 examples numerically finer (8/14).
Ex: *ANA Signature* (Heritage, 8/2007), lot 1117; *Dallas Signature* (Heritage, 4/2007), lot 893. NGC ID# 27V5, PCGS# 6637

**1938 Walking Liberty Half, PR68
None Numerically Finer**

- 3623 1938 PR68 NGC.** Lovely light-green, lilac, ice-blue, and golden-tan patination visits both sides, but is especially pleasing on the reverse. The strike is exacting, since only the index finger of the branch hand lacks absolute detail. Gorgeously preserved. The designer’s monogram is faint but intact. Census: 58 in 68 (7 in 68 ★), 0 finer (8/14).
Ex: *Dallas Signature* (Heritage, 4/2007), lot 897; *Central States Signature* (Heritage, 4/2008), lot 1539. NGC ID# 27V6, PCGS# 6638

- 3624 1940 PR68 NGC.** From a mintage of 11,279 pieces, the 1940 proof Walking Liberty half dollar is more available than proofs of earlier years, but the date is seldom encountered in this lofty grade. The design elements are fully struck, and the surfaces are reflective under shades of champagne-gold toning. Census: 58 in 68 (4 in 68 ★), 0 finer (8/14). NGC ID# 27V8, PCGS# 6640

FRANKLIN HALF DOLLARS

- 3625 1950 MS66+ Full Bell Lines PCGS. CAC.** Violet-gray toning and iridescent accents cover both sides of this Superb Gem Full Bell Lines representative. The quality of this piece is affirmed by both the Plus designation and a green CAC sticker. Population: 228 in 66 (17 in 66+) Full Bell Lines, 9 finer (8/14). NGC ID# 24SW, PCGS# 86656
- 3626 1954-S MS66 Full Bell Lines PCGS.** Full Bell Lines and brilliant, frosty mint bloom are the hallmarks of this MS66-certified representative. A couple light abrasions near the eye and mouth limit the grade, though these are not readily apparent to the unaided eye. PCGS has encapsulated just one numerically finer representative (8/14). NGC ID# 24TB, PCGS# 86669
- 3627 1962 MS65 Full Bell Lines NGC.** The 1962 Franklin half dollar is one of the scarcer issues in the series with Full Bell Lines, and coins grading finer than MS65 with that designation are exceedingly rare. This Gem piece showcases bold design definition and vibrant luster than engulfs each side in frosty brilliance, as recognized by the W (White) designation on the holder. Census: 18 in 65 Full Bell Lines, 1 finer (8/14). NGC ID# 24TR, PCGS# 86682

PROOF FRANKLIN HALF DOLLARS

- 3628 1950 PR65 Cameo PCGS. CAC.** The 1950 Franklin half is a key date with cameo contrast, especially in Gem condition. This gorgeous example features bold white-on-black contrast with deep mirrors and sharp, thickly frosted devices. A nice Registry candidate. NGC ID# 27VA, PCGS# 86691
- 3629 1951 PR67 PCGS.** A seemingly pristine example, this Superb Gem proof showcases beautifully brilliant surfaces and tack-sharp definition, even on the minute bell inscriptions. Moderate reflectivity is present, though the fields are not truly mirrored. PCGS has certified only one numerically finer representative (8/14). NGC ID# 27VB, PCGS# 6692

3630 1951 PR66 Cameo PCGS. The 1951 is a relatively scarce Franklin to obtain in full cameo. Frosty devices and mirrored fields give this half the sought after black-and-white look. A few minor, scattered, microscopic field hairlines do not detract from the gleaming appeal of this lustrous Premium Gem. Population: 69 in 66 (1 in 66+), 20 finer (9/14).
Ex: CSNS Signature (Heritage, 5/2004), lot 7912. NGC ID# 27VB, PCGS# 86692

3631 1951 PR66 Cameo PCGS. CAC. Stark white-on-black contrast radiates from each side of this tremendously appealing Premium Gem proof. By current standards, the mintage was low at 57,500 pieces, and Cameo examples are not easy to locate. A beautiful, fully struck coin with impeccably preserved surfaces. Population: 69 in 66 (1 in 66+) Cameo, 20 finer (9/14). NGC ID# 27VB, PCGS# 86692

1952 Franklin Half, PR67+ ★ Cameo
Beautiful, Outstanding Specimen

3632 1952 PR67+ ★ Cameo NGC. A beautiful example of this early proof issue in the Franklin half dollar series. The deeply-mirrored fields are jet-black, and the thickly frosted devices are icy-white and fully defined. A great, essentially pristine specimen that is recognized by NGC both for its outstanding technical quality — with the PR67+ numeric assessment — and for its remarkable eye appeal with the ★ designation. Census: 1 in 67+★ Cameo, 5 finer (8/14). NGC ID# 27VC, PCGS# 86693

3633 1957 PR68 Deep Cameo PCGS. Blazing white, deep-mirrored fields contrast with thickly frosted devices for fantastic cameo contrast. Not a bit of toning appears on the intense silver surfaces. Over one million proof sets were issued in 1957, yielding but two examples at PCGS that exceed the numeric grade of this exceptional proof half. Population: 71 in 68 Deep Cameo, 2 finer (9/14). NGC ID# 24TX, PCGS# 96698

SMS KENNEDY HALF DOLLAR

1966 SMS Kennedy Half, SP67 Deep Cameo
Scarce This Starkly Contrasted

3634 1966 SMS SP67 Deep Cameo PCGS. A must-have coin for the Registry Set collector, this Superb Gem Deep Cameo example is one of just 27 for the grade at PCGS, and only four are numerically finer within the designation (9/14). A profound depth of mirroring in the fields and heavily frosted devices produce outstanding white-on-black contrast, while the surfaces are untuned and almost perfectly preserved. The coin is tied numerically with the example in the current highest-rated proof Registry Set. NGC ID# 24WH, PCGS# 96846

End of Session One

SESSION TWO

EARLY DOLLARS

- 3635** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Cleaning — PCGS Genuine. VG Details. Die State II. The most frequently encountered variety, often chosen for type representation. This piece shows evidence of cleaning, but has long since acquired deep gunmetal and steel-gray toning over each side. The border dentils are complete, with no interrupting adjustment marks. The central devices are well-worn, though Liberty's head is boldly outlined, as usual for this variety. PCGS# 39977

**1795 Draped Bust Dollar, Fine 12
Off-Center, B-14, BB-51**

- 3636** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, Fine 12 PCGS. Bowers Die State I. "1795 B-14 is one of the more readily available issues of the year. An estimated 350 to 550 exist in all grades combined," according to Bowers' silver dollar *Encyclopedia*. This piece is an attractive example of the date and type, with pewter-gray devices surrounded by charcoal-gray fields. Parallel adjustment marks are noted between the rim and AMERICA, but post-strike abrasions are relatively unobtrusive. Population: 2 in 12, 14 finer (8/14). PCGS# 39996

- 3637** 1796 Small Date, Large Letters, B-4, BB-61, R.3, Good 6 PCGS. Die State II. Among the more available varieties, BB-61 is ideal for date representation. This well-worn example displays clear lettering and boldly outlined central devices. Milky-gray and pale gold toning blanket each side. PCGS# 40000

**1796 Dollar, VF Details
B-5, BB-65**

- 3638** 1796 Large Date, Small Letters, B-5, BB-65, R.2 — Obverse Graffiti — NGC Details. VF. Die State IV, as determined by the advanced progression of the die lump between the I and C in AMERICA. This is a boldly struck example of this moderately available variety with strong borders, though the central devices exhibit moderate wear. Bright pewter-gray patina blankets each side, while a few faint scratches in the upper-right obverse field preclude a numeric grade from NGC. PCGS# 40002

**1796 Draped Bust Dollar, VF30
B-1, BB-66, Rare Early Die State**

- 3639** 1796 Small Date, Small Letters, B-1, BB-66, R.4, VF30 ANACS. Die State I. Bowers described this die state in *Silver Dollar & Trade Dollar of the United States*, but noted it may not exist, as he had never seen an example. The bold definition of the lowest left leaf on the wreath and also on the shallow points of the ribbon, however, confirm this coin's attribution. The border dentils are strong, with well-defined central devices, as well. Deep gunmetal-gray and olive toning encompasses each side, attesting to the originality of the surfaces. A few faint adjustment marks are observed on the reverse below the eagle. PCGS# 39999

**1798 Large Eagle Dollar, XF40
B-6, BB-96, Knob 9, 5 Vertical Lines**

- 3640** 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3 XF40 NGC. Die State V, with bold die cracks around the date. Most examples of the BB-96 variety are in VF and lower grades, with XF and AU coins only infrequently encountered. This example exhibits complete border dentils and strong central detail. Pale amber-gray patina blankets each side, and the surfaces appear free of adjustment marks. PCGS# 40011

- 3641** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VF30 PCGS. Bowers Die State II. The availability of the BB-105 variety makes this example an excellent early dollar type coin. The surfaces exhibit lavender-gray patina with splashes of golden-orange color, and most of the design remains clear. Population: 1 in 30, 11 finer (8/14). PCGS# 40022

- 3642** 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3 — Cleaning — PCGS Genuine. VF Details. Die State II. Most examples of this variety are well-worn, with VF and XF pieces being the finer-known survivors. This piece shows strong VF detail, but displays bright, silvery-white color from vigorous cleaning. A still-pleasing representative, however, as no adjustment marks or major circulation scars are observed. PCGS# 40028

**1798 B-29, BB-119 Dollar, XF40
Large Eagle, Pointed 9**

- 3643** 1798 Large Eagle, Pointed 9 XF40 NGC. B-29, BB-119, R.4. Bowers Die State I. This gunmetal-gray and golden-brown Heraldic Eagle dollar displays traces of luster within the wings and borders. All letters in E PLURIBUS UNUM are clear, and a number of breast feathers are visible. Smooth aside from a single thin mark beneath the hair ribbon. PCGS# 40036

**1798 Large Eagle, Pointed 9 Dollar, VF30
B-14, BB-122, Smooth and Attractively Toned**

- 3644** 1798 Large Eagle, Pointed 9 VF30 PCGS. B-14, BB-122, R.3. Bowers Die State III. Violet-gray patina and iridescent orange accents embrace this Heraldic Eagle dollar. In spite of moderate blending from circulation, the design elements exhibit a pleasing amount of detail. The surfaces are largely smooth with an expected number of well-hidden marks. PCGS# 40039

- 3645** 1798 Large Eagle, Pointed 9 VF25 PCGS. B-24, BB-124, R.2. Bowers Die State III. Die cracks through star 12 affirm the die state. BB-124 features the "Blundered Stars Reverse" with the some stars overlapping the clouds. Dusky gray patina and light orange accents color the surfaces. This is a problem-free type coin with significant detail remaining. PCGS# 40041

**1799 Dollar, AU Sharpness
7x6 Stars, B-19, BB-155
Terminal Die State**

- 3646** 1799 7x6 Stars, B-19, BB-155, R.4 — Cleaning — PCGS Genuine. AU Details. Bowers Die State IV. The terminal die state with the obverse field buckling between stars 2 and 3. Liberty's curls and shoulder display only slight friction, and no marks are readily evident. However, evaluation beneath a lens reveals hairlines on both sides, and the obverse has a small glossy area from the right border of Liberty's neck into the nearby field. PCGS# 40047

- 3647** 1799 7x6 Stars, B-7, BB-156, R.4, VF30 NGC. Die State III. The reverse die is shattered with numerous die cracks, both peripheral and radial. As the terms suggest, peripheral die cracks essentially follow the border, while radial cracks extend in from the border to the center. The coin displays pleasing pale gray surfaces with faint traces of champagne and lavender toning. Ex: *Houston Signature (Heritage, 12/2008)*, lot 829. PCGS# 40048

- 3648** 1799 7x6 Stars, B-5, BB-157, R.2, VF20 NGC. Bowers-Borckardt Die State II. Early dies for this collectible Bolender variety, though the ascending crack through STATES is present. Richly toned in golden-brown and steel-blue with pleasing definition on the eagle's wings. Each side is devoid of any consequential marks. PCGS# 40049

- 3649** 1799 7x6 Stars, B-11, BB-161, R.3 — Cleaning — PCGS Genuine. VF Details. Die State III. This variety lacks berries on the branch due to heavy die lapping. This representative is well-detailed for the VF grade level, but exhibits signs of light cleaning. Pale golden-gray patina blankets each side, and no adjustment marks are present. PCGS# 40052

- 3650** 1799 7x6 Stars, B-8, BB-165, R.3, VF20 PCGS. Bowers Die State II. The 1 in the date is positioned far from the hair curl, and a series of die cracks occur around the reverse legends, confirming the variety and die state. Bright steel-gray patina drapes the surfaces of this collectible early dollar, and much design detail remains, though the reverse stars are weak (as made). PCGS# 40056

- 3651** 1799 7x6 Stars, B-9, BB-166, R.1 — Damage — PCGS Genuine. XF Details. Die State II. This lightly circulated piece displays varying shades of pewter-gray patina, with deeper olive tinges throughout the reverse. The central devices are well-detailed and the border denticles are complete. The obverse exhibits heavy parallel surface scratches in the fields, accounting for the details grade from PCGS. PCGS# 40057

**1800 Draped Bust Dollar, Fine 15
B-10, BB-190
Wide Date, Low 8**

- 3652** 1800 Wide Date, Low 8, B-10, BB-190, R.3, Fine 15 NGC. Bowers Die State III. The Wide Date, low 8 variety. An original, well centered example with rich, gunmetal-blue and gray patina. The motifs are a lighter bronze-gray for pleasing two-tone contrast. Strong detail remains on the motifs, rims, and denticles, with remarkably few abrasions anywhere on the coin. Quite attractive for the assigned grade. PCGS# 40076

- 3653** 1800 Dotted Date, B-14, BB-194, R.3 — Cleaning — PCGS Genuine. XF Details. Bowers Die State II. This popular *Guide Book* variety earns its name from a series of die lumps located around the 0 in the date. According to Bowers (2013), "Most known specimens of BB-194 are in lower grades." Medium steel-gray patina covers each side, which show signs of an old cleaning. The devices exhibit even wear, but most of the design remains clear. PCGS# 40078

**1801 Dollar, B-1, BB-211, VF30
Extreme Late Die State, Rare**

3654 1801 B-1, BB-211, R.3, VF30 PCGS. Die State V, with die failure seen near the E in AMERICA, causing a bulge in the coin. This is a pleasing mid-grade example of one of the more plentiful varieties of the issue. Deep olive and gunmetal-gray patina encompasses the recesses, while the relief elements show areas of lighter tan-gray color. The borders are strong and the surfaces are void of adjustment marks. PCGS# 40083

3655 1801 B-2, BB-212, R.3 — Bent — PCGS Genuine. VF Details. Bowers Die State III. This is the usual die state with bright silver-gray surfaces and golden-brown toning in the recessed areas. The noted bend is minimally distracting and difficult to discern in the holder. A collectible early dollar. PCGS# 40084

3656 1801 B-4, BB-214, R.4 — Cleaning — PCGS Genuine. VF Details. Die State III. This piece is lightly circulated, with the top of Liberty's head and the corresponding portion of the reverse exhibiting the most noticeable weakness. The borders are strong, with no disrupting adjustment marks. The silver-gray surfaces are unnaturally bright, due to past cleaning. PCGS# 40086

**1801 B-4, BB-214 Silver Dollar, VF35
Elusive Draped Bust Issue**

3657 1801 B-4, BB-214, R.4, VF35 PCGS. Bowers Die State III. The 1801 is the scarcest date in the Draped Bust, Heraldic Eagle series of early silver dollars. There are only four known die varieties, and all are relatively scarce, yet collectible. This nicely defined Choice VF example is predominantly olive and stone-gray, although the borders exhibit glimpses of ocean-blue and bright gold. PCGS# 40086

**1802/1 Dollar, B-4, BB-232, VF20
Unusually Sharp and Appealing for the Grade**

3658 1802/1 Narrow Date, B-4, BB-232, R.3, VF20 PCGS. Die State II, as usual. This representative boasts unusually bold central detail for the grade, with strong border dentils contributing the high appeal. Deep gunmetal and olive-gray patina coats the recesses, yielding to lighter shades of the same over portions of the relief elements. No adjustment marks are present, and the overdate feature is bold. An immensely appealing Draped Bust type coin. PCGS# 40092

3659 1802/1 Wide Date, B-3, BB-234, R.3 — Cleaning — PCGS Genuine. VF Details. Die State II. A popular *Guide Book* variety, with the overdate boldly visible to the unaided eye. This piece displays pleasing detail for the VF grade level, with complete border dentils and a lack of adjustment marks. Pale golden-gray patina blankets lightly cleaned surfaces. PCGS# 40094

3660 1802 Narrow Date, B-6, BB-241, R.1 — Cleaning — PCGS Genuine. Fine Details. Die State III. A readily available variety, well-suited for type purposes. Close examination of this example reveals signs of old cleaning, though each side exhibits deep olive-gray patina in the recesses, with lighter golden-gray color over portions of the relief elements. The central detail and border dentils are sharp for the grade, and no adjustment marks are noted. PCGS# 40088

3661 1802 Narrow Date, B-6, BB-241, R.1 — Cleaning — PCGS Genuine. XF Details. Bowers Die State I. The missing right foot on the T in LIBERTY and a protruding spur on the third cloud from the left identify this readily available early dollar variety. Peripheral olive-green toning yields to dark steel-gray centers, and the cleaning does not overly detract. Sharply detailed with few noteworthy marks. PCGS# 40088

3662 1803 Large 3, B-6, BB-255, R.2, VF20 PCGS. Die State I, as usual. A moderately plentiful variety from the final year of regular production for the type. This is a pleasing mid-grade representative, displaying deep pewter-gray patina over each side. The upper-right reverse is slightly soft, as usual, though the dentils are complete and no adjustment marks or major circulation scars are noted. PCGS# 40101

3663 1803 Large 3, B-6, BB-255, R.2 — Repaired — NGC Details. XF. Bowers Die State II. A hairline die crack connects stars 9 through 11. Violet-gray and gunmetal-blue patina cover the surfaces of this Draped Bust type coin. NGC notes a repair, likely in the upper-left obverse field, but it is not overly distracting. PCGS# 40101

SEATED DOLLARS

1845 Seated Dollar, AU55 Challenging Low-Mintage Issue

3664 1845 AU55 PCGS. Limited by the lack of silver bullion, the Mint struck just 24,500 silver dollars in 1845 and some of the mintage likely was exported. The date is exceptionally rare in Mint State, making AU coins the logical alternative for collectors. This example is bright and untoned, with several chatterlike marks scattered over the fields on both sides and light wear on the central motifs. Population: 28 in 55, 23 finer (9/14). NGC ID# 24YF, PCGS# 6931

3665 1846-O AU55 PCGS. The Louisiana branch mint failed to produce any silver dollars until 1846, when it struck 59,000 coins. This inaugural representative shows bright surfaces with areas of golden-gray toning and traces of mint luster within the recesses. Well-struck and minimally abraded. Population: 22 in 55, 40 finer (8/14). NGC ID# 24YH, PCGS# 6933

3666 1853 XF40 PCGS. From a mintage of only 46,110 coins, this lightly circulated piece presents the type collector with a highly attractive, problem-free No Motto Seated dollar of a date that is not often seen with original color and surfaces. Deep gunmetal-gray fields fade to lighter gray hues over the relief elements, and there is strong detail remaining for the grade. NGC ID# 24YS, PCGS# 6941

3667 1856 PCGS Genuine. The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. We believe this coin has the sharpness of an XF specimen that has been lightly cleaned. The well-detailed design elements show just a touch of high-point wear. From a mintage of 63,500 pieces. NGC ID# 24YV, PCGS# 6944

3668 1856 — Cleaning — PCGS Genuine. AU Details. Mottled violet-gray toning shows pastel shades of blue, green, and orange when examined closely. This minimally circulated representative is irregularly struck with an area of indistinctness over the eagle's left (facing) leg and talon. NGC ID# 24YV, PCGS# 6944

1857 Seated Dollar, AU55 Semiprooflike, Lightly Toned

3669 1857 AU55 PCGS. Because virtually all 1857 Seated dollars were struck with prooflike surfaces to one extent or another, it is no surprise to see the reflectiveness of this Choice AU example. More surprising is the fact that the combined grading service populations of the 1854 and 1855 issues (considered much rarer) are comparable to the scarcity of the 1857 date both in AU55 condition and in the overall number of grading events. This heavily exported date is underrated and desirable. The present coin is a sharp, lightly toned representative of the issue, boldly struck with nice remaining luster. Population: 18 in 55, 63 finer (8/14). NGC ID# 24YW, PCGS# 6945

3670 1859-S — Cleaning — PCGS Genuine. AU Details. Minted primarily for export to Asia, most coins from the 1859-S issue (20,000 pieces) are typically found in VF to XF condition. AU pieces such as this are scarce. Olive-green and steel-gray toning intermingle over each side with mild strike softness over the eagle's wingtips and left (facing) talon. All stars are sharp. NGC ID# 24YZ, PCGS# 6948

3671 1860-O AU58 PCGS. The 1860-O Seated dollar is one of the most plentiful dates in the series and a popular choice among type enthusiasts because of its mintage of 515,000 coins. Brilliant and lustrous surfaces exhibit typical softness over the stars and Liberty's head, but the remaining devices are bold. Semiprooflike and only lightly marked. NGC ID# 24Z3, PCGS# 6950

3672 1860-O MS61 PCGS. Bright sparkling mint frost with bold definition, modest abrasions, and a much nicer appearance than might be expected for the grade. A fully brilliant, ice-white coin on both obverse and reverse. NGC ID# 24Z3, PCGS# 6950

3673 1861 VF20 NGC. Approximately 40,000 coins from the original 77,500-coin mintage were melted and restruck into small denominations. Consequently, the issue is scarce in all grades and highly coveted among collectors. This example shows bright silver-gray surfaces with partial inner-design detail present. Myriad abrasions are strewn over each side, but they do not overly detract. NGC ID# 24Z4, PCGS# 6951

3674 1861 — Questionable Color — PCGS Genuine. AU Details. Concentric obverse toning in shades of blue, green, violet, and peach-orange seems too good to be true. The reverse shows a more uniform layer of golden-brown and plum coloration. This AU example is sharply detailed, minimally marked, and attractive in spite of the Details designation. NGC ID# 24Z4, PCGS# 6951

3675 1862 VF30 NGC. The large-scale melting of 1862 dollars for conversion into subsidiary coinage makes this one of the scarcest issues in the series (11,540 coins struck). This piece features steel and olive-gray patina with a high degree of design detail remaining. A small scratch is noted between the eagle's beak and left (facing) wing tip. NGC ID# 24Z5, PCGS# 6952

3676 1863 — Cleaning — PCGS Genuine. AU Details. Silver-gray patina covers each side of this No Motto Seated dollar. Most of the 27,200 coins minted were exported overseas, as specie payments were still in suspension. Wispy hairlines from cleaning are lightly scattered over the sharply struck surfaces. NGC ID# 24Z6, PCGS# 6953

3677 1864 VF35 PCGS. CAC. An evenly worn example with deep olive-tan coloration and smooth, barely marked surfaces. The mintage of 30,700 pieces was mostly destroyed outside of circulation. A scarce Choice VF example of this Civil War-era issue. NGC ID# 24Z7, PCGS# 6954

3678 1865 — Cleaning — PCGS Genuine. AU Details. From a low mintage of only 46,500 coins, this About Uncirculated representative displays dusky, light gray patina over each side. The smooth surfaces show strong device definition, and the noted cleaning does not overly detract. NGC ID# 24Z8, PCGS# 6955

3679 1869 AU53 PCGS. High Comstock yields had much to do with the large number of Seated dollars produced in Philadelphia in 1869. This lightly circulated representative offers silver-gray toning overall with a degree of hazy patina in the fields on both sides. Somewhat irregularly struck on the obverse, but overall this is a nice problem-free example. NGC ID# 24ZC, PCGS# 6962

1869 Seated Dollar, MS62 Elusive Philadelphia Issue

3680 1869 Misplaced Date and Repunched Date, FS-301, MS62 PCGS Secure. This interesting *Cherrypickers'* variety exhibits repunching on the lower edges of the 1 and 8 in the date, with the top of a misplaced numeral (likely a 6) in the dentils below the primary 6. Other repunched date varieties exist for this issue, though this is arguably the most intriguing. As a date, this issue had a fairly substantial mintage of more than 423,000 coins, but the attrition rate was very high and today, survivors in any grade are elusive, with Mint State pieces being particularly so.

This representative is boldly struck, with attractive semiprooflike fields and traces of light golden color on each side. Surface flaws are surprisingly few for the grade, the most prominent being an old hit in the field near star 1, which is well-hidden near the rim. Population: 13 in 62, 20 finer (8/14). PCGS# 416930

1870-CC Seated Dollar Bright, AU Sharpness

3681 1870-CC — Cleaning — Genuine PCGS. AU Details. Overly brilliant but not too heavily hairlined from a past cleaning, this well-detailed Carson City dollar is one of just 12,462 pieces struck. Numerous light abrasions are distributed across the surfaces that retain a bit of luster and reflectivity at the margins. NGC ID# 24ZE, PCGS# 6964

3682 1872 AU58 PCGS. Light golden-gray toning graces the obverse of this near-Mint Seated dollar, while the reverse remains frosty and brilliant. The devices are sharply struck with typical softness over Liberty's head. One small planchet void (as made) occurs below the 2 in the date and another appears adjacent to the A in AMERICA. Additionally, a small lamination is noted next to star 10. NGC ID# 24ZJ, PCGS# 6968

3683 1872 MS61 PCGS. Somewhat softly struck on the obverse stars and on Liberty's head, as usual. Substantial luster and the absence of high-point wear confirm the Uncirculated status of this pleasing example. Small marks restrict the grade. Population: 12 in 61, 80 finer (8/14). NGC ID# 24ZJ, PCGS# 6968

3684 1872-CC Good 4 ANACS. The 1872-CC Seated dollar issue is scarce in all grades because of its low mintage of only 3,150 coins. This well-worn example exhibits light gray devices and darker steel-gray fields. The design elements show clear outlines, and the legends are readable. NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, Fine 15 Low-Mintage Carson City Issue

3685 1872-CC Fine 15 PCGS. The silver bullion value alone restricted any significant mintage of the 1872-CC dollar, and the few that were struck likely were withheld from distribution until the price of silver fell in 1873. Just 3,150 pieces were produced, and the scarcity today is undeniable although the issue is slightly more obtainable than either of the surrounding Carson City dates, the 1871-CC and 1873-CC. This silver-gray survivor shows partial LIBERTY on the shield. Most of the abrasions are softened by wear. A few minor disturbances are seen on the reverse rims. NGC ID# 24ZK, PCGS# 6969

- 3686 1872-CC — Repaired — PCGS Genuine. VF Details.** The repair likely occurs in the right obverse field. However, the surfaces have been smoothed, giving the coin a uniformly soft appearance and making it difficult to locate the noted damage. This Carson City issue is a capstone in the Seated dollar series with a mintage of only 3,150 coins. NGC ID# 24ZK, PCGS# 6969

**1872-CC Seated Dollar
XF Sharpness Remains**

- 3687 1872-CC — Obverse Repaired, Harshly Cleaned — NGC Details. XF.** Most of the “work” was done on the obverse of this scarce Carson City dollar, where noticeable cleaning, tooling, and retoning minimizes roughness in the fields. Pitting and numerous abrasions remain on Liberty’s portrait and borders, where several small nicks dot the rims. The reverse shows a few marks and rim nicks, but overall it conveys a more natural appearance than the obverse.

**1872-CC Seated Dollar, XF40
Attractive, Silver-Gray Surfaces**

- 3688 1872-CC XF40 PCGS.** Fewer than the expected number of abrasions appear on the fields and devices, which are lightly toned in pleasing, silver-gray tones with a touch of gold on the rims. Bold detail remains on the motifs. Although the 1872-CC is more available than the other rare Carson City dates of the series, it is still scarce in all conditions. Only a few examples survive from the small mintage of just 3,150 pieces as nice as this sharp, collector-grade representative. Population: 24 in 40, 67 finer (8/14). NGC ID# 24ZK, PCGS# 6969

- 3689 1872-S XF40 PCGS.** Not unlike the Carson City issues of the same series, all the San Francisco-issued Seated Liberty dollars were struck in limited quantities and are proportionately elusive in higher grades. This 1872-S representative, from a mintage of only 9,000 coins, displays strong detail, with bright silvery-gray fields and pale golden-gray devices. NGC ID# 24ZL, PCGS# 6970

- 3690 1873 AU53 PCGS.** The issue’s mintage of 293,000 coins and its status as the final date in the Seated dollar series make it widely sought after for type purposes. Splashes of golden-orange toning appear over otherwise silver-gray surfaces when held at the correct angle, and the design elements are largely well-struck. Glowing mint luster remains within the protected regions. NGC ID# 24ZM, PCGS# 6971

PROOF SEATED DOLLARS

- 3691 1866 Motto — Questionable Color — PCGS Genuine. Proof, Unc Details.** A popular issue from the first year of the With Motto type. This example displays rich, concentric circles of rainbow toning around the peripheries, with dusky lavender-gray color in the centers. The strike is full throughout, and there is substantial reflectivity in the fields. NGC ID# 252M, PCGS# 7014
- 3692 1868 PR61 PCGS.** This entirely untoned proof is one of only 600 specimens struck in 1868. As one would expect, the strike is razor-sharp throughout, and wispy die polish lines are evenly scattered over each side. The reverse exhibits a distinct cameo appearance, while the obverse lacks the contrast required for a Cameo designation. NGC ID# 252P, PCGS# 7016

TRADE DOLLARS

- 3693 1873-CC Chop Mark XF45 PCGS.** Trade dollars struck at the Carson City Mint in 1873 are challenging to locate, with or without chop marks, because of the issue’s low mintage of 124,500 coins. This well-traveled representative offers clear counterstamps that do not completely compromise the integrity of the design elements. The CC mintmark remains intact. PCGS# 87032
- 3694 1874-CC AU55 NGC.** Type One Obverse and Reverse. Micro CC. No period after FINE. A lightly circulated Carson City representative with bold definition except on Liberty’s hair curls. Delicate ice-blue and straw-gold toning visits moderately abraded fields. Minor gray verdigris is noted near DOLLAR and a couple of pinpoint aqua flecks are seen near UNITED. NGC ID# 2532, PCGS# 7035

**1874-CC Trade Dollar, MS60
Attractive, High-End Example**

- 3695 1874-CC MS60 NGC.** A lovely original appearance is the hallmark of this pleasing, well-struck example. Light speckled toning variations include elements of sandy-tan, golden-brown, pale olive, and creamy-gold patina. The fields display an attractive semiprooflike sheen. Housed in an old-style NGC holder, and definitely high-end for the assigned grade. NGC ID# 2532, PCGS# 7035

- 3696 1875-S MS63 PCGS.** Ex: “Col.” Green, Newman. Type One Obverse and Reverse. The 1875-S is one of the more plentiful Trade dollar issues of the period, ideal for type representation. This Select Mint State example displays soft, satiny luster beneath a veil of dusky lavender, blue, and golden-gray toning. The strike is generally well-executed, save for Liberty’s head and the eagle’s right (facing) talons, which are not fully defined. NGC ID# 2536, PCGS# 7039

- 3697 1875-S/CC Chop Mark XF45 PCGS. FS-501.** The popular S/CC *Guide Book* variety is the result of dies intended for the Carson City Mint being sent to San Francisco, where Mint officials overpunched an S mintmark. This example has clearly served its intended purpose, as evidenced by heavy chop marks from Chinese merchants, essentially obliterating most of the original design detail. Of interest to collectors across various fields of specialization, this historical piece is sure to garner attention when it crosses the auction block. PCGS# 87040

3698 1876 MS63 PCGS. CAC. Type One Obverse. Type Two Reverse. The usual subtype for the issue. A well struck and coruscating Select Centennial-year representative. Splendid golden-brown, fire-red, and ocean-blue toning embraces minimally marked surfaces. High-end for the designated grade, and an aesthetic pleasure to behold. NGC ID# 2539, PCGS# 7041

3699 1876-S MS62 PCGS. Type One Obverse, Type One Reverse. Large S. A flashy, fully struck example with untuned silver-gray surfaces and dynamic mint luster. A noticeable abrasion in the right reverse field restricts the grade. NGC ID# 253B, PCGS# 7043

1876-S Trade Dollar, MS64 Lightly Toned and Well-Preserved

3700 1876-S MS64 PCGS. CAC. A flashy, fully struck example with light mottling evident near the obverse and reverse peripheries, and dazzlingly lustrous fields. Well-preserved with few surface marks and seemingly high-end for the grade. Only six examples of this date and mint have been rated higher by PCGS as of (8/14). NGC ID# 253B, PCGS# 7043

1877-S Trade Dollar, MS64 Ideal Type Candidate

3701 1877-S MS64 PCGS. CAC. Breen-5814. Minute S. The 1877-S Trade dollar is one of the more plentiful dates in the series, but like all Trade dollar issues, it becomes scarce in MS65, and finer pieces are rare. This Choice representative boasts sharp design definition and subtle reflectivity in the fields. Warm gold, lavender, and aquamarine hues encompass each side, with the deeper colors more prominent on the reverse. PCGS has certified only 35 numerically finer representatives (8/14). NGC ID# 253E, PCGS# 7046

3702 1878-S MS64 NGC. Ex: Eric P. Newman Collection. Type Two Obverse and Reverse. An attractive near-Gem representative of the final Trade dollar issue to see mass distribution, toned gold-gray and peach overall with sizable green-gray patches noted at the lower obverse and upper reverse. All-around striking definition is excellent. Coins finer than MS64 are conditionally elusive, bordering on rare. NGC ID# 253G, PCGS# 7048

1878-S Trade Dollar, MS64+ Attractive Semiprooflike Example

3703 1878-S MS64+ PCGS. CAC. Dusky butter-gold, lime-green, and cream-gray toning encompasses this precisely struck Choice Trade dollar. Exemplary for the grade with only infrequent and inconsequential marks. Minor die doubling is noted on 420 GRAINS and TRADE. PCGS has received only 49 numerically finer submissions (8/14). NGC ID# 253G, PCGS# 7048

3704 1878-S MS61 Prooflike NGC. Evidently one of the first pieces struck from a fresh pair of dies, this sharp Mint State representative delivers the overall appearance of a proof when held in hand, and only the presence of the San Francisco mintmark causes one to realize it is a business strike. Splashes of light golden color melt into the deep mirrors on each side. This piece is one of only five examples awarded a Prooflike designation by NGC (8/14). PCGS# 77048

PROOF TRADE DOLLARS

3705 1874 PR62 Cameo PCGS. This is the second-year proof issue in the Trade dollar series, claiming a mintage of 700 examples. As the Cameo designation suggests, the thickly frosted design elements contrast starkly against the deeply mirrored and lightly toned fields. Wispy marks are scattered uniformly over the surfaces. Population: 9 in 62 Cameo, 39 finer (8/14). PCGS# 87054

3706 1878 PR58 PCGS. This PR58 specimen, from a proof-only issue of 900 pieces, displays just enough high-point friction to prevent an Uncirculated designation. Bright, silver-gray patina covers each fully struck side. Thin, wispy marks are scattered throughout, and a small rim nick occurs below the date. NGC ID# 27YP, PCGS# 7058

3707 1880 PR62 PCGS. Although undesignated as such on the holder, this brilliant proof features pleasing cameo contrast between thickly frosted motifs and deep mirrors. The strike is sharp overall with slight incompleteness over the upper obverse. One of 1,987 proofs struck in 1880. NGC ID# 27YS, PCGS# 7060

3708 1880 PR62 PCGS. The year 1880 (1,987 proofs struck) is the second date in a series of proof-only issues between 1879 and 1885. This representative offers a veil of faint, dusky toning over each side. The design motifs are crisply impressed, and wispy marks are lightly scattered throughout. NGC ID# 27YS, PCGS# 7060

3709 1882 PR62 PCGS. Type Two Obverse and Reverse. A razor-sharp example of this proof-only issue, this piece displays deeply mirrored recesses and moderate field-device contrast. The reverse shows dusky golden-gray patina, while the obverse exhibits beautiful hues of lavender, sea-green, and amber-gold toning. NGC ID# 27YU, PCGS# 7062

1882 Trade Dollar, PR63 Cameo
Proof-Only Issue

3710 1882 PR63 Cameo PCGS. Contrast is evident between the reflective fields and the lightly frosted devices. Subtle hints of caramel-gold toning are present. A strong lens is requisite to locate delicate field hairlines. The strike is bold aside from the upper left stars. A popular proof-only date. Population: 38 in 63 (4 in 63+) Cameo, 65 finer (8/14). PCGS# 87062

3711 1883 PCGS Genuine. Proof. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been scratched and cleaned. The fields are display parallel hairlines across both sides, along with distributed abrasions associated with indifferent keepsake storage. Glimpses of golden toning visit the borders. NGC ID# 27YV, PCGS# 7063

1883 Trade Dollar, PR64
Attractively Toned

3712 1883 PR64 NGC. CAC. Always a popular issue, as most of us will never be able to afford an 1884 or 1885 Trade dollar, thus making the 1883 the end of the line for the vast majority of date collectors. Well-mirrored and lacking any obvious contact marks or spots, each side has deep smoky-gray toning with turquoise-blue, green-gold, and lavender accents in the fields.
Ex: Houston Signature (Heritage, 12/2009), lot 966. NGC ID# 27YV, PCGS# 7063

1883 Trade Dollar, PR62 Cameo
Flashy and Lightly Toned

3713 1883 PR62 Cameo PCGS. CAC. Light honey-gold toning graces the majority of the obverse, although the right border displays powder-blue. The reverse is mostly brilliant but has glimmers of green, gold, and violet in protected areas. Flashy and fully struck. Minor obverse hairlines determine the grade. The final collectible proof-only date.
Ex: Grand Central Sale (Paramount, 11/1974), lot 343. PCGS# 87063

MORGAN DOLLARS

3714 1878 8TF MS65+ PCGS. CAC. The 1878 Eight Tailfeathers variant was the first variety of Morgan dollar coined, and is an always-popular issue in Gem condition. This sharply struck piece exhibits few surface flaws, with brilliant cartwheel luster. The obverse is fully prooflike with a distinct cameo appearance, though the reverse fields are a little too frosty to qualify for the Prooflike designation. PCGS has seen only 44 numerically finer representatives (8/14). NGC ID# 253H, PCGS# 7072

3715 1878 8TF Lines in LIB, VAM-2, MS65+ PCGS. CAC. This essentially brilliant and thoroughly lustrous Gem also displays a pleasing strike. No mentionable abrasions are absent, save for a tick on the eagle's breast. The eight tailfeather subtype was coined only in 1878 at Philadelphia, and constitutes a minority of the production for that year. PCGS# 133785

3716 1878 8TF First Die Pair, VAM-9, AU50 PCGS. A Top 100 Variety. The first die pair used to strike Morgan dollars. Only 303 examples were coined with this die pair, according to a reporter present at the time of striking. This piece displays bright silvery-gray color, with wisps of light golden toning over portions of each side. Slight friction is present, though the design elements remain nearly complete. Population: 25 in 50, 33 finer (8/14). PCGS# 133792

3717 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS. Attractive and unusual gray-green and pastel rose toning adorns the unmarked surfaces of this first-year example, showing the 8 Tailfeather Reverse. Sharply struck with prooflike obverse fields and a bright satiny appearance on the reverse. PCGS# 133818

3718 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS. A well-struck first-year representative showing the First Reverse type with eight tail feathers. Lustrous and minimally abraded, as expected for a Gem, with brilliant silver-white surfaces. PCGS# 133818

**1878 Morgan Dollar, MS64 Deep Mirror Prooflike
7/8 Tailfeathers, Only Three Finer at NGC**

- 3719 1878 7/8TF MS64 Deep Mirror Prooflike NGC.** Some reverse dies were altered during the first year of Morgan dollar production by changing the eight feathers in the eagle's tail to a more natural seven feathers arrangement. An estimated 500,000 coins were struck with these dies. This impressive example displays sharply detailed frosty design elements that contrast boldly with the well-preserved mirrored fields. Careful examination reveals the remnants of at least five undertype feathers below the primary seven feathers in the eagle's tail. Census: 23 in 64 Deep Mirror Prooflike, 3 finer (8/14). NGC ID# 2TXZ, PCGS# 97079

- 3720 1878 7/8TF Strong, VAM-38, MS65 PCGS.** Five original tailfeathers show beneath the seven overstruck tailfeathers, and the doubling on LIBERTY is the largest known shift of its kind. This frosty and brilliant Gem is sharply detailed and of interest to both series specialists and type collectors. PCGS# 134035

- 3721 1878 7/8TF VAM-40, 7/5 Strong, MS65 PCGS.** Five tailfeathers are visible beneath seven tailfeathers, and diagnostic die lumps occur on the olive leaves and left bow. Splendidly toned in lime-green, yellow, orange, and blue shades with mostly brilliant centers, this Gem is boldly impressed and minimally marked. PCGS has certified only nine numerically finer examples, all varieties included (8/14). PCGS# 134037

- 3722 1878 7TF Reverse of 1879 MS65 PCGS.** This lovely Gem example features brilliant and lustrous surfaces with minimal abrasions. The design elements are fully struck, and light clash marks occur on the reverse. PCGS has graded 17 Reverse of '79 examples numerically finer (8/14).

Ex: *Central States Signature* (Heritage, 4/2006), lot 3198. NGC ID# 253L, PCGS# 7076

**1878 7TF Morgan, MS65+
Reverse of 1879**

- 3723 1878 7TF Reverse of 1879 MS65+ PCGS.** Fully deserving of the Plus designation awarded it by PCGS, this high-end Gem representative is virtually free of even minor surface flaws, with just a few faint luster grazes behind Liberty's eye apparently limiting the grade. The strike is sharp and the frosty surfaces are essentially brilliant. PCGS has certified only 17 numerically finer representatives (8/14). NGC ID# 253L, PCGS# 7076

- 3724 1878-CC MS65 PCGS.** A delightful Gem from the first year of the Morgan design, this piece exhibits sharply detailed design elements and the creamy surfaces radiate vibrant mint luster. No mentionable distractions are evident. NGC ID# 253M, PCGS# 7080

- 3725 1878-CC MS65 PCGS.** Bright multicolored toning and cartwheel luster add to the eye appeal of this Gem. The patina includes hues of apple-green, cherry-red, teal, and russet-gold. The coin displays a well-executed strike. A number of small contact marks are present on Liberty's cheek, but are well-masked by the luminous patina. NGC ID# 253M, PCGS# 7080

- 3726 1878-CC MS65 PCGS. VAM-13.** The date, bust tip, and right-side stars are strongly doubled. Both borders display various slender die cracks. According to VAMworld.com, silver dollar authority John Roberts states that VAM-13 is "a tough coin and a legitimate rarity in Mint State." The present lustrous Gem is noteworthy for its fully dappled forest-green and cherry-red toning. NGC ID# 253M, PCGS# 7080

- 3727 1878-CC MS65 Prooflike NGC.** Although plentiful in an absolute sense, the 1878-CC Morgan is somewhat elusive at the Gem grade level with Prooflike mirroring. This piece displays moderate cameo contrast, with needle-sharp devices and nearly undisturbed luster. Hints of light golden toning around the rims are the only trace of color. NGC has awarded a Prooflike designation to only 9 numerically finer coins (8/14). NGC ID# 253M, PCGS# 7081

**1878-CC Morgan, MS64 Deep Mirror Prooflike
Attractive, Lightly Toned Example**

- 3728 1878-CC MS64 Deep Mirror Prooflike PCGS. CAC.** Highly popular as the first Morgan dollar issued at the Carson City Mint, the 1878-CC is also somewhat elusive with Deep Mirror Prooflike contrast. This example is boldly struck, with frosted devices and deep reflectivity in the fields. Violet and golden hues surround the peripheries, attractively complementing minimally abraded centers. PCGS has awarded the Deep Mirror Prooflike designation to only 38 numerically finer pieces (8/14). NGC ID# 253M, PCGS# 97081

- 3729 1878-S MS66 PCGS. CAC.** Spectacular multichromatic patina graces the obverse in shades of blue, green, magenta, yellow, and orange, while the reverse remains frosty and brilliant. Although each side appears radically different, needle-sharp definition and minimal marks are shared attributes. PCGS has certified only 27 examples numerically finer. NGC ID# 253R, PCGS# 7082

**1878-S Morgan, MS66 Prooflike
Conditionally Rare With Prooflike Qualities**

3730 1878-S MS66 Prooflike PCGS. CAC. The 1878-S Morgan is a readily available date in grades through MS66. Prooflike examples in the finer Mint State grades, however, are genuinely scarce. This brilliant representative showcases needle-sharp design definition, with ample mirroring in the fields. A few microscopic luster grazes on Liberty's cheek preclude a finer grade, but are virtually undetectable to the unaided eye. Population: 10 in 66 Prooflike, 2 finer (8/14). NGC ID# 253R, PCGS# 7083

3731 1878-S Doubled Rib, VAM-111, Fine 12 NGC. A Hot 50 Variety. The obverse motto is strongly doubled and a diagnostic vertical die gouge points to the I in PLURIBUS. This is a rare variety discovered in September 2011 by John Roberts and selected as the 2011 VAM of the Year by the SSDC, according to VAMWorld.com. A well-worn example but desirable nevertheless. PCGS# 516625

**1879 Morgan Dollar, MS66
Virtually Unavailable Any Finer**

3732 1879 MS66 PCGS. CAC. Despite a mintage of nearly 15 million pieces, the 1879 Morgan dollar was little saved, and coins that rate better than Gem are elusive. The present piece is solidly struck with strong luster and occasional whispers of tan-tinged toning over otherwise brilliant surfaces. This popular Philadelphia issue is essentially unavailable any finer, with only four coins certified in higher grades by PCGS (8/14).

Ex: *Long Beach Signature* (Heritage, 5/2008), lot 2433; *FUN Signature* (Heritage, 1/2009), lot 4447. NGC ID# 253S, PCGS# 7084

**1879-CC Dollar, MS63 Deep Mirror Prooflike
VAM-3, Capped Die**

3733 1879-CC Capped Die, VAM-3, MS63 Deep Mirror Prooflike PCGS. A brilliant-white coin with deep mirrors and frosted devices. Notable as the VAM-3 variety, with the date doubled (most obviously at the top of the 1 and 8, less so at the bottom outside of the 9 on the lower loop). Die chips surround the mintmark, believed to be a large mintmark stamped over a small one. Numerous abrasions over the reflective fields and on the portrait determine the Select Uncirculated grade. PCGS# 40777

3734 1879-O MS64+ PCGS. CAC. This frosty Plus-designated Morgan dollar has an excellent strike for the issue, showing only trifling weakness over Liberty's ear. The untuned surfaces are brilliant and lustrous. NGC ID# 253V, PCGS# 7090

**1879-O Morgan Dollar, MS65
Lustrous, Outstanding Example**

3735 1879-O MS65 PCGS. According to the second edition of *A Guide Book of Morgan Silver Dollars*: "The 1879-O dollar is plentiful in lower Mint State levels from 60 through 63. MS-64 coins are scarce and in proportion to the demand for them, MS-65 pieces are rare."

This is a lovely Gem with variegated champagne and light greenish-gray toning over clean, carefully preserved surfaces. A well-struck, lustrous example with outstanding eye appeal. NGC ID# 253V, PCGS# 7090

1879-O Dollar, High-End MS65

- 3736 1879-O MS65 PCGS.** Few coins were released into circulation, and most were stored in sealed bags that were eventually transferred to the Treasury. Between moving and annual inventory procedures, the majority of stored coins became bagmarked, with few pristine survivors. This amazing Gem has fully brilliant silver surfaces, frosty luster, and bold design features. The surfaces are remarkably clean, and only 16 examples are reported finer at PCGS (8/14).
Ex: Central States Signature (Heritage, 4/2008), lot 2590. NGC ID# 253V, PCGS# 7090

- 3737 1879-S Reverse of 1878 MS64 PCGS.** The parallel top arrow feather identifies the scarcer Reverse of 1878. This attractive Choice example displays well-detailed design elements and vibrant mint luster on both sides and the brilliant surfaces show a few minor signs of contact. NGC ID# 253W, PCGS# 7094

1879-S Morgan, MS65 Reverse of 1878

- 3738 1879-S Reverse of 1878 MS65 PCGS.** A degree of semiprooflike reflectivity in the fields complements heavily frosty devices on this brilliant Gem representative. A sharp strike and a lack of any major abrasions further contribute to the overall appeal. This Reverse of 1878 variety is seldom found so well-preserved. Population: 51 in 65, 1 finer (8/14). NGC ID# 253W, PCGS# 7094
- 3739 1879-S MS65 PCGS.** This is a boldly struck example, with only a few faint grazes on the obverse to limit the grade. The reverse displays vivid hues of sea-green, violet, and orange-gold toning, while the obverse is somewhat more muted in varying shades of tan-gray and pale gold. Radiant underlying luster is the hallmark of this Gem representative. NGC ID# 253X, PCGS# 7092

1879-S Morgan, MS67+ Prooflike High-End Early Type Coin

- 3740 1879-S MS67+ Prooflike PCGS. CAC.** The 1879-S is an easily obtainable date, even in the finer Mint State grades, though its availability is primarily restricted to non-Prooflike examples; at the MS67 grade level, Prooflike pieces are highly scarce. This Plus-graded representative showcases ample frost over the devices and pleasing cameo contrast. The strike is razor-sharp and subtle traces of light golden toning around the peripheries are the only suggestions of color. Population: 48 in 67 (3 in 67+) Prooflike, 2 finer (8/14). NGC ID# 253X, PCGS# 7093

- 3741 1880 MS65+ PCGS.** A fully brilliant Gem with the important PCGS Plus designation, this lovely Morgan dollar has satiny silver luster and is devoid of toning. NGC ID# 253Y, PCGS# 7096

- 3742 1880 MS66 PCGS.** The essentially untoned surfaces of this Premium Gem display strong luster and adequately struck design elements. A few light obverse grazes preclude full Gem status. Vast quantities of the more than 12 million piece mintage are available today, but MS66 coins are difficult to locate, and none are graded any higher at either service as of (8/14).
Ex: Long Beach Signature (5/2008), lot 2448. NGC ID# 253Y, PCGS# 7096

- 3743 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. The popular Carson City overdate variety with the Reverse of 1878, showing the underdigit without the need for magnification. This Gem is brilliant with frosty silver luster, sans toning. PCGS# 133876

- 3744 1880-CC 8 Over High 7, VAM-5, MS65+ PCGS.** A Top 100 Variety. This popular VAM variety exhibits an underlying 7 beneath the second 8 in the date; a small die gouge above the arrow feathers on the reverse confirms the attribution. This example displays frosty luster with just a blush of light golden toning. The strike is slightly soft on the wreath bow and the eagle's talons, though the design elements are otherwise well-defined. PCGS# 133877

- 3745 1880-CC MS65 PCGS.** A remarkably high-end coin, even for the Gem grade level, this piece exhibits virtually flawless surfaces, save for a few light grazes in the luster on Liberty's cheek. The hair above Liberty's ear is a trifle soft, though not to a distracting extent. Traces of light golden color warm the heavily frosted surfaces. Housed in an old green label holder. NGC ID# 2542, PCGS# 7100

- 3746 1880-CC MS66 PCGS. VAM-8.** A dash below the second 8 in the date and a lump within the second C of the mintmark attribute the variety. Though the central obverse is a trifle soft, this strongly lustrous coin offers pleasing detail elsewhere. The surfaces are fully brilliant and splendidly preserved.
Ex: FUN Signature (Heritage, 6/2008), lot 1304. NGC ID# 2542, PCGS# 7100

- 3747 1880-CC MS66 PCGS.** Frosty luster shines through a thin veil of light golden toning on each side of this Premium Gem example, while the surfaces are free of any significant abrasions. Slight softness of strike is noted on the eagle's breast and the hair above Liberty's ear, but not so much as to be detracting. PCGS has encapsulated 30 numerically finer representatives (8/14). NGC ID# 2542, PCGS# 7100
- 3748 1880-CC MS66 PCGS.** A number of examples of this issue have been certified at the MS66 grade level, but PCGS has seen only 30 numerically finer submissions (8/14). This frosty representative is well-struck and attractively preserved. Wisps of light golden toning grace nearly undisturbed luster on each side. NGC ID# 2542, PCGS# 7100
- 3749 1880-O MS64 PCGS.** Emanating luster and sharply defined devices characterize this Choice New Orleans dollar. The surfaces are entirely untuned and minimally marked for the grade. PCGS has certified 35 coins numerically finer (8/14).
Ex: *ANA Signature (Heritage, 3/2008), lot 932.* NGC ID# 2543, PCGS# 7114
- 3750 1880-O MS64 PCGS.** Moderately available in lower grades, the 1880-O Morgan becomes distinctly scarce in Gem condition. This Choice example exhibits frosty cartwheel luster with unusually well-preserved surfaces for the grade. The strike is bold for a New Orleans issue. PCGS has certified only 35 numerically finer representatives (8/14). NGC ID# 2543, PCGS# 7114
- 3751 1880-S MS67+ PCGS.** Medium S. The 1880-S is a widely available issue, as the Treasury release of the early 1960s yielded a vast quantity of representatives. The issue is also recognized for its sharp strike and excellent luster, attributes of this Superb Gem. Overall, this Plus-designated example has all the makings of an excellent type coin. NGC ID# 2544, PCGS# 7118

**1880-S Morgan Dollar, MS68
Superb Type Coin**

- 3752 1880-S MS68 PCGS.** Ex: California. Small S. This brilliant and highly lustrous Superb Gem has cartwheel mint frost that rolls around each side as the coin is rotated beneath a light. The devices are fully struck throughout. The surfaces are virtually perfect with a clean cheek and excellent overall eye appeal.
Ex: *FUN Signature (Heritage, 1/2003), lot 7833; ANA Signature (Heritage, 7/2008), lot 2306.* NGC ID# 2544, PCGS# 7118
- 3753 1881 MS66 PCGS.** Fully struck and impressively preserved, this brilliant coin displays flashy, vibrant mint luster and only scattered, minute surface marks that are not distracting or even visible to the unaided eye. A conditionally scarce example at this advanced grade level, and extremely rare any finer. NGC ID# 2546, PCGS# 7124
- 3754 1881-CC MS66 PCGS.** A flashy example of this Carson City date with stone-white surfaces and intense, frosty mint luster. A single, barely visible nick on Liberty's cheekbone is the only possible grade-limiting element on either side of this marvelous Premium Gem dollar. NGC ID# 2547, PCGS# 7126
- 3755 1881-CC MS66+ PCGS. CAC.** An outstanding Carson City dollar, this PCGS Plus designated example has brilliant silver surfaces with frosty luster. Both sides are bright white without toning. NGC ID# 2547, PCGS# 7126

- 3756 1881-CC MS66+ PCGS. CAC.** The well-preserved surfaces of this high-end Premium Gem are blanketed in shades of greenish-gold, lavender-gray, and violet toning. Well-detailed design elements and vibrant mint luster add to the considerable eye appeal. NGC ID# 2547, PCGS# 7126
- 3757 1881-CC MS66+ PCGS. CAC.** Tremendous mint frost radiates across the exquisitely preserved surfaces of this high-end Premium Gem. Fully struck and free of mentionable flaws, with outstanding overall eye appeal. NGC ID# 2547, PCGS# 7126
- 3758 1881-O MS65 PCGS.** In all respects, this O-mint Gem is highly appealing. Each side beams with frosty luster and unimpeded brilliance. The hair over Liberty's ear is remarkably well-defined, while the eagle's breast is typically soft. PCGS has certified only 26 coins in higher numeric grades (8/14). NGC ID# 2548, PCGS# 7128
- 3759 1881-S MS67+ PCGS. CAC.** This brilliant Superb Gem boasts CAC-approved visual appeal and premium quality for the grade. The strike is pinpoint-sharp, and the surfaces are devoid of any mentionable blemishes. This is strong candidate for type purposes. NGC ID# 2549, PCGS# 7130
- 3760 1881-S MS67+ PCGS. CAC.** A perfect type representative, this Plus-graded Superb Gem example showcases seemingly pristine surfaces with vibrant cartwheel luster and sharp motifs. The reverse is essentially brilliant, though the obverse displays soft hues of lavender-gray, amber-gold, and pale aquamarine toning. Fully deserving of the assigned CAC green label. NGC ID# 2549, PCGS# 7130
- 3761 1881-S MS67+ PCGS. CAC.** Amazingly deep hues of gold, electric-blue, purple-red and lime-green adorn the highly lustrous surfaces of this distraction-free Superb Gem. One of the most readily available dates in the Morgan dollar series in high grades. NGC ID# 2549, PCGS# 7130

**1881-S Morgan Dollar, MS68
Virtually Pristine Type Coin**

- 3762 1881-S MS68 NGC.** David Bowers (2006) calls the 1881-S "the commonest Mint State Morgan dollar of the 1878-1904 era," and common and readily available it is, as NGC and PCGS have certified many thousands of examples through MS67. The certified population figures drop off drastically in MS68, however.
The highly lustrous surfaces of this MS68 coin are untuned, save for a wide crescent of multicolored patina around the lower-left obverse border. A powerful strike results in crisp definition on all of the design elements, and both sides are beautifully preserved. None have been certified numerically finer at NGC (8/14).
Ex: *ANA Signature (Heritage, 8/2007), lot 2244.* NGC ID# 2549, PCGS# 7130
- 3763 1882 MS66 PCGS.** A beautiful piece with lovely toning that results in outstanding visual appeal. Well struck with vibrant luster and a couple of faint field grazes on the obverse that are well concealed by the deep patina. Only eight coins are graded finer at PCGS as of (8/14). NGC ID# 254A, PCGS# 7132
- 3764 1882 MS66 PCGS.** An exquisite Premium Gem, this important dollar has brilliant luster with satiny fields and frosty devices. No toning appears on either side. PCGS has only certified eight finer examples (8/14). NGC ID# 254A, PCGS# 7132

3765 1882 MS66 PCGS. Pleasing luster emanates from the silver-gray surfaces of this attractive Premium Gem Morgan dollar. The design features reveal sharp definition, including good detail in the hair at Liberty's ear and on the eagle's breast feathers.
Ex: Long Beach Signature (Heritage, 9/2008), lot 2672. NGC ID# 254A, PCGS# 7132

3766 1882-CC MS66 PCGS. CAC. Faint amber-brown toning colors the border regions, while the interiors remain largely brilliant. The impression is sharp aside from slight softness toward the centers over Liberty's hair and the eagle's breast feathers. An appealing Carson City type coin with few marks. NGC ID# 254B, PCGS# 7134

3767 1882-S MS67 PCGS. CAC. The obverse of this spectacular Superb Gem displays vivid shades of orange-gold, cobalt-blue, and violet toning, with a wide rainbow crescent around the upper margin, while the reverse is nearly brilliant, with thin bands of blue and golden color around the peripheries. The design elements are sharply detailed and vibrant mint luster shines through the patina. PCGS has seen 47 numerically finer submissions (9/14). NGC ID# 254F, PCGS# 7140

3768 1883 MS67 PCGS. *Ex: NFL Set.* This Superb Gem displays a decidedly above-average strike, especially on the eagle's breast. Whispers of golden-tan patina reside over the highly lustrous, impeccably preserved surfaces. Only two coins are certified in higher numeric grades at PCGS (8/14).
Ex: FUN Signature (Heritage, 1/2009), lot 4524. NGC ID# 254G, PCGS# 7142

3769 1883-CC MS66+ PCGS. CAC. The well-preserved surfaces of this high-end Premium Gem are vividly toned in shades of greenish-gold, silver-gray, and powder-blue, with more color on the obverse. The design elements are well-detailed and eye appeal is terrific. NGC ID# 254H, PCGS# 7144

**1883-CC Dollar, MS67
Excellent Carson City Type Coin**

3770 1883-CC MS67 PCGS. This is the second most available Carson City Morgan dollar in higher Mint State grades. Bags of 1,000 pieces were released in 1938, in the mid-1950s, and in the early 1960s. This Superb Gem displays cartwheel luster and silver-gray surfaces that reveal traces of light tan on the central reverse. Nicely struck, except for minor softness on the hair over Liberty's ear. A few inoffensive marks are noted. PCGS has graded only five coins finer (8/14).
Ex: Dallas Signature (Heritage, 10/2006), lot 1390; ANA Signature (Heritage, 3/2008), lot 980. NGC ID# 254H, PCGS# 7144

**1883-CC Morgan, MS66 Deep Mirror Prooflike
Old Green Label Holder**

3771 1883-CC MS66 Deep Mirror Prooflike PCGS. CAC. The 1883-CC is one of the more available Morgan dollar issues from this mint due to many bags of the date being distributed through the GSA sales of the early 1970s, but Deep Mirror Prooflike examples are in the distinct minority. This piece is essentially brilliant, with ample frost over the devices and pleasing field-motif contrast. The strike is sharp and there are only a few almost imperceptible luster grazes on the obverse to limit the numeric grade. Housed in an old green label holder. PCGS has seen only two numerically finer Deep Mirror Prooflike examples (8/14). NGC ID# 254H, PCGS# 97145

**1883-O Morgan Dollar, MS67
Among the Finest Certified**

3772 1883-O MS67 PCGS. *Ex: New York City Set.* The 1883-O dollar, with a mintage of nearly 9 million pieces, is one of the most common Morgans in Mint State. This is evidenced by the large certified population—over 100,000 Uncirculated coins through MS65 have been seen by PCGS and NGC. The numbers dwindle to a little over a thousand Premium Gems, and MS67 coins are fewer than 50 specimens. No '83-O's have been graded finer (8/14). This Superb Gem shows light traces of faint tan color over strongly lustrous surfaces. Except for minor softness in the hair over Liberty's ear, the design elements are well-impressed. Impeccably preserved surfaces further enhance the eye appeal. Population: 44 in 67 (1 in 67+), 0 finer (8/14).
The Michael Casper Collection, Part Three (Heritage, 3/2006), lot 1097. NGC ID# 254J, PCGS# 7146

1883-S Morgan, MS63
Virtually Prooflike

- 3773 1883-S MS63 PCGS.** This issue is moderately available in lower Mint State grades, much to the delight of the series collector. This piece shows fully prooflike mirroring in the obverse fields and semiprooflike qualities on the reverse, which is significant since certified Prooflike pieces are rare in all grades. The surfaces are mildly abraded, but the strike is sharp and the coin remains unusually appealing for the grade. NGC ID# 254K, PCGS# 7148

1883-S Morgan, MS63
Radiant Mint Luster

- 3774 1883-S MS63 PCGS.** The 1883-S Morgan had a mintage in excess of 6 million coins, but these pieces were widely distributed early, with the result that Mint State survivors of this issue are significantly scarcer than are those of other dates with similar mintages. This MS63 example displays frosty, nearly untuned luster, with well-defined devices. Light, scattered abrasions on the obverse limit the grade. NGC ID# 254K, PCGS# 7148

1883-S Silver Dollar, MS63
Better San Francisco Issue

- 3775 1883-S MS63 PCGS.** The 1883-S is far scarcer in Uncirculated grades than its San Francisco Morgan predecessors, although more collectible in the present grade than the 1884-S. This minimally toned representative offers sweeping luster and exhibits relatively few marks. The centers display minor incompleteness of strike. NGC ID# 254K, PCGS# 7148

1883-S Morgan Dollar, MS64
Upper-End for the Grade

- 3776 1883-S MS64 PCGS.** The 1883-S is only moderately available at the Choice Mint State level, and finer coins are decidedly rare. This piece exhibits radiant cartwheel luster beneath a thin veil of light golden toning. The strike is sharp, and there are only a few too many faint luster grazes on the cheek to warrant a Gem grade from PCGS. This service has certified only 18 coins in numerically finer grades (8/14). NGC ID# 254K, PCGS# 7148

-
- 3777 1884-CC MS66+ PCGS. CAC.** The blazing mint frost over snow-white surfaces produces outstanding visual appeal. A favorite type issue for collectors seeking a Carson City example, this piece would seem to qualify in spades. Fully struck with impressively preserved, near-flawless surfaces. NGC ID# 254M, PCGS# 7152

1884-CC Morgan, MS67
Only Three Numerically Finer at PCGS

- 3778 1884-CC MS67 PCGS.** The 1884-CC Morgan dollar is a readily available issue in Mint State due to many mint-sealed bags being distributed through the Treasury releases of the early 1960s and the GSA sales of a decade later, though its availability declines at the lofty MS67 grade level. This radiant, frost-white example displays nearly perfect surface preservation and intricately detailed devices. PCGS has encapsulated a paltry three numerically finer coins (8/14). NGC ID# 254M, PCGS# 7152

**1884-CC Silver Dollar, MS67
Prohibitively Rare Any Finer**

- 3779 1884-CC MS67 PCGS.** While the typically encountered 1884-CC Morgan would make a nice addition to a type set, Superb Gems are scarce and deserving of inclusion in the finest specialized collections. Both sides of this piece display the typical "look" for this CC-mint delivery: thickly frosted surfaces, rolling cartwheel effects, and boldly struck devices. Essentially untuned, the nearly pristine surfaces are comfortably at home at the MS67 grade level. PCGS has encapsulated only three numerically finer coins (8/14).
Ex: Philadelphia Signature (Heritage, 8/2000), lot 6291; ANA Signature (Heritage, 8/2001), lot 6638. NGC ID# 254M, PCGS# 7152

**1884-CC Morgan, MS67
Only Three Numerically Finer at PCGS**

- 3780 1884-CC MS67 PCGS.** Due to the distribution of large quantities of this issue in the GSA sales of the early 1970s, the 1884-CC is one of the more plentiful Morgan dollars in the series from this mint. Like many available dates, however, this issue becomes scarce at the MS67 grade level, and finer coins are prohibitively rare. This representative boasts a bold strike, with nearly undisturbed, frost-white luster. PCGS has certified only three numerically finer representatives (8/14). NGC ID# 254M, PCGS# 7152

**1884-O Dollar, MS67
Only a Single Coin Finer at PCGS**

- 3781 1884-O MS67 PCGS. CAC.** The 1884-O dollar is readily available in all Mint State grades through the MS66 level, after which the certified population drops precipitously. Radiant luster swirls about brilliant surfaces that display whispers of tan-gray on the right reverse. Generally well-struck and nicely preserved. Housed in a green label holder. PCGS has certified just a single coin finer (8/14).
Ex: Long Beach Signature (Heritage, 5/2008), lot 2507. NGC ID# 254N, PCGS# 7154

- 3782 1884-S AU58 NGC.** This attractive near-mint Morgan dollar displays sharply impressed design elements with the slightest trace of high-point wear and the lightly abraded surfaces retain much of their original mint luster. NGC ID# 254P, PCGS# 7156
- 3783 1884-S AU58 NGC.** A large portion of the 3.2 million-coin mintage entered into circulation on the West Coast, ensuring the issue as a condition rarity. Cartwheel luster and light toning blend over the otherwise brilliant surfaces of this attractive near-Mint example. NGC ID# 254P, PCGS# 7156
- 3784 1884-S AU58 PCGS.** Bright silvery-gray luster encompasses each side of this near-Mint example, while the strike is sharp and only slight friction is seen over the high points of the design. Light, scattered abrasions accompany the grade. NGC ID# 254P, PCGS# 7156
- 3785 1884-S AU58 PCGS.** Boldly struck overall with just a trace amount of weakness noted on the hair detail directly above Liberty's ear. Still lustrous and fully brilliant, with scattered minor abrasions and a slight degree of high-point rub seen on each side. NGC ID# 254P, PCGS# 7156
- 3786 1884-S AU58 NGC.** For the series collector, this lustrous near-Mint representative offers a slightly more affordable alternative to the elusive Uncirculated pieces. Nearly untuned luster blankets both sides, and only a brush of friction is evident over the eagle's breast and the hair above Liberty's ear. NGC ID# 254P, PCGS# 7156
- 3787 1885 MS67 PCGS. CAC.** Potent luster, a crisp strike, and a splendidly smooth appearance confirm the lofty quality of the present Superb Gem. A wisp of honey toning denies full brilliance. Housed in a green label holder.
Ex: ANA Signature (Heritage, 3/2010), lot 1427. NGC ID# 254R, PCGS# 7158
- 3788 1885 MS67 PCGS. CAC.** As the lofty grade suggests, this 1885 Morgan is almost perfectly preserved, with close examination finding only a few microscopic luster grazes on the obverse to limit the grade. Frost-white mint bloom engulfs each side, while the eagle's talons and the hair above Liberty's ear exhibit sharp definition. PCGS has encapsulated only two numerically finer representatives (8/14). NGC ID# 254R, PCGS# 7158
- 3789 1885-CC MS66 NGC.** An impressively lustrous example of this low-mintage Carson City issue. The frostiness of the obverse portrait shines through gold and green-blue patina, while the near-brilliance of the reverse puts the frost across the eagle on full display. NGC has graded 90 numerically finer pieces (9/14).
Ex: Long Beach Signature (Heritage, 9/2008), lot 2744. NGC ID# 254S, PCGS# 7160
- 3790 1885-CC MS66 PCGS.** Sharply struck with soft, elegant frost over the beautifully preserved devices. This Premium Gem is essentially untuned save for a hint of toning over the centermost areas of the central devices. PCGS has graded just 64 finer pieces (8/14).
Ex: ANA Signature (Heritage, 3/2008), lot 1008. NGC ID# 254S, PCGS# 7160
- 3791 1885-CC MS66+ NGC.** One would expect a Carson City coin from a mintage of only 228,000 pieces to be out of the reach of most collectors, especially in Premium Gem condition with a Plus designation. Such is not the case, however, as vast quantities were released throughout the 20th century. This gorgeous representative features exceptionally clean and brilliant surfaces with above-average strike definition. NGC ID# 254S, PCGS# 7160
- 3792 1885-O MS67 NGC.** This Superb Gem is nearly fully struck, a rare attribute for any New Orleans Mint product but one that is sometimes found on 1885-O examples. The surfaces are softly frosted and completely void of even the slightest hint of toning. NGC has graded only 10 coins numerically finer (8/14). NGC ID# 254T, PCGS# 7162

3793 1885-O MS67 PCGS. CAC. This is a solidly struck and lustrous blast-white Superb Gem without a lick of toning. Excellent overall preservation, and essentially devoid of even the slightest imperfection. PCGS has graded no numerically finer examples (8/14).

Ex: *FUN Signature (Heritage, 6/2008)*, lot 1110. NGC ID# 254T, PCGS# 7162

3794 1885-O MS67 PCGS. CAC. A coin with strong visual appeal, this Superb Gem boasts lovely silver-white color, frosty luster, and very few marks, all of them minuscule. The piece exhibits a sharp strike, even at the centers. PCGS has yet to assign a higher numeric grade to a single example (9/14). NGC ID# 254T, PCGS# 7162

1886-O Morgan, Frosty MS63

3795 1886-O MS63 PCGS. The 1886-O is a slightly more challenging issue from this Mint, especially near the Gem grade level, where representatives are seldom seen. This piece has unusually frosty luster for the issue, and exhibits only minor disturbances, primarily on the obverse. The hair above Liberty's ear is weak, as is typical of this New Orleans issue, though the overall appeal remains above-average for the date and grade. NGC ID# 254W, PCGS# 7168

1886-O Morgan Dollar, MS63

3796 1886-O MS63 PCGS. The high mintage 1886-O is a type coin in VF, but becomes surprisingly scarce in Uncirculated grades. The present lustrous and brilliant New Orleans dollar displays expected grazes but lacks any mentionable marks. The centers show moderate softness characteristic of the issue. NGC ID# 254W, PCGS# 7168

1886-O Morgan, MS63 Attractive for the Grade

3797 1886-O MS63 NGC. Unlike the 1885-O, which is a plentiful issue in Mint State, the 1886-O is scarce finer than MS63, and rare as a Gem. This piece is from a minority of examples with attractive, frosty luster and minimal significant abrasions. The strike is above-average for the issue, with only slight softness on the eagle's talons and the hair above Liberty's ear. Tinges of light golden toning intrude from the borders, though the interiors are nearly brilliant. NGC ID# 254W, PCGS# 7168

3798 1887 MS67 PCGS. Well struck with uncharacteristically flashy luster and minimal patina. This beautifully preserved Superb Gem is nearly unsurpassed for the issue, with just one finer example known to PCGS (8/14).

Ex: *ANA Signature (Heritage, 3/2008)*, lot 1023; *Long Beach Signature (Heritage, 9/2008)*, lot 2672. NGC ID# 254Y, PCGS# 7172

3799 1887 MS67 NGC. A lovely Superb Gem, this piece exhibits appealing cartwheel luster. Hints of gold and rose toning appear at the edge of the lower left portion of the obverse. Only three pieces are graded finer by NGC as of (8/14).

Ex: *Central States Signature (Heritage, 4-5/2009)*, lot 8866. NGC ID# 254Y, PCGS# 7172

3800 1887 Partial E Reverse, VAM-1B, AU55 NGC. A Hot 50 Variety. According to VAMWorld.com, "Acquiring an 1887 with a clashed E is considered a landmark event by most variety specialists." This Choice About Uncirculated example shows light silver-gray toning and ample remaining luster. Census: 2 in 55, 0 finer (8/14). PCGS# 134003

1887 Morgan, AU55 VAM-1B, Partial E Reverse

3801 1887 Partial E Reverse, VAM-1B, AU55 PCGS. A Hot 50 Variety. The popular "Clashed E Reverse," with the obverse E in LIBERTY visible in the reverse field below the eagle's tailfeathers. For the VAM specialist, this variety is near the top of the list for Hot 50 varieties. This example retains silvery-gray mint luster in the recesses, while the remainder of the surfaces display a pale golden-gray hue. Wear is minimal, and the eye appeal is quite pleasing for the grade. Population: 3 in 55, 4 finer (8/14). PCGS# 134003

**1887-O Morgan, MS65
Rarely Encountered Finer**

- 3802 1887-O MS65 PCGS. CAC.** A challenging issue in Gem condition, the 1887-O becomes undeniably rare in finer grades. This CAC-endorsed example showcases frosty, nearly brilliant surfaces, with just a touch of softness on the hair immediately above Liberty's ear. A few faint luster grazes contribute to the grade, but are not particularly distracting to the unaided eye. Only ten coins have been graded numerically finer at PCGS (8/14). NGC ID# 2552, PCGS# 7176
- 3803 1887-O MS64 Deep Mirror Prooflike PCGS.** A brilliant, silver-white coin, nicely frosted on Liberty's clean cheek, portrait, and on all other motifs as well. The bold strike shows minor blending over the ear as is usually seen on Deep Mirror Prooflike examples of the issue. A curving, shallow pair of field abrasions opposite Liberty's chin are the most noticeable marks on this near-Gem coin. Just seven examples are certified finer by PCGS in Deep Mirror Prooflike (9/14). NGC ID# 2552, PCGS# 97177
- 3804 1887/6-O VAM-3 MS62 PCGS. CAC.** A Top 100 Variety. The lower curve of the 6 appears to the lower right of the 7 in the date. Brilliant surfaces and radiant mint frost account for the CAC-approved eye appeal. The devices are sharp overall with typical softness at the centers, and marks are scattered throughout. Housed in a green label holder. PCGS# 133912
- 3805 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. A secondary 6 is faintly visible to the lower right of the 7 in the date. This Select *Guide Book* variety displays brilliant and softly frosted surfaces with typically shallow central design elements. A number of light grazes define the grade. PCGS# 133912
- 3806 1887-S MS65 PCGS. VAM-2a.** A Top 100 Variety. The mintmark is obviously repunched within the upper loop. This is a lustrous and penetratingly struck Gem with smooth fields and a clean portrait. The surfaces are brilliant aside from a wisp of gold toning on the jaw. PCGS has certified only 25 pieces numerically finer (8/14). Ex: *Central States Signature (Heritage, 4/2008)*, lot 2745. NGC ID# 2554, PCGS# 7180
- 3807 1888 MS65 Deep Prooflike NGC.** Ex: Binion Collection. Gem-quality 1888 Morgans with Deep Prooflike mirroring are seldom encountered, and finer examples are rare. This piece displays a profound depth of mirroring in the fields and sharp, well-frosted devices. A few luster grazes on the cheek limit the grade. Hints of lemon-gold toning around the extreme peripheries are the only trace of color. Census: 31 in 65 Prooflike, 9 finer (8/14). NGC ID# 2555, PCGS# 97183
- 3808 1888-O MS66 PCGS.** Boldly impressed with strong cartwheel luster. This Registry-quality Premium Gem is untoned, save for a splash of orange color on Liberty's cheek. Tied for the finest certified by PCGS (8/14). Ex: *ANA Signature (Heritage, 3/2008)*, lot 1034. NGC ID# 2556, PCGS# 7184
- 3809 1888-O MS66 PCGS.** A typical New Orleans issue, the 1888-O is infrequently encountered in high grades and when found, often exhibits subdued luster and incomplete strikes. This Premium Gem is an important exception, showcasing frosty, beautifully preserved surfaces and sharp design definition. Traces of lemon-gold color warm the border regions. None have graded numerically finer at PCGS (8/14). NGC ID# 2556, PCGS# 7184

- 3810 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU55 PCGS.** A Top 100 Variety. Liberty's nose, lips, and chin are broadly doubled. The frosty surfaces are largely untuned and surprisingly lustrous. Typical strike softness occurs toward the centers, and marks are lightly scattered over each side. Population: 39 in 55, 9 finer (8/14). PCGS# 133919
- 3811 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU55 PCGS.** A Top 100 Variety. The famous "Hot Lips" VAM with strong die doubling seen on Liberty's profile. This creamy-gray example is moderately marked and lightly worn across the design's high-points. It is well-detailed and the doubling on Liberty's lips, nose, and chin are easy to discern with the unaided eye. Listed on page 229 of the 2015 *Guide Book*. Population: 46 in 55, 21 finer (8/14). PCGS# 133919
- 3812 1888-S MS64+ PCGS. CAC.** A well-struck example from San Francisco with rollicking mint luster and creamy-white surfaces. A few small marks are noted that seem minimal for the near-Gem assessment; as confirmed by the coveted + designation from PCGS. NGC ID# 2557, PCGS# 7186
- 3813 1888-S MS65 PCGS.** A hint of pale toning blankets the otherwise brilliant obverse, while the reverse is devoid of any color. This frosty S-mint Gem Morgan dollar shows well-struck design motifs and minimal marks. Parallel die polish striations appear over the reverse. PCGS has seen only 28 coins in higher numeric grades (8/14). NGC ID# 2557, PCGS# 7186
- 3814 1888-S MS65 PCGS.** A charming Gem example of this San Francisco Mint issue, with intensely lustrous silver-white surfaces that are clean and virtually unmarked on both sides. From a low mintage of 657,000 coins. NGC ID# 2557, PCGS# 7186
- 3815 1889-CC VF25 PCGS.** Nicely detailed for the grade, with warm, old-silver appeal and few abrasions on the smooth fields and devices. Strong, unmarked rims remain on this moderately circulated key Carson City issue. NGC ID# 2559, PCGS# 7190
- 3816 1889-CC — Cleaning — PCGS Genuine. XF Details.** This lightly circulated example shows glossy surfaces from past cleaning, but has since acquired pale golden-gray toning. A few marks are present, though this remains a pleasing example of this sought-after Carson City issue. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, XF45
Richly Toned Throughout**

- 3817 1889-CC XF45 PCGS.** The 1889-CC is the rarest Morgan dollar from the Carson City Mint, due to its low production total of 350,000 pieces. Much of the mintage circulated heavily in the 19th century, suffering attrition along the way, and many coins were undoubtedly melted in later years. This Choice XF specimen shows only light wear on the well-detailed design elements, and the lightly abraded surfaces are blanketed in shades of bluish-gray, apple-green, and amber toning. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan, Unc Details
Key Carson City Issue**

- 3818 1889-CC — Cleaning — PCGS Genuine. Unc Details.** Lightly cleaned, as noted by PCGS, this key-date Morgan dollar has since acquired pale amber-gold hues in the peripheral regions, and displays strong semiprooflike mirroring in the fields. The design elements are sharply struck, and the surfaces are free of any major abrasions. NGC ID# 2559, PCGS# 7190

**1889-O Morgan Dollar, MS65
Better O-Mint Issue in High Grade**

- 3819 1889-O MS65 PCGS.** This issue was produced in substantial quantities (nearly 12 million coins), but most entered circulation shortly after their issue, and high-grade Mint State examples are not as plentiful as they theoretically should be. Gems can be found with some searching, though finer coins are decidedly rare. This piece displays frosty, nearly untuned luster and well-preserved surfaces. As is characteristic of this New Orleans issue, some minor softness is observed on the eagle's breast and the hair above Liberty's ear. PCGS has encapsulated only 10 numerically finer representatives (8/14). NGC ID# 255A, PCGS# 7192

**1889-S Morgan, MS66
Beautiful Multicolor Toning**

- 3820 1889-S MS66 NGC.** A slightly better date in all grades, the 1889-S becomes rare finer than MS66. This example exhibits frosty, vibrant mint luster beneath a thick blanket of olive, sea-green, orange-gold, violet-red, and forest-green hues, with the deeper colors seen primarily around the peripheries. A few minute ticks limit the grade, but are well-hidden beneath the rich patina. A sharp strike completes the eye appeal. NGC has certified just three numerically finer representatives (9/14). NGC ID# 255B, PCGS# 7194

**1889-S Dollar, MS66
Essentially Unobtainable Any Finer**

- 3821 1889-S MS66 PCGS.** This thoroughly lustrous and virtually brilliant Premium Gem showcases a bold strike and a beautifully preserved obverse field. The 1889-S is a popular lower-mintage date that is essentially impossible to acquire above the MS66 level. Population: 75 in 66 (4 in 66+), 1 finer (8/14). NGC ID# 255B, PCGS# 7194

- 3822 1890 MS65 PCGS.** This well-struck Gem offers mostly brilliant and softly frosted surfaces with only a few scattered marks over each side. Despite a mintage exceeding 16.8 million coins, PCGS has graded just three submissions in higher numeric grades (8/14). Ex: *Dallas Signature (Heritage, 11/2006), lot 1342.* NGC ID# 255C, PCGS# 7196

- 3823 1890-CC MS64 PCGS.** This near-Gem Carson City Morgan dollar exhibits glimpses of pale toning, though brilliance predominates. A pinpoint-sharp strike, glowing luster, and few noteworthy marks further enhance the visual appeal. NGC ID# 255D, PCGS# 7198

- 3824 1890-CC MS64 PCGS.** The 1890-CC is a rather plentiful issue through Choice condition. In higher grades, however, the issue is scarce. Thus, this frosty and untuned representative offers an affordable opportunity for the budget-minded collector to obtain a high-end Mint State Carson City coin. Well-struck and minimally abraded. NGC ID# 255D, PCGS# 7198

- 3825 1890-CC MS64 PCGS.** Ex: Carson City Collection. Frosty, minimally abraded surfaces exhibit faint traces of light golden color as the coin is turned in-hand. The hair above Liberty's ear is well-defined, though not definably full. Overall, this is a highly attractive example for the grade. Finer pieces are only infrequently encountered. NGC ID# 255D, PCGS# 7198

- 3826 1890-CC MS64 PCGS.** Ex: Carson City Collection. Heavily frosted, untuned luster engulfs each side of this high-end Choice example, with only a few light grazes on the obverse limiting the numeric grade. A sharp strike completes the immense visual appeal. NGC ID# 255D, PCGS# 7198

- 3827 1890-CC MS64+ NGC.** Very nearly Gem-quality, as evidenced by the given Plus designation, this Choice 1890-CC Morgan displays frosty cartwheel luster beneath thin traces of light golden color. The strike is well-executed and only a few luster grazes on the cheek limit the grade. NGC ID# 255D, PCGS# 7198

- 3828 1890-CC MS64+ PCGS.** CAC. A high-end Choice specimen from the famous Carson City Mint, this coin exhibits sharply detailed design elements and lustrous brilliant surfaces that show a few minor contact marks. NGC ID# 255D, PCGS# 7198

1890-CC Morgan, MS65
Rarely Encountered Finer

- 3829 1890-CC MS65 PCGS. VAM-3, Doubled 90.** The 90 in the date is noticeably recut north. As a date, the 1890-CC Morgan is only marginally scarce at the Gem level, but finer pieces are rare, inspiring greater demand on MS65-graded pieces. This frosty, untuned representative displays well-struck design elements, with only a few minute luster grazes on the cheek precluding an even finer grade assessment. PCGS has certified just 13 numerically finer representatives (8/14). NGC ID# 255D, PCGS# 7198

- 3830 1890-O MS65 PCGS.** A beautifully lustrous, snow-white Gem showing well-detailed motifs and only faint chatter marks on the reverse that keep it from grading even higher. Surprisingly scarce at this level considering the high mintage of 10.7 million coins, and rare any finer. Only 24 pieces are rated above MS65 by PCGS as of (8/14). NGC ID# 255E, PCGS# 7200

- 3831 1890-S MS65+ PCGS. CAC.** A plentiful date in lower grades, the 1890-S Morgan becomes slightly more elusive in Gem condition, with finer pieces being genuinely scarce. This Plus-graded representative displays thickly frosted luster and sharp devices beneath varying shades of silver-gray, orange-gold, lilac-green, pale lavender toning. NGC ID# 255F, PCGS# 7202

1890-S Morgan Dollar, MS66
Rarely Seen in Higher Grades

- 3832 1890-S MS66 PCGS.** A whisper of russet toning adorns the rims of this highly lustrous Premium Gem, while the fields and devices are brilliant. Beautifully preserved and well-detailed with only moderate inexactness on the curl above the ear. PCGS has certified a mere seven pieces finer (8/14).
Ex: ANA Signature (Heritage, 3/2008), lot 1073. NGC ID# 255F, PCGS# 7202

1891 Morgan Dollar, MS65
Exceedingly Rare Any Finer

- 3833 1891 MS65 PCGS.** A gleaming piece, mildly reflective with occasional wisps of cloud-white toning over otherwise brilliant silver surfaces. The well-defined and carefully preserved surfaces display considerable frostiness. Impressive eye appeal for the issue. Encased in an old green label holder. PCGS has certified three just coins numerically finer (8/14).
Ex: FUN Signature (Heritage, 1/2009), lot 4660. NGC ID# 255G, PCGS# 7204

1891 Silver Dollar, MS65
Virtually Unobtainable Finer

- 3834 1891 MS65 PCGS.** Thousands of 1891 dollars are certified in MS62 through MS64, but Gems are far scarcer than the high mintage would suggest. In fact, the low mintage 1899 is much more plentiful at the MS65 level than the 1891. The present minimally toned 1891 Morgan displays vibrant luster. The cheek and fields are smooth, and the grade is limited solely by a typical strike. NGC ID# 255G, PCGS# 7204

- 3835 1891-CC MS64 PCGS.** The obverse is awash in golden-russet patina and reverse is fully brilliant and frosty. Each side features sharply detailed motifs and few noteworthy marks aside from a graze on Liberty's cheek. The 1891-CC is a popular issue among type enthusiasts, and examples become elusive in Gem condition, making MS64 an ideal collectible grade. NGC ID# 255H, PCGS# 7206

- 3836 1891-CC MS64 PCGS. CAC.** This delightful Choice Mint State Carson City Morgan dollar has beautiful gold and iridescent toning on the obverse, and a brilliant, untuned reverse. NGC ID# 255H, PCGS# 7206

- 3837 1891-CC MS64 ★ NGC. CAC.** Both NGC and CAC have affirmed the eye appeal of this near-Gem example, awarding it a Star designation and a green label sticker respectively. The surfaces remain thickly frosted and fully brilliant with bold detail and only undistracting marks. A nice Carson City type. NGC ID# 255H, PCGS# 7206

1891-CC Morgan, MS65
Virtually Brilliant Throughout

3838 1891-CC MS65 PCGS. The 1891-CC Morgan was not as well-represented in the GSA sales of the early 1970s as were Carson City issues from the 1880s, with the result that this date is proportionately more elusive in high grades. This Gem example displays frosty luster and sharp motifs. A few insignificant surface grazes limit the technical grade, but hardly inhibit the eye appeal. PCGS has encapsulated 30 numerically finer representatives (8/14). NGC ID# 255H, PCGS# 7206

3839 1891-CC MS63 Deep Prooflike NGC. Deep Prooflike Carson City dollars are always in demand, partly due to their general scarcity in relation to non-prooflike examples. This 1891-CC representative displays fully mirrored fields and softly frosted devices. Traces of amber toning surround the extreme outer peripheries, while a shallow reed mark in the field below Liberty's chin contributes to the grade. The central eagle's feathers and the hair above Liberty's ear are not fully defined. Census: 64 in 63 Deep Prooflike, 25 finer (8/14). NGC ID# 255H, PCGS# 97207

3840 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. A Top 100 Variety. A small die gouge occurs below the eagle's beak. The 1891-CC is good for type purposes, as it claims the second-highest mintage among Carson City Morgan dollars after the 1890-CC issue. Frosty luster rolls over the brilliant surfaces of this near-Gem example. The design elements are sharply struck with faint softness at the centers, and marks are minimal. PCGS# 133937

3841 1891-CC Spitting Eagle, VAM-3, MS64+ NGC. A Top 100 Variety. A small die gouge in the field near the eagle's beak identifies this popular variety. This example displays heavily frosted, remarkably clean surfaces and sharply struck devices. The obverse is nearly brilliant, save for a few amber tinges around the periphery, while the reverse is awash in rich orange-gold toning, with a crescent of ocean-blue seen around the lower-right border. NGC has encapsulated only 45 numerically finer representatives of this variety (8/14). PCGS# 133937

1891-CC Silver Dollar, MS65
'Spitting Eagle,' Top 100

3842 1891-CC Spitting Eagle, VAM-3, MS65 PCGS. A Top 100 Variety. Undesignated as such on the PCGS insert, but the die lump beneath the beak is obvious. The left C in the mintmark is repunched north, and a diagonal die line crosses the flag of the 1 in the date. A lustrous and nearly brilliant Gem with excellent eye appeal and only inconsequential contact. PCGS# 133937

3843 1891-O MS64 PCGS. CAC. A slender band of autumn-gold toning illuminates the margins of this lustrous and well preserved near-Gem. The strike at the centers is decidedly above average for this indifferently made issue. Despite a mintage of close to 8,000,000 pieces, the 1891-O is elusive in the present quality. Housed in a green label holder. NGC ID# 255J, PCGS# 7208

3844 1891-O MS64+ PCGS. CAC. The eye appeal of this high-end near-Gem example is substantial, and perhaps its most noteworthy attribute. Shimmering mint luster and subtle peripheral toning combine to guarantee the beauty of this New Orleans Mint product. NGC ID# 255J, PCGS# 7208

3845 1891-S MS65 NGC. The Sherman Silver Purchase Act of 1890 is to blame for the high mintages from all four mints in 1891. In particular, the San Francisco Mint struck nearly 5.3 million Morgan dollars in 1891. This is a frosty and well-struck example with splashes of pale toning over otherwise brilliant surfaces. While comparable Gems are generally available, finer examples are scarce. NGC has certified only 21 coins in higher numeric grades (8/14). NGC ID# 255K, PCGS# 7210

1891-S Morgan Dollar, MS66
Lustrous and Sharply Defined

3846 1891-S MS66 PCGS. Cartwheel luster swirls over completely brilliant surfaces, and the devices exhibit typically sharp definition for the issue. A few grade-limiting ticks are noted mostly on the reverse, though none are singularly distracting. This Premium Gem is a strong candidate for Registry or type purposes. Population: 78 in 66 (4 in 66+), 8 finer (8/14). NGC ID# 255K, PCGS# 7210

1892 Dollar, MS64 Deep Mirror Prooflike
Starkly Contrasted and Brilliant

3847 1892 MS64 Deep Mirror Prooflike PCGS. Bowers notes: "Semi-prooflike coins are seen on occasion, but gems are elusive and sharply struck DMPLs are rarer yet." This is one such sharply struck Deep Mirror Prooflike representative. Pronounced contrast characterizes each side, and abrasions are minimal. Population: 27 in 64 Deep Mirror Prooflike, 5 finer (8/14). NGC ID# 255L, PCGS# 97213

3848 1892-CC MS61 PCGS. A high mintage of 1.35 million pieces ensures the ready availability of this late Carson City issue. This example is boldly struck with typical small abrasions and a splash of russet-brown patina that resides along the upper right obverse periphery. NGC ID# 255M, PCGS# 7214

3849 1892-CC MS61 PCGS. CAC. A lustrous and attractive dollar, sharply struck for the issue and brilliant, frost-white on each side. Remarkably few abrasions for the assigned grade. Housed in a first generation PCGS holder with CAC approval. NGC ID# 255M, PCGS# 7214

3850 1892-CC MS62 PCGS. When held at the correct angle under a lamp, olive-green patina reveals magnificent shades of red, blue, green, and lemon-yellow. A surprising amount of luster emanates from beneath the toning, illuminating lightly marked and well-detailed surfaces. NGC ID# 255M, PCGS# 7214

3851 1892-CC MS63 NGC. This is a snow-white example with intensely lustrous surfaces and a few superficial marks on Liberty's cheek and on the left obverse field that keep the piece from a higher grade. This was the next-to-last year of Carson City coinage production. NGC ID# 255M, PCGS# 7214

1892-CC Morgan, MS64 Well-Preserved and Frosty

3852 1892-CC MS64 PCGS. CAC. The GSA sales of the early 1970s did not contain any examples of this late Carson City issue, contributing to its scarcity in high grades. This Choice example displays frosty mint luster with only minor grazes on each side limiting the grade. The eagle's breast and the hair above Liberty's ear exhibit just a touch of striking weakness, though the other elements are well brought up. Faint traces of light golden color appear around the extreme outer peripheries. NGC ID# 255M, PCGS# 7214

3853 1892-O MS64 PCGS. CAC. Softly struck over the centers, with coruscating luster and brilliant stone-white surfaces. A couple of superficial grazes on the cheek and another on the left obverse field seemingly keep this high-end example from a Gem grade, along with a few wispy field marks on the reverse. This flashy piece excels through sheer eye appeal. NGC ID# 255N, PCGS# 7216

3854 1892-O MS64+ PCGS. CAC. This New Orleans issue is moderately available in MS64 and lower grades, but Gems are scarce. This Plus-graded Choice example exhibits unusually clean surfaces for the grade, though a soft strike likely contributed to PCGS's assessment. Faint remnants of roller marks are seen over the centers, a product of insufficient die pressure. A thin crescent of orange-gold toning along the lower-left obverse rim is the only mentionable color. NGC ID# 255N, PCGS# 7216

3855 1892-S AU50 PCGS. The 1892-S is one of the more conditionally challenging issues in the Morgan dollar series, and is seldom seen in pleasing Mint State condition. This AU representative offers a well-detail alternative. Bright silvery surfaces reveal few noticeable flaws. NGC ID# 255P, PCGS# 7218

3856 1892-S AU53 PCGS. A pleasing AU example of this better S-mint issue, this piece displays gold-tinted silvery-gray patina, with remnants of luster in the protected regions. Only slight wear is seen over the high points of the design. NGC ID# 255P, PCGS# 7218

3857 1892-S AU53 NGC. An attractive untoned example of this better date which becomes a key issue in mint condition. Well-detailed with very minor high-point wear noted on each side, and lightly hairlined fields. NGC ID# 255P, PCGS# 7218

1892-S Silver Dollar, AU55 Challenging San Francisco Issue

3858 1892-S AU55 NGC. The 1892-S Morgan is the very definition of a condition rarity; the date is easily obtainable in circulated grades, but Mint State pieces in any condition are among the rarest in the series and draw appropriately strong prices when offered. This Choice AU representative offers the budget-minded collector with a pleasing alternative. Traces of light golden color accent bright surfaces on each side, while light wear is primarily restricted to the eagle's breast and the hair above Liberty's ear. NGC ID# 255P, PCGS# 7218

1892-S Morgan, AU55 Heavily Circulated Issue

3859 1892-S AU55 NGC. The San Francisco Mint struck 1.2 million silver dollars in 1892, but most were released into circulation early, with the result that Mint State survivors are scarce in all grades. This lightly toned AU example shows pale golden-gray surfaces and nearly complete detail. Noticeable surface flaws are at a minimum. NGC ID# 255P, PCGS# 7218

3860 1893 MS63 NGC. Cartwheel luster illuminates flashy and brilliant surfaces that show only a spot of amber toning on the eagle's breast. This Select dollar is sharply struck with minor incompleteness toward the centers, typical for the issue, and lightly scattered marks. A low-mintage date in the series (378,000 coins). NGC ID# 255R, PCGS# 7220

3861 1893 MS63 PCGS. All of the federal coinage facilities saw reduced Morgan dollar mintages in 1893, and only 378,000 business strikes emerged from the Philadelphia Mint. Quite a few were saved, however, or came out of the later Treasury releases, making this a common date popular with type specialists. This Select example is well-struck and only shows scattered, minuscule abrasions typical for the grade. NGC ID# 255R, PCGS# 7220

3862 1893 MS63 NGC. Ex: Stack's W 57th St Collection. This piece exhibits frosty, nearly untuned luster, with hints of gold and blue toning around the extreme outer borders. The eagle's breast and the hair above Liberty's ear are not fully brought up, though the surfaces are unusually well-preserved for the grade level. NGC ID# 255R, PCGS# 7220

3863 1893 MS64 PCGS. VAM-2. A lightly toned and lustrous near-Gem of this lower mintage Philadelphia issue. Marks are refreshingly few and inconsequential. The top of the 3 is repunched. The date slants upward with the 3 further from the dentils than the 1. Liberty's profile is lightly die doubled. NGC ID# 255R, PCGS# 7220

3864 1893-CC XF40 PCGS. A glimpse of mint luster remains at the margins of this final-year Carson City dollar. Lightly toned, silver-gray surfaces show a few small abrasions but no serious marks. Soft over the ear, but otherwise nicely detailed for the grade. NGC ID# 255S, PCGS# 7222

3865 1893-CC XF40 PCGS. After striking a low mintage of 677,000 Morgan dollars, the Carson City mint facility ceased coinage operations forever. This XF example displays deep champagne-gray toning and evenly worn surfaces with a few marks and hairlines that are too minor to detract from the coin's very decent eye appeal. NGC ID# 255S, PCGS# 7222

3866 1893-CC XF40 PCGS. CAC. The Carson City branch mint shut its doors in 1893, but not before striking 677,000 Morgan dollars. This final-year key date features stone-gray patina with the slightest trace of luster in the recesses. All but the highest points of the design still show good detail. NGC ID# 255S, PCGS# 7222

3867 1893-CC XF45 NGC. By the end of 1893, the Carson City Mint had struck its last coin. This final-year representative features bright, silver-gray patina with intermittent splashes of violet toning around the edges. Light friction and scattered marks do not detract from the appeal of this low-mintage CC Morgan dollar. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, AU53 Pleasing Final-Year Type Coin

3868 1893-CC AU53 PCGS. In its final year of coinage production, the Carson City mint facility struck just 677,000 silver dollars. This is an untoned, lightly circulated example that should please the Carson City date specialist or the final-year type collector seeking a suitable representative. A few moderate bagmarks are present, but they are located primarily in the fields. NGC ID# 255S, PCGS# 7222

1893-CC Morgan, AU58 Final-Year Carson City Issue

3869 1893-CC AU58 PCGS. The 1893-CC Morgan is widely sought due to its stance as the final silver dollar coined at the Carson City Mint, but it is also one of the scarcer issues from that facility in Mint State condition, as only a single representative was found in the GSA sales of the early 1970s. This near-Mint example presents the collector with a well-detailed, lustrous representative. The surfaces are nearly brilliant, save for a blush of light golden toning around the peripheries. Scattered abrasions accompany the grade. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, AU58 Popular Type Issue

3870 1893-CC AU58 NGC. A flashy AU example of this final-year Carson City issue that is fully brilliant and retains all but trace amounts of the original design details, lost to small touches of high-point friction. Just 677,000 pieces were produced and the issue boasts excellent survivorship based upon the number of near-Mint and Uncirculated examples that still exist. NGC ID# 255S, PCGS# 7222

3871 1893-S Good 4 PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Good specimen that has been improperly cleaned. Consequently, this example presents an affordable opportunity to obtain a famous cornerstone date in the Morgan dollar series. Multicolor toning hugs to obverse margins, while a veil of rose-orange patina covers the reverse. NGC ID# 255U, PCGS# 7226

3872 1893-S Good 6 NGC. Silver dollars circulated for long periods of time on the West coast without regard for date or mintmark. However, few examples of any date survive in this grade as original and undisturbed as this coin, let alone as the key business strike Morgan dollar. Just a few tiny ticks interrupt the natural old-silver patina. NGC ID# 255U, PCGS# 7226

1893-S Morgan, VF Sharpness

3873 1893-S — Improperly Cleaned — NGC Details. VF. Lightly cleaned in the past, this key-date San Francisco Morgan dollar has since acquired pale steel-gray toning overall, and retains strong design definition for the grade level. An affordable example for the budget-minded series collector. NGC ID# 255U, PCGS# 7226

3874 1894 XF40 NGC. Despite grade-consistent friction over the high points, a majority of the original design remains clear. The interstices retain much luster, and the surfaces remain virtually untuned with marks lightly scattered over each side. This Extremely Fine piece offers a balance between condition and affordability that discerning collectors are sure to appreciate. NGC ID# 255V, PCGS# 7228

3875 1894 XF45 PCGS. A popular Philadelphia issue, with a low mintage of only 110,000 pieces. This Choice XF representative displays bright steel-gray surfaces, save for a few hints of amber color around peripheries. The eagle's breast and the hair above Liberty's ear exhibit the only readily obvious wear. NGC ID# 255V, PCGS# 7228

3876 1894 — Improperly Cleaned — NGC Details. AU. With a mintage of only 110,000 coins, the 1894 issue is a perennial favorite among series specialists. A light and mostly unobtrusive cleaning has left the surfaces somewhat subdued, though a pleasing amount of original luster remains. The motifs showcase a bold impression, and abrasions are minimally scattered over each side. NGC ID# 255V, PCGS# 7228

3877 1894 — Improperly Cleaned — NGC Details. AU. The 1894 dollar claims the second-lowest mintage in the series with a production of just 110,000 coins, exceeded only by the formidable 1893-S. This lightly circulated example shows swirling luster over silver-gray surfaces. A number of abrasions are scattered over each side. NGC ID# 255V, PCGS# 7228

3878 1894 AU50 NGC. A lightly circulated example of this low-mintage issue, this coin is nearly untuned, save for a couple of virtually imperceptible gold color on Liberty's cheek and the eagle's breast. Traces of luster are visible in the protected areas, and just a few unobtrusive marks are scattered about. The design features show nice definition, though the hair over Liberty's ear and the eagle's breast are flat.

Ex: Long Beach Signature (Heritage, 9/2005), lot 6035. NGC ID# 255V, PCGS# 7228

3879 1894 AU53 NGC. Silver-gray patina covers surfaces that retain an impressive degree of mint luster. The design features show solid detail, although an expected amount of friction causes moderate blending over the high points. This is a collectible representative from a famous low-mintage key date in the Morgan dollar series. NGC ID# 255V, PCGS# 7228

3880 1894 AU53 NGC. An unusually attractive example of this better Philadelphia issue, this piece exhibits natural golden-gray toning with traces of luster remaining in the protected regions, primarily on the obverse. Slight wear on the eagle's breast and the hair above Liberty's ear preclude a Mint State grade, but the surfaces are attractively free of major consequential abrasions. NGC ID# 255V, PCGS# 7228

3881 1894 AU53 PCGS. Boasting the second-lowest business strike mintage of the series, the 1894 Morgan dollar is nevertheless a readily available date that collectors should have no trouble obtaining a nice example of. This untuned AU coin retains substantial detail and displays few marks that are individually noticeable. NGC ID# 255V, PCGS# 7228

3882 1894 AU55 NGC. This Choice About Uncirculated example and Philadelphia key date retains its brilliance. Ample mint luster rolls over each side, and sharply struck devices show only light rubbing over the high points. Sure to be one of the highlights in any Morgan dollar collection. NGC ID# 255V, PCGS# 7228

3883 1894 AU58 NGC. Along with the 1889-CC and 1893-S, the 1894 Morgan dollar issue is one of the keystone dates in the series. This near-Mint State representative features abundant luster over largely untuned surfaces. Exceptionally well-struck and minimally marked for the grade. NGC ID# 255V, PCGS# 7228

3884 1894 AU58 NGC. A well-struck piece with flashy, semi-prooflike surfaces that are free of toning and lightly abraded across both sides. A better date with the second-lowest business strike mintage in the Morgan dollar series. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS61 Affordable Low-Mintage Issue

3885 1894 MS61 NGC. This issue had the second-lowest business strike mintage of the series but is surprisingly available in Uncirculated condition, up to and including MS63. Higher-graded pieces are expensive, however, making the current grade level a more affordable alternative. This is an essentially untuned, creamy-silver example with faint rose accents on some of the high points, and a few noticeable abrasions that keep it from a finer grade. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS62 Highly Lustrous Example

3886 1894 MS62 NGC. A popular date among Morgan dollar collectors, the 1894 boasts the lowest mintage of any Philadelphia issue in the series, only 110,000 pieces. This well-struck example exhibits unusually vibrant mint luster highlighting tinges of amber-gold toning around the peripheries. Light, scattered abrasions are present, as the grade suggests. NGC ID# 255V, PCGS# 7228

3887 1894-O MS61 PCGS. A pleasing lower-grade Mint State example of this popular O-mint issue, this piece displays softly frosted, untuned luster, with only minor grazes on the cheek limiting the grade. The eagle's talons and the hair above Liberty's ear are not fully defined, as is typical of this New Orleans issue. NGC ID# 255W, PCGS# 7230

3888 1894-O MS62 PCGS. For an issue typically characterized as lackluster and poorly struck, this Uncirculated representative features unusually vivid cartwheel luster and strong detail. Slight incompleteness over Liberty's ear is expected, and evenly scattered marks across the obverse are in accord with the grade. The reverse is surprisingly devoid of abrasions. NGC ID# 255W, PCGS# 7230

3889 1894-S MS63 PCGS. A flashy specimen with reflective fields that are close to being fully Prooflike, although unacknowledged as such by PCGS. A well-struck, brilliant example with wispy contact marks on the cheek and in the left obverse field that are consistent with the Select Mint State grade assessment. NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, MS64
Strong Eye Appeal**

- 3890 1894-S MS64 PCGS. CAC.** This near-Gem 1894-S Morgan is essentially untoned, save for a blush of lemon toning behind Liberty's cap. The surfaces display some prooflike characteristics with die polish in the gleaming fields, though it stops short of the sharply struck, lightly marked devices. An attractive coin with CAC approval.
Ex: Dallas Signature (Heritage, 4/2007), lot 1213; ANA Signature (Heritage, 3/2008), lot 1151. NGC ID# 255X, PCGS# 7232

- 3891 1895-O AU53 PCGS.** Remnants of mint luster highlight the recesses, while the relief elements retain nearly complete definition, despite slight high-point wear. The coin is essentially untoned, with bright, steel-gray surfaces. NGC ID# 255Y, PCGS# 7236

- 3892 1895-O AU53 PCGS.** A heavily circulated issue, the 1895-O Morgan is seldom seen in Mint State condition. This bright, silvery-gray AU example retains moderate luster in the recesses, with only light wear over the high points. Scattered abrasions accompany the grade. NGC ID# 255Y, PCGS# 7236

- 3893 1895-O AU53 NGC.** Slight wear is evident on the eagle's breast feathers and the hair above Liberty's ear, though the design elements are otherwise sharp. Substantial luster remains in the recesses, illuminating faint golden hues on each side. Overall, this is a pleasing AU example of this slightly better O-mint issue. NGC ID# 255Y, PCGS# 7236

- 3894 1895-O AU53 NGC.** A well-detailed example for the grade of this important New Orleans issue, struck in a year when there were no Philadelphia Mint business strikes. Essentially untoned with small marks from what was likely a fairly brief stint in circulation. NGC ID# 255Y, PCGS# 7236

- 3895 1895-O AU55 NGC.** This low-mintage branch mint issue is common in XF and AU grades, but scarce-to-rare in Uncirculated condition. This is a boldly defined piece with a noticeable layer of opaque creamy-beige patina across each side. Shallow marks are evident in the left obverse field, and on Liberty's cheek, but the reverse is unmarked. Both sides show a slight degree of high-point-wear. NGC ID# 255Y, PCGS# 7236

**1895-O Dollar, AU58
Important, Scarce Low-Mintage Issue**

- 3896 1895-O AU58 PCGS.** This low-mintage issue is rare in Mint State, making a nice near-Mint example like this one highly desirable in the numismatic marketplace. The strike definition is impressive for a New Orleans product, and the fields display a flashy semiprooflike sheen. A fully brilliant example with small abrasions and a few wispy hairlines, along with barely-evident friction on the high points. An attractive piece, very close to Mint State. NGC ID# 255Y, PCGS# 7236

- 3897 1895-S XF45 PCGS.** An untoned, modestly worn example with a number of faint hairlines and a few small blemishes noted on each side. A scarce and expensive issue in high grades. NGC ID# 255Z, PCGS# 7238

**1895-S Morgan Dollar
Semikey, Near-Mint Example**

- 3898 1895-S AU58 PCGS.** A production of 400,000 Morgan dollars at the San Francisco Mint makes this issue one of the lowest-mintage dates in the entire series and widely sought for that reason. This sharply detailed and brilliant representative shows minimal high-point rub that limits the grades. Lustrous and lightly marked. NGC ID# 255Z, PCGS# 7238

- 3899 1896 MS67 PCGS.** This Superb Gem is problem-free and attractive, with smooth, nearly unmarked fields and motifs and a full strike. An untoned, brilliant, and frosty Morgan dollar. Just two numerically finer coins are reported at PCGS (9/14). NGC ID# 2562, PCGS# 7240

**1896 Silver Dollar, MS67
Two Coins Finer at PCGS and NGC Combined**

3900 1896 MS67 PCGS. CAC. The 1896 is the first readily collectible Philadelphia issue in mint condition, and coins are obtainable through the MS66 grade level. Comparable Superb Gems are scarce, and only two coins are certified finer at both PCGS and NGC combined (8/14). This eye-appealing representative features blushes of pale toning over largely brilliant surfaces. Frosty luster abounds, and the strike is boldly impressed. NGC ID# 2562, PCGS# 7240

3901 1896 MS66 Prooflike PCGS. Readily available in lower grades, the 1896 Morgan becomes scarce at the MS66 level with a Prooflike designation. This piece is untoned, with moderate mirroring in the fields and soft frost over the devices. A sharp strike and a lack of significant abrasions completes the eye appeal. Population: 18 in 66 (1 in 66+) Prooflike, 1 finer (8/14). NGC ID# 2562, PCGS# 7241

**1896-O Dollar, MS62
Lustrous and Brilliant**

3902 1896-O MS62 PCGS. Taken as a series, there is no other Morgan dollar that is more consistently lackluster, bagmarked, and softly struck than the 1896-O. This piece has radiant, flashy luster and is definitely superior to most examples seen. The strike is soft over Liberty's ear, and the eagle's breast is ill-defined also, but these seem like minor considerations when one appreciates the generally miserable appearance of most '96-O dollars. Brilliant throughout with bagmarks that seem appropriate for the grade.
Ex: Long Beach Signature (Heritage, 9/2006), lot 5490. NGC ID# 2563, PCGS# 7242

**1896-O Morgan, MS62
Challenging in Mint State**

3903 1896-O MS62 PCGS. Readily available in circulated grades, the 1896-O Morgan becomes somewhat elusive in Mint State, and is genuinely rare in Choice or finer condition. This example displays satiny luster beneath iridescent light golden toning. The eagle's breast and the hair above Liberty's ear are slightly soft, as is typical of this New Orleans issue, though the surfaces are only minimally abraded. NGC ID# 2563, PCGS# 7242

3904 1896-S MS60 NGC. The faintest hint of peach-orange toning blankets otherwise brilliant surfaces that show softly frosted luster. As is typical of this somewhat better-date dollar, the strike shows slight incompleteness at the centers, but the eye appeal remains strong overall. NGC ID# 2564, PCGS# 7244

1896-S Morgan, Lustrous MS62

3905 1896-S MS62 NGC. Though not truly rare in and of itself, in Mint State the 1896-S is a decidedly challenging issue in the context of the Morgan dollar series. Traces of light golden color encompass each side of this example, while the grade-limiting abrasions are light and evenly dispersed. A touch of softness is noted on the eagle's breast and the hair above Liberty's ear. NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, MS62
Seldom Seen in High Grade**

3906 1896-S MS62 NGC. Although specimens in circulated grades are readily available, the 1896-S Morgan dollar is much more difficult to locate in high grade than its mintage of 5 million pieces would suggest. This attractive MS62 specimen is well-detailed and brightly lustrous, with a number of minor contact marks, mostly on the obverse. NGC ID# 2564, PCGS# 7244

- 3907 1897 MS66+ PCGS.** Liberty's hair is a trifle weak over the ear as usual, but the remaining design elements are bold, including crisp breast feathers on the reverse. This Premium Gem is brilliant and untuned with frosty silver luster. PCGS has only certified 25 finer examples (8/14). NGC ID# 2565, PCGS# 7246
- 3908 1897-O MS62 PCGS.** Softly frosted luster illuminates traces of pale champagne toning on this 1897-O representative. Abrasions are light and evenly dispersed, though moderate striking weakness on the eagle's breast and the hair above Liberty's ear likely contributes to the grade. NGC ID# 2566, PCGS# 7248
- 3909 1897-S MS66 PCGS.** This wonderfully preserved San Francisco dollar is remarkably free of any noteworthy blemishes. Each side remains untuned and lustrous with well-defined devices. A struck-in grease mark occurs under the eagle's left (facing) wing. PCGS has certified only 23 numerically finer submissions (8/14). NGC ID# 2567, PCGS# 7250

**1897-S Morgan, MS66 Prooflike
Elusive This Well-Contrasted**

- 3910 1897-S MS66 Prooflike PCGS.** This San Francisco issue is only marginally elusive in MS66 condition, though such pieces exhibiting prooflike mirroring are distinctly scarce, and numerically finer examples are decidedly rare. This piece is sharply struck, with brilliant, mirrored fields and frosty, minimally disturbed devices. Population: 31 in 66 (2 in 66+) Prooflike, 3 finer (9/14). NGC ID# 2567, PCGS# 7251
- 3911 1898 MS66+ PCGS.** An impressive Premium Gem that carries the coveted PCGS Plus designation, this untuned beauty has white-silver luster and frosty surfaces. NGC ID# 2568, PCGS# 7252
- 3912 1898 MS65 Deep Mirror Prooflike PCGS. CAC.** Iridescent blue-violet and yellow-gold patina adorns each side of this lovely Gem. The fields are highly reflective, and the surfaces are carefully preserved. Not a rare issue overall, but certainly scarce in MS65 with Deep Mirror fields. Population: 62 in 65 Deep Mirror Prooflike, 14 finer (8/14).
Ex: Long Beach Signature (Heritage, 9/2002), lot 7585. NGC ID# 2568, PCGS# 97253
- 3913 1898-O MS67 NGC.** An impressive, fully brilliant Superb Gem with rollicking cartwheel luster and razor-sharp strike definition. Both sides of the coin are splendidly preserved and Liberty's cheek is nearly immaculate. NGC ID# 2569, PCGS# 7254
- 3914 1898-O MS67 PCGS. CAC.** This fully struck Superb Gem is thoroughly lustrous with whispers of patina near the obverse rims. Outstanding in every respect with magnificent eye appeal. Tied for the finest-certified by PCGS (8/14).
Ex: Long Beach Signature (Heritage, 2/2006), lot 2293; ANA Signature (Heritage, 3/2008), lot 1172. NGC ID# 2569, PCGS# 7254

- 3915 1898-O MS66+ Prooflike PCGS. CAC.** A gorgeous example of this once-rare issue that became more readily available only after the first large Treasury release of stored Morgan dollars in 1962. This Prooflike example is brilliant and sharply struck, with outstanding reflectivity seen in the fields. The surfaces are as clean as expected for the Premium Gem grade, including Liberty's smooth, unmarked cheek. Population: 53 in 66 (2 in 66+) Prooflike, 2 finer (8/14). NGC ID# 2569, PCGS# 7255
- 3916 1898-S MS65 PCGS.** A brilliant Gem with satin luster, this lovely Morgan dollar lacks toning on either side. The fields are reflective and provide a nice backdrop for the design motifs. Just 76 finer examples are PCGS certified (8/14). NGC ID# 256A, PCGS# 7256
- 3917 1898-S MS65 NGC.** A lovely Gem from San Francisco with blended hues of olive and mustard-gold coloration along the peripheries, and bold cartwheel luster in the fields. Well-struck with compete definition over the centers and two or three trivial nicks on the reverse that are too small to preclude the MS65 designation. NGC ID# 256A, PCGS# 7256

**1898-S Morgan Dollar, MS66
Challenging in This High Grade**

- 3918 1898-S MS66 PCGS. Ex: Jack Lee Estate.** Each side has a subtle splash of pale gold toning over otherwise frosty silver luster. The central motifs are sharp, with slight weakness only over Liberty's ear, as nearly always. This Premium Gem represents the highest collectible grade for the variety, with only three numerically finer PCGS-certified pieces (8/14).
Ex: Dallas Signature (Heritage, 10/2008), lot 1467. NGC ID# 256A, PCGS# 7256
- 3919 1899 MS66 PCGS.** A sharply struck, brilliant example with intensely lustrous, near-pristine surfaces. This issue had a low mintage of only 330,000 pieces, and Premium Gem examples such as this one are difficult to locate. NGC ID# 256B, PCGS# 7258
- 3920 1899 MS66 PCGS.** A semikey in the series, with a mintage of only 330,000 pieces, the 1899 Morgan dollar understandably becomes elusive in MS66, and is genuinely rare any finer. This Premium Gem piece displays sharp devices and excellent preservation. Traces of light golden toning complement frosty luster on each side. PCGS has encapsulated only 18 numerically finer representatives (8/14). NGC ID# 256B, PCGS# 7258
- 3921 1899-O MS67 PCGS.** Radiantly lustrous surfaces display occasional hints of light olive-green color over otherwise entirely brilliant surfaces. Overall, this is a well-struck and impeccably preserved Superb Gem. PCGS has certified only a single coin numerically finer (8/14).
Ex: ANA Signature (Heritage, 8/2008), lot 2433. NGC ID# 256C, PCGS# 7260

**1899-O Morgan, MS67
Superb O-Mint Representative**

- 3922 1899-O MS67 PCGS. CAC.** The population of Mint State 1899-O Morgan dollars was greatly increased in autumn 1962 when the Treasury released large quantities to the numismatic world, making the date excellent for type purposes. This Superb Gem example displays softly frosted, light golden luster over both sides, with beautifully preserved underlying surfaces. A sharply struck example, housed in an old green label holder. Only one example has graded numerically finer at PCGS (8/14). NGC ID# 256C, PCGS# 7260

**1899-S Morgan Dollar, MS66
Remarkable, Eye-Appealing Example**

- 3923 1899-S MS66 PCGS.** This sharply struck and thoroughly lustrous Premium Gem is generally brilliant, but has occasional hints of gold toning. The fields are remarkably unabraded, and the eye appeal is undeniably superior. Housed in a green label holder.
Ex: Dallas Signature (Heritage, 11/2007), lot 1346; Central States Signature (Heritage, 4/2008), lot 2969. NGC ID# 256D, PCGS# 7262
- 3924 1900 MS66+ PCGS. CAC.** Iridescent shades of champagne-gold, aquamarine, and lilac-gray toning enhance the well-preserved obverse surfaces of this high-end Premium Gem. By contrast, the reverse remains essentially brilliant. The design elements are sharply detailed and eye appeal is tremendous. NGC ID# 256E, PCGS# 7264

**1900-O Dollar, MS67
None Finer at Both Services**

- 3925 1900-O MS67 PCGS.** Both sides offer impressive luster that shines through only faint toning over otherwise brilliant surfaces. The strike is solid, particularly at the often-weak centers, and both the central devices and the fields show outstanding preservation for this New Orleans issue. Neither PCGS nor NGC have certified a numerically finer example (8/14).
Ex: FUN Signature (Heritage, 1/2009), lot 4788. NGC ID# 256F, PCGS# 7266

- 3926 1900-O/CC VAM-11 MS65 NGC.** A Top 100 Variety, this *Guide Book* variety is one of the more popular VAMs of the latter portion of the series. This example displays vibrant, frosty mint bloom beneath faint traces of light golden toning. Slight striking softness is noted on the eagle's breast, though the surfaces are remarkably free of any significant abrasions. NGC has certified just 11 numerically finer representatives (8/14). PCGS# 133963
- 3927 1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. A diagonal die crack beneath the shoulder curl is the pick-up point for this collectible overmintmarked VAM. Carson City dies leftover from the 1893 closure of the facility were eventually given New Orleans mintmarks and placed into production. An appealing Gem with light green-gold toning, booming luster, and smooth surfaces. PCGS# 133963
- 3928 1900-S MS65 NGC.** Splendid eye appeal is the hallmark of this Gem dollar from the San Francisco Mint. The bright, brilliant fields and centers are beautifully framed by rich reddish-brown peripheral toning. A well-struck specimen with semi-prooflike fields and a few small abrasions on the reverse that keep it from grading even finer. NGC ID# 256H, PCGS# 7270
- 3929 1900-S MS65 PCGS.** Frosty, nearly undisturbed luster enlivens both sides of this Gem representative, with just a faint suggestion of light golden color seen upon close examination. The eagle's breast feathers and the hair above Liberty's ear are not fully defined, though the remarkably clean surfaces balance the visual appeal. NGC ID# 256H, PCGS# 7270

1900-S Morgan Dollar, MS66
Only Two Numerically Finer at PCGS

- 3930 1900-S MS66 PCGS.** A well-produced example, silver-white, of this generally nicely executed issue. Bounteous cartwheel luster emanates from both sides, and there are few mentionable abrasions. (One diagonal scrape that appears to be on the eagle's upper breast is actually on the slab.) PCGS has graded only two numerically finer examples (8/14).
Ex: FUN Signature (Heritage, 1/2009), lot 4797. NGC ID# 256H, PCGS# 7270

- 3931 1901 AU58 PCGS.** The 1901 is one of the most conditionally elusive issues in the Morgan dollar series after the 1896-O. This largely brilliant near-Mint example is ideal for the collector on a budget. Ample cartwheel luster swirls over the lightly abraded surfaces, and the motifs show good detail. NGC ID# 256J, PCGS# 7272

- 3932 1901 AU58 PCGS.** One of the most conditionally elusive issues in the series in Mint State, the 1901 Morgan dollar boasts many pleasing AU examples to satisfy the collector on a budget. This near-Mint piece shows original, nearly full mint luster and exhibits just a trace of high-point friction. This coin is one of the more attractive AU representatives this cataloger has seen. NGC ID# 256J, PCGS# 7272

1901 Morgan, MS60
Sought-After in Mint State

- 3933 1901 MS60 PCGS.** The 1901 Morgan dollar is well-known as being one of the most elusive dates in the series in Mint State condition, and is actively sought in all such grade levels. This example exhibits numerous scattered abrasions, as the grade suggests, though the luster is especially vibrant. Traces of golden toning around the peripheries are the only hint of color on this coin. NGC ID# 256J, PCGS# 7272

- 3934 1901 Doubled Die Reverse, VAM-3, XF45 ANACS.** This *Guide Book* variety exhibits bold die doubling on all reverse elements, but is most famous for the doubled outline of the central eagle, hence the moniker "Shifted Eagle." This example is lightly circulated, with glossy steel-gray patina over the centers, and tinges of amber-gold and blue toning around the peripheries. PCGS# 133965

- 3935 1901 Doubled Die Reverse, VAM-3, AU50 PCGS.** A Top 100 Variety. A complete second set of tailfeathers appear as a result of misaligned hubbing toward 12 o'clock. The arrows, leaves, and IN GOD WE TRUST are also broadly doubled. This is a lightly toned and partly lustrous representative. Population: 18 in 50, 75 finer (8/14). PCGS# 133965

- 3936 1901-S MS64 PCGS.** The design elements are sharply detailed overall with slight strike incompleteness at the centers. Each side shows vibrant mint luster over all-brilliant surfaces. Minimally marked and scarce any finer. NGC ID# 256L, PCGS# 7276

1901-S Morgan Dollar, MS65
Above-Average Strike

- 3937 1901-S MS65 PCGS.** Vibrant luster issues from the untuned surfaces of this Gem S-mint dollar, and a better-than-average strike brings out relatively strong definition on the design elements, including partial detail over Liberty's ear. Some grade-consistent marks are visible over each side. PCGS has graded only 36 submissions in higher numeric grades (8/14).
Ex: Long Beach Signature (Heritage, 5/2008), lot 2702. NGC ID# 256L, PCGS# 7276

1901-S Silver Dollar, MS64
Rare Attractive Prooflike Example

- 3938 1901-S MS64 Prooflike PCGS. CAC.** The 1901-S Morgan dollar is a challenging issue in high-grade and examples with attractive prooflike surfaces are especially elusive. This impressive Choice example exhibits sharply detailed design elements and deeply reflective fields that show a few minor hairlines and contact marks, and a few hints of pale jade toning. Population: 9 in 64 Prooflike, 3 finer (8/14). NGC ID# 256L, PCGS# 7277

- 3939 1902 MS66+ PCGS. CAC.** This high-end Premium Gem displays well-preserved brilliant surfaces with just a hint of lavender-gray toning. The design elements are sharply rendered but mint luster is slightly subdued. PCGS has graded 28 numerically finer examples (8/14). NGC ID# 256M, PCGS# 7278

- 3940 1902-O MS66+ PCGS. CAC.** Highly lustrous and impressively preserved, the obverse displays a full, variegated coating of apple-green and cinnamon toning. Light traces of orange-gold and green-gray toning enhance the peripheries of the otherwise brilliant reverse. Scarce any finer at both services. NGC ID# 256N, PCGS# 7280

- 3941 1902-S MS64+ PCGS.** A well-struck, highly lustrous Morgan dollar with untuned interiors and slight golden peripheral toning. Minimally abraded and definitely high-end, as confirmed by the + PCGS grade. NGC ID# 256P, PCGS# 7282

1902-S Morgan, MS65
Lightly Toned and Eye-Appealing

3942 1902-S MS65 PCGS. CAC. The 1902-S Morgan dollar is often plagued by striking weakness, and this representative exhibits this to a mild degree, with the hair above Liberty's ear being the most obvious area of softness. The frosty surfaces, however, are unusually clean, even for the Gem grade level. Light champagne toning with peripheral tinges of amber and navy blue increases the eye appeal. PCGS has seen only 49 numerically finer submissions (8/14). NGC ID# 256P, PCGS# 7282

3943 1903 MS66+ PCGS. CAC. A lovely, fully brilliant, sharply struck example with radiant cartwheel luster across each side. An impressive piece without a hint of toning on the carefully preserved surfaces. One small blemish on the lower right reverse, just beyond the arrow tips, is the only noteworthy surface flaw. NGC ID# 256R, PCGS# 7284

1903 Morgan Dollar, Brilliant MS67
Impeccably Preserved

3944 1903 MS67 PCGS. CAC. Ex: Ray George. This is a wonderfully preserved and highly lustrous Superb Gem with a blush of gold patina over the otherwise brilliant surfaces. The center of the obverse displays a touch of weakness, as does the reverse, from the use of the C4 reverse die. The surfaces are extraordinarily clean on each side. This piece is tied for finest certified PCGS (8/14). Ex: FUN Signature (Heritage, 1/2007), lot 7443; ANA Signature (Heritage, 8/2008), lot 2443. NGC ID# 256R, PCGS# 7284

1903-O Dollar, Sharp MS67
Outstanding New Orleans Example

3945 1903-O MS67 PCGS. CAC. This is an impeccably preserved Superb Gem with brilliant surfaces and scintillating luster. The strike is nearly full, and a few wispy grazes do not affect the excellent eye appeal. The 1903-O is seldom seen at such a lofty level. Neither PCGS nor NGC have certified any pieces finer (8/14). Ex: Los Angeles Signature (Heritage, 8/2009), lot 2041. NGC ID# 256S, PCGS# 7286

1904 Silver Dollar, Brilliant Gem

3946 1904 MS65 PCGS. CAC. Lustrous surfaces are essentially untoned, and exhibit well-struck design elements, including most of the detail in the hair over Liberty's ear. A few minuscule, grade-consistent marks do not disturb. After the 1904 Philadelphia, New Orleans, and San Francisco issues, no more Morgan dollars were struck until 1921. PCGS has certified just 18 numerically finer examples (8/14).

Ex: Houston Signature (Heritage, 12/2008), lot 3283; Baltimore Signature (Heritage, 3/2009), lot 1528. NGC ID# 256U, PCGS# 7290

3947 1921-D MS66+ PCGS. CAC. Normal striking softness is observed on the reverse wreath leaves, and on the eagle's breast feathers, while the other design elements are boldly produced. Highly lustrous and draped across both sides by a lovely mixture of green, lavender, and russet-red coloration. Surface marks are minimal and nearly nonexistent. Population: 24 in 66+, 8 finer (9/14). NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

3948 1878 8TF PR62 PCGS. VAM-14.3. Both proofs and business strikes are known from the VAM-14.3 dies. However, the present coin is obviously a proof, since the strike is razor-sharp and devices exhibit contrast with the glassy fields. Nonetheless undesignated as Cameo. The margins display a hint of golden-tan toning, and minor hairlines are noted near UNITED STATES. The reverse legends are die doubled. NGC ID# 2572, PCGS# 7311

1880 Morgan Dollar, PR64
Gorgeous Premium Quality Example

3949 1880 PR64 PCGS. This is a gorgeous near-Gem proof dollar that exhibits razor-sharp strike definition and no-questions cameo contrast that is bold and clear on both sides. Lovely light toning includes golden peripheral coloration on each side. A great piece that is clearly high-end for the grade. NGC ID# 2724, PCGS# 7315

3950 1881 PR62 NGC. From a mintage of 984 pieces, this fully struck proof displays vivid coppery-orange toning over deeply mirrored fields. Faint hairlines limit the grade, though they are well-hidden by the rich patina. Overall, this is a highly pleasing lower-grade proof Morgan. NGC ID# 2725, PCGS# 7316

1883 Silver Dollar, PR64 Secure
Lightly Toned and Conditionally Scarce

- 3951 1883 PR64 PCGS Secure. A lightly toned example with mottled hues over each side, and well-preserved surfaces that are contact-free. Full strike definition includes the eagle's talons and tailfeathers, along with all of the central motifs. This proof issue had a mintage of 1,039 pieces, relatively few of which are graded finer than PR64 at either service. NGC ID# 27Z7, PCGS# 7318

1885 Morgan Dollar, PR66 Cameo
Beautifully Toned

- 3952 1885 PR66 Cameo PCGS. A beautifully toned representative that reveals exquisite cameo contrast on the obverse. Both sides exhibit lavender, mustard-gold, and cobalt-blue toning that is a bit deeper on the reverse. The strike definition is full, and the surfaces are nearly flawless. From a slightly higher mintage of 930 pieces, for the era, this issue is scarce at PR66 Cameo and rare finer. Population: 20 in 66 (2 in 66+) Cameo, 0 finer (9/14). PCGS# 87320

1887 Dollar, PR63
Low-Mintage Proof Issue

- 3953 1887 PR63 PCGS. The reduced mintage of 710 coins makes this a more challenging proof issue from the 1880s. Multicolored patina covers the reverse and frames the frosted, icy-white obverse portrait of Liberty. The motifs are struck with pinpoint precision on each side, and the surfaces are contact-free. Minor cloudiness in the fields restricts the numeric grade of this otherwise attractive coin. NGC ID# 27ZG, PCGS# 7322

1892 Morgan Dollar, PR64
Lightly Toned Reflective Fields

- 3954 1892 PR64 PCGS. Due to the introduction of the Barber design on the lower denomination silver coinage, the demand for proof sets was high in 1892 and a generous mintage of 1,245 sets were struck. This impressive Choice example offers well-detailed design elements and lightly marked reflective surfaces under shades of delicate golden-brown toning. Population: 78 in 64 (1 in 64+), 65 finer (9/14). NGC ID# 27ZM, PCGS# 7327

1892 Dollar, PR64 Cameo
Attractive and High-Quality for the Grade

- 3955 1892 PR64 Cameo PCGS. An attractive piece that displays slight weakness above Liberty's ear and on the eagle's breast feathers, problems that are endemic to this proof issue and others beginning in 1888, according to Bowers. A lightly toned specimen with intense frost on the central motifs and watery, highly reflective fields. The coin's surfaces are contact-free, with minimal hairlines. Population: 26 in 64 (3 in 64+) Cameo, 19 finer (9/14). PCGS# 87327

1893 Morgan Dollar, PR64
Well-Preserved and Mark-Free

- 3956 1893 PR64 PCGS. The fields display adequate mirrors and the motifs are lightly frosted. The strike definition is weak just above Liberty's ear, and a planchet lamination or a strike-through seems evident at the top of the eagle's breast. There is a diagonal light-brown toning streak across the upper reverse, but no contact or handling marks are noticeable on either side of the piece. Population: 48 in 64, 31 finer (9/14). NGC ID# 27ZN, PCGS# 7328

**1898 Silver Dollar, PR64
Scarce Low-Mintage Issue**

3957 1898 PR64 PCGS. This proof Morgan dollar issue had a low mintage of 735 pieces and examples are scarce at the current PR64 grade level or finer. This specimen is sharply struck with brilliant surfaces and lovely, bold field-to-device contrast observed on each side. With contact marks absent and hairlines very few in number, this piece seems to be conservatively graded by PCGS. Population: 49 in 64, 35 finer (9/14). NGC ID# 27ZW, PCGS# 7333

3958 1901 PR62 PCGS. VAM-4. The eagle, wreath, and portrait all demonstrate significant contrast with the glassy fields, but PCGS has eschewed a Cameo designation. Well struck and unmarked. The fields display subtle sea-green and lilac toning. ONE DOLLAR is lightly die-doubled, diagnostic for proofs of this date. NGC ID# 27ZZ, PCGS# 7336

**1901 Morgan Dollar, PR63 Secure
Deeply Toned and Contact-Free**

3959 1901 PR63 PCGS Secure. A lovely piece with sharply defined motifs and deep charcoal-green toning in the fields and near the peripheries. Substantial field-to-device contrast is evident on each side, but falls just short of full Cameo. Wispy field hairlines, difficult to see without a magnifier, seemingly limit the grade of this lower-mintage example. NGC ID# 27ZZ, PCGS# 7336

**1901 Morgan, PR64
Highly Attractive for the Grade**

3960 1901 PR64 PCGS. A pleasing mid-grade proof, with deeply mirrored fields and satiny, unmarked devices that deliver just a touch of field-motif contrast. A thin veil of light golden color complements the sharply struck design elements. This particular proof issue experiences increased demand from date collectors, due to the rarity of high-grade business strikes of this date. PCGS has certified 31 numerically finer non-Cameo representatives (8/14). NGC ID# 27ZZ, PCGS# 7336

1902 Morgan, Toned PR64

3961 1902 PR64 PCGS Secure. An appealing mid-grade proof, with vivid ocean-blue and violet peripheral hues surrounding pale golden-gray centers. The hair immediately above Liberty's ear is not fully defined, a typical characteristic of this proof issue, though the strike is otherwise bold. From a mintage of 777 pieces. NGC ID# 2822, PCGS# 7337

PEACE DOLLARS

3962 1921 MS65 NGC. Vivid luster radiates from the brilliant, high-relief surfaces of this Gem Peace dollar. The strike is sharp overall with typical incompleteness at the centers, and a thin, wispy mark on Liberty's cheek is the only blemish worthy of individual mention. NGC ID# 2U4E, PCGS# 7356

3963 1921 MS65 PCGS. This Gem High Relief Peace dollar is unusually sharp for the issue, with well-delineated eagle's feathers and partial definition on the hair over Liberty's ear. A blush of light golden toning warms satiny luster on each side, and a small tick on the cheek near the nose is the only immediately obvious surface flaw. NGC ID# 2U4E, PCGS# 7356

3964 1921 MS65 PCGS. CAC. A well-preserved Gem example of this always-popular High Relief Peace dollar. This piece displays frosty luster in shades of ice-blue and light champagne, with a few pale amber overtones in the central regions. Some of the usual softness is evident on the central devices, though the surfaces are attractively free of major abrasions. NGC ID# 2U4E, PCGS# 7356

3965 1922-D MS66 PCGS. An amazing Premium Gem Peace dollar, this beautiful Denver product exhibits frosty silver luster with untuned surfaces. PCGS has only certified three finer examples (8/14). NGC ID# 257D, PCGS# 7358

3966 1922-D MS66 NGC. Satiny surfaces show dove-gray with sprinkles of cinnamon more prevalent on the obverse. Both sides are free of mentionable marks. Interesting die cracks appear atop and below Liberty's face. A beautiful and well-struck coin with just 16 examples in higher numeric grades at NGC (8/14). NGC ID# 257D, PCGS# 7358

3967 1922-S MS65 PCGS. This Gem showcases radiant luster over flashy and brilliant surfaces. The hair above Liberty's ear exhibits strong detail, and only a small planchet flaw on the eagle's wing is worthy of mention. PCGS has certified just seven numerically finer submissions (8/14). NGC ID# 257E, PCGS# 7359

3968 1922-S MS65 PCGS. The San Francisco variant is the scarcest of the three 1922 Peace dollar issues; it is decidedly rare in grades finer than MS65. This piece displays vibrant, frosty mint bloom and above-average design definition. There are a few too many minor luster grazes on the reverse to qualify for a Premium Gem grade, though the eye appeal is hardly inhibited. PCGS has certified seven numerically finer representatives (8/14). NGC ID# 257E, PCGS# 7359

3969 1922-S MS65 PCGS. Scarce in Gem condition and virtually unavailable any finer, this brilliant-white example is smooth and lustrous. A few shallow, small contacts account for the assigned grade. Sharply struck for the issue. PCGS has certified just seven numerically finer examples (9/14). NGC ID# 257E, PCGS# 7359

- 3970 1923 MS66+ PCGS. CAC.** Remarkably thick mint frost blankets both sides of this boldly struck, incredibly eye-appealing Premium Gem. A few minute grazes on the high points of the design limit the technical grade, though each side displays beautiful swirling hues of lemon-gold and ice-blue toning. PCGS has encapsulated 53 numerically finer representatives (8/14). NGC ID# 257F, PCGS# 7360
- 3971 1923 MS66+ PCGS. CAC.** The beautifully clean surfaces of this Premium Gem display swirling luster and lovely touches of pale golden color near the peripheries that frame brilliant, snow-white centers. A well-struck example that should have considerable appeal for the high-end type collector. NGC ID# 257F, PCGS# 7360
- 3972 1924 MS66+ PCGS.** An impressive Peace dollar with brilliant luster, this frosty Premium Gem is entirely untuned with extraordinary eye appeal. PCGS has certified a mere 28 finer examples (8/14) of this plentiful Philadelphia Mint issue. NGC ID# 257J, PCGS# 7363
- 3973 1924-S MS64 PCGS.** The 1924-S Peace dollar is an elusive issue in grades above the MS64 level. This attractive Choice example offers well-detailed design elements and lustrous lightly marked surfaces with a few hints of golden-tan toning. NGC ID# 257K, PCGS# 7364
- 3974 1924-S MS64 PCGS.** Cartwheel luster percolates from beneath light violet and golden-brown toning over each side. Most of the design elements are well-struck, though the upper-reverse legends are somewhat softly impressed. From a mintage of 1.7 million coins, PCGS has certified only 84 examples numerically finer (8/14). NGC ID# 257K, PCGS# 7364
- 3975 1924-S MS64 PCGS.** The 1924-S Peace dollar is a challenging issue in high grade. This attractive Choice example displays well-detailed devices and vibrant mint luster under areas of hazy golden-tan toning. NGC ID# 257K, PCGS# 7364
- 3976 1924-S MS64 NGC.** To the unaided eye, this piece appears a full grade point finer, though close examination reveals a few microscopic disturbances in the satiny luster that limited NGC's assessment. The strike is sharp and a faint blush of light golden toning complements each side. Finer examples are scarcely seen. NGC ID# 257K, PCGS# 7364
- 3977 1924-S MS64+ PCGS. CAC.** Delicate splashes of violet toning color the obverse, while the reverse remains entirely brilliant. Unlike most other S-mint products, this Choice example features vibrant luster and better-than-average striking characteristics. A minimally marked piece with strong visual appeal. NGC ID# 257K, PCGS# 7364
- 3978 1925 MS67 NGC.** A spectacular Superb Gem, with sharply detailed design elements and impeccably preserved lustrous surfaces, this coin shows a few hints of golden-tan toning. Census: 72 in 67 (1 in 67 ★), 1 finer (9/14). NGC ID# 257L, PCGS# 7365
- 3979 1925-S MS64+ NGC.** Well-deserving of the Plus designation awarded it by NGC, this near-Gem showcases vibrant, brilliant luster and correspondingly ample visual appeal. A small fragment of an old reed mark near Liberty's eye appears to be the only grade-limiting factor. A touch of softness is noted on the hair over the ear, as is typical of this San Francisco issue. NGC ID# 257M, PCGS# 7366
- 3980 1927-S MS64 PCGS.** The 1927-S issue enjoys a low mintage of 866,000 coins, and prior to the discovery of the Redfield Hoard, high-quality examples were few and far between. This near-Gem example is largely brilliant with areas of pale toning. The strike is above-average, though the obverse motto is soft, and the surfaces are minimally marked for the grade. NGC ID# 257U, PCGS# 7372

- 3981 1927-S MS64 PCGS.** A lightly toned representative from a semikey issue in the Peace dollar series. This near-Gem example is typically struck with shallow incompleteness toward the centers. Luster rolls over each side, and marks are consistent with the grade. NGC ID# 257U, PCGS# 7372

- 3982 1927-S MS64+ PCGS.** Roger Burdette (2008) notes, "Within the entire series, the 1927-S is one of the rarer issues in Uncirculated condition." This Plus-designated near-Gem is mostly flashy and brilliant with a few pale toning spots on each side. The motifs are well brought-up. PCGS has graded 74 coins in higher numeric grades (8/14). NGC ID# 257U, PCGS# 7372

**1927-S Peace Dollar, MS64+
Semikey Issue in High Grades**

- 3983 1927-S MS64+ PCGS. CAC.** One of only three issues in the series with a mintage of less than 1 million coins (866,000 pieces), the 1927-S Peace dollar is a scarce issue in Gem grades. This Plus-graded MS64 example, however, is beautifully preserved for the Choice level, with a faint luster graze near Liberty's eye being the only grade-limiting surface flaw. A blush of pale champagne toning warms each side, with heavily frosted underlying luster. The central devices exhibit above-average definition for the issue. NGC ID# 257U, PCGS# 7372
- 3984 1928 MS64 PCGS.** In the Peace dollar series, the 1928 issue boasts the lowest mintage (360,649 coins), for which reason it is widely sought-after as a key date. This near-Gem features areas of light golden toning over largely brilliant surfaces, affirming its originality. The motifs are well-struck and abrasions are well-hidden. NGC ID# 257V, PCGS# 7373
- 3985 1928 MS64 PCGS.** Vibrant mint luster and brilliant surfaces are attributes of this Choice key date representative. The strike is exceptionally sharp, and only a prominent tick on the eagle's wing prevents a Gem designation. NGC ID# 257V, PCGS# 7373
- 3986 1928 MS64 PCGS.** A mintage of 360,649 coins ensures the 1928 issue as the key date in the Peace dollar series, although in higher grades it is eclipsed by the 1934-S. This Choice example is thickly frosted and entirely brilliant with sharp detail and few marks. NGC ID# 257V, PCGS# 7373
- 3987 1928 MS64 PCGS Secure.** Unquestionably original steel-blue and rose-violet patina shroud the surfaces and imbue this Choice example with dramatic eye appeal. Radiant luster emanates from beneath the toning, and the strike shows the usual high-point incompleteness. NGC ID# 257V, PCGS# 7373

1928 Silver Dollar, MS65
Challenging in High Grade

3988 1928 MS65 PCGS. With the lowest mintage of the series (little more than 360,000 coins), the 1928 Peace dollar is a popular key issue throughout the grading spectrum. At the Gem level the date is only marginally elusive, but it becomes genuinely rare in finer grades. This example is sharply struck, with only a few faint luster grazes on the cheek precluding a finer numeric grade. Light champagne toning encompasses much of each side, though subtle hues of ice-blue and pale lavender are also present. PCGS has seen 13 numerically finer submissions (8/14). NGC ID# 257V, PCGS# 7373

3989 1934-D MS65 PCGS. Micro D. Frosty with a hint of straw-gold toning draping each side. This Gem's portrait shows a clean cheek, though a single abrasion occurs on Liberty's chin. A lower mintage issue, and the final 90% silver dollar issue from the Denver facility. Ex: *Long Beach Signature (Heritage, 9/2009)*, lot 1208. NGC ID# 257Y, PCGS# 7376

3990 1934-S MS62 ANACS. Long considered the key issue in the Peace dollar series, this San Francisco date is scarce in any Mint State grade. A thin covering of silver-gray patina confirms this example's originality, with strong mint luster shining through on both sides of the coin. Small marks and abrasions are distributed across the sharply struck surfaces, determining the assigned grade. NGC ID# 257Z, PCGS# 7377

3991 1935-S MS65 PCGS. Four rays below ONE. Radiant mint frost covers the fully brilliant surfaces of this final-year S-mint Gem. Sharply detailed and remarkably well-preserved, the issue's scarcity in higher grades makes this a highly collectible example. NGC ID# 2583, PCGS# 7379

3992 1935-S MS65 NGC. Three rays below ONE. The 1935-S typically comes well-struck with minimal bagmarks, as is the case with this Gem. Radiant mint frost swirls over the fully brilliant surfaces, and the level of eye appeal is high. NGC has seen 68 examples numerically finer (8/14). NGC ID# 2583, PCGS# 7379

3993 1935-S MS65 PCGS. CAC. A well-struck Gem example of this scarce, final-year issue. Essentially untoned with creamy-white surfaces and soft mint luster. Surface marks are nearly nonexistent. NGC ID# 2583, PCGS# 7379

1935-S Peace Dollar, MS66
Only Two Finer Coins at PCGS

3994 1935-S MS66 PCGS. Ex: Jack Lee. Three rays below ONE, the usual variety. This delightful Premium Gem displays well-preserved brilliant surfaces with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is terrific. PCGS has certified only two numerically finer specimens (8/14). NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

3995 1971 MS66 PCGS. CAC. Listed as No. 62 in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. A delightful Premium Gem, with well-detailed design elements and pristine lustrous surfaces that show highlights of greenish-gold and lavender-gray toning. Population: 54 in 66, 0 finer (9/14). NGC ID# 2584, PCGS# 7406

1976 Bicentennial Dollar, MS66
Elusive Type One Guide Book Variety

3996 1976 Type One MS66 PCGS. CAC. Spectacular shades of violet, golden-brown, burnt-orange, and cerulean-blue toning blanket the surfaces of this extraordinary Premium Gem. The design elements are sharply detailed and vibrant mint luster shines through the toning. The thick lettering on the reverse identifies the scarcer Type One Guide Book variety. Population: 24 in 66, 0 finer (8/14). NGC ID# 258G, PCGS# 7418

SACAGAWEA DOLLAR

2000-P 'Cheerios' Sacagawea, FS-902, MS67 Remarkable, Pristine Example

- 3997** 2000-P Cheerios, FS-902, MS67 PCGS. This issue is a prized rarity based upon its slight reverse design variation compared to the final version of the Sacagawea dollar. The eagle's tailfeathers show greater detail and sharper definition on these so-called Cheerios' dollars. This remarkably preserved specimen is fully struck, intensely lustrous, and seemingly pristine. A Certificate of Authenticity and an associated Lincoln cent, graded MS64 Red by PCGS, are included in this lot. Population: 22 in 67, 23 finer (8/14). (Total: 2 coins) PCGS# 147231

COMMEMORATIVE SILVER

- 3998** 1893 Isabella Quarter MS64 Prooflike NGC. The quality-conscious collector will find much to love about this high-end near-Gem; the motifs are beautifully produced, with needle-sharp definition on even the most minute details, while the fields are given a profound depth of mirroring. Pale gold, lavender, and sky-blue hues grace each side, completing the immense visual appeal. Housed in a prior generation holder. NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, MS66 Attractive Border Toning

- 3999** 1893 Isabella Quarter MS66 PCGS. Plum-red and forest-green endow the peripheries, but the majority of this lustrous Premium Gem is toned medium olive-gold. Fully struck and devoid of evident contact. Far scarcer than the 1892 and 1893 Columbian half dollars, which had high mintages and were placed in local circulation to promote the Chicago exposition. NGC ID# 28HR, PCGS# 9220

- 4000** 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C. Peripheral cobalt-blue and mauve patina frames the gunmetal-gray and chestnut-gold centers. This satiny near-Gem shows a well-preserved reverse, while the obverse lacks any individually substantial contact. A crisply struck representative of this important early silver commemorative, the only commemorative silver dollar issue prior to the commencing of the 1984 Los Angeles Olympics. NGC ID# 28N8, PCGS# 9222

- 4001** 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C. Both sides are largely untuned and boldly impressed. There are a few minor abrasions on and just behind the obverse portraits and in the reverse fields. The Lafayette dollar is one of the key issues in the U.S. commemorative series and near-Gems are undeniably scarce. Ex: Long Beach Signature (Heritage, 6/2002), lot 7340; ANA Signature (Heritage, 3/2007), lot 1448. NGC ID# 28N8, PCGS# 9222

- 4002** 1900 Lafayette Dollar MS64 NGC. DuVall 2-C. Vibrant, satiny luster envelops each side of this near-Gem representative, illuminating a blush of light golden toning that grows deeper toward the borders. The strike is sharp, and only a few minute ticks on Washington's cheek preclude a full Gem grade assessment. NGC ID# 28N8, PCGS# 9222

1900 Lafayette Dollar, MS64+ Better DuVall 3-D Variety

- 4003** 1900 Lafayette Dollar MS64+ PCGS. CAC. DuVall 3-D. A better die variety distinguished by obverse repunching on the AT in STATES. The final A in AMERICA is also recut. The branch below the statue differs slightly from the various other known reverse dies. The present near-Gem displays potent luster uncommon for the issue. Light almond-gold toning adorns well struck surfaces. The portraits display unobtrusive marks. NGC ID# 28N8, PCGS# 9222

- 4004** 1921 Alabama MS66 PCGS. A delightful Premium Gem with sharply detailed design elements and vibrant satiny mint luster on both sides. The well-preserved surfaces display hints of pale gold toning and outstanding eye appeal. PCGS has graded three numerically finer examples (8/14). NGC ID# 28HT, PCGS# 9224

- 4005** 1937 Antietam MS67 PCGS. Soft mint luster encompasses the stone-white surfaces of this lovely, unmarked example. Exceptionally well-struck, especially on the details of the obverse portraits. A popular low-mintage early silver commemorative type. NGC ID# 28HV, PCGS# 9229

- 4006** 1935-D Arkansas MS67 PCGS. From a mintage of 5,505 coins, this first-year Denver representative features gorgeous satiny luster and fully brilliant surfaces. The eagle's breast is a touch incomplete, while the remaining design elements are sharply defined. Population: 50 in 67 (6 in 67+), 1 finer (8/14). NGC ID# 28HX, PCGS# 9234

- 4007** 1935-S Arkansas MS67 PCGS. Shades of lavender-gray, greenish-gold, and amber toning enhance the well-preserved surfaces of this sharply detailed Superb Gem. The 1935-S Arkansas half dollar claims a small distribution of 5,506 pieces. Population: 23 in 67 (2 in 67+), 0 finer (8/14). NGC ID# 28HY, PCGS# 9235

- 4008** 1935-S Arkansas MS67 PCGS. Arkansas commemorative halves were struck from 1935 to 1939, though the actual centennial year was 1936. This S-mint Superb Gem is softly frosted and delicately toned with orange and yellow color encircling the borders on each side. Population: 23 in 67 (2 in 67+), 0 finer (8/14). NGC ID# 28HY, PCGS# 9235

- 4009** 1937-D Arkansas MS67 PCGS. Nearly flawless preservation and iridescent pastel toning are the hallmarks of this satiny Superb Gem, though a crisp strike completes the immense visual appeal. Rare this well-preserved. Population: 25 in 67 (3 in 67+), 1 finer (8/14). NGC ID# 28J5, PCGS# 9242

4010 1939-D Arkansas MS66 PCGS. A staggering 500,000 coins were authorized for the multi-year Arkansas Centennial issue, but only a small fraction of the authorized quantity was actually produced, and some were melted as unsold. B. Max Mehl was the primary buyer for most of the remaining coins, which he then retailed at higher prices. This brilliant-white example shows a few areas of clear gold overtones and a couple of tiny flecks of deeper color. Just nine pieces are certified numerically higher at PCGS (9/14). NGC ID# 28JB, PCGS# 9250

4011 1937-D Boone MS67 PCGS. The 1937-D had one of the lower mintages of the Daniel Boone Bicentennial production period, totaling only 2,500 coins (plus six pieces for assay purposes). This example is remarkably well-preserved, exhibiting nearly flawless satiny surfaces with faint wisps of light golden color. A sharp strike completes the eye appeal. Population: 50 in 67 (2 in 67+), 4 finer (8/14). NGC ID# 28JS, PCGS# 9271

1925-S California Diamond Jubilee Half, MS67 Beautifully Toned on Both Sides

4012 1925-S California MS67 PCGS. CAC. The California Diamond Jubilee half dollars were struck to celebrate the 75th anniversary of the state's admittance into the Union, and the coins have remained highly popular among collectors to this day. This example displays a bold strike and satiny luster. Mottled multicolor toning in shades of gold, lavender-gray, violet, and ocean-blue encompasses much of each side, giving this nearly pristine piece outstanding overall visual appeal. PCGS has certified only six numerically finer representatives (9/14). NGC ID# 28JY, PCGS# 9281

4013 1936-D Cincinnati MS67 NGC. Orange and rose patina blankets the obverse, while the reverse maintains its brilliance. Shimmering, satin luster radiates over carefully preserved surfaces, and the devices are well-defined. Census: 34 in 67 (1 in 67+, 5 in 67 ★), 3 finer (8/14). NGC ID# 28K2, PCGS# 9284

4014 1893 Columbian MS66+ PCGS. This attractive, second-year representative showcases the typically seen multicolor toning in shades of sea-green, ice-blue, rose, and peach-orange. The devices are well brought-up, and marks are invisible to the unaided eye. PCGS has graded only 17 examples finer (8/14). NGC ID# 26H6, PCGS# 9297

4015 1936 Delaware MS67 PCGS. CAC. Struck to commemorate the 300th anniversary of the Swedes' landing in Delaware, this Delaware Tercentenary half dollar is boldly detailed and impeccably preserved. Vivid multicolor toning blankets each side in a pattern reminiscent of the original cardboard distribution holder, showing varying shades of lemon-green, amber-red, and golden orange, with the deeper hues seen primarily around the margins. PCGS has encapsulated only two numerically finer representatives (8/14). NGC ID# 28K9, PCGS# 9301

4016 1936 Delaware MS67 PCGS. CAC. Struck to celebrate the 300th anniversary of the Swedes' landing in Delaware, this Delaware Tercentenary half dollar displays bold design definition and beautifully preserved surfaces. Rich toning engulfs the obverse in blended orange-gold, rose, forest-green, and dusky lavender hues, while the same colors surround the reverse margins in a pattern reminiscent of the original cardboard distribution holder. PCGS has certified only 2 numerically finer representatives (9/14). NGC ID# 28K9, PCGS# 9301

4017 1936 Elgin MS67 PCGS. Gleaming satin luster and light, mottled gold and russet toning mainly near the border areas, are highlights of this well-preserved Superb Gem example. From a lower distribution of 20,015 pieces, and rare any finer than the current grade level. NGC ID# 28KA, PCGS# 9303

4018 1922 Grant No Star MS66 PCGS. Intermittent olive-green shadings color this otherwise brilliant Premium Gem. Satiny luster and minimal marks provide strong eye appeal. A small tick is noted on Grant's cheek, but it is hardly visible without magnification. NGC ID# 28KD, PCGS# 9306

4019 1928 Hawaiian AU58 NGC. A bright, near-Mint example of this popular key commemorative issue. Detail is essentially complete, and close examination is needed to detect any signs of high-point friction. Traces of light golden color grace each side. NGC ID# 28KE, PCGS# 9309

4020 1928 Hawaiian MS63 PCGS. Medium caramel-gold and pearl-gray toning embraces satiny and smooth surfaces. A well struck Select example of this coveted sesquicentennial of discovery issue. The key to the 50-piece silver commemorative type set, softly lustrous and appealing for the grade.
Ex: Dallas Signature (Heritage, 11/2005), lot 5312, which realized \$2,817.50. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Sesquicentennial Half, MS64 Popular Key Early Silver Commemorative Type

4021 1928 Hawaiian MS64 NGC. An untoned, satiny representative of this popular key commemorative issue. A couple of faint nicks are located in the right obverse field, directly below IN GOD, but these trifling flaws are only seen with careful scrutiny. Only around 10,000 of these sesquicentennial memorial pieces were distributed, making this issue a perennial favorite among collectors. NGC ID# 28KE, PCGS# 9309

1928 Hawaiian Sesquicentennial Half, MS65 Satiny, Well-Preserved Example

4022 1928 Hawaiian MS65 PCGS. CAC. This key commemorative issue celebrates James Cook as the "Discoverer of Hawaii": a designation that might be challenged by the proud natives of what were once called The Sandwich Islands. This is a boldly struck example with attractive light patina and shimmering satiny mint luster. NGC ID# 28KE, PCGS# 9309

4023 1935 Hudson MS64 PCGS. Mottled golden-brown toning occurs intermittently around the obverse periphery and offers the only indication of color over otherwise fully brilliant surfaces. This is an attractive Choice representative despite slight incompleteness at the centers. Housed in an old green label holder. NGC ID# 28KF, PCGS# 9312

4024 1935 Hudson MS64 NGC. Multicolor toning occurs within the upper-obverse and lower-reverse legends, while the remaining surfaces exhibit only light patination. This Choice Hudson commemorative is high-end for the grade, and housed in a former generation holder. NGC ID# 28KF, PCGS# 9312

4025 1918 Lincoln MS67 NGC. The Mint struck 100,058 half dollars in commemoration of the 100th anniversary of Illinois' admittance into the Union. This Superb Gem example features delicate olive toning over virtually mark-free surfaces. Sharply struck and lustrous. NGC has seen only five submissions numerically finer (8/14). PCGS# 9320

4026 1921 Missouri MS65 PCGS. Struck for the 100th anniversary of Missouri's statehood, this Gem Missouri Centennial half dollar exhibits bold design definition and satiny luster. Faint traces of gold, lavender, and ice-blue color are seen when turned in-hand. PCGS has certified 38 numerically finer representatives (8/14). NGC ID# 28KS, PCGS# 9330

4027 1921 Missouri MS65 PCGS. CAC. The Missouri halves were part of the Missouri Centennial Celebration, held Aug. 8-20, 1921, in Sedalia, Missouri, the first capital. This frosty gray Gem alternates with pinkish tones on parts of each side, and there are a few stray marks on the high points that determine the grade. The eye appeal is nonetheless strong. NGC ID# 28KS, PCGS# 9330

1921 Missouri Centennial Half, MS65+ Scarce in Finer Grades

4028 1921 Missouri MS65+ PCGS. CAC. The 1921 Missouri Centennial half dollar is among the more conditionally challenging issues in the classic commemorative series; only 11,400 examples of the "plain" variant were struck, and those grading finer than MS65 are distinctly scarce. This Plus-graded Gem displays well-defined motifs and rich satiny luster. Tinges of olive and amber-gold toning surround the margins, while the centers exhibit pastel hues of gold and sky-blue. PCGS has seen only 38 numerically finer submissions (8/14). NGC ID# 28KS, PCGS# 9330

1921 Missouri Centennial Half Deeply Struck Premium Gem, Few Finer

4029 1921 Missouri MS66 NGC. Robert Aitken became one of the first outside artists to design a commemorative coin when his models appeared on the two varieties of the Panama-Pacific fifty dollar gold piece, and the first such repeat artist with his commission for the 1921 Missouri half. The pleasing Premium Gem presented here is a delightful representative of Aitken's work. The frosty surfaces display subtle hints of sky-blue and rose-gold patina. Immensely appealing and one of the finest survivors known. Census: 36 in 66, 2 finer (9/14).
Ex: Orlando FUN Signature (Heritage, 1/2008), lot 2352; FUN Signature (Heritage, 1/2008), lot 2352. NGC ID# 28KS, PCGS# 9330

4030 1923-S Monroe MS65 PCGS. With a distribution of 274,077 pieces, the Monroe half dollar is not too difficult to locate in Gem condition. This attractive piece offers well-detailed design elements and lustrous surfaces that show hints of pale gold toning and few signs of contact. NGC ID# 28KT, PCGS# 9333

4031 1923-S Monroe MS65 PCGS. CAC. Soft, frosty luster percolates from beneath the light golden-tan patina on each side. Multicolor accents include blue, rose, and orange. This is a conditionally scarce Gem with strong visual appeal. NGC ID# 28KT, PCGS# 9333

4032 1938 New Rochelle MS67 PCGS. CAC. This exceptional Superb Gem exhibits grayish-silver fields with deep olive-gold and iridescent toning limited to the outer margins. Here is an excellent opportunity for the Registry collector, as PCGS has only certified five numerically finer pieces (8/14). NGC ID# 28KU, PCGS# 9335

4033 1938 New Rochelle MS67 PCGS. CAC. Light silver-blue and gold toning through the interiors with an arc of deeper crimson along the upper obverse. A faint fingerprint appears to the right of the calf. Just five coins are graded finer by PCGS (8/14). NGC ID# 28KU, PCGS# 9335

4034 1936 Norfolk MS68 PCGS. A pristine representative of this exceptionally well made issue. Aqua and apricot toning adorns lustrous and precisely struck surfaces. Certified in an old green label holder. NGC ID# 28KV, PCGS# 9337

4035 1934-D Oregon MS67 PCGS. One of the nicer Oregon Trail Memorial pieces that we have seen in quite some time, this example exhibits razor-sharp definition and bold, bright, satiny mint luster. The surfaces are untoned and near-pristine on both sides. Population: 73 in 67 (4 in 67+), 1 finer (9/14). NGC ID# 28L2, PCGS# 9344

4036 1937-D Oregon MS68 PCGS. As the lofty MS68 grade suggests, this piece is impeccably preserved, but also displays attractive amber-orange and olive-gold toning over much of each side. The rear upright of the wagon is not fully defined, though the strike is otherwise sharp. From a mintage of 12,000 coins (plus eight pieces for assay purposes). Population: 50 in 68 (2 in 68+), 1 finer (8/14). NGC ID# 28L5, PCGS# 9347

4037 1938-D Oregon MS68 NGC. The Denver Mint struck 6,005 Oregon Trail commemorative halves in 1938, but NGC has only certified 62 examples in this lofty grade (1 in 68+, 35 in 68 ★, 1 in 68+★), and just two coins finer (8/14). This satiny and brilliant coin presents a strong opportunity for Registry specialists. NGC ID# 28L7, PCGS# 9349

4038 1915-S Panama-Pacific MS66 NGC. The 1915-S Panama-Pacific half dollars were struck to celebrate the opening of the Panama Canal and the recovery of San Francisco after the 1906 earthquake. A net total of 27,134 pieces was distributed. This impressive Premium Gem is sharply detailed and lustrous, with well-preserved surfaces that show mingled shades of violet, lavender-gray, and golden-brown toning. NGC ID# 26H7, PCGS# 9357

1915-S Panama-Pacific Half, MS66 Elusive in Finer Grades

4039 1915-S Panama-Pacific MS66 NGC. CAC. The only silver commemorative issued in conjunction with the Panama-Pacific International Exposition held in San Francisco in 1915, the Panama-Pacific half dollar also had the highest mintage of the five different commemorative issues (27,134 pieces). The mintage, however, was still rather small, and today, Premium Gem examples are only infrequently seen, and finer coins are scarce. This example shows tinges of deep olive and russet toning around the margins, with light golden hues over the central regions. The strike is slightly soft on the highest points of the obverse, though the overall appeal is hardly affected. NGC ID# 26H7, PCGS# 9357

1921 Pilgrim Tercentenary Half, MS67 Immensely Appealing

4040 1921 Pilgrim MS67 PCGS. A beautifully preserved example, this Superb Gem Pilgrim Tercentenary half dollar displays frosty ice-blue luster with small tinges of lemon-gold and amber toning around the peripheries. The strike is crisp throughout, completing the visual appeal. From a mintage of only 20,053 coins. Population: 34 in 67 (2 in 67+), 1 finer (8/14). NGC ID# 28LD, PCGS# 9360

4041 1936-D Rhode Island MS67 PCGS. CAC. This impressive Rhode Island commemorative displays well-executed design motifs that are much sharper-than-usual, for the type; which may partly explain the elevated grade assessment by PCGS. The blemish-free surfaces display glowing mint frost and occasional splashes of mottled russet, olive, gold, and burnt-orange toning. Population: 58 in 67 (1 in 67+), 1 finer (9/14). NGC ID# 28LF, PCGS# 9364

4042 1936 Robinson MS67 PCGS. The strike definition on this exceptional example is the sharpest that we have seen in recent years. Robinson's facial definition and ear are especially full. The luster quality is likewise impressive and visually appealing. Olive and russet peripheral toning frames clean, untoned and unmarked fields and centers. Population: 72 in 67 (1 in 67+), 2 finer (8/14). NGC ID# 28LJ, PCGS# 9369

4043 1935-S San Diego MS67 PCGS. CAC. Frosty silver luster engulfs the centers, with blended gold, peach, rose, and violet seen around the margins. A couple of tiny marks within the folds of Minerva's drapery are among the few perceptible flaws. PCGS has encapsulated only four numerically finer representatives (8/14). NGC ID# 28LK, PCGS# 9371

4044 1936-D San Diego MS67 PCGS. CAC. Twenty years after designing the Pan-Pac fifties, sculptor Robert Aitken also fashioned the San Diego (aka California-Pacific International Exposition) half dollars (note his monogram), and similarities are noteworthy, starting with the helmeted head of a seated Minerva on the obverse. This frosty silver-gray piece has pink-champagne accents and bold luster. NGC ID# 28LL, PCGS# 9372

4045 1936-D San Diego MS67 PCGS Secure. CAC. Frosty silvery-golden interiors yield to more prominent amber and olive elements around the peripheries. Swirling luster enhances the eye appeal of this striking Superb Gem. None have been certified numerically finer at PCGS (8/14). NGC ID# 28LL, PCGS# 9372

4046 1926 Sesquicentennial MS65 PCGS. Pale champagne toning blends with soft pastel hues on each side of this satiny Gem, with a deeper area of olive-gold color seen along the upper-right reverse border. The strike is crisp, and only a few minor abrasions are observed upon close examination. PCGS has encapsulated eight numerically finer pieces (8/14). NGC ID# 28LM, PCGS# 9374

4047 1926 Sesquicentennial MS65 PCGS. Soft pastel hues encompass satiny luster on each side of this Gem Sesquicentennial half dollar, struck to commemorate the 150th anniversary of the signing of the Declaration of Independence. The strike is well-executed, with notable sharpness seen on the bell lines and inscriptions, and the surfaces lack any bothersome abrasions. PCGS has encapsulated only eight numerically finer representatives (8/14). NGC ID# 28LM, PCGS# 9374

4048 1926 Sesquicentennial MS65 PCGS. Design by Committee is seldom a good thing. In the case of the Sesquicentennial half dollars, the result is an extremely shallow, low relief, that surely must rank among the more ill-considered coinage design decisions of the 20th century. The officers of the National Sesquicentennial Exhibition Association, however, were insistent that the design be issued in low relief. The good news for this coin is that its eye appeal is much above the norm for the issue, with radiant cartwheel brilliance emanating from the silvery-gold surfaces; a good strike, and an absence of any mentionable distractions. PCGS has certified only eight numerically finer representatives (8/14). Ex: Long Beach Signature (Heritage, 9/2006), lot 2834; Long Beach Signature (Heritage, 2/2007), lot 6128. NGC ID# 28LM, PCGS# 9374

4049 1935 Spanish Trail MS64 NGC. A boldly struck representative of this popular Spanish Trail commemorative half, this Choice example displays satiny luster with faint wisps of light golden color on each side. A few nearly imperceptible grazes in the left obverse field limit the grade, though the coin appears nearly pristine to the unaided eye. NGC ID# 28LN, PCGS# 9376

4050 1925 Vancouver MS66+ PCGS. CAC. An impressive Premium Gem example of this rugged-looking commemorative type. The centers are more fully struck than usually seen, and the luster quality is excellent. Splashes of mottled russet and deep blue-green toning enhance the well-preserved, mark-free surfaces. NGC ID# 28M5, PCGS# 9399

4051 1946-D Booker T. Washington MS67 PCGS. Registry Set enthusiasts will recognize the importance of this conditionally scarce Superb Gem. The brilliant surfaces display shimmering satin luster and fully struck devices. Virtually unmarked. Population: 46 in 67 (4 in 67+), 0 finer (8/14). NGC ID# 28M8, PCGS# 9405

**1947-S Booker T. Washington Half, MS67
Decidedly Rare This Nice**

4052 1947-S Booker T. Washington MS67 PCGS Secure. CAC. The 1947-S Booker T. Washington half dollar is one of the more conditionally challenging issues in the six-year production run of the type; it is decidedly rare at the MS67 grade level, and none have been certified numerically finer. This satiny representative displays sharp motifs and nearly flawless surfaces. Splashes of olive, gold, and amber-red toning encompass much of the obverse margins, while the reverse shows just a blush of pale olive-gold color. Population: 16 in 67, 0 finer (8/14). NGC ID# 28MC, PCGS# 9410

4053 1948-D Booker T. Washington MS67 PCGS. CAC. A better issue due to a low mintage of 8,005 pieces, the 1948-D was initially available only as part of a PDS set. A gorgeous representative, this Superb Gem example displays sharp details and rich silver luster along with a few subtle hints of toning. Population: 23 in 67, 0 finer (8/14). NGC ID# 28ME, PCGS# 9413

4054 1948-D Booker T. Washington MS67 PCGS. CAC. This satiny Superb Gem 1948-D Booker T. Washington half is among only 23 such graded by PCGS with none finer (8/14). The centers are untuned, but a thin ring of iridescent toning includes saffron and amber hues, to beautiful effect. The portrait of educator Booker T. Washington, who rose "from slave cabin to Hall of Fame," is free of visible marks. NGC ID# 28ME, PCGS# 9413

4055 1948-S Booker T. Washington MS67 PCGS Secure. CAC. A remarkably bright, exquisite representative of this popular commemorative type. Lovely sky-blue and golden-brown iridescence rings the peripheries. The interiors are brilliant, icy, and seemingly pristine. Population: 24 in 67 (3 in 67+), 0 finer (8/14). NGC ID# 28MF, PCGS# 9414

4056 1949 Booker T. Washington MS67 PCGS. CAC. A faint blush of light golden toning graces otherwise brilliant, satiny surfaces on this Superb Gem representative. The strike is crisp and there are no perceptible flaws of note. Population: 23 in 67, 0 finer (8/14). NGC ID# 28MG, PCGS# 9416

4057 1949 Booker T. Washington MS67 PCGS. CAC. From a small distribution of 6,000 pieces (plus four coins for assay purposes), the 1949 Booker T. Washington commemorative half dollar is seldom encountered in Superb Gem condition. This sharply detailed MS67 example displays vibrant mint luster and sharply detailed design elements, with a few wisps of pale gold and pink toning. Population: 23 in 67, 0 finer (8/14). NGC ID# 28MG, PCGS# 9416

4058 1949-D Booker T. Washington MS67 PCGS. CAC. Well struck and fully brilliant, with great satiny mint luster and clean, seemingly flawless surfaces. A beautiful, Superb example of this Denver Mint Booker T. Washington half dollar. Population: 32 in 67 (3 in 67+), 0 finer (8/14). NGC ID# 28MH, PCGS# 9417

**1950-D Booker T. Washington Half, MS67
Among the Finest Certified**

4059 1950-D Booker T. Washington MS67 PCGS. CAC. Gleaming silver-white surfaces provide this piece with immediate eye appeal. Closer examination reveals scattered areas of light toning, in shades of pale orange, with a few yellow, red, and olive-green splashes at the right reverse periphery. The signs of contact are minuscule. Population: 14 in 67, 0 finer (9/14). NGC ID# 28ML, PCGS# 9421

**1950-D Booker T. Washington Half Dollar
Sharply Detailed Superb Gem**

4060 1950-D Booker T. Washington MS67 PCGS. CAC. A series of silver commemorative half dollars honoring the life and accomplishments of Booker T. Washington was authorized by Congress in 1946, and large numbers of the coins were produced at all three mints through 1951. Although many examples were sold through various distributors over the years, numismatic demand failed to meet the optimistic production totals. In 1950 the Denver Mint produced more than 12,000 specimens, but only half that number were actually distributed. The coins were poorly produced, and high-quality coins with well-struck details are quite elusive today.

The present coin is a spectacular Superb Gem showing sharply detailed design elements. The pristine surfaces display hints of attractive golden-tan toning amid vibrant mint luster on both sides. Eye appeal is extraordinary. Population: 14 in 67, 0 finer (8/14). NGC ID# 28ML, PCGS# 9421

**1950-D Booker T. Washington Half, MS67
Well-Defined and Carefully Preserved**

4061 1950-D Booker T. Washington MS67 PCGS. CAC. Zones of canary-yellow and pinkish-blue occupy the centers of this Superb Gem, while orange-influenced hues prevail along the borders. Surprisingly little of the customary planchet roughness affects Washington's jaw, and as the grade suggests, the surfaces are free of all but the smallest marks. Population: 14 in 67, 0 finer (8/14). NGC ID# 28ML, PCGS# 9421

4062 1936 Wisconsin MS68 NGC. Despite the distribution of 25,015 pieces from 1936 into the 1950s, finding examples at this grade level is expectedly challenging. Largely brilliant centers yield to light-gold toning toward the peripheries. The badger is crisply struck, as are the other major design elements. A coin with plenty of eye appeal. Census: 36 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (8/14). NGC ID# 28N6, PCGS# 9447

4063 1936 Wisconsin MS68 NGC. Light-champagne toning combines with flawless surfaces and a full strike to generate a high degree of allure. Issued to celebrate the 100th anniversary of the establishment of the territorial government. Census: 36 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (8/14). NGC ID# 28N6, PCGS# 9447

COMMEMORATIVE GOLD

4064 1903 Louisiana Purchase/Jefferson MS65 PCGS. A beautifully preserved example of this early gold dollar commemorative, this Gem showcases satiny lemon-gold luster and sharp motifs. Virtually flawless surfaces complete the eye appeal. NGC ID# 26HA, PCGS# 7443

4065 1905 Lewis and Clark MS62 PCGS. An attractive MS62 example from the second year of this gold commemorative design, with well-detailed design elements and lustrous surfaces that show a few minor signs of contact. NGC ID# 26HD, PCGS# 7448

4066 1916 McKinley MS65 PCGS. Faint mint-green and peach elements complement lustrous, honey-gold surfaces that are unquestionably high-end for the grade. A degree of shallowness occurs over McKinley's hair, typical of the issue, while the remaining motifs are bold. Housed in a green label holder. NGC ID# 26HF, PCGS# 7454

**1916 McKinley Memorial Gold Dollar, MS67
None Numerically Finer at PCGS**

4067 1916 McKinley MS67 PCGS. Rich luster, brilliant surfaces, and deep peach-gold color provide this Superb Gem with exceptional eye appeal. Deep honey-gold accents appear on the obverse. A few tiny alloy spots appear near the outer edges, but do not pose a distraction. Population: 81 in 67 (1 in 67+), 0 finer (8/14). NGC ID# 26HF, PCGS# 7454

4068 1917 McKinley MS66 PCGS. Lilac and peach-gold color blend with softly frosty luster over this Premium Gem. The surfaces are impeccably preserved and mostly well-struck with light softness over McKinley's hair and the upper-reverse legends. PCGS has certified 66 coins in higher numeric grades (8/14). NGC ID# 26HG, PCGS# 7455

**1917 McKinley Memorial Gold Dollar, MS67
Among the Finest Certified**

4069 1917 McKinley MS67 NGC. Hints of rose overtones appear on the lustrous yellow-gold surfaces of this impressive Superb Gem. This issue was a fundraiser for the McKinley Birthplace Memorial in Niles, Ohio. This example is among the finest certified of the 1917 issue. Census: 56 in 67 (5 in 67 ★), 0 finer (9/14). NGC ID# 26HG, PCGS# 7455

**1917 McKinley Gold Dollar, MS67
Beautifully Lustrous Example**

4070 1917 McKinley MS67 PCGS. A great Superb Gem representative of the second-year McKinley Birthplace gold dollar, tied for numerically finest certified by NGC or PCGS (08/14). Potent yellow-orange luster graces the smooth fields, while the devices are boldly impressed and subtly frosted, creating mild contrast on the obverse. Population: 66 in 67 (1 in 67+), 0 finer (8/14).
Ex: Houston Money Show Signature (Heritage, 12/2009), lot 1378.
From The Pannonia Collection, Part Two. NGC ID# 26HG, PCGS# 7455

**1917 McKinley Memorial Gold Dollar, MS67
Immensely Attractive Original Luster**

- 4071 1917 McKinley MS67 PCGS.** The 1917 McKinley Memorial gold dollar had a small distribution of only 5,000 pieces, and is proportionately scarcer than the 1916 issue in high grades. This Superb Gem representative showcases seemingly flawless surfaces, with frosty luster that emits swirling hues of rose, green, and yellow-gold color. The lower obverse and upper reverse peripheries show just a touch of striking softness, though the design elements are otherwise sharp. Population: 67 in 67 (1 in 67+), 0 finer (9/14). NGC ID# 26HG, PCGS# 7455

- 4072 1922 Grant No Star AU58 NGC.** The small incuse star in the right obverse field was removed halfway through production, creating a second variety of the Grant Memorial gold dollar to market to collectors. This near-Mint example of the No Star variant displays essentially complete detail and flashy rose-gold luster. NGC ID# 26HJ, PCGS# 7458

**1922 Grant No Star Gold Dollar, MS67
Lustrous, Carefully Preserved Example**

- 4073 1922 Grant No Star MS67 PCGS.** A Superb example of this early commemorative gold dollar, which shares its Laura Gardin Fraser design with a half dollar issue of the same date. A well-struck, carefully preserved example with vibrant luster and lovely orange-gold coloration. Surface marks are minimal, as expected for this lofty grade designation. From *The Pannonia Collection, Part Two*. NGC ID# 26HJ, PCGS# 7458

- 4074 1922 Grant With Star MS64 NGC.** From the earlier issuance of the Grant Memorial gold dollar, as evidenced by the small incuse star in the right obverse field. This Choice Uncirculated example displays satiny yellow-gold luster with pale rose-gold overtones on the central reverse. Grade-limiting surface flaws are challenging to detect. NGC ID# 26HH, PCGS# 7459

- 4075 1922 Grant With Star MS66 PCGS.** An immensely eye-appealing representative, this Premium Gem showcases intermingled hues of yellow, lilac, and rich orange-gold over satiny mint luster. The strike is well-executed, and the surfaces are almost perfectly preserved. Housed in an old green label holder. NGC ID# 26HH, PCGS# 7459

- 4076 1922 Grant With Star MS66 PCGS. CAC.** A richly toned orange-gold example with resplendent luster and impressively sharp definition. The radiant surfaces are near-pristine. NGC ID# 26HH, PCGS# 7459

**1922 Grant With Star Gold Dollar, MS67
Lustrous, Remarkable Example**

- 4077 1922 Grant With Star MS67 PCGS.** A wonderfully lustrous Superb Gem example of this popular commemorative type, with rich, vibrant coloration and fine, shimmering mint luster. The With Star variety of this Laura Gardin Fraser-designed issue was produced to the extent of just 5,016 pieces, exactly the same number as its No Star counterpart. From *The Pannonia Collection, Part Two*. NGC ID# 26HH, PCGS# 7459

**1922 Grant With Star Memorial Gold Dollar
Eye-Appealing Superb Gem**

- 4078 1922 Grant With Star MS67 PCGS. CAC.** From the first issuance of the Grant Memorial gold dollar, as evidenced by the presence of a small incuse star in the right obverse field. The artistic meaning of the star is unknown, though its removal halfway through production produced a second variety of the commemorative to market to collectors. This Superb gem representative is virtually pristine, with satiny lemon-gold luster and razor-sharp design elements. A visually finer piece will prove difficult to acquire. PCGS has seen only one numerically finer representative (8/14). NGC ID# 26HH, PCGS# 7459

**1922 Grant Memorial Gold Dollar, MS67
Earlier With Star Variant**

- 4079 1922 Grant With Star MS67 PCGS. CAC.** An almost perfectly preserved, sharply struck representative of the With Star variant. Varying shades of lemon and orange-gold luster encompass each side, with the reverse also exhibiting a deeper tinge of coppery-orange toning in the center. Housed in an old green label holder, with just one piece encapsulated numerically finer by PCGS (8/14). NGC ID# 26HH, PCGS# 7459

MODERN ISSUES

1995 and 1996 Atlanta Olympic Commemoratives Complete 32-Piece Set in Wooden Case

- 4080 Complete 32-Piece 1995-1996 Atlanta Olympics Commemorative Set in Wooden Case.** Every design, every metal, every coin from half dollars to half eagles: the complete 32-coin Uncirculated and Proof set of Atlanta Olympic commemoratives. All coins housed in their original Mint plastic capsules, the whole contained in a two-tray setup mounted in an impressive wooden box. Comes with key and certificate of authenticity. (Total: 32 coins)

Proof 1995-P Gymnastics Silver Dollar Cancelled Reverse Die

- 4081 1995-P Gymnastics Silver Dollar Cancelled Reverse Proof Die.** Serial number 5642602. A hefty cylindrical steel die with highly polished face, used to strike proof Atlanta Olympics silver dollar commemoratives with the Gymnastics design. Two crossing rim-to-rim lines form a prominent 'X' cancellation mark. Dimensions are similar to a slightly oversized shotglass. A certificate of authenticity from the U.S. Mint accompanies the lot, and indicates that it struck 1,200 pieces sometime between its April 18, 1996 introduction and September 23, 1997 retirement.
- 4082 2001-W Capitol Visitors Center Five Dollar MS70 PCGS.** Only 6,761 business strikes were minted, compared with a substantial production of 27,652 proofs. This technically flawless example displays lemon-gold color over softly frosted and unmarked surfaces. NGC ID# 28VB, PCGS# 9792

MODERN BULLION COINS

- 4083 1986 Quarter-Ounce Gold Eagle MS70 NGC.** The Mint struck 726,031 quarter-ounce Gold Eagles for the inaugural issue in 1986. This lustrous, butter-gold example is technically perfect and visually pleasing. NGC ID# 26M2, PCGS# 9804
- 4084 1986 Half-Ounce Gold Eagle MS70 NGC.** This first-year representative is devoid of even the most minute tick or speck, fully warranting a perfect technical grade. The strike is razor-sharp, and softly frosted luster and butter-gold surfaces provide a high degree of eye appeal. NGC ID# 28Y8, PCGS# 9805
- 4085 1986-W Eagle 1 Ounce Gold Eagle PR70 Deep Cameo PCGS.** First year of the American Eagle series, represented here by a lovely Deep Cameo proof. Perfect with brilliant and beautiful surfaces. NGC ID# 28YV, PCGS# 9807
- 4086 1987-P Half-Ounce Gold Eagle PR70 Deep Cameo PCGS.** The American Eagle gold and silver bullion program started the previous year with one ounce coins. Half-ounce gold coins were introduced in 1987, and smaller pieces came later. This two-piece set offers the one-ounce and half-ounce gold eagles, each in the prefect PR70 grade with amazing contrast. (Total: 2 coins) NGC ID# 28Y9, PCGS# 9813
- 4087 1991 Quarter-Ounce Gold Eagle MS70 NGC.** This issue represents the final Roman numerals issue in the Gold Eagle series. Warm orange-gold color and radiant mint luster blend over the fully struck and technically pristine surfaces. NGC ID# 26M7, PCGS# 9850

1993 Silver Eagle, Radiant MS70

- 4088 1993 Silver Eagle MS70 NGC.** Creamy-white mint bloom encompasses this fully struck representative. Close scrutiny with a loupe fails to reveal any discernable surface flaws, confirming the technically perfect grade of MS70 awarded it by NGC. The combination of pleasing attributes makes the viewer want to pause and just look at this piece for no other reason than admiring its beauty and quality. NGC ID# 26JJ, PCGS# 9866
- 4089 1993-P Silver Eagle, Moy Signature, PR70 Deep Cameo PCGS.** A magnificent technically perfect representative of this popular bullion piece, from a mintage of 405,913 pieces. The design elements are fully detailed and the richly frosted devices create an intense cameo effect against the deeply mirrored fields. Population: 34 in 70 Deep Cameo, (9/14). PCGS# 520860
- 4090 1994-P Silver Eagle, Moy Signature, PR70 Deep Cameo PCGS.** A technically perfect representative of this popular silver bullion issue from a mintage of 372,168 pieces. The design elements are fully struck and richly frosted, creating intense cameo contrast with the deeply mirrored fields. PCGS# 520610

1995-W Silver Eagle, PR69 Ultra Cameo
The Key to the Series

4091 1995-W Silver Eagle PR69 Ultra Cameo NGC. The 1995-W proof was issued only in special 10th anniversary proof sets from the West Point Mint, of which only 30,125 were ever sold. This paltry mintage is the lowest of any issue in the American Silver Eagle series. This representative showcases stark white-on-black contrast, with razor-sharp devices and seemingly perfect preservation. NGC ID# 28WZ, PCGS# 9887

4092 1996 Quarter-Ounce Gold Eagle MS70 NGC. Delicate lemon-gold color graces this immaculately preserved and fully struck quarter-ounce Gold Eagle. Predictably, magnification fails to yield even a single element worthy of critique. NGC ID# 26MC, PCGS# 9904

4093 Four-Coin 1998-W Platinum Eagle Set PR70 Deep Cameo PCGS. The four-piece set includes the one-ounce \$100, half-ounce \$50, quarter-ounce \$25, and tenth-ounce \$10 denominations. Certified in separate holders bearing identical ideal grades. All four coins are pristine and exhibit outstanding cameo contrast. The first year of the "Vistas of Liberty" designs, with the eagle flying over a New England shoreline. (Total: 4 coins) NGC ID# 293N, PCGS# 99768

4094 Four-Coin 2000-W Platinum Eagle Set PR70 Deep Cameo PCGS. The set includes the one-ounce \$100, half-ounce \$50, quarter-ounce \$25, and tenth-ounce \$10 2000-W platinum American Eagles in separate holders but matching ultimate grade. All four coins are both flawless and unimprovable. The "Eagle above America's Heartland" design. (Total: 4 coins)

4095 Four-Piece 2002-W Gold Eagle Set PR70 Deep Cameo PCGS. The four-coin set includes the one-ounce \$50, half-ounce \$25, quarter-ounce \$10, and tenth-ounce \$5 denominations. Each of the four coins has been awarded the top grade and designation. Each pristine piece exhibits impressive cameo contrast. (Total: 4 coins) NGC ID# 28XJ, PCGS# 99960

4096 Four-Coin 2002-W Platinum Eagle Set PR70 Deep Cameo PCGS. The set includes the one-ounce \$100, half-ounce \$50, quarter-ounce \$25, and tenth-ounce \$10 denominations. Housed in separate but identically graded holders. All four coins are perfect except for a tiny spot on the final ray of the tenth-ounce piece. Final year of the "Vistas of Liberty" series with the eagle fishing in America's Northeast. (Total: 4 coins) NGC ID# 293T, PCGS# 99797

4097 Four-Coin 2003-W Platinum Eagle Set PR70 Deep Cameo PCGS. The four-coin set includes the one-ounce \$100, half-ounce \$50, quarter-ounce \$25, and tenth-ounce \$10 denominations. Each coin is in separate holders but identically graded. All are pristine, sporting exquisite cameo contrast between the mirrored fields and frosty devices. (Total: 4 coins) NGC ID# 26SC, PCGS# 921100

4098 Four-Coin 2004-W Gold Eagle Set PR70 Deep Cameo PCGS. The four-coin set includes the one-ounce \$50, half-ounce \$25, quarter-ounce \$10, and tenth-ounce \$5 denominations. The coins are separately housed in PCGS holders that bear identical, ultimate grades. All pieces are immaculate and intricately struck with various degrees of light orange toning. (Total: 4 coins) NGC ID# 28XK, PCGS# 99971

4099 Four-Coin 2004-W Platinum Eagle Set PR70 Deep Cameo PCGS. The four-coin set includes the one-ounce \$100, half-ounce \$50, quarter-ounce \$25, and tenth-ounce \$10 denominations. Each coin is in separate holders but identically graded. All are pristine aside from wispy imperfections on the tenth-ounce piece above Liberty's head and torch. (Total: 4 coins)

4100 Four-Coin 2005-W Platinum Eagle Set PR70 Deep Cameo PCGS. The four-coin set includes the one-ounce \$100, half-ounce \$50, quarter-ounce \$25, and tenth-ounce \$10 denominations. Each coin is in separate holders but identically graded. An immaculate and razor-sharp quartet that boasts unimprovable white-on-black contrast. (Total: 4 coins) NGC ID# 2933, PCGS# 921108

4101 Four-Coin 2006-W Platinum Eagle Set PR70 Deep Cameo PCGS. The four-coin set includes the one-ounce \$100, half-ounce \$50, quarter-ounce \$25, and tenth-ounce \$10 denominations. Each coin is in separate holders but identically graded and equally flawless. The design is from the "Foundations of Democracy" series and represents the Legislative Branch. (Total: 4 coins) PCGS# 921116

4102 Four-Piece 2007-W Gold Eagle Set PR70 Deep Cameo PCGS. The four-coin set includes the one-ounce \$50, half-ounce \$25, quarter-ounce \$10, and tenth-ounce \$5 denominations. Each piece is identically graded but separately holdered. Each of the four coins is pristine and demonstrates exemplary cameo contrast. The central reverse of tenth-ounce piece has peach toning. (Total: 4 coins) NGC ID# 26R4, PCGS# 148082

4103 2007-W Half-Ounce Platinum Eagle, 10th Anniversary PR70 PCGS. A pair of half-ounce Platinum eagles in different formats including a standard proof and a reverse proof, each in the ultimate grade with exceptional contrast. (Total: 2 coins) NGC ID# 293L, PCGS# 393055

4104 2008-W Four-Piece Buffalo Proof Set PR69 Ultra Cameo NGC. Included are: \$5 tenth-ounce; \$10 quarter-ounce; \$25 half-ounce; and a \$50 one-ounce American Buffalo bullion coins. This is the only year the Mint produced four-piece American Buffalo fractional coin sets. Each piece is .9999 fine gold, with mirrored fields and contrasting, heavily frosted devices. (Total: 4 coins) PCGS# 399932

**2008-W One-Ounce Gold Buffalo
PR69 Deep Cameo**

- 4105 2008-W One-Ounce Gold Buffalo PR69 Deep Cameo PCGS.** James Earle Fraser's iconic Buffalo nickel designs were revived for use on this one-ounce American Buffalo gold bullion coin, making the type one of the most attractive and sought-after modern bullion issues. This proof representative is essentially flawless in strike and preservation, delivering a degree of field-device contrast that beautifully amplifies the bold motifs. PCGS# 393329

- 4106 2009-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** This perfect proof platinum Eagle celebrates "A More Perfect Union," according to the reverse design. PCGS# 404476

- 4107 Four-Piece 2010-W Gold Eagle Set PR70 Deep Cameo PCGS.** The four-coin set includes the one-ounce \$50, half-ounce \$25, quarter-ounce \$10, and tenth-ounce \$5 denominations. These four pieces are identically graded at the top of the scale, and each exhibits a high degree of contrast between the mirrored fields and lustrous devices. (Total: 4 coins) NGC ID# 26LX, PCGS# 502739

- 4108 2010-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** This exceptional platinum Eagle has amazing contrast with perfectly mirrored fields and lustrous devices. NGC ID# 26UL, PCGS# 415546

- 4109 2011-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** Brilliant and sharply detailed, this perfect Deep Cameo proof has impressive field-to-device contrast. NGC ID# 26UM, PCGS# 507770

- 4110 2012-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** A perfect brilliant proof one-ounce platinum Eagle, this piece has deeply mirrored fields with highly lustrous and brilliant devices. Exceptional contrast. NGC ID# 2U2H, PCGS# 515152

- 4111 2014-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** .9999 Fine Gold. Flawless. Housed in the original PCGS gold label holder. PCGS# 527905

- 4112 2014-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** .9999 Fine Gold. Flawless. Housed in the original PCGS gold label holder. PCGS# 527905

- 4113 2014-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** .9999 Fine Gold. Flawless. Housed in the original PCGS gold label holder. PCGS# 527905

- 4114 2014-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** .9999 Fine Gold. Flawless. Housed in the original PCGS gold label holder. PCGS# 527905

- 4115 2014-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** .9999 Fine Gold. Flawless. Housed in the original PCGS gold label holder. PCGS# 527905

- 4116 (2013) One-Ounce Platinum "1876 \$100 Union" Ultra Cameo Gem Proof NGC.** Struck by the private New York Mint, with the Smithsonian Institute receiving a portion of the sales revenue. The designs are based on a drawing by U.S. Mint engraver George T. Morgan that was never struck as a pattern. A different variety, struck in 2005, bears the legend ONE HUNDRED DOLLARS, but the present variety has no indication of denomination. A presentation box accompanies the piece.

- 4117 No Lot**

- 4118 No Lot**

COINS OF HAWAII

**1879 12 1/2 Cent T.H. Hobron Token
Choice AU, Rare Medcalf 2TE-8 Variant**

- 4119 1879 T. Hobron, Kahului-Wailuku 12 1/2 Cent Railroad Token, Thin 6/2 Stars, AU55 PCGS. M. 2TE-8 Variant.** A rare die marriage. Similar to the Medcalf 2TE-8 variety, but both dies differ. For example, the T is repunched above its right base, as is the first H. The reverse stars have long, slender branches. The lower loop of the 8 is slightly open. An evenly struck and unblemished walnut-brown example. Listed on page 414 of the 2015 *Guide Book*. Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3929.

HARD TIMES TOKENS

**1837 Three-Cent Feuchtwanger, Eagle MS61
Impressive High-Grade Example
One of the Finest Known, HT-262**

4120 1837 Feuchtwanger Three Cent, Coat of Arms MS61 NGC. Low-117, HT-262, R.3. The obverse shows a depiction of The New York State Coat of Arms. The denomination is spelled out on the central reverse. Struck in German silver. This is an impressive, high-grade example and one of just a handful known in Mint State. The motifs are sharply struck and the surfaces are smooth and distraction-free. Feuchtwanger's experimental compositions were produced in one and three-cent formats, with the latter (in three distinct varieties) being far scarcer. Listed on page 408 of the 2015 *Guide Book*. Census: 1 in 61, 1 finer (9/14). PCGS# 20002

4121 1837 Feuchtwanger Three Cent, Eagle — Edge Damaged, Countermark "JMP" — VF30 ANACS. Low-118, HT-263, R.5. A defiant eagle stands facing left on the obverse. The denomination is spelled out across the central reverse. This example of the rare Feuchtwanger three-cent "Eagle" — one of three distinct varieties for the denomination — shows a clip on the edge at 7 o'clock (obverse). On the upper reverse beneath W in FEUCHTWANGER is a deeply-impressed, upside-down countermark reading "JMP". Both sides of the piece exhibit heavy planchet cracks and adjustment marks. PCGS# 20004

4122 1837 Feuchtwanger Cent MS65 NGC. Low-120, HT-268, Breen 6-I, R.1. A pleasingly high-grade example of this popular type, which is rarely seen in such a fine state of preservation. It is well-struck with full, gleaming luster and essentially untuned olive-gray surfaces. Other than a couple of faint toning marks, both sides are distraction-free. Census for HT-268 (61): 28 in 65, 8 finer (9/14).

CONFEDERATE STATES OF AMERICA

4123 Bashlow CSA Restrike Set, MS65-MS68 NGC. A six-piece set of Bashlow Restrikes of the CSA cent and half dollars in a handsome customized plastic holder certified by NGC. The cents were restruck in 1961 in silver, copper, and goldline (three pieces). The half dollars show the reverse design of the Confederate half dollar on the obverse, with modified inscriptions (similar to Scott's white metal tokens) on the reverse. They were struck in 1962 in bronze, silver, and goldline (three pieces). The cents all grade MS68, with the copper piece MS68 Red. The half dollar tokens all grade MS65, with the bronze example MS65 Red and Brown. (Total: 6 coins)

ALASKA TOKEN

4124 1911 Alaska Gold 'One', Parka Head, 11 Stars MS63 NGC. Gould-Bressett 173 Variant, HK-850, R.7. An attractive representative of this rare gold token variety. From "Hart's Coins of the West" series.

ERRORS

**1943 Lincoln Cent Struck on Silver 10C Planchet, VF25
Rare, Interesting Mint Error**

4125 1943 Lincoln Cent — Struck on Silver 10C Planchet — VF25 PCGS. An interesting piece, well-struck with most of the Lincoln cent design elements present, save for the 3 in the date, LI in LIBERTY, O in ONE, and the upper portions of E PLURIBUS UNUM along the upper reverse border. An evenly worn, unabraded example that someone recognized and pulled from circulation.

**1960 Cent on a 1960 Roosevelt Dime, MS64
Double Denomination '11-Cent Piece'**

4126 1960 Large Date Lincoln Cent — Double Denomination, Struck on a Roosevelt Dime — MS64 PCGS. An impressive "11-cent piece." Roosevelt gazes northwest relative to the Lincoln Memorial. The torch from the silver dime is present along Lincoln's jaw and the back of his head. Most of the cent date is clear. At least two-thirds of the dime date is visible near the E in ONE. Lightly toned and lustrous with an unmarked appearance. Incorrectly designated as Small Date by PCGS.

4127 1941 Jefferson Nickel — Struck on a Copper Lincoln Cent, Double Denomination — VF20 Brown NGC. Lincoln's profile, from the nose down to the bowtie, is evident on Jefferson's portrait between the cheek and the top of the collar. Traces of the right wheat ear are near E PLURIBUS UNUM. A glossy example with vivid lavender-red, sea-green, and cobalt-blue toning.

4128 1980-P Jefferson Nickel — Struck on a Cent Planchet — MS64 Red and Brown NGC. This wrong-planchet error is off center toward 10 o'clock, with most of the right side legend and date intact and most of the left side legend missing. The design elements are well-detailed and the pleasing surfaces are blanketed in shades of violet, blue, and lavender.

**1976-D Bicentennial Quarter
Struck on a Cent Flan, MS61 Red**

- 4129 1976-D Bicentennial Quarter — Struck on a Cent Planchet — MS61 Red PCGS.** Quarters struck on cent planchets likely occur fairly regularly at the Mint, but most are detected by riddlers and destroyed. Not only did the present full Red wrong planchet error escape the Denver facility, but it is an example of the short-lived Bicentennial quarter type. Further, the Drummer and dual date are nearly completely present. The mintmark is on the obverse rim at 4 o'clock.

**1970-S Quarter, PR67 Cameo
Obverse Double Struck in Collar**

- 4130 1970-S Washington Quarter — Obverse Double Struck in Collar — PR67 Cameo PCGS.** A bold, highly intriguing mint error for the Washington quarter or error coin specialist. Proof coins were subjected to more than one die impression in 1970 to bring up the design fully, but on the occasion when this piece was struck, the obverse die rotated slightly counter-clockwise after the first strike, so that the second impression left a doubled image on the obverse. The mirroring in the fields was not affected, leaving this nearly pristine proof with a high degree of overall eye appeal, while a blush of golden toning warms each side.

- 4131 1916-S Walking Liberty Half — Disc Clip at 7:30 — MS63 PCGS Secure.** A minuscule planchet clip is evident at 7:30 relative to the obverse on this attractive first-year half dollar. Both sides are brilliant and untuned with frosty luster. The clip takes the form of a depression on the obverse and reverse rims.

- 4132 1918-D Walking Liberty Half — Defective Planchet AU58 PCGS.** A near-Mint example of this early Denver issue, featuring a fissure in the planchet at 10:30 on the reverse rim, with resulting weakness of strike on the surrounding letters and on the corresponding portion of the obverse rim. Satiny silver-gray luster encompasses each side, with Liberty's head and branch hand exhibiting some of the usual softness. An interesting mint error from this heavily collected series.

**1932 Indian Ten Dollar, MS63
Obverse Struck-Through**

- 4133 1932 Indian Eagle — Obverse Struck-Through — MS63 NGC.** A 1 mm x 6 mm strike-through is visible on the lower left portion of the headdress. The strike-through exhibits parallel grooves that correspond to the texture of the unknown struck-in object, which is no longer present. A lustrous butter-gold type coin with booming luster and exemplary preservation for the MS63 level. NGC ID# 28HB, PCGS# 8884

**1924 Double Eagle, MS63
Struck Through Small Rod**

- 4134 1924 Double Eagle — Obverse Struck-Through — MS63 PCGS.** A small rod, 1 x 10 mm, apparently came between the obverse die and the present coin. The rod is absent but its impression remains. The strike-through begins on the right (facing) shoulder and concludes near the rim at 1:30. A green-gold example with distributed field marks usual for the bag-shipped type.
Ex: Dallas Signature (Heritage, 11/2007), lot 9849; Stamford Signature (Heritage, 10/2010), lot 12204, which realized \$1,840. NGC ID# 26G7, PCGS# 9177

GSA DOLLARS

- 4135 1881-CC MS64 Deep Mirror Prooflike NGC. VAM-2.** An impressive Choice example of this popular Carson City issue, with sharply detailed design elements and deeply reflective prooflike fields that show a scattering of minor contact marks and hairlines. Band certified in the original plastic holder, with original box and numbered government card. PCGS# 497127

- 4136 1881-CC MS64+ Deep Mirror Prooflike NGC.** The design elements of this high-end Choice example are sharply detailed and richly frosted, providing intense cameo contrast with the deeply reflective prooflike fields. The surfaces show a few minor hairlines and contact marks on both sides. Band Certified in the original GSA holder and box but without a certificate. PCGS# 497127

1882-CC GSA Dollar, MS65
Deep Mirror Prooflike Example

4137 1882-CC MS65 Deep Mirror Prooflike NGC. A delightful Gem Morgan dollar from the famous Carson City Mint, with sharply detailed frosty design elements that contrast boldly with the deeply reflective brilliant fields to create a stunning cameo effect. Band certified in the original black GSA holder and box, with numbered card. PCGS# 497135

4138 1883-CC MS65 Deep Mirror Prooflike NGC. The deeply reflective surfaces of this spectacular Gem are lightly marked and the sharply detailed frosty design elements provide intense cameo contrast. Band certified in the original black GSA holder and box, with numbered card. PCGS# 497145

4139 1884-CC MS65 Deep Mirror Prooflike NGC. The 1884-CC Morgan dollar was heavily represented in the GSA sales and collector demand for this issue is always strong. This delightful Gem is sharply detailed, with deeply mirrored fields and strong field-device contrast. Band certified in the original black GSA holder and box, with numbered card. PCGS# 497153

4140 1885-CC MS65 NGC. Deeply frosted and fully brilliant surfaces exhibit sharp definition with a touch of central softness. An attractive Carson City Gem. Band-certified in the black GSA holder and box of issue. A certificate is present but the serial number is trimmed. PCGS# 407160

4141 1885-CC MS64 Deep Mirror Prooflike NGC. A sharply detailed Choice example of this popular low-mintage issue, with lightly marked brilliant surfaces and intense field-device contrast. Band certified in the original black GSA holder and box, with numbered card. PCGS# 497161

CERTIFIED MODERN PROOF SETS

4142 1936 Proof Set PR63 to PR64 NGC. The coins are separately housed in NGC holders with consecutive certification numbers. The set includes: **cent Satin PR63 Red and Brown**, satiny luster covers each side, small carbon specks throughout; **nickel Proof Details Environmental Damage**, subdued gray patina with areas of iridescent toning, damage from improper storage; **dime PR63**, lightly toned but mostly brilliant, full strike definition; **quarter PR64**, minimally toned, surprisingly few marks for the grade; and a **half dollar PR64**, razor-sharp strike, deeply mirrored, dappled toning. (Total: 5 coins) NGC ID# 22L2, PCGS# 3331

4143 1937 Proof Set from PR65 to PR66 NGC. The coins are separately housed in NGC holders with consecutive certification numbers. The set includes: **cent PR65 Red and Brown**, a deeply mirrored, uniform copper and russet color, minimal carbon; **nickel Proof Details Environmental Damage**, multicolor patina, slight spotting over each side from improper storage; **dime PR65**, light toning over otherwise brilliant surfaces, needle-sharp strike; **quarter PR66**, pale patina covers each fully struck side, no marks of note; and a **half dollar PR66**, delicately toned and fully struck. (Total: 5 coins) NGC ID# 22L4, PCGS# 3337

MINT SETS

4144 1947 Double Mint Set Uncertified. This double Mint Set includes 28 coins, two of each denomination issued by the three active mints in 1947 (San Francisco did not strike half dollars that year). The coins are in the original cardboard holders and the envelope is present, but tattered. The copper coins are red and brown and the silver and copper-nickel coins are lightly toned in shades of gray, amber, gold, and lavender. (Total: 28 coins) NGC ID# 22EN, PCGS# 2750

4145 1948 Double Mint Set Uncertified. A double Mint Set, containing 28 coins in the original packaging and envelope. The copper coins are red and brown, and the silver and copper-nickel coins show traces of greenish-gold and amber toning. (Total: 28 coins) NGC ID# 22ES, PCGS# 2759

4146 1949 Double Mint Set Uncertified. A double Mint Set of 28 coins, two of each denomination issued from each of the active mints (San Francisco did not issue quarters in 1949) in the original packaging and envelope. The surfaces of the copper coins have mellowed to red and brown, and the silver and copper-nickel coins display shades of apple-green, burnt-orange, and amber toning. (Total: 28 coins) NGC ID# 22EV, PCGS# 2768

4147 1951 Double Mint Set Uncertified. A double Mint Set, including 30 coins, two of each denomination from each of the active mints, in the original packaging and envelope. The copper coins offer red and brown surfaces, while the silver and copper-nickel coins are often toned in shades of golden-brown, violet, and amber. (Total: 30 coins) NGC ID# 22F3, PCGS# 2786

4148 1952 Double Mint Set Uncertified. This double Mint Set contains 30 coins, two of each denomination issued by each of the active mints in 1952, in the original holders and envelope. Some copper coins are red, some are red and brown, and some are brown. The silver and copper-nickel coins are lightly toned, with silver-gray and pale gold highlights. (Total: 30 coins) NGC ID# 22F6, PCGS# 2795

4149 1953 Double Mint Set Uncertified. This 1953 double Mint Set includes 30 coins, two of each denomination from the three active mints, in the original packaging and envelope. The copper coins remain mostly red and the silver and copper-nickel coins are lightly toned in shades of russet, apple-green and gray, with most of the color at the peripheries. NGC ID# 22F9, PCGS# 2804

End of Session Two

SESSION THREE

PATTERNS

1850 Perforated Cent, MS63
Judd-119, Struck in Billon

- 4150** 1850 One Cent, Judd-119 Original, Pollock-134, Low R.6, MS63 NGC. The obverse displays the denomination CENT at the top, the date 1850 at the bottom, two rosettes at the sides, and a perforation in the center. The shattered reverse has the inscriptions USA and ONE TENTH SILVER around. Struck in billon (10% silver, 90% copper) with a plain edge. Judd-119 is typically certified as a proof by both NGC and PCGS. The present piece is the sole exception. This well-struck example has mostly oxidized steel-gray but ample hints of initial pearl-white luster outlines the letters and rosette. The left obverse displays wispy marks. PCGS# 11511

1850 Three Cent Silver, PR62
Judd-125, Cap and Rays Design

- 4151** 1850 Three Cent Silver, Judd-125 Original, Pollock-147, R.4, PR62 PCGS. The obverse features a Liberty cap surrounded by rays. LIBERTY is near the base of the cap with the date below. On the reverse, a circular palm branch encloses the Roman numeral III and is framed by UNITED STATES OF AMERICA. Struck in silver with a plain edge. This design was by Franklin Peale and modeled after the similarly designed gold dollar from 1836. Deeply toned gunmetal-gray. The strike is sharp except on the E in LIBERTY. No marks are evident but the surfaces are somewhat subdued by the original patination. PCGS# 11536

1853 Judd-151 Cent, PR64
Liberty Quarter Eagle Obverse Design

- 4152** 1853 One Cent, Judd-151, Pollock-178, Low R.6, PR64 PCGS. The obverse design is the issued 1853 quarter eagle, but the reverse shows the denomination ONE CENT within a laurel wreath. Struck with a reeded edge in an alloy of 60% copper and 40% nickel. A flashy and intricately struck near-Gem. A few light flecks of carbon are all that limit the grade of this lovely piece. Ex: FUN Signature (Heritage, 1/2004), lot 8379. PCGS# 11628

1854 Judd-159a Cent, MS61 Brown
Seated Liberty Obverse

- 4153** 1854 Electrotype One Cent, Judd-159a, Pollock-186, High R.6, MS61 Brown NGC. An unusual pattern variety. The obverse die was made by crudely reducing an 1854 silver dollar with a lathe, causing prominent concentric die lines and blurry design details. The date resembles 1851. The reverse shows 1 CENT encircled by an oak and acorn wreath. Struck in copper with a plain edge. Judd-159 is a formidable rarity but its electrotype copper counterpart Judd-159a is somewhat more available. Designated as Mint State, but both NGC and PCGS have also certified examples as proof. Predominantly toned deep chocolate-brown, although crimson-red outlines the devices and legends. The well preserved obverse has blurry features and a faint target pattern (as made) on the seated Liberty. The lightly abraded reverse is comparatively sharp. Ex: New York Signature (Heritage, 11/2003), lot 11009. PCGS# 11654

**1854 One Cent Pattern, Judd-161 Original, PR61 Brown
Attractive, Nicely Preserved Pattern Piece**

- 4154** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR61 Brown NGC. On the obverse Liberty faces left on a blank field with no peripheral stars or legends; the date 1854 below. On the reverse, the denomination ONE CENT is in the center, surrounded by a laurel wreath; with the legend UNITED STATES OF AMERICA around the margins. Struck in bronze with a plain edge. This is a lovely, fully struck representative with smooth surfaces and a minor planchet void in the right obverse field that provides a small window of semiprooflikeness. PCGS# 11663

**1858 Flying Eagle Cent, Choice Proof
Judd-191, Laurel Wreath Reverse**

- 4157** 1858 Flying Eagle Cent, Judd-191, Pollock-233, Snow-PT14, R.5, PR64 PCGS. A transitional pattern that combines a regular issue 1858 Small Letters obverse with the laurel wreath reverse of 1859. Struck in copper-nickel with a plain edge. A well struck near-Gem that has a wheat-gold obverse and an olive-green reverse. A lens reveals minor carbon and a pair of hair-thin marks above the ribbon loop.
Ex: Long Beach Signature (Heritage, 3/2003), lot 9060. PCGS# 11840

**1855 Judd-167 Flying Eagle Large Cent
PR62 Red and Brown**

- 4155** 1855 Flying Eagle Cent, Judd-167 Original, Pollock-193, R.5, PR62 Red and Brown PCGS. A large cent pattern featuring a hooked-neck eagle and slanting 5s on the obverse. The reverse resembles the issued large cent reverse but the wreath and denomination are smaller, and UNITED STATES OF AMERICA is widely spaced. Struck in bronze with a plain edge. A sharply struck sea-green, powder-blue, rose-red, and lavender specimen. The surfaces are glossy aside from granularity near the RI in AMERICA. Struck from prominently clashed dies. PCGS# 11710

**1858 Flying Eagle Cent, Judd-192, PR64
Oak Wreath, Sans Shield Reverse**

- 4158** 1858 Flying Eagle Cent, Judd-192, Pollock-235, Snow-PT13, R.5, PR64 PCGS. The obverse is the familiar Small Letters 1858 cent. The pattern reverse generally resembles the 1860 regular issue reverse, but there is no shield at the top and the wreath is closed. Struck in copper-nickel with a plain edge. A fully struck and moderately mirrored near-Gem. A few flecks are distributed near the denomination, and a small strike-through rests beneath the left border of the front wing. PCGS# 11842

**1855 Flying Eagle Cent, PR63 Brown
Judd-168 Original**

- 4156** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR63 Brown NGC. A Flying Eagle cent pattern featuring a hooked-neck eagle and slanting 5s on the obverse. The diameter is that of a large cent, and the reverse is similar to the issued 1855 cent. It shows ONE CENT at the center surrounded by a circular wreath bound by a ribbon. Struck in copper with a plain edge. Free from clash marks, unlike many examples of Judd-168. Deep walnut-brown overall with glimpses of lighter tan toning. A lens and a strong light reveal unobtrusive obverse field marks. PCGS# 11720

**1858 Flying Eagle Cent, Choice Proof
Judd-193, Ornamented Shield Reverse**

- 4159** 1858 Flying Eagle Cent, Judd-193, Pollock-236, Snow-PT11a, R.5, PR64 PCGS. The obverse is identical to the regular issue 1858 Small Letters cent. The reverse resembles the issued 1860 Indian cent reverse but the shield is broad and ornamented. Struck in copper-nickel with a plain edge. A smooth razor-sharp near-Gem with sea-green fields and wheat-gold margins. Minor carbon is on the obverse rim near 9 o'clock and the left base of the E in ONE. Certified in a first generation holder.
Ex: Long Beach Signature (Heritage, 5/2003), lot 6403, which realized \$3,220. PCGS# 11844

**1858 Flying Eagle Cent, PR64
Judd-202, Five-Leaf Clusters**

- 4160** 1858 Flying Eagle Cent, Judd-202, Pollock-245, Snow-PT19, R.5, PR64 PCGS. The hook-necked eagle pattern obverse, usually attributed to Longacre, was paired with several reverses during the year. Judd-202 displays ONE CENT in a simple laurel wreath with clusters of either five (Pollock-245) or six (Pollock-246) leaves. Struck in copper-nickel with a plain edge. This boldly struck chestnut-brown near-Gem is unmarked and satiny with freckles of russet patina near the right-side portion of the wreath.
Ex: New Millennium Collection (Heritage, 11/2003), lot 11018, which realized \$3,105. PCGS# 11867

**1858 Flying Eagle Cent, PR64
Judd-203, Well-Struck**

- 4161** 1858 Flying Eagle Cent, Judd-203, Pollock-247, Snow-PT18, R.5, PR64 PCGS. The obverse has a hook-necked eagle flying left with tall wings. The reverse is similar to that of the issued 1860 cent but there is no shield near 12 o'clock. Struck in copper-nickel with a plain edge. A fully struck near-Gem with nicely mirrored sun-gold and olive-green surfaces. The upper obverse field displays minor carbon. Housed in a green label holder.
Ex: New York Signature (Heritage, 11/2003), lot 11019, which realized \$4,830. PCGS# 11869

**1858 Flying Eagle Cent, PR64
Judd-206, Low Leaves Reverse**

- 4162** 1858 Flying Eagle Cent, Judd-206, Pollock-242, Snow-PT16, R.5, PR64 NGC. Paquet's Small Eagle pattern obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. A well struck peach-gold near-Gem that has a blush of steel-gray toning on the central reverse. A minor spot is noted on the obverse field between the eagle and the E in AMERICA. PCGS# 11877

**1858 Judd-208 Indian Cent, PR64
Important Transitional Pattern**

- 4163** 1858 Indian Cent, Judd-208, Pollock-259, Snow-PT28, R.1, PR64 NGC. The 1858-dated transitional pattern with dies similar to the circulation-issue 1859 Indian cent, struck in copper-nickel with a plain edge. The wreath has five-leaf clusters, the date is centered, and the bust tip is blunt, one of several Judd-208 subvarieties classified by Pollock and Snow. A fully struck and radiant near-Gem with attractive lemon-gold and cherry-red toning. The obverse dentils display minor spots at 2 and 6 o'clock. PCGS# 11885

**1858 Indian Cent, Choice Proof
Judd-211, Oak Wreath Reverse**

- 4164** 1858 Indian Cent, Judd-211, Pollock-262, Snow-PT26, R.4, PR64 PCGS. Eagle Eye Photo Seal, no card included. The obverse is similar to the issued Indian cent, but is dated 1858. The reverse is similar to the issued 1860 cent reverse, except there is no shield between the ends of the oak wreath. The centered date, broad bust point variant. Struck in copper-nickel with a plain edge. A prominently mirrored pumpkin-gold cent. The strike is exemplary and the grade is limited solely by minor carbon on the left obverse field. PCGS# 11893

**1858 Judd-212 Indian Cent, PR64
Ornamental Shield Reverse**

- 4165** 1858 Indian Cent, Judd-212, Pollock-263, Snow-PT25, R.4, PR64 NGC. Similar to the Indian cent design as issued in 1860, but with a broad, ornamented shield at the top of the reverse. Struck in copper-nickel with a plain edge. The centered date, broad bust tip Pollock and Snow variant of Judd-212. A fully struck Choice proof with flashy peach-gold fields and only minor carbon. PCGS# 11895

1858 Judd-213 Indian Cent, PR64
Low Leaves Reverse

- 4166 1858 Indian Cent, Judd-213, Pollock-258, Snow-PT22, R.5, PR64 PCGS. The obverse is the Indian type as issued in 1859, but dated 1858. The reverse is the same as used on Flying Eagle cents. The Broad Bust Point, Centered Date, Low Leaves Pollock and Snow subvariety of Judd-213. Struck in copper-nickel with a plain edge. An orange-gold and lemon Choice proof that boasts a needle-sharp strike and mark-free surfaces. Minute carbon flecks are all that limit the grade. PCGS# 11897

1859 Judd-226 Indian Cent, PR63
Oak Wreath, No Shield Reverse

- 4167 1859 Indian Cent, Judd-226, Pollock-270, Snow-PT2, High R.6, PR63 PCGS. The obverse is the same as the issued 1859 cent. The reverse resembles the issued cent reverse of 1860 but lacks a shield at 12 o'clock. Struck in copper-nickel with a plain edge. Rarer than most cent patterns of the era. A chestnut-gold and apple-green example. Post-strike imperfections are absent, although we note a small field strike-through near the A in STATES. The strike shows blending on the lower arrowheads and upper headdress feather tips. PCGS# 11928

1859 Judd-227 Indian Cent, PR64
Ornamental Shield Reverse

- 4168 1859 Indian Cent, Judd-227, Pollock-271, Snow-PT3, Low R.6, PR64 NGC. The designs are similar to the issued 1860 Pointed Bust cent, except the shield on the upper reverse is broad and ornamental. Struck in copper-nickel with a plain edge. A butter-gold Choice proof. Well struck and coruscating with minimal carbon. Smooth aside from a single tick on the cheek. Housed in a prior generation holder. PCGS# 11930

1859 Judd-228 Indian Cent, MS65
Reverse of 1860

- 4169 1859 Indian Cent, Judd-228, Pollock-272, Snow-PT4, R.1, MS65 NGC. A transitional pattern that combines the issued 1859 Indian Head cent obverse with the Shield Reverse first issued for commerce in 1860. Struck in copper-nickel with a plain edge. The present Gem is interesting for a broad wire rim on the reverse near 9 o'clock, caused by a slightly misaligned reverse die. The strike is nonetheless crisp except on the top of the shield. Toned sun-gold and cream-gray with minor granularity near the U in UNITED and the C in CENT. PCGS# 11932

1863 Indian Cent, PR64 Red and Brown
Judd-299, Bronze Alloy, No L

- 4170 1863 One Cent, Judd-299, Pollock-359, R.3, PR64 Red and Brown NGC. Eagle Eye Photo Seal, card not included. Judd-299 is struck from regular issue dies, but struck in bronze (instead of copper-nickel) with medal turn and a plain edge. Rare thick planchet specimens are known, but given its recession within the older NGC holder, this is the usually encountered thin planchet variety. Business strikes of Judd-299 are also known, but the intricate strike and reflective fields confirm proof status. A lovely peach-gold near-Gem that approaches full Red. A few minor obverse flecks are noted near 12 and 5 o'clock. PCGS# 70454

1863 Two Cent Piece, PR65 Brown
Judd-305, Washington Bust

- 4171 1863 Two Cents, Judd-305, Pollock-370, R.4, PR65 Brown PCGS. The obverse features a bust right of Washington, encircled by the words GOD AND OUR COUNTRY and the date below, on the obverse. The reverse displays a wheat wreath surrounded by UNITED STATES OF AMERICA. The denomination is at the center, with CENTS prominently curved. Struck with a plain edge. Variegated walnut-brown and orange-gold dominate, though ruby-red and powder-blue are also present. A fully struck and impressive Gem. PCGS# 60460

**1863 Two Cent Piece, PR63 Brown
Judd-312, GOD OUR TRUST**

- 4172** 1863 Two Cents, Judd-312, Pollock-377, R.4, PR63 Brown NGC. Similar to the adopted two cent piece of the following year except that the motto is GOD OUR TRUST, CENTS is sharply curved, and the wreath lacks trailing ribbon ends. Struck in bronze with a plain edge. Precisely struck and moderately mirrored with rich sea-green and plum-red toning. Well preserved and exemplary for the designated grade. Certified in a prior generation holder. PCGS# 60467

**1863 Three Cent Silver, PR62
Judd-322, Struck in Aluminum**

- 4173** 1863 Three Cent Silver, Judd-322, Pollock-387, High R.7, PR62 PCGS. Although described in the literature as "regular dies trial pieces," Judd-322 is a restrike from the early 1870s, and initially offered as part of complete off-metal sets with the silver coinage of this year containing quarter, half dollar, and dollar which had the reverses of 1866 with the motto IN GOD WE TRUST above the eagle. Struck in aluminum with a plain edge. A stone-gray example with well struck central motifs. The peripheral stars show occasional softness. The central reverse displays several hair-thin and granular horizontal lines. Certified in an old green label holder. PCGS# 60479

**1863 Ten Cent Pattern, PR62
Judd-329, Postage Currency, Struck in Tin**

- 4174** 1863 Ten Cents, Judd-329, Pollock-399, Low R.6, PR62 PCGS. The obverse features an ornamental shield that has an inverted laurel wreath suspended from a ring. A pair of arrows are crossed behind the shield. The reverse features the denomination and date in the center. The peripheral legends are EXCHANGED FOR U.S. NOTES on the obverse and POSTAL CURRENCY ACT JULY 1862 on the reverse. Struck in tin with a plain edge. A silver-gray example with a few minor handling marks and a speck of brown debris at 12 o'clock on the obverse. The obverse exhibits two lengthy die cracks. Population: 4 in 62, 3 finer (9/14). Ex: Dallas Signature (Heritage, 11/2003), lot 11041. PCGS# 60488

**1864 Indian Cent Pattern in Billon, MS64
J-356, Nearly Full Red Color**

- 4175** 1864 One Cent, Judd-356, Pollock-426, Low R.6, MS64 PCGS. CAC. The Mint experimented with several different coinage alloys in 1864, and used the regular working dies for the cent denomination to strike the patterns. This specific piece was struck with the regular No L 1864 Indian cent dies, in an alloy of 90% copper and 10% tin (often called billon). The surfaces show substantial coppery-red luster, with faintly dappled burgundy overtones on each side. The headdress feather tips are not fully defined, and there are prominent clash marks in the obverse field. USPatterns.com estimates as few as a dozen examples are known. Population: 1 in 64, 1 finer (8/14). PCGS# 60526

- 4176** 1865 Three Cent Nickel, Judd-413, Pollock-484, R.5, PR63 Brown PCGS. This regular dies trial piece shares the same obverse die as the scarce proof 1865 three cent nickel, since the date exhibits similar broad recutting. A high date variant, unlisted in Pollock, is also known. Struck in copper with a plain edge. A deep chocolate-brown specimen that displays iridescent cherry-red and forest-green undertones across the mirrored fields. Infrequent small spots decide the grade. Population: 3 in 63 Brown, 4 finer (9/14). PCGS# 60594

**1866 Washington Nickel, PR64
Baker-40, Judd-473**

- 4177** 1866 Five Cents, Baker-40, Judd-473, Pollock-564, Low R.6, PR64 PCGS. Many varieties of Washington five cent patterns are known, but the familiar Shield design was issued instead. The IN GOD WE TRUST Washington obverse die of Judd-464 through Judd-472 is paired with the issued Rays reverse design. Struck in nickel with a plain edge. A fully struck almond-gold and ice-blue example with mark-free microgranular surfaces. Housed in a green label holder. PCGS# 60669

**1867 Pattern Five Cents, PR63
Judd-561, Pollock-622**

- 4178** 1867 Five Cents, Judd-561, Pollock-622, R.5, PR63 PCGS. A Longacre design that shows Liberty facing left with four feathers and four stars in the headdress, the date below, UNITED STATES OF AMERICA above, and his name immodestly engraved beneath the portrait. The reverse has a large, ornate shield with a large Roman numeral V over it, the motto above. It is believed that 100 of these were struck, according to J. Colvin Randall. Liberty's profile greatly resembles Longacre's contemporary Indian cent, gold dollar, and three dollar designs. The stars are boldly recut. Struck in aluminum with a plain edge. The devices as well as the fields show light striations. The fields are deeply mirrored and the surfaces unoxidized but there is a slight haziness present.
Ex: *Central States Signature* (Heritage, 5/2004), lot 10607. PCGS# 60771

**1867 Five Cents, Judd-566, PR66
Among the Finest Certified**

- 4179** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR66 NGC. The obverse features a bust of Liberty facing left, wearing a coronet but lacking a star, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. CENTS is in a straight line. Struck in nickel with a plain edge. Moderately reflective fields complement well-struck design elements on this early nickel pattern, with faintly iridescent silver-gray color over both sides and overall excellent preservation. PCGS# 60776

**1868 Cent Pattern, PR64
Judd-605, Struck in Nickel**

- 4180** 1868 One Cent, Judd-605, Pollock-670, R.5, PR64 PCGS. Diminutive pattern Cent with an obverse similar to the issued three cent nickel design. The reverse features the wreath of the issued three dollar piece but the denomination is expressed by a large Roman numeral I at the center. Struck in nickel with a plain edge. A sharply struck cream-gray near-Gem. Trivial carbon does not appear to limit the grade.
Ex: *New Millennium Collection* (Heritage, 11/2003), lot 11080. PCGS# 60817

**1869 Judd-666 Cent, Choice Proof
Design Similar to Three Cent Piece**

- 4181** 1869 One Cent, Judd-666, Pollock-741, R.5, PR64 PCGS. The design resembles the contemporary three cent nickel, except the diameter is smaller and a single Roman column depicts the denomination. At least three date positions are known; Pollock-741 has the 1 distant from the bust and the 9 close to bust. Struck in nickel with a plain edge. Nicely struck and unabraded with streaky olive-gray surfaces and a minor spot near the D in UNITED.
Ex: *Long Beach Signature* (Heritage, 6/2002), lot 7168. PCGS# 60890

**1869 Three Cent Nickel, PR63
Judd-676, Smooth Pillars**

- 4182** 1869 Three Cent Nickel, Judd-676, Pollock-755, R.4, PR63 PCGS. Similar to the contemporary three cent nickel, except the date is larger and the denomination pillars are smooth. The Pollock variant with a short lower left ribbon end. Struck in nickel with a plain edge. A nicely struck and radiant pattern with scattered unimportant carbon and a hint of granularity on the central reverse. Certified in an old green label holder. PCGS# 60901

1869 Judd-684 Nickel, PR63
Longacre Liberty Bust Left

- 4183** 1869 Five Cents, Judd-684, Pollock-763, R.5, PR63 PCGS. Reminiscent of the contemporary three cent nickel, but Liberty's coronet has a star, the Roman numeral V replaces the Roman III, and a Maltese cross and a scroll bearing the motto closes the reverse wreath. Struck in nickel with a plain edge. A well-struck pearl-gray Select specimen. The grade is limited solely by a slender vertical lamination on the cheek and a narrow retained lamination to the west of the ribbon loop. PCGS# 60909

1869 Standard Silver Quarter Dollar, PR63
Judd-727, Pollock-808
Scarcer Standard Silver Issue

- 4184** 1869 Standard Silver Quarter Dollar, Judd-727, Pollock-808, R.5, PR63 NGC. The obverse features a head of Liberty, with hair bound, and no stars on the tiara. UNITED STATES OF AMERICA is around the border with a ribbon bearing the motto IN GOD WE TRUST below. The reverse displays a centered denomination, surrounded by a wreath, with STANDARD SILVER and the date at the peripheries. Struck in silver with a reeded edge. This example is sharply struck with deeply reflective fields and pleasing shades of golden-brown, charcoal-gray, and violet-gray over both sides. Census: 4 in 63, 18 finer (8/14). PCGS# 60954

1870 Judd-831 Ten Cent, PR65
William Barber's Liberty

- 4185** 1870 Ten Cents, Judd-831, Pollock-921, High R.6, PR65 NGC. A William Barber seated Liberty obverse. She faces left and supports a shield in her right hand. Her left hand holds an olive branch. A free-standing liberty pole is present behind the shield. Paired with a regular Seated dime reverse. Struck in silver with a reeded edge. This untuned specimen displays obvious cameo contrast, although it is undesignated as such due to the age of its holder. The fields display only minor hairlines, and the strike is bold except on the upper extremities of the wreath. PCGS# 61075

1870 Standard Silver Ten Cent, PR62
Judd-841, Extremely Rare

- 4186** 1870 Standard Silver Ten Cents, Judd-841, Pollock-933, High R.7, PR62 PCGS. A capped bust of Liberty faces right with UNITED STATES OF AMERICA around and IN GOD WE TRUST on a scroll below. On the reverse 10 CENTS and 1870 are within a wreath of cotton and corn with STANDARD above. Struck in aluminum with a reeded edge. A sharply struck and unabraded specimen with a pleasing reverse and a blush of gray verdigris on the cap and near UNITED STATES. Ex: ANA Signature (Heritage, 8/2008), lot 2736. PCGS# 61085

1870 Standard Silver Ten Cents, Judd-849, PR65
Pleasing, Scarce Pattern Coin

- 4187** 1870 Standard Silver Ten Cents, Judd-849, Pollock-956, R.5, PR65 NGC. Standard Silver Design C: Liberty wears a headband with her hair tied in a bun as more fully described for Judd-708. The reverse carries the denomination and date inside a wreath of corn and cotton with STANDARD above. Struck in silver with a reeded edge. Mostly brilliant silver surfaces are accompanied by light steel and lilac toning. This is a pleasing Gem proof with fully mirrored fields and just a hint of cameo contrast. A few faint surface imperfections are consistent with the grade. Census: 7 in 65, 2 finer (8/14). Ex: FUN Signature (Heritage, 1/2007), lot 1430. PCGS# 61093

1882 No Cents Liberty Nickel, PR63
Judd-1684, No Obverse Stars

- 4188** 1882 Liberty Head Five Cents, Judd-1684, Pollock-1886, Low R.6, PR63 PCGS. The design is similar to that adopted for the regular issue Liberty nickel in 1883, but the legend UNITED STATES OF AMERICA has replaced the stars around the periphery, and the wreath and V are larger with E PLURIBUS UNUM placed at the top. Struck in nickel with a plain edge. A razor-sharp representative with rich caramel-gold toning. Unabraded and virtually devoid of carbon. The central reverse is microgranular. PCGS# 62089

1884 'Holey' Cent Pattern, PR63
Judd-1721, Struck in Nickel

- 4189** 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR63 NGC. Eastman Johnson's "holey" design for the cent with the center perforated with an irregular circumference. The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. The die engraver made several minor blunders, including a repunched N in UNITED and C in AMERICA. The upper serif of an S emerges from the O in OF. Satiny and minimally abraded with light almond-gold toning. Encased in a former generation holder. PCGS# 62150

1885 Perforated Cent, PR64
Judd-1740, Eastman Johnson Design

- 4190** 1885 One Cent, Judd-1740, Pollock-1950, High R.6, PR64 PCGS. This annular pattern cent has a central perforation with a smooth, raised edge. The obverse has UNITED STATES OF AMERICA above with the date 1885/3 at the bottom of that side. On the reverse, ONE CENT is in large letters at the top with a small shield below flanked by laurel sprigs. Struck in silver with a plain edge. Eastman Johnson's unadopted design. The present fully struck specimen is caramel-gold overall with glimpses of navy-blue in protected areas. Satiny and attractive. A radial crack passes through the N in ONE.
Ex: FUN Signature (Heritage, 1/2004), lot 8513. PCGS# 62181

1896 Cent Pattern, Judd-1769
Aluminum Alloy

- 4191** 1896 One Cent, Judd-1769, Pollock-1985, High R.6, PR62 PCGS. The obverse displays a shield with 13 stripes, having the motto E PLURIBUS UNUM above and the date 1896 below. There are 13 stars at the border arranged seven left and six right, and the border is beaded. On the reverse, the denomination 1 CENT is centered within a curved olive sprig, with the legend UNITED STATES OF AMERICA surrounding both. The reverse also has a beaded border. Struck in an aluminum alloy with a plain edge. The alloy is listed on the PCGS insert as 95% aluminum, 2.8% copper, 1% silicon, and 0.8% manganese. Toned caramel-gold and pearl-gray. Well struck and satiny with minor handling marks in the fields. PCGS# 62223

1896 Shield Five Cent, Judd-1770, PR64

- 4192** 1896 Five Cents, Judd-1770, Pollock-1987, Low R.6, PR64 PCGS. This Charles Barber design uses a Federal shield as its primary motif. Behind the shield are two crossed poles bearing a liberty cap and eagle. A scroll passing in front of the shield is inscribed LIBERTY. The denomination 5 CENTS is centered within a curved olive sprig on the reverse. Struck in a nickel alloy with a plain edge. A fully struck and moderately mirrored specimen with pastel straw-gold and ice-blue toning. A lens fails to locate any detractors. PCGS# 62224

(1965) Martha Washington Die Trial Medal
J-2131, Copper-Nickel Alloy, MS64

- 4193** “1759” (1965) Martha Washington “Half Dollar,” Judd-2131, Pollock-2083, R-8, MS64 NGC. A rare 1965 trial striking, utilizing the Mint’s test dies depicting Martha Washington, Mount Vernon, and the date 1759. As the design bears no denomination and also lacks the other mandatory legends, these trial pieces are technically medals, and not coins. This fantasy design was used to test various coinage alloys in 1965, following the discontinuance of 90% silver coinage. The half dollar-size pieces were struck in multiple alloys, but only a few variations are known to exist today, and these in very limited numbers. At the writing of *United States Pattern Coins*, tenth edition, no examples of Judd-2131 were known to survive, though this piece has since been authenticated. The coin is struck in a composition of 75% copper and 25% nickel, similar to what was ultimately adopted for coinage. A touch of light golden toning blankets flashy silvery-gray surfaces, with well-defined motifs. Prominent clash marks are noted on the reverse.

1987 Gold ‘Half Eagle’ Token, MS63
Pollock-5450, Only Six Pieces Struck

- 4194** 1987 Gold “Half Eagle” Token, Pollock-5450, MS63 NGC. According to Andrew Pollock, this privately struck variety was “issued by Fred Zinkann of Montgomery, Illinois. They ... were struck by Pressed Metal Products of Vancouver, British Columbia ... [and] intended to serve as pattern pieces for the 1987 Constitution Bicentennial \$5 coin.” The mintages were six pieces in 0.917 gold (Pollock-5450), two pieces in hafnium (P-5455), 100 pieces in silver (P-5460) and 88 pieces in tungsten (P-5465). A well struck matte-finish apricot-gold example. Pristine aside from a small smoothed area on the reverse field between the second and third columns.

GOLD DOLLARS

- 4195** 1849 Open Wreath MS63 PCGS. From the first year of production, highly popular among type collectors. This sharp example is unusually well-preserved for the grade, exhibiting soft yellow-gold luster and lacking any noticeable abrasions. Housed in an old green label holder. NGC ID# 25B9, PCGS# 7502
- 4196** 1849-O Open Wreath MS62 PCGS. Variety 1. The doubling on the R in DOLLAR typifies this variety. Scattered small marks account for the grade on this piece, but the golden-yellow surfaces display bold eye appeal and a good strike overall. The 1849-O gold dollar is popular as the first-year O-mint issue. The issue also hails from a historic year in New Orleans, when a levee named Sauv s Crevasse failed upriver from the city, producing the most extensive flooding seen until Hurricane Katrina in 2005. Population: 50 in 62, 64 finer (9/14). NGC ID# 25BE, PCGS# 7508

1850-O Gold Dollar, MS61
Elusive Branch Mint Issue

- 4197** 1850-O MS61 NGC. Variety 1. Only 14,000 gold dollars were struck at the New Orleans Mint in 1850 and the issue is seldom encountered in any grade. This attractive MS61 specimen offers sharply detailed design elements and pleasing yellow and rose-gold surfaces with the expected number of minor contact marks. Census: 46 in 61, 26 finer (8/14). NGC ID# 25BJ, PCGS# 7512
- 4198** 1851 MS64+ PCGS. CAC. A wonderfully appealing, premium quality near-Gem example with shimmering mint frost and light lime-gold toning across both sides. Well-struck with a pair of faint luster grazes in the right obverse field that seemingly limit the numeric grade. NGC ID# 25BK, PCGS# 7513
- 4199** 1852-C AU55 PCGS. Variety 2. An attractive sun-gold Choice AU Charlotte dollar. Marks are confined to a single hair-thin line near the base of the 1 in the denomination. Mint-made strike-throughs affect the LA in DOLLAR and the field near Liberty’s chin and shoulder. At least five sets of clash marks are noted west of the repunched 1 in the date. NGC ID# 25BR, PCGS# 7518

**1853-D Gold Dollar, AU55
Original Patina**

4200 1853-D AU55 NGC. CAC. Variety 5-G. The 1853-D is a slightly scarcer issue in the gold dollar series from this mint, as only about 150 to 200 examples are estimated to survive in all grades. A significant quantity of AU examples are known, however, making the date one of the more easily obtainable in this grade range, and proportionately popular with Southern gold specialists. This Choice example displays original olive-gold patina, with subtle orange-gold overtones in the recesses. A touch of wear on the high points of the motifs defines the grade. Census: 23 in 55, 90 finer (8/14). NGC ID# 25BW, PCGS# 7523

4201 1855-O AU50 PCGS. Variety 2. This is the only Type Two gold dollar issue from the New Orleans Mint. Partial luster accompanies deep reddish-gold hues over lightly marked surfaces. The top of the 8 in the date is a touch incomplete, and moderate friction from brief circulation covers the high points. Housed in a green label holder. NGC ID# 25C7, PCGS# 7535

**1855-O Type Two Gold Dollar, AU55
Popular Type Issue From New Orleans**

4202 1855-O AU55 NGC. CAC. Variety 1. This low-mintage issue of 55,000 pieces is the most common Type Two gold dollar from a branch mint, per Garrett and Guth. This straw-gold specimen displays typical weakness on the 8 in the date and a small number of trivial field hairlines on each side. A popular issue for type purposes, according to the aforementioned authors. NGC ID# 25C7, PCGS# 7535

**1857-D Gold Dollar, AU53
Underrated Southern Gold Issue**

4203 1857-D AU53 NGC. Variety 9-L. From a small mintage of 3,533 pieces, the 1857-D gold dollar is one of the most underrated issues from the Dahlonega Mint. Probably no more than 150-200 examples are extant in all grades. This AU53 specimen offers well-detailed design elements with prominent clash marks on both sides. The pleasing orange-gold surfaces are lightly abraded and brightly lustrous. Census: 12 in 53, 67 finer (8/14). NGC ID# 25CF, PCGS# 7546

4204 1858 MS64 PCGS. The 1858 is one of the more elusive Philadelphia gold dollar issues of the period, and is genuinely rare in Gem and finer condition. This near-Gem representative exhibits satiny apricot-gold luster and sharp devices. The surfaces are remarkably clean, even for the Choice grade level. Population: 26 in 64, 15 finer (8/14). NGC ID# 25CH, PCGS# 7548

4205 1859 MS64 NGC. CAC. The 1859 gold dollar is a moderately available issue overall, but it becomes scarce in MS64 and is rarely seen finer. This example displays unusually bold design definition and frosty honey-gold luster. Census: 19 in 64, 20 finer (8/14). NGC ID# 25CL, PCGS# 7551

**1865 Gold Dollar, MS61 Prooflike
Scarce, Low-Mintage Issue**

4206 1865 MS61 Prooflike ANACS. Since gold coins failed to circulate on the East Coast during this Civil War year, the 1865 business strike mintage was only 3,725 pieces. Unlike later dates, Uncirculated examples were not saved in quantity, and in fact the date is rare regardless of grade. This is a flashy and sharply struck example interesting for a patch of die polish lines beneath the top of the wreath. None have been certified as PL or DPL by NGC. NGC ID# 25CZ, PCGS# 7564

- 4207 1872 MS61 Prooflike NGC.** This is a flashy and precisely struck gold piece with frosty motifs and surprisingly clean fields. Unlike the 1873 Open 3, the 1872 is scarce. A mere 3,500 pieces were struck, and unlike later low-mintage dates, relatively few were set aside by local dealers. Census: 2 in 61 Prooflike, 7 finer (8/14).
Ex: FUN Signature (Heritage, 1/2007), lot 5338; Central States Signature (Heritage, 5/2009), lot 3579. PCGS# 77572
- 4208 1873 Closed 3 MS62 NGC.** The Close 3 is by far the rarer of the two date variants from 1873. Only 1,800 pieces are believed to have been struck. This nicely lustrous example displays rich, reddish-tinted mint frost. A bit of striking softness is noted over the high points — a properly graded coin, with comparatively few examples certified finer. Census: 22 in 62, 34 finer (9/14). NGC ID# 25DA, PCGS# 7574
- 4209 1874 MS65 PCGS.** The 1874 is one of the most frequently encountered issues in type collections because of its mintage of nearly 200,000 coins. This Gem displays frosty, butter-gold surfaces with pleasing lilac and mint-green accents. Struck from slightly rusted dies. NGC ID# 25DC, PCGS# 7575
- 4210 1874 MS65 PCGS.** Lemon-gold color and green accents characterize the surfaces of this available gold dollar. The devices are somewhat lightly impressed, however marks are few and far between. A couple of alloy spots occur on each side. Thickly frosted and appealing. NGC ID# 25DC, PCGS# 7575

1875 Gold Dollar, MS60 Details Scarce Low-Mintage Issue

- 4211 1875 — Damaged — ANACS. MS60 Details.** A large contact mark is seen across Liberty's chin that appears to have buckled the planchet. The 1875 is one of the best known scarcities in the gold dollar series, its notoriety derived from the original mintage of 420 pieces, 20 struck as proofs. Like all 1875 business strikes, a tiny "spine" projects downward into the field from Liberty's throat, this still being visible despite the aforementioned mark. Normally the fields are prooflike, a characteristic that is still very much in evidence on this minimally-worn example. Appealing golden patina overall.
Ex: Long Beach Signature (Heritage, 9/2008), lot 3195. NGC ID# 25DD, PCGS# 7576
- 4212 1880 MS62 PCGS.** Flashy honey-gold and yellow-gold mirrors dominate the eye appeal, though the softness of strike reveals a circulation origin. Lightly abraded but thoroughly enjoyable. NGC ID# 25DJ, PCGS# 7581

- 4213 1883 MS65 PCGS. CAC.** An attractive type candidate, this 1883 gold dollar displays original yellow-gold luster and semiprooflike mirroring in the fields. A small tick in the obverse field near Liberty's mouth appears to be the grade-limiting factor on this piece, but is not prominent to the unaided eye. Irregularities in the border dentils is characteristic of many examples of this issue. NGC ID# 25DM, PCGS# 7584
- 4214 1886 MS66 PCGS.** A spectacular Premium Gem example of this popular issue, with sharply detailed design elements and well-preserved yellow-gold surfaces that radiate vibrant mint luster, with some prooflike reflectivity around the devices. Population: 16 in 66, 5 finer (8/14). NGC ID# 25DR, PCGS# 7587
- 4215 1888 MS65 PCGS.** When considered in the broader scope of U.S. numismatics, the 1888 issue's mintage of 15,501 coins is small. However, it is one of the more accessible dates in the series. This Gem showcases attractive reddish-gold color and uniformly well-struck devices. NGC ID# 25DT, PCGS# 7589
- 4216 1889 MS65 PCGS. CAC.** The final year of issue for the gold dollars except for a few later commemoratives. This Gem has light yellow surfaces and frosty luster with minimal marks and above average design definition. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

- 4217 1836 Script 8 AU55 PCGS. CAC. Head of 1835, Breen-6143, Variety 11, R.2.** A bright Choice AU example with yellow-gold surfaces that are minimally hairlined and free of any large or distracting abrasions. The absence of a berry on the reverse olive wreath, and the closeness of obverse star 6 to Liberty's hair curl both aid in the attribution of this Head of 1835 variety. NGC ID# 25FU, PCGS# 7694
- 4218 1837 AU50 PCGS. Breen-6145, Variety 16, R.2.** The bright wheat-gold surfaces exhibit pleasing undertones of mint-green. A boldly struck piece showing relatively modest high-point wear on each side. Population: 17 in 50, 73 finer (9/14). NGC ID# 25FX, PCGS# 7695

LIBERTY QUARTER EAGLES

- 4219 1840 AU53 PCGS.** Popular as the first year of the Christian Gobrecht Liberty Head design, the Philadelphia issue is scarce in grades above XF. This About Uncirculated example shows little actual wear, but weakness at the eagle's talons, leg, and head, and most of the star centers is noted. Lustrous yellow-gold color provides nice eye appeal despite small abrasions above and below Liberty's eye, plus a shallow scrape in the right obverse field. Few examples are certified finer at PCGS. Population: 4 in 53, 11 finer (9/14). NGC ID# 25GA, PCGS# 7717

1842-O Quarter Eagle, AU55 Scarce Low-Mintage Issue

- 4220 1842-O AU55 NGC. Variety 1.** From a mintage of 19,800 pieces, the 1842-O Liberty quarter eagle is one of the scarcest issues from the popular New Orleans Mint. Most examples seen are softly struck throughout, but this coin exhibits slightly better-than-average detail on the central devices. The lightly abraded yellow and greenish-gold surfaces are brightly lustrous and appealing. Census: 19 in 55, 38 finer (8/14). NGC ID# 25GK, PCGS# 7726

**1843-C Quarter Eagle, AU55
Large Date, Plain 4**

- 4221 1843-C Large Date, Plain 4 AU55 PCGS. CAC. Variety 1.** The more plentiful of the two known varieties for this issue. As a date, the 1843-C is fairly plentiful in comparison to other quarter eagles from the Charlotte Mint, with 250 to 350 examples believed extant, though its availability declines rapidly in the AU grade range, and the issue becomes rare in Mint State. This Choice AU representative displays bright honey-gold patina. The central eagle's feathers are weakly defined, more a product of poor striking quality than from actual wear. The specialist will appreciate, however, that the design definition is above-average for the issue. Population: 15 in 55, 21 finer (9/14). NGC ID# 25GN, PCGS# 7728

- 4222 1843-D Small D XF45 NGC. Variety 4-F.** The usually seen small mintmark variety. The issue's mintage of 36,209 coins is generous by Dahlonega standards, making it appropriate for type purposes. This is especially true when seen with an above-average strike and original reddish-gold surfaces, such is the case with this Choice XF representative. NGC ID# 25GP, PCGS# 7730

**1843-D Quarter Eagle, AU53
Small D Variety**

- 4223 1843-D Small D AU53 PCGS. Variety 4-H.** The 1843-D is one of the most plentiful quarter eagles from the Dahlonega Mint, with 400 to 500 examples believed extant, but it is also one of the best-struck overall, a combination that is ideal for the type collector seeking a single example from the Georgia facility. This representative displays medium bronze-gold patina, with only slight wear over the high points of the sharply impressed design. Consequential abrasions are minor, with none worthy of individual mention. Population: 24 in 53, 56 finer (9/14). NGC ID# 25GP, PCGS# 7730

**1852-C Quarter Eagle, AU53
Scarce, Low-Mintage Issue**

- 4224 1852-C AU53 NGC. Variety 1.** Rich honey-gold toning embraces this partly lustrous example. The major devices are typically struck, but the stars and dentils are well impressed. Smooth save for a thin mark above the arrowheads. A scant 9,772 pieces were struck. Census: 10 in 53, 49 finer (8/14). Ex: Long Beach Signature (Heritage, 2/2009), lot 2515; FUN Signature (1/2010), lot 3840. NGC ID# 25HS, PCGS# 7764

- 4225 1856-C — Improperly Cleaned — NGC Details. AU. Variety 1.** A bright piece with typically mushy details and green-gold surfaces that are hairlined and lightly abraded. A scarce quarter eagle issue from the Charlotte Mint. NGC ID# 25J8, PCGS# 7778

- 4226 1857-O AU55 PCGS. CAC.** The final year of quarter eagle production at the New Orleans Mint accomplished 34,000 pieces, most of which circulated heavily in the South and East. There was no impetus to save mintmarked gold in the 1850s, so relatively few coins survived in higher grades. The present Choice example is softly struck on the eagle's head, leg, and talons, but the coin is reasonably bold elsewhere. Surprisingly few marks are scattered across the attractive, medium-gold surfaces. Population: 31 in 55, 51 finer (9/14). NGC ID# 25JE, PCGS# 7784

**1859 Quarter Eagle, MS63
Type Two Reverse**

- 4227 1859 New Reverse, Type Two MS63 PCGS.** A new reverse hub was introduced in 1859, exhibiting several minor differences in the placement of the lower design elements, most notably that of the arrows, which are smaller and well-separated on the Type Two Reverse. This variant is only slightly scarcer than its Type One Reverse counterpart, though both are elusive in all Mint State grades. This piece displays original honey-gold luster and sharp motifs. Surface abrasions are faint and evenly dispersed. Population: 11 in 63, 5 finer (8/14). NGC ID# 25JK, PCGS# 7788

**1859-S Two and a Half, AU58
Sharp, Original Example**

- 4228 1859-S AU58 PCGS. CAC.** A good barometer of the scarceness of this San Francisco issue was seen in the Harry Bass Collection, which held six examples but none in Mint State. Grading events confirm the low population of Uncirculated survivors, with fewer than two dozen representatives from PCGS and NGC combined. It would not be surprising to discover many of those coins lack the eye appeal and pleasing, unabraded surfaces offered by this near-Mint example. A bold strike complements the apricot-gold patina with deeper, amber-gold accents around the devices. Population: 10 in 58, 10 finer (9/14). NGC ID# 25JN, PCGS# 7790

**1861 Type Two Quarter Eagle, MS64+
Rich Original Patina**

- 4229 1861 New Reverse, Type 2 MS64+ NGC.** Despite being the more plentiful of the two reverse types, the 1861 Type Two quarter eagle's availability declines sharply beyond the MS64 grade level, with Gem or finer coins scarcely seen. This example showcases frosty orange-gold luster and needle-sharp design elements. A few microscopic ticks defined the grade, but leave this piece with exceptional eye appeal. NGC has seen 32 numerically finer submissions (8/14). NGC ID# 25JX, PCGS# 7794

- 4230 1866-S AU58 PCGS.** Despite the 1866-S quarter eagle's mintage of 38,900 coins being one of the more substantial production figures of the period, Mint State survivors are decidedly rare, and high-end AU examples are only infrequently encountered. This near-Mint representative displays substantial yellow-gold luster. Some of the usual striking softness is seen on the eagle's left (facing) leg, though actual wear is only slight. Population: 8 in 58, 4 finer (8/14). NGC ID# 25K8, PCGS# 7804

- 4231 1869-S AU58 PCGS.** Produced to the limited extent of only 29,500 pieces, the 1869-S quarter eagle is an elusive issue in circulated grades and becomes genuinely rare in Mint State. This near-Mint example displays luminous orange-gold patina and smooth surfaces. The curls around Liberty's face and the eagle's neck and left (facing) leg are softly defined, as is typical of this poorly produced branch mint issue. Population: 27 in 58, 16 finer (8/14). NGC ID# 25KE, PCGS# 7810

**1870 Quarter Eagle, MS61
Rare Low-Mintage Issue**

- 4232 1870 MS61 NGC.** This issue had a small business strike mintage of 4,520 pieces, and survivors are scarce-to-rare at any grade level. This is a well-defined example with prooflike fields and scattered tiny field marks that explain the grade. Rare in Mint State, and a highly desirable coin as such. Census: 8 in 61, 2 finer (8/14). NGC ID# 25KE, PCGS# 7811

- 4233 1872-S AU58 NGC.** Just a trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen, and the lightly abraded surfaces retain almost all of their original mint luster. Census: 42 in 58 (1 in 58+), 15 finer (8/14). NGC ID# 25KL, PCGS# 7816

- 4234 1873 Closed 3 MS64 PCGS.** The scarcer of the two logotypes, the 1873 Closed 3 quarter eagle is seldom seen in Choice Mint State condition, and is decidedly rare any finer. This example shows frosty orange-gold luster and only minor, grade-consistent abrasions. The eagle's left (facing) leg and the hair curls around Liberty's face are not fully defined, though the motifs are otherwise sharp. Housed in an old green label holder. Population: 49 in 64 (1 in 64+), 12 finer (8/14). NGC ID# 25KM, PCGS# 7818

**1876 Quarter Eagle, MS61
Conditionally Rare Low-Mintage Issue**

- 4235 1876 MS61 PCGS.** In addition to noting its tiny mintage of just 4,176 pieces (including 76 proofs), Garrett and Guth's comments regarding this issue include the following: "Most of the survivors seen of the date are in About Uncirculated condition. Coinage for the year was meager at best, and the coin is quite popular due to its low mintage." This piece is one of the rare Uncirculated examples that have emerged in recent decades. The strike definition is soft, especially over the centers. The yellow-gold surfaces are lit by strong, vibrant mint luster, however, and surface marks are not excessive for the grade. Population: 6 in 61, 6 finer (8/14). NGC ID# 25KU, PCGS# 7824

- 4236 1876-S AU58 NGC.** With a mintage of only 5,000 coins, the 1876-S quarter eagle is seldom seen in any grade, with Mint State pieces being decidedly rare. This example retains modest rose-gold luster amid rich orange-gold patina. The eagle's talons and left (facing) leg show some of the typical softness, though the strike is otherwise pleasing. Census: 44 in 58, 23 finer (8/14). NGC ID# 25KV, PCGS# 7825

- 4237 1878 MS64 PCGS.** Wheat-gold surfaces gleam with luster and show a nicely bold strike. A few scattered marks account for the grade, including one vertical scrape on Liberty's neck. Tiny pecks on the date are insignificant. NGC ID# 25KY, PCGS# 7828
- 4238 1878 MS64 PCGS.** Bright yellow-gold luster encompasses the obverse of this near-Gem representative, while the reverse displays deeper orange-gold color. The strike is sharp, and only a few minute surface ticks limit the grade. PCGS has encapsulated 44 numerically finer examples (8/14). NGC ID# 25KY, PCGS# 7828
- 4239 1878 MS64 NGC.** Frosty honey-gold mint luster is the hallmark of this Choice example, though the sharp central devices add to the appeal. A few light surface grazes preclude a full Gem grade assessment. NGC has seen 37 numerically finer submissions (8/14). NGC ID# 25KY, PCGS# 7828
- 4240 1878 MS64 NGC. CAC.** With one of the highest mintages of the period (more than 286,000 pieces), the 1878 quarter eagle is easily obtainable in grades through MS64, but becomes scarce any finer. This Choice example displays frosty rose-gold luster and sharp motifs. Faint luster grazes on the relief elements limit the grade, but are not overly detracting. NGC has seen 37 numerically finer coins (8/14). NGC ID# 25KY, PCGS# 7828
- 4241 1878 MS65 PCGS.** Beautiful rose, peach, and lavender-gold hues encompass frosty luster on each side of this Gem representative. The strike is lacking on the eagle's left (facing) leg, though the design elements are otherwise sharp. No major abrasions are observed on either side. Population: 37 in 65 (1 in 65+), 7 finer (8/14). NGC ID# 25KY, PCGS# 7828
- 4242 1887 MS62 NGC.** Substantial semiprooflike mirroring adorns the fields of this well-struck, honey-gold example. Light, scattered abrasions in the fields limit the grade, but are hardly detracting to the unaided eye, and do not inhibit the mirroring. Census: 36 in 62 (3 in 62+), 26 finer (8/14). NGC ID# 25LB, PCGS# 7839
- 4243 1887 MS63 NGC.** The 1887 quarter eagle is scarce in any grade, with a mintage of just 6,160 pieces. Most of the examples certified by NGC and PCGS fall within the AU55 to MS62 range, with the numbers dropping precipitously in higher grades. A lovely Select example, this coin features pleasing yellow-gold color and exhibits a sharp strike. Census: 17 in 63, 9 finer (8/14). NGC ID# 25LB, PCGS# 7839

**1888 Quarter Eagle, MS63
Housed in a Black First-Generation Holder**

- 4244 1888 MS63 NGC.** This Select representative is the only quarter eagle confirmed in a first generation holder. The surfaces exhibit smooth and lustrous caramel-gold color with minor strike incompleteness over the eagle's leg. The first-generation NGC black holders were only used during the first month or two of the firm's operations, September to October 1987. Most of the coins certified by NGC during those two months were eventually broken out of their holders for resubmission in hopes of a higher grade. Approximately 30 NGC black holders are confirmed. The edge of the slab is chipped above the lower-left corner, but it does nothing to affect its rarity and desirability. NGC ID# 25LC, PCGS# 7840

- 4245 1897 MS65+ PCGS. CAC.** A stunning Gem, this Liberty quarter eagle has a bold strike with exceptional frosty yellow-gold luster, creating excellent eye appeal. A copper identifier fills the inside of the 9 in the date. PCGS has only certified 42 numerically finer examples (8/14). NGC ID# 25LM, PCGS# 7849
- 4246 1897 MS66 NGC.** The butter-gold surfaces show a shimmering mint frost and fully struck design features. There are a few tiny marks on each side visible with a glass, but none are apparent to the unaided eye. Census: 51 in 66 (2 in 66+, 1 in 66 ★), 19 finer (8/14). Ex: Dallas Signature (Heritage, 11/2003), lot 7318. NGC ID# 25LM, PCGS# 7849

1898 Quarter Eagle, Conditionally Scarce MS66

- 4247 1898 MS66 PCGS.** The 1898 quarter eagle can be located in most grades through MS65. Premium Gems are scarce, however, and finer examples are rare. The yellow-gold surfaces of this MS66 specimen display intense luster and sharply struck design elements. Both sides are well-preserved. Population: 35 in 66 (2 in 66+), 9 finer (8/14). NGC ID# 25LN, PCGS# 7850

**1898 Two and a Half, MS67
None Numerically Finer**

- 4248 1898 MS67 NGC.** With only 24,000 pieces struck, the 1898 quarter eagle is conditionally challenging in MS67. The NGC Census Report shows 36 pieces certified in this lofty grade (4 in 67 ★, 3 in 67+), with none finer (8/14), but that figure possibly includes a number of resubmissions. The surfaces of this representative are remarkably smooth and softly frosted, showing just a bit of light reddish patina. A full strike completes the visual appeal. NGC ID# 25LN, PCGS# 7850
- 4249 1900 MS66 PCGS.** This impeccably preserved and sharply struck Premium Gem displays green and reddish elements interspersed over frosty, yellow-gold surfaces. A mintage of 67,000 coins makes this turn-of-the-century example ideal for type purposes. Population: 70 in 66 (2 in 66+), 11 finer (8/14). NGC ID# 25LR, PCGS# 7852
- 4250 1902 MS66+ NGC. CAC.** Rich gold color and appealing luster contribute to the strong eye appeal this high-end Premium Gem specimen possesses. The design elements exhibit strong definition, further adding to the attractiveness. Aside from a few hair-thin marks on the reverse near 9 o'clock, no signs of contact are worthy of mention. NGC ID# 25LT, PCGS# 7854

1902 Quarter Eagle, MS67
Among the Finest Certified at PCGS

4251 1902 MS67 PCGS. Plentiful in lower grades, the 1902 quarter eagle becomes scarce in Superb Gem condition, but is still obtainable for type representation. This example showcases frosty golden luster and boldly struck design elements. As the grade demands, the surfaces are virtually perfect, delivering a high degree of eye appeal. Population: 42 in 67, 0 finer (8/14). NGC ID# 25LT, PCGS# 7854

4252 1905 MS65+ PCGS. A beautiful piece with flaming luster and even reddish-green toning. Both sides reveal flawlessly preserved, mark-free surfaces. NGC ID# 25LW, PCGS# 7857

4253 1905 MS66 NGC. This carefully preserved quarter eagle is sharply struck with radiant luster. Peach and orange hints grace mostly yellow-gold surfaces. A delightful Premium Gem with winning eye appeal.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2680. NGC ID# 25LW, PCGS# 7857

INDIAN QUARTER EAGLES

1908 Indian Head Quarter Eagle, MS65+ Important First Year of Type Gem Specimen

4254 1908 MS65+ NGC. CAC. The luminous surfaces display frosted rather than normal satiny mint luster across clean, well-preserved surfaces. The incuse design motifs, just introduced this year, are well-struck except for noticeable weakness on the eagle's shoulder. This issue must have been extensively saved as the first year of the new type, as high-grade examples are somewhat available for collectors. NGC ID# 288Y, PCGS# 7939

4255 1909 MS63 NGC. An unusually well-preserved representative for the grade, this satiny 1909 quarter eagle also possesses sharply struck design elements. The color is primarily golden, though some pale olive-gold overtones are observed on each side. NGC ID# 288Z, PCGS# 7940

4256 1909 MS64+ PCGS. This is a splendid, conservatively graded example of this early Indian Head issue from the Philadelphia Mint. The light honey-golden surfaces display shimmering mint luster and outstanding preservation. NGC ID# 288Z, PCGS# 7940

4257 1910 MS63 NGC. The 1910 Philadelphia quarter eagle is a better date within the series. This attractive wheat-gold example boasts ample luster and minimal marks for the grade, producing great eye appeal. NGC ID# 2892, PCGS# 7941

4258 1910 MS64+ PCGS. CAC. With vivid orange-gold surfaces that radiate vibrant mint luster and well-detailed design elements, this coin represents a good balance of quality and value. No mentionable surface flaws are evident and eye appeal is quite strong. NGC ID# 2892, PCGS# 7941

4259 1911-D Weak D — Improperly Cleaned — NGC Details. AU. This is a bright, lemon-gold representative from the keystone issue in the Indian Head quarter eagle series. Most detail remains strong, however the mintmark is nearly imperceptible. Wispy hairlines from cleaning are scattered throughout.
The Valley View Life Collection, Part Three. PCGS# 7954

4260 1911-D — Improperly Cleaned — NGC Details. AU. A paltry 55,680 coins were struck of this key to Bela Lyon Pratt's Indian Head design. This mintage was less than one-fourth of the second-lowest, the 1914-D. The surfaces display subdued yellow-gold color with slight friction over the high points. The mintmark is faint but easily discernible.

4261 1911-D — Mount Removed — NGC Details. AU. A khaki-green example of this important key date that shows slight evidence of a removed mount, mainly along the left side obverse border. Full AU details are seen on both sides. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU53 Original Coloration

4262 1911-D AU53 PCGS. Strong D. While the Indian quarter eagle is famous for its sunken relief design, the mintmark was added after the die was made, being the only element on the coin in traditional relief. This lightly circulated piece exhibits slight wear, and the exposed mintmark is understandably faded as a result, though still plainly visible upon close examination. Bronze-gold color blankets each side, and the central motifs retain nearly complete detail. A pleasing AU example of this key Denver issue. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, AU55 Attractive for the Grade

4263 1911-D AU55 NGC. Strong D. As the lowest-mintage issue in the Indian quarter eagle series (55,680 pieces), the 1911-D is widely sought in all grades, even at the lower circulated levels. This Choice AU representative displays smooth bronze-gold surfaces and retains nearly complete detail. The diagnostic wire rim around the upper obverse border is bold. NGC ID# 2894, PCGS# 7943

4264 1913 MS64 NGC. With a mintage of 722,000 pieces, the 1913 quarter eagle is an easily obtainable issue in grades through MS64, though its availability declines significantly in finer condition. This near-Gem representative displays pleasantly clean fields and sharp design definition. Satiny bronze-gold luster blankets each side, with a single small alloy spot near star 7 on the obverse. NGC ID# 2897, PCGS# 7945

4265 1914 MS62 NGC. Khaki-gold surfaces display a few small marks consistent with the grade on this better-date quarter eagle, which boasts a bold strike and broad eye appeal. The Indian's cheek is quite clean for the grade. NGC ID# 2898, PCGS# 7946

4266 1914 MS62 NGC. From a mintage of 240,000 pieces, the 1914 Indian quarter eagle is one of the most challenging issues of the series in high grade. This lustrous orange-gold example is well-detailed and shows scattered minor contact marks. NGC ID# 2898, PCGS# 7946

1914 Quarter Eagle, Appealing MS63

4267 1914 MS63 PCGS. Although the 1914 quarter eagle is usually available in lower grades, its availability progressively drops finer than MS62, and the date is rarely encountered at the Gem grade level. This softly frosted Select example exhibits sharp central devices and rich orange-gold patina over both sides. The surfaces are free of distracting abrasions and show good eye appeal. NGC ID# 2898, PCGS# 7946

1914 Two and a Half, MS63 Attractive, Satiny Example

4268 1914 MS63 NGC. One of the most elusive Indian quarter eagles in high grades, the 1914 is a favorite semikey to the series. This Select example is sharply struck, with satiny bronze-gold luster. Surface abrasions are light and evenly dispersed, with none being worthy of individual notice.
The Valley View Life Collection, Part Three. NGC ID# 2898, PCGS# 7946

1914-D Quarter Eagle, MS64 Challenging Issue in Higher Grades

4269 1914-D MS64 NGC. With a reported mintage of 448,000 pieces, the 1914-D Indian quarter eagle is, surprisingly, one of the most challenging issues of the series in high grade. This attractive Choice example offers sharply detailed design elements throughout. The well-preserved yellow-gold surfaces are brightly lustrous and eye appeal is terrific. C NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, MS64 Remarkable Eye Appeal

4270 1914-D MS64 NGC. A conditionally scarce issue in the series. This example displays remarkably vibrant red-gold toning that greatly increases the overall visual appeal of the piece. A well-struck near-Gem that also exhibits intensely frosty mint luster that is atypical for the type or the date. Few other MS64 1914-Ds will be able to match the eye appeal of this piece. NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, MS64+ Major Series Condition Rarity

4271 1914-D MS64+ NGC. This is the second-rarest issue in the Indian quarter eagle series at grades of MS65 or better, and is considered a major condition rarity overall. This example displays an unusually high degree of flash and deep, vibrant orange-gold toning that further increases the appeal. A couple of wispy lines on the upper reverse keep it from grading finer. 44 in 64+, 4 in 64 ★, 43 finer (8/14). NGC ID# 2899, PCGS# 7947

THREE DOLLAR GOLD PIECES

- 4272 1854 AU55 NGC.** Original olive-gold patina encompasses each side of this Choice AU type representative, with surprisingly few noticeable abrasions for the grade. The strike is sharp, and only slight wear is evident over the relief elements. NGC ID# 25M3, PCGS# 7969
- 4273 1854 AU58 NGC.** Shimmering honey-gold luster illuminates somewhat smooth surfaces on this near-Mint first-year type coin. Traces of friction over the high points of the design preclude a Mint State grade, though the overall eye appeal is hardly diminished. NGC ID# 25M3, PCGS# 7969
- 4274 1854 — Repaired — PCGS Genuine. Unc Details.** Radiant, original mint luster and light lemon-gold color provide this Uncirculated first-year representative with strong eye appeal. PCGS notes a repair, but it is not immediately evident. An attractive type coin. NGC ID# 25M3, PCGS# 7969
- 4275 1854 — Improperly Cleaned — NGC Details. Unc.** Light cleaning is evident in the presence of faint, wispy hairlines in the fields, though this unworn first-year type coin retains substantial visual appeal, with shimmering apricot-gold luster and sharp design elements. No major abrasions are observed on either side. NGC ID# 25M3, PCGS# 7969
- 4276 1854 — Cleaning — PCGS Genuine. Unc. Details.** Upon cursory evaluation, this first-year type coin appears to merit a lofty Mint State grade, since the fields lack bagmarks and the cheek displays only wispy contact. Close inspection reveals delicate hairlines, but the eye appeal is nonetheless imposing. NGC ID# 25M3, PCGS# 7969
- 4277 1854 MS61 NGC.** A pleasing lower-grade Mint State example of this popular type issue. Shimmering honey-gold luster blankets each side, and the surfaces are pleasantly clean for the grade. The bow knot is slightly soft, as usual. NGC ID# 25M3, PCGS# 7969
- 4278 1855 AU53 NGC.** Though not considered one of the “common” type issues, the 1855 three dollar piece is still plentiful enough in AU and lower Mint State grades to be considered for type representation. This Almost Uncirculated example displays deep yellow-gold patina, with tinges of coppery-gold color in the protected regions. A few small flat spots are observed from wear, though the major design elements remain bold. NGC ID# 25M6, PCGS# 7972

1855 Three Dollar Gold, MS61+ A Popular Issue in an Unusual Grade

- 4279 1855 MS61+ NGC.** The 1855 three dollar gold piece had a rather substantial mintage for the series (50,555 coins), but was not saved to the extent of the 1854 or many of the later, low-mintage dates. Still, enough examples survive in circulated and lower-Mint State grades that the date is an ideal choice for the type collector seeking to stray from the typically seen 1854, 1874, and 1878 issues. This Plus-graded example displays warm golden luster, while the grade-limiting abrasions are minor and evenly dispersed. The bow knot is soft, but the remainder of the devices are well-struck. *The Valley View Life Collection, Part Three.* NGC ID# 25M6, PCGS# 7972

1855 Three Dollar Gold, MS62 Appealing for the Grade

- 4280 1855 MS62 PCGS.** While not considered one of the “common” dates in the series, the 1855 is still plentiful enough to be a candidate for type representation. Its availability, however, declines in grades finer than MS62. This piece shows luminous orange-gold surfaces and sharp design definition. Surprisingly, no major abrasions are observed. NGC ID# 25M6, PCGS# 7972
- 4281 1856 AU58 NGC. CAC.** A pleasing combination of mint-green and pink-rose toning encompasses the lightly-worn, essentially unabraded surfaces. Boldly struck except for softness on the wreath bow, and nearly mark-free on both sides. NGC ID# 25M8, PCGS# 7974
- 4282 1856-S XF45 PCGS. CAC.** The San Francisco Mint struck three dollar gold pieces in only four production years (not counting the unique 1870-S), and all are elusive in high grades. This Choice XF example of the 1856-S issue exhibits original olive-gold patina, with minimal wear and no major consequential abrasions. NGC ID# 25M9, PCGS# 7975

1860 Three Dollar Gold, AU58 Challenging in Higher Grades

- 4283 1860 AU58 NGC. CAC.** The 1860 three dollar gold piece had a mintage of only 7,036 pieces, and Mint State examples are scarce in all grades, and rare above MS62. This near-Mint representative displays original green-gold color over each side, with hints of luster remaining in the protected regions. The detail is virtually complete, and only the bow knot exhibits any discernable degree of striking softness. NGC ID# 25ME, PCGS# 7980
- 4284 1863 AU50 — Improperly Cleaned — NGC Details. AU.** The pale orange-gold surfaces of this lightly circulated three dollar gold piece show some signs of cleaning, with a few minor abrasions on each side and traces of mint luster near the devices. A low-mintage date, with just 5,000 pieces produced. NGC ID# 25MJ, PCGS# 7984
- 4285 1868 AU50 NGC.** Sandy-gold surfaces on each side of this low-mintage three dollar issue show light contact marks and a touch of the expected wear, but major abrasions or any other distractions are absent. The eye appeal is good on this well-struck coin, a survivor from the mintage of 4,850 pieces. NGC ID# 25MP, PCGS# 7989
- 4286 1870 — Smoothed — PCGS Genuine. Unc Details.** A popular low-mintage issue, the 1870 three dollar gold piece is elusive in Mint State grades. This coin exhibits sharp, unworn devices, and rich honey-gold color. An effort to smooth the abrasions out of the fields has left this piece with a distinctly prooflike appearance, which balances the visual appeal. NGC ID# 25MS, PCGS# 7991

4287 1874 AU55 NGC. Substantial coppery-gold luster remains in the protected regions, with remarkably clean surfaces for the grade. The strike is slightly soft on the lower wreath, though actual wear is minimal. An appealing Choice AU type coin. NGC ID# 25MX, PCGS# 7998

4288 1874 AU55 NGC. CAC. This bright Choice AU example displays lovely antique-gold coloration and only slight signs of circulation. An excellent coin for type purposes. NGC ID# 25MX, PCGS# 7998

4289 1878 AU55 NGC. The 1878 three dollar gold piece ranks as the most plentiful date in the series in high grades, ideal for type representation. This Choice AU example retains nearly complete detail, with remnants of original luster in the protected regions. NGC ID# 25MZ, PCGS# 8000

4290 1878 AU58 NGC. A highly attractive, near-Mint type coin, this 1878 three dollar gold piece showcases substantial semiprooflike mirroring in the fields, with only slight friction over the relief elements. Rich honey-gold patina warms each side. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS62 Popular Type Issue

4291 1878 MS62 PCGS. The 1878 three dollar gold piece is always in demand as a type coin, as the date is one of the few available issues in the series in high grade. This attractive MS62 example offers well-detailed design elements and lustrous orange-gold surfaces that show only a scattering of minor contact marks. Housed in a green label holder. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS63 Attractive Type Coin

4292 1878 MS63 PCGS. The 1878 is by far the most plentiful three dollar gold issue in Mint State condition, and is also one of the better-produced, being ideal for type representation. This Select example beautifully displays sharp motifs and shimmering yellow-gold luster. Scattered, minute surface grazes limit the grade, but hardly detract from the overall appeal. NGC ID# 25MZ, PCGS# 8000

4293 1881 — Smoothed — PCGS Genuine. AU Details. With a paltry mintage of only 500 pieces, the 1881 three dollar gold piece is a favorite among the late-series issues. This example retains nearly complete detail, but displays unnatural luster due to the fields being smoothed in an effort to eradicate surface abrasions. Nonetheless, the overall appeal remains pleasing to the unaided eye. NGC ID# 25N4, PCGS# 8003

1889 Three Dollar Gold, MS60 Final-Year Issue

4294 1889 MS60 PCGS. While not quite as available as the 1888, the 1889 three dollar gold piece is one of the more plentiful late-series issues in Mint State, and is sometimes chosen for type purposes due to its final-year issue status. This representative exhibits shimmering orange-gold luster and well-defined motifs. The surfaces are surprisingly well-preserved for the grade, and the eye appeal is proportionately high. Housed in an old green label holder. NGC ID# 25NC, PCGS# 8011

EARLY HALF EAGLE

4295 1807 Bust Left — Mount Removed — PCGS Genuine. VF Details. BD-8, R.2. Bass-Dannreuther Die State c/a. This piece represents the more plentiful of the two Bust Left 1807 half eagle varieties, often chosen for type purposes. This is the second and final use of this obverse die, though this reverse was later employed for the first three varieties of the 1808 half eagle coinage. PCGS notes signs of mount removal on this piece, and the surfaces exhibit bright green-gold color and moderate abrasions. Detail is pleasing for the grade level, though, and the coin was struck with mildly rotated dies. NGC ID# 25P9, PCGS# 8101

CLASSIC HALF EAGLE

4296 1834 Plain 4 AU53 NGC. Breen-6501, McCloskey 1-A, R.3. Bright, lemon-yellow color graces the surfaces of this lightly circulated Classic Head No Motto five. The design features show slight rubbing over the high points, and myriad abrasions are peppered throughout. *The Valley View Life Collection, Part Three.* NGC ID# 25RR, PCGS# 8171

LIBERTY HALF EAGLES

1843-O Half Eagle, Choice AU Large Letters, Large O

4297 1843-O Large Letters AU55 NGC. Variety 1. Large O. Peach-gold luster visits design recesses of this otherwise green-gold representative. Well defined except for mint-made weakness near the IC in AMERICA. No marks are consequential. The new Liberty half eagle reverse subtype was likely among the final master hub tasks for Chief Engraver Christian Gobrecht, who died in 1844. NGC ID# 25T6, PCGS# 8216

- 4298 1850 AU58 NGC.** The 1850 Philadelphia five is scarce in all grades because of its 64,400-coin mintage, but the issue is rare in near-Mint condition and above. This problem-free example displays green-gold color over well-struck and partly lustrous surfaces. Census: 28 in 58, 6 finer (8/14). NGC ID# 25TY, PCGS# 8243

**1855-C Half Eagle, AU50
Dramatic Cud Reverse
Rare Late Die State**

- 4299 1855-C AU50 PCGS. Variety 1.** A dramatic die break spans 2:30 to 3:30 on the reverse border and reaches the tops of the ME in AMERICA. The 1855-C is a Charlotte type issue and has only one known die pair, but the present terminal die state is very rare. Our online auction archives, which go back to 1993, confirm only two other examples that show this cud: a PCGS XF45 piece that appeared in January 2001, August 2006, and August 2007 Signature auctions and has two noticeable marks on the lower left obverse; and a PCGS MS61 that appeared in our January 1999, May 2003, May 2007, November 2012, and April 2013 Signature auctions. A partially lustrous straw-gold example with a pair of small marks between the AT in STATES, noted as identifiers. *Ex: FUN Signature (Heritage, 1/2005), lot 8805, which realized \$3,910.* NGC ID# 25UR, PCGS# 8262

- 4300 1856-S AU55 NGC.** Large S. The pale straw-gold surfaces exhibit small marks and wispy hairlines. The design motifs are sharply struck and only betray trace amounts of wear over the central high points. An absolutely and conditionally scarce example from the San Francisco Mint. Census: 33 in 55, 23 finer (8/14). NGC ID# 25UZ, PCGS# 8270

- 4301 1860-C XF40 NGC. Variety 1.** The 1860-C issue (14,813 coins) is known for a problematic strike. This representative is typically detailed with softness over the eagle. Yellow-gold paints the expectedly abraded surfaces, and a frequently encountered planchet void occurs between star 2 and Liberty's chin. Housed in a former generation holder. NGC ID# 25VG, PCGS# 8285

- 4302 1866-S Motto VF30 NGC. CAC.** The 1866-S half eagle, with a mintage of only 34,920 pieces, is scarce in all grades and rare above the Very Fine grade level. Only one Mint State example is certified, an MS61 NGC coin. This representative is well-detailed for the grade, with original olive-gold patina. Few noticeable abrasions are present. Census: 5 in 30, 29 finer (8/14). NGC ID# 25W2, PCGS# 8312

- 4303 1870 VF30 PCGS.** A mintage of just 4,000 coins correctly suggests the rarity of the issue — CoinFacts estimates that a mere 55 examples survive in all grades. This reddish-gold representative is lightly worn, but the devices retain a pleasing amount of design detail. Population: 4 in 30, 40 finer (8/14). NGC ID# 25W9, PCGS# 8319

**1872-S Five Dollar, AU53
Condition Rarity**

- 4304 1872-S AU53 PCGS.** The Philadelphia, Carson City, and San Francisco Mints combined to strike only 55,040 half eagles in 1872. The CC issue is far and away the most elusive of the three, while the S-mint coins are the most common in lower grades but surpass the Philadelphia coins in AU condition. This lightly circulated example features good striking characteristics overall with softness over Liberty's hair curls and the lower portion of the eagle. Partial luster remains in the interstices. PCGS has certified six coins in AU53 and eight pieces finer, all in AU55 (8/14). NGC ID# 25WH, PCGS# 8327

**1872-S Half Eagle, AU55
None Finer at PCGS**

- 4305 1872-S AU55 PCGS.** The half eagle played an integral role in West Coast commerce, and finding examples in high grades proves challenging. From a mintage of 36,400 coins, this Choice About Uncirculated representative is tied with seven other coins for finest certified at PCGS (8/14). The recesses retain ample mint luster, and the surfaces show medium yellow-gold color with well-detailed devices and minimal friction over the high points. A handful of small marks define the grade. NGC ID# 25WH, PCGS# 8327

**1879 Half Eagle, MS64
Orange-Gold With Lavender Accents**

- 4306 1879 MS64 PCGS.** Philadelphia half eagle production continued its ascent in 1879, when the facility struck 301,920 examples. Splashes of lavender coloration complement the frosty orange-gold surfaces, and evenly sharp devices supplement the appeal. Light field chatter limits the grade. Housed in a green label holder. Population: 17 in 64 (4 in 64+), 4 finer (8/14). NGC ID# 25X7, PCGS# 8348

4307 1879-S MS63 PCGS. An elusive issue in all Mint State grades, the 1879-S half eagle is genuinely rare finer than MS63. This representative displays satiny honey-gold luster, with distinctly greenish hues seen around the peripheries. The eagle's feathers and Liberty's hair curls are well-delineated, despite scattered, grade-consistent abrasions. Population: 27 in 63, 12 finer (8/14). NGC ID# 25X9, PCGS# 8350

4308 1880-S MS64+ PCGS. CAC. The lightly marked yellow-gold surfaces of this high—end Choice example show a few highlights of rose and a few minor signs of contact. The design elements are sharply detailed and eye appeal is quite strong. Population: 90 in 64 (10 in 64+), 2 finer (8/14). NGC ID# 25XC, PCGS# 8353

4309 1885 MS64 PCGS. Luminous semiprooflike fields frame sharp central devices on this piece, while the surfaces display rich orange-gold patina. Light, scattered abrasions contribute to the grade. Housed in an old green label holder. Population: 78 in 64 (5 in 64+), 2 finer (8/14). NGC ID# 25XS, PCGS# 8367

4310 1885-S MS65 PCGS. Despite a mintage in excess of 1.2 million coins, the 1885-S half eagle is scarce in MS65 and rare any finer. The present survivor displays pale rose and green-gold hues over well-preserved, lightly frosted surfaces. Sharply struck design elements add further appeal. Population: 50 in 65 (1 in 65+), 5 finer (8/14). NGC ID# 25XT, PCGS# 8368

4311 1885-S MS65 PCGS. Despite its status as a common issue, this incredibly lovely Gem is anything but common in terms of its aesthetic appeal. Radiant luster leaps from the surfaces, and premium orange-gold and hazel coloration provides a notable backdrop for the razor-sharp strike and relative absence of singular abrasions. Type coin collectors, take note. Population: 50 in 65 (1 in 65+), 5 finer (9/14).

Ex: *Long Beach Signature* (Heritage, 5-6/2007), lot 2372. NGC ID# 25XT, PCGS# 8368

1886-S Half Eagle, MS65 Only One Coin Numerically Finer

4312 1886-S MS65 NGC. With more than 3.2 million pieces struck, this San Francisco issue is easily obtainable in grades through Choice Uncirculated. At the Gem level, however, the date becomes decidedly scarce, and finer coins are nearly nonexistent. This representative is sharply struck, with frosty green and rose-gold luster. A loupe reveals a few grade-consistent abrasions on the obverse, though the coin appears nearly pristine to the unaided eye. Census: 52 in 65 (2 in 65+, 1 in 65 ★), 1 finer (8/14). NGC ID# 25XV, PCGS# 8370

1888-S Half Eagle, MS63 Tied for Finest-Graded at Both Services

4313 1888-S MS63 NGC. An outstanding example with great significance considering the date and mint. In fact, this piece is tied as one of the ten finest-graded coins at NGC and PCGS combined. Despite a moderately high mintage of 293,000, the 1888-S half eagle is scarce in Uncirculated condition; and conditionally unsurpassed at MS63. This is a lustrous, boldly struck piece with pleasing antique-gold toning and a few wispy marks that keep it at the Select Mint State level, where it resides as one of the finest-known examples of this San Francisco date. Census: 3 in 63, 0 finer (8/14). NGC ID# 25XY, PCGS# 8373

1890-CC Half Eagle, MS62 Elusive in Finer Grades

4314 1890-CC MS62 PCGS. CAC. Variety 1-A. While not itself rare, the 1890-CC half eagle, with a mintage of only 53,800 coins, is significantly scarcer in Mint State condition than is the higher-mintage 1891-CC. This CAC-approved example displays frosty yellow-gold luster and only light grade-limiting abrasions. The hair curls around Liberty's face and the eagle's neck feathers are not fully defined, an often-seen characteristic on this late Carson City issue. NGC ID# 25Y3, PCGS# 8376

4315 1891-CC MS60 NGC. Variety 1-A. A sharply struck half eagle with scintillating mint luster and attractive, light orange-gold toning imbued with mint-green accents. Tiny abrasions are scattered over each side, limiting the grade. NGC ID# 25Y5, PCGS# 8378

4316 1892-CC AU58 PCGS. CAC. Variety 1-A. This issue was produced in the penultimate year of coin production at Carson City. Well-struck with bright surfaces that display khaki-gold and rose coloration. Both sides are free of individually noticeable abrasions, and high-point friction is minimal. NGC ID# 25Y7, PCGS# 8380

4317 1893-CC AU58 PCGS. Variety 1-A. Substantial honey-gold luster remains in the recesses on this near-Mint Carson City half eagle, while the relief elements exhibit only a brush of friction. A sharp strike further heightens the visual appeal. Light, scattered abrasions accompany the grade, as is typical at this numeric level. NGC ID# 25YB, PCGS# 8384

4318 1898 MS64 NGC. The 1898 half eagle is scarce in this grade, but genuinely rare any finer. Displaying sharp detail and shimmering honey-gold luster, this frosty example is free of any overly detracting abrasions. Census: 115 in 64 (3 in 64+, 1 in 64 ★), 31 finer (8/14). NGC ID# 25YP, PCGS# 8396

4319 1898 MS64 PCGS. CAC. Vibrant yellow-gold luster engulfs each side of this near-Gem in frosty luminance. The strike is sharp, and only a few luster grazes on the high points of the devices preclude a finer grade. Housed in an old green label holder. Population: 51 in 64 (1 in 64+), 8 finer (8/14). NGC ID# 25YP, PCGS# 8396

4320 1901-S MS65+ NGC. Generous luster on caramel-gold surfaces and a bold strike with minimal abrasions are all actually quite typical of this high-mintage, well-produced issue from San Francisco just after the turn of the century. A handsome Gem coin, with the NGC Plus designation well-deserved. NGC ID# 25YX, PCGS# 8404

1904-S Half Eagle, MS63 Conditionally Scarce

4321 1904-S MS63 PCGS. The 1904-S is one of the scarcest 20th century issues in the Liberty half eagle series, being decidedly elusive in all Mint State grades, and rare in Choice or finer condition. This Select example displays frosty honey-gold luster and sharp design elements. Grade-limiting surface abrasions are light and evenly dispersed, with overall excellent appeal for the grade. Population: 12 in 63, 12 finer (9/14). NGC ID# 25Z5, PCGS# 8410

4322 1905 MS64+ NGC. The 1905 Liberty half eagle becomes very scarce at the Gem level, so this high-end Choice example is a good balance of quality and value. The design elements are sharply detailed and the well-preserved peach-gold surfaces radiate vibrant mint luster. NGC ID# 25Z6, PCGS# 8411

4323 1905-S MS63 PCGS. Medium yellow-gold color and lilac accents shroud each side of this Select S-mint half eagle. The strike is uniformly bold, and abrasions are lightly peppered throughout. A mintage of 880,700 coins belies the availability of the issue, as many examples were likely destroyed. Population: 33 in 63, 33 finer (8/14). NGC ID# 25Z7, PCGS# 8412

4324 1906-S MS64 PCGS. This impressive Choice example exhibits razor-sharp detail on all design elements, with vibrant mint luster and well-preserved yellow-gold surfaces. Eye appeal is terrific. Population: 37 in 64, 15 finer (8/14). NGC ID# 25ZB, PCGS# 8415

4325 1907-D MS65 NGC. This is a softly frosted Denver representative with gorgeous orange-gold and lavender coloration. The devices are sharply impressed overall with a touch of softness over the eagle's neck, right (facing) claw, and the arrow fletchings. Two small planchet voids, one adjacent to star 3 and another below the A in STATES, are noted for accuracy. NGC has certified 26 numerically finer examples (8/14). NGC ID# 25ZD, PCGS# 8417

INDIAN HALF EAGLES

4326 1908-S — Improperly Cleaned — NGC Details. Unc. A production of 82,000 five dollar coins at the San Francisco Mint in 1908 is the third-lowest mintage in the series. This bright honey-gold example is well-struck with a touch of indistinctness over the high points, including the eagle's wing tips. A copper alloy spot occurs below the R in LIBERTY. NGC ID# 28DG, PCGS# 8512

4327 1909 MS63 NGC. This Select Indian Head half eagle exhibits green and rose-gold color over minimally marked surfaces with well-defined design elements. The 1909 is a fairly accessible issue through Gem condition, and this example would fit nicely in an MS63 type collection. NGC ID# 28DH, PCGS# 8513

4328 1909 MS63 NGC. For the MS63 grade level, this representative displays remarkably clean fields, giving the overall impression of a higher grade to the unaided eye. A loupe, however, finds a few light luster grazes on each side. The strike is sharp and satiny honey-gold luster encompasses the surfaces. NGC ID# 28DH, PCGS# 8513

1909 Half Eagle, Sharp MS64 Ideal Type Coin

4329 1909 MS64 PCGS. Satiny lemon-gold mint luster illuminates minimally abraded surfaces on this eye-appealing near-Gem. The strike is razor-sharp, with notable boldness seen on the headdress and the eagle's wing feathers. This issue is among the more easily obtainable issues in the series, ideal for type purposes. NGC ID# 28DH, PCGS# 8513

1909 Half Eagle, Appealing MS64+

4330 1909 MS64+ PCGS. Moderately available in lower grades, the 1909 half eagle becomes somewhat elusive in MS65 condition, and is rarely encountered finer. This Plus-graded Choice example displays exceptional eye appeal for the grade with satiny honey-gold luster and well-defined motifs. A few minute ticks in the reverse field seem to be all that limit the grade on this near-Gem representative. NGC ID# 28DH, PCGS# 8513

4331 1909-D MS63 PCGS. Razor-sharp detail and satiny lemon-gold luster are among the pleasing attributes this piece has to offer. A few light grazes are noted in the fields upon close examination, but none are particularly obvious. NGC ID# 28DJ, PCGS# 8514

4332 1909-D MS63 NGC. The 1909-D Indian half eagle had the highest mintage of the series (exceedingly 3.4 million pieces), and is proportionately available for type purposes. This example displays sharp design definition and rich lemon-gold luster. The surfaces are free of major abrasions, though a small planchet void is noted within the upper headdress feathers. NGC ID# 28DJ, PCGS# 8514

**1909-S Five Dollar, MS61
Appealing, Conditionally Scarce Specimen**

- 4333 1909-S MS61 NGC.** This is a conditionally scarce issue, very difficult to locate in advanced Mint State grades, despite a reasonably hefty mintage of 297,200 coins. According to Garrett and Guth: "this date is nearly impossible to locate in gem grades." This is an appealing khaki-gold specimen with bold strike definition and satiny surfaces that only show a few thin lines on the reverse. NGC ID# 25ZL, PCGS# 8516

**1910 Half Eagle, MS64
Seldom Seen Finer**

- 4334 1910 MS64 NGC.** Despite its perception as a common P-mint, the 1910 Philadelphia half eagle issue is scarce in grades above MS63. This lovely near-Gem offers boldly struck, lustrous wheat-gold surfaces that are free of mentionable distractions and offer considerable eye appeal. The certified populations in Gem grade or finer are an order of magnitude less. NGC ID# 28DK, PCGS# 8517

**1910-S Indian Half Eagle, MS61
Conditionally Scarce Mint State Example**

- 4335 1910-S MS61 NGC.** This example displays a soft mintmark which needs close examination in order to verify its San Francisco origin. The fields are satiny and the strike details are otherwise bold, except on the eagle's shoulder. Light mint-green toning adorns the field areas, while the motifs display champagne-gold coloration. NGC ID# 28DM, PCGS# 8519

**1911 Half Eagle, MS64
Elusive in Finer Grades**

- 4336 1911 MS64 PCGS.** The 1911 half eagle is easily obtainable in grades through MS64, but Gem-quality examples are scarce, and finer pieces are prohibitively rare. This Choice example exhibits satiny green-gold luster, with only a few minor abrasions limiting the grade. The strike is lacking on the lower portion of the headdress feathers, though the eagle's feathers are well-defined. NGC ID# 28DP, PCGS# 8520

**1911-D Half Eagle, AU58
Challenging Denver Issue**

- 4337 1911-D AU58 NGC.** Like the eagles and quarter eagles of the same date, the 1911-D half eagle is an elusive issue in the context of the series, being particularly so in Mint State condition. This near-Mint representative exhibits medium bronze-gold patina, with hints of luster remaining in the recesses. The details are sharp, and high-point wear is virtually nonexistent. NGC ID# 28DR, PCGS# 8521

- 4338 1911-S MS61 NGC.** Luminous yellow-orange surfaces are moderately abraded with copper spotting at the headband and upper right obverse, as well as a few other isolated areas. Well struck with generally light abrasions aside from the small reed marks hidden in the eagle's feathers. NGC ID# 25ZM, PCGS# 8522

**1912 Half Eagle, Sharp MS64+
Appealing, Frosty Luster**

- 4339 1912 MS64+ PCGS. CAC.** The 1912 half eagle had a substantial mintage of 790,000 coins, and extant pieces are readily available in grades through MS64. Gem examples, however, are scarce, and finer representatives are prohibitively rare. This high-end Choice example displays the attractive, frosty luster and bold design definition that the issue is known for, while the surfaces reveal only a few faint luster grazes when tilted at the correct angle. PCGS has seen 52 numerically finer submissions (9/14). NGC ID# 28DS, PCGS# 8523

**1912-S Indian Head Five, MS61
Honey-Gold Coloration**

4340 1912-S MS61 PCGS. Despite an unremarkable mintage of 392,000 coins, the 1912-S is a condition rarity in the Indian Head half eagle series. This example exhibits warm honey-gold surface coloration with lilac accents. The Indian shows mostly strong detail with slight softness over portions of the headdress. The eagle is expertly defined throughout. Like nearly all representatives, the mintmark is lightly impressed. NGC ID# 25ZN, PCGS# 8524

4341 1915 MS63 PCGS. Glowing sandy-gold surfaces, a sharp strike, and a paucity of mentionable abrasions make this Select 1915 half eagle a tempting potential acquisition. The next-to-last Philadelphia issue in the series, followed only by the legendary 1929 date. NGC ID# 28DX, PCGS# 8530

LIBERTY EAGLES

1840 Ten Dollar, Near-Mint

4342 1840 AU58 NGC. Like most lower mintage No Motto issues, the 1840 is seldom encountered at the near-Mint level. The median third-party grade is XF45 to AU50. The present sharply struck example shows a trace of wear on the hair above the ear. Luster is plentiful across the motifs and the reverse border. Abrasions are relatively minor. The reverse rim is moderately granular between 2 and 3 o'clock.

Ex: West Palm Beach Signature (Heritage, 6/2008), lot 2111; Pre-Long Beach (Ira & Larry Goldberg, 9/2008), lot 1521. NGC ID# 262G, PCGS# 8581

**1843 Liberty Eagle, AU55
Ex: S.S. Republic**

4343 1843 AU55 NGC. Ex: S.S. Republic. The 1843 Liberty eagle claims a mintage of 75,462 pieces and few examples were saved by contemporary collectors. This impressive Choice AU specimen was recovered from the wreck of the *S.S. Republic*. The well-detailed design elements show just a trace of actual wear, and the moderately abraded yellow-gold surfaces retain much original mint luster. Census: 23 in 55, 20 finer (8/14). NGC ID# 262P, PCGS# 8588

4344 1848-O — Improperly Cleaned — NGC Details. Unc. Variety 1. The more available Variety 1, with the ring on the shield and die lines above the eagle's left shoulder. This well-detailed lemon-yellow example shows only minor signs of contact, but the surfaces have a flat, unnatural sheen that indicates a light cleaning. NGC ID# 2634, PCGS# 8600

4345 1849 AU58 PCGS. A prooflike near-Mint example of this conditionally scarce issue. The pale green and antique-gold surfaces exhibit small abrasions and noticeable high-point friction, consistent with the assigned grade. Population: 17 in 58, 35 finer (9/14). NGC ID# 2635, PCGS# 8601

**1849 Liberty Ten, MS61
Elusive Issue in High Grade**

4346 1849 MS61 PCGS. The 1849 Liberty eagle is one of the more available issues from the No Motto era, but examples in Mint State condition are elusive. This impressive MS61 specimen offers well-detailed design elements and bright lemon-yellow surfaces that show a scattering of minor contact marks on both sides, with traces of prooflike reflectivity in sheltered areas. Population: 11 in 61, 22 finer (8/14). NGC ID# 2635, PCGS# 8601

4347 1850 Large Date AU53 PCGS. This Large Date variety is considerably more available than its Small Date counterpart, but both types are scarce. This is an attractive lime-gold example with two or three minor abrasions on each side, along with even high-point wear and scattered minuscule marks. Population: 20 in 53, 32 finer (8/14). NGC ID# 2637, PCGS# 8603

4348 1852 AU55 NGC. According to the *Encyclopedia of U.S. Gold Coins* (2006), "The 1852 eagle is a relatively common date, but nowhere near as common as the mintage indicates." Luster remains in the recessed areas, and the yellow-gold surfaces show scattered abrasions over each side. This is an affordable opportunity to acquire a lightly circulated No Motto example.
The Valley View Life Collection, Part Three. NGC ID# 263C, PCGS# 8608

**1852 Ten Dollar, AU58+
Elusive in Finer Grades**

4349 1852 AU58+ PCGS. This issue circulated extensively, with Mint State survivors being scarce and largely grading no finer than MS62. This piece is the only AU58 example to receive a Plus designation from PCGS (9/14), and exhibits substantial yellow-gold luster. The strike is bold and only a touch of wear is detected on the relief elements. Population: 16 in 58 (1 in 58+), 13 finer (9/14). NGC ID# 263C, PCGS# 8608

4350 1853 AU55 PCGS. A surprisingly bright Choice AU example with straw-gold surfaces and the usual number of minor marks from a period in circulation. A pleasing coin, suitable for type purposes. NGC ID# 263E, PCGS# 8610

4351 1854 AU55 NGC. CAC. This Choice AU specimen displays lightly abraded yellow-gold surfaces that retain considerable amounts of original mint luster. The well-detailed design elements show just a trace of high-point wear. Census: 53 in 55, 61 finer (8/14). NGC ID# 263G, PCGS# 8613

4352 1878 MS61 NGC. A pleasing antique-gold and rose example with ample original mint luster still evident. Random small marks limit the grade. A conditionally rare issue from a low mintage of 73,780 pieces. NGC ID# 265J, PCGS# 8680

**1879 Ten Dollar, MS63
Pleasing, Conditionally Rare Example**

4353 1879 MS63 PCGS. Garrett and Guth comment that the typical example of this S-mint issue grades somewhere between XF and AU; going on to note that (in 2008) MS64 coins had become extremely rare. This is a well-struck, lustrous example with scattered trivial marks that are not excessive for the grade. Population: 28 in 63, 12 finer (8/14). NGC ID# 265M, PCGS# 8683

4354 1880 MS63 NGC. Although this was the first issue in the series to exceed the million-coin mintage mark, Select examples such as this are truly scarce. The surfaces show thick mint frost over rose-gold surfaces, and a strong strike provides excellent design definition. Census: 39 in 63, 15 finer (8/14).
The Valley View Life Collection, Part Three. NGC ID# 265S, PCGS# 8687

4355 1880 MS63 PCGS. The surfaces of this Select example reveal shades of gold, orange, and pale rose. Rich, frosty luster and a pleasing strike add to the eye appeal. Population: 62 in 63 (1 in 63+), 20 finer (8/14). NGC ID# 265S, PCGS# 8687

**1881-CC Liberty Eagle, AU58
Scarce in Finer Grades**

4356 1881-CC AU58 NGC. Variety 1-A. From a mintage of 24,015 pieces, the 1881-CC Liberty eagle is an available date in the context of the series, but high-grade specimens are seldom encountered. This attractive near-Mint example displays sharply detailed design elements with just a trace of wear on the high points. The pleasing orange-gold surfaces are lightly abraded and retain much of their original mint luster. Census: 85 in 58 (1 in 58+), 47 finer (8/14). NGC ID# 265X, PCGS# 8692

- 4357 1883 MS63 NGC.** This is an attractive Select example with lustrous, yellow-gold color and sharply defined devices. The 1883 issue is scarce in MS63 and prohibitively rare in finer condition. NGC has certified a mere four coins in higher numeric grades (8/14). NGC ID# 2666, PCGS# 8699
- 4358 1884-S MS62 PCGS. CAC.** European hoards dramatically altered the availability of the 1884-S in Uncirculated condition. Still MS62 examples such as this are scarce. Immensely appealing orange-gold coloration covers the frosty and well-struck surfaces, and abrasions are lightly scattered throughout. PCGS has seen only 11 coins numerically finer (8/14). NGC ID# 266C, PCGS# 8705
- 4359 1887 MS61 NGC.** The Philadelphia Mint produced few gold coins of any denomination in 1887. In fact, half eagles and double eagles were issued in proof format only. From a mintage of 53,600 pieces, this Uncirculated example exhibits cartwheel luster and light yellow-gold color with scattered marks throughout. Census: 62 in 61, 23 finer (8/14). *The Valley View Life Collection, Part Three.* NGC ID# 266H, PCGS# 8710
- 4360 1887 MS62 PCGS.** The 1887 Liberty eagle claims a mintage of 53,680 pieces, making it a scarce issue in high grade. This impressive MS62 example is sharply detailed and lustrous, showing a smattering of minor contact marks that explain the grade. Population: 33 in 62, 5 finer (9/14). NGC ID# 266H, PCGS# 8710
- 4361 1887-S MS63 PCGS.** Apricot-gold bands surround the margins, with pale yellow interiors. The surfaces are lightly abraded, as the grade suggests, with the most noticeable flaw being a small scrape to the left of the bust truncation, though the eye appeal is nonetheless fair. Population: 87 in 63, 3 finer (8/14). NGC ID# 266J, PCGS# 8711
- 4362 1888 MS62 PCGS.** The 1888 ten dollar is a conditionally elusive issue in Mint State, with examples grading finer than MS62 being distinctly rare. This representative exhibits sharp motifs and frosty yellow-gold luster. Moderate abrasions define the grade. Population: 43 in 62, 8 finer (8/14). NGC ID# 266K, PCGS# 8712
- 4363 1888-O MS62 NGC. Variety 1.** The typically struck obverse displays khaki-gold color primarily, while the surprisingly sharp reverse tends toward honey-gold. Luster abounds, and marks are evenly scattered over each side. NGC has seen only 11 coins numerically finer (8/14). NGC ID# 266L, PCGS# 8713
- 4364 1891-CC — Improperly Cleaned — NGC Details. Unc. Variety 2-B.** “The 1891 eagle remains a relatively scarce date despite a mintage that might indicate otherwise,” according to Garrett and Guth (2006). This Uncirculated example shows bright yellow-gold surfaces with razor-sharp devices and abundant mint luster. The noted cleaning is not overly distracting. NGC ID# 266U, PCGS# 8720
- 4365 1891-CC MS61+ NGC. Variety 1-A.** A powerful strike impression fully brings up all of the design elements, including the denticles. Pleasing antique-gold toning is highlighted by soft, shimmering mint luster. Scattered minor contact marks limit the grade but do not overly detract from the coin’s appealing overall appearance. NGC ID# 266U, PCGS# 8720

1891-CC Ten Dollar, MS62 Immensely Appealing for the Grade

- 4366 1891-CC MS62 NGC. Variety 1-A.** This Carson City issue is easily obtainable in grades through MS62, but becomes scarce in MS63, and finer coins are distinctly rare. This piece exhibits bright, flashy luster, with deeper tinges of apricot color seen periodically around the extreme outer peripheries. Scattered abrasions limit the grade, though the strike is pleasantly sharp. Housed in a prior generation holder. NGC ID# 266U, PCGS# 8720
- 4367 1891-CC/CC FS-501 AU55 PCGS.** The mintmark is widely repunched left. This Choice About Uncirculated representative displays bright yellow-gold surfaces, with remnants of semiprooflike mirroring in the fields. The design elements are well-detailed, exhibiting only slight wear. A small reed mark on Liberty’s cheek is the only notable abrasion. PCGS# 145728
- 4368 1891-CC/CC FS-501 MS61 NGC. Variety 3-C.** This *Cherrypickers’* variety features a secondary C to the right of the second C in the mintmark. The 1891-CC eagle is the most plentiful issue from the Nevada facility thanks to a mintage of 103,732 coins. Swirling luster and orange-gold color blend over the lightly marked and well-struck surfaces. *The Valley View Life Collection, Part Three.* PCGS# 145728
- 4369 1893 MS64 PCGS.** Frosty orange-gold luster complements sharp design definition on this undeniably original Choice example. Minor surface ticks define the grade. Housed in an old green label holder. PCGS has certified a paltry four numerically finer coins (8/14). NGC ID# 266Z, PCGS# 8725
- 4370 1894 MS63 Prooflike NGC.** Amazing prooflike contrast and reflectivity are hallmarks of this Select example. The upper-obverse stars show shallow incompleteness, while the remaining motifs are sharply detailed, notably on the reverse. A lustrous, yellow-gold representative with commanding visual presence. Census: 13 in 63 (2 in 63+ Prooflike, 1 in 63 ★), 1 finer (8/14). *The Valley View Life Collection, Part Three.* PCGS# 78729
- 4371 1895-O MS61 PCGS. Variety 2.** Mild strike doubling is seen on most peripheral reverse design elements. This well-detailed representative displays satiny luster beneath shades of orange, olive, and rose-gold patina. Light, scattered abrasions define the grade. NGC ID# 2679, PCGS# 8733
- 4372 1897 MS64 PCGS.** Bold design definition and frosty green-gold luster are among the pleasing attributes this near-Gem possesses. Faint surface grazes limit the grade, but the eye appeal remains high for the numeric level. PCGS has seen only 11 numerically finer submissions (8/14). NGC ID# 267D, PCGS# 8737
- 4373 1897 MS64 NGC.** Frosty green-gold luster is interrupted by only minor surface ticks and grazes, leaving this Choice example with ample eye appeal. The eagle’s right (facing) talons are slightly soft, though the strike is otherwise well-executed. NGC has encapsulated 27 numerically finer representatives (8/14). NGC ID# 267D, PCGS# 8737

4374 1898 MS64 PCGS. A simply outstanding coin for the grade, this near-Gem 1898 ten dollar piece showcases razor-sharp design definition and remarkably clean surfaces, with a few faint grazes on the obverse apparently being all that precludes a numerically finer assessment from PCGS. Intermingled honey and green-gold luster encompasses each side. Population: 67 in 64 (1 in 64+), 9 finer (8/14). NGC ID# 267G, PCGS# 8740

4375 1899-S MS63 NGC. Despite a mintage of 841,000 pieces, the 1899-S eagle is somewhat elusive in MS63, and finer coins are rarely encountered. This piece displays a bold strike and frosty honey-gold luster. Light, scattered abrasions contribute to the grade, but are not overly detracting. Census: 71 in 63 (1 in 63+), 16 finer (8/14). NGC ID# 267L, PCGS# 8744

4376 1899-S MS63 NGC. The reverse in particular displays potent luster on this lovely Select representative. Hints of green-gold and peach are present and the design elements are pleasingly detailed. Census: 71 in 63 (1 in 63+), 16 finer (8/14). NGC ID# 267L, PCGS# 8744

4377 1901 MS64+ PCGS. A high-end Choice example of this turn-of-the-century type coin, with well-detailed design elements and vibrant mint luster throughout. The vivid orange-gold surfaces show few signs of contact. NGC ID# 267P, PCGS# 8747

4378 1901-S MS64 PCGS. With a mintage of more than 2.8 million pieces, the 1901-S Liberty eagle is readily available for type purposes. This Choice example displays sharp design elements and frosty luster in shades of green and rose-gold. Faint, scattered luster grazes on the obverse preclude full Gem status, but are hardly detracting to the unaided eye. NGC ID# 267S, PCGS# 8749

1901-S Liberty Eagle, MS65+ Highly Attractive Type Coin

4379 1901-S MS65+ NGC. CAC. This is one of the more plentiful issues in the Liberty Head series, and is readily available in grades through MS65. In higher grades, the certified population declines rapidly. This Plus-graded Gem showcases radiant golden mint bloom and sharp design definition. To the unaided eye, the surfaces appear virtually pristine, and only under a loupe do any microscopic luster disturbances become evident. The date or type collector will find it greatly challenging to find another piece of equal grade that boasts greater eye appeal than this representative. NGC ID# 267S, PCGS# 8749

4380 1903 MS64 PCGS. Gleaming orange-gold surfaces brim with luster on this attractive near-Gem, kept from an even finer grade by small, scattered abrasions. A sharply struck and attractive type coin, seldom seen at the Gem level. Population: 47 in 64 (1 in 64+), 8 finer (9/14). NGC ID# 267V, PCGS# 8752

4381 1903-O MS63 NGC. Variety 2. Moderately available in MS63 and lower grades, the 1903-O ten dollar becomes scarce at the Choice level. This radiant Select example exhibits frosty green and yellow-gold hues over each side, with sharply struck design elements. Light, scattered surface disturbances limit the grade. Census: 49 in 63, 8 finer (8/14). NGC ID# 267W, PCGS# 8753

1903-S Liberty Eagle, MS65 Well-Preserved Lustrous Surfaces

4382 1903-S MS65 PCGS. This delightful Gem exhibits razor-sharp definition on most design elements, but some stars on the left are a little flat in the centers. The well-preserved peach-gold surfaces radiate vibrant mint luster on both sides and eye appeal is outstanding. Population: 60 in 65 (3 in 65+), 21 finer (8/14). NGC ID# 267X, PCGS# 8754

4383 1905 MS64 NGC. Mint State coins from this issue are typically seen in MS61 to MS62. Choice representatives such as this are scarce, and anything finer is decidedly rare. The rich orange-gold surfaces reveal no marks of note, and the devices are uniformly sharp. Incontestably high-end for the grade. Housed in a prior generation holder with chips along the edges. NGC ID# 2682, PCGS# 8757

4384 1906-D MS64 NGC. An exceptional Choice example from the first year of coinage operations at the Denver Mint, this coin features sharply detailed design elements and vibrant mint luster, with lightly marked yellow and peach-gold surfaces. NGC ID# 2685, PCGS# 8760

4385 1906-O MS62 PCGS. Variety 1. This conditionally scarce eagle represents the final production of ten dollar coins at the New Orleans Mint (86,895 pieces). Lustrous, lemon-yellow surfaces show sharper definition on the reverse as compared to the obverse, and grade-consistent marks occur over each side. NGC ID# 2686, PCGS# 8761

4386 1907 MS64 NGC. The year 1907 marked the transition from the Liberty Head design to the Indian Head design. This final-year, near-Gem type coin offers strong definition over Liberty's hair curls and the eagle's talons, while star 13 is a touch incomplete. Each side shows appealing orange-gold coloration and swirling mint frost. *The Valley View Life Collection, Part Three.* NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

4387 1908 Motto MS63 NGC. An attractive Select specimen from the first year to include the motto IN GOD WE TRUST. This coin displays well-detailed design elements and lustrous reddish-gold surfaces. NGC ID# 28GJ, PCGS# 8859

**1908 Indian Ten Dollar, MS64
With Motto Variant**

- 4388 1908 Motto MS64 NGC.** The 1908 With Motto ten dollar is usually available in grades through MS64, but the date becomes increasingly scarcer in finer grades. This Choice example displays satiny green-gold luster and sharply struck design elements. Light, scattered abrasions limit the grade, but none are individually noticeable. NGC ID# 28GJ, PCGS# 8859

**1908-D Motto Indian Eagle, MS62
Upper-End for the Grade**

- 4389 1908-D Motto MS62 PCGS.** The 1908-D With Motto Indian eagle is one of the more elusive dates in the series in high grades. Low-end Mint State pieces are easily obtainable, but this issue becomes notably scarce in MS63 and finer. This example displays satiny pale-gold luster and is surprisingly void of any significant abrasions, an unusual characteristic for an MS62-graded coin. The eagle's facing shoulder is not fully defined, but this hardly inhibits the eye appeal. NGC ID# 28GK, PCGS# 8860

- 4390 1908-S AU55 PCGS.** With a low mintage of only 59,850 coins, the 1908-S Indian eagle is a more challenging San Francisco issue in the context of the series. This is a pleasing Choice AU representative, retaining much original luster and exhibiting nearly complete detail. Scattered abrasions accompany the grade, as expected. NGC ID# 28GL, PCGS# 8861

- 4391 1909 MS62 NGC.** The 1909 ten dollar is most often seen in MS62 and lower grades, its availability declining substantially at each finer level of preservation. This example exhibits bright yellow-gold luster, with well-defined central devices. Light, scattered grazes limit the grade, but are not overly bothersome to the unaided eye. NGC ID# 28GM, PCGS# 8862

1909-D Eagle, Boldly Struck MS62

- 4392 1909-D MS62 NGC.** The lustrous orange-gold surfaces are boldly struck and relatively unabraded for the MS62 grade. Magnification is required to observe the scattered small ticks on the cheek and headdress, along with a few on the reverse that together constitute the grade, but much eye appeal is present here. The 1909-D is seldom seen above MS63. NGC ID# 28GN, PCGS# 8863

**1910-S Eagle, MS62+
Original Patina**

- 4393 1910-S MS62+ PCGS. CAC.** The 1910-S is a slightly better date in Mint State grades, with the majority of such pieces grading no finer than MS62. This Plus-graded example is sharply struck, with satiny honey-gold luster. Scattered abrasions limit the grade, though none are individually detracting. Finer examples are scarcely seen. NGC ID# 268D, PCGS# 8867

**1911-D Ten Dollar, AU55
Semikey Denver Issue**

- 4394 1911-D AU55 NGC.** Like the other gold issues of this date and mint, the 1911-D Indian eagle is a challenging issue within its series, a characteristic reflected by the certified population reports. This Choice AU example displays deep orange-gold patina over each side, with wisps of luster in the recesses. The strike is sharp and high-point wear is minimal. NGC ID# 28GU, PCGS# 8869

4395 1911-S AU55 NGC. With a low mintage of 51,000 coins, the 1911-S ten dollar is a scarcer issue in the Mint State grade range, and is only marginally available in the finer AU levels. This Choice example displays moderate luster beneath rich orange-gold patina. Light wear is present, though consequential abrasions are minimal. NGC ID# 28GV, PCGS# 8870

4396 1912 MS64 PCGS. MS64 is the highest grade level at which the 1912 Indian eagle can be easily obtained, as finer examples are conditionally scarce. This Choice representative displays frosty green-gold luster and well-defined motifs. Light, scattered grazes limit the grade. PCGS has seen 42 numerically finer submissions (8/14). NGC ID# 28GW, PCGS# 8871

4397 1912-S AU58 NGC. From a mintage of 300,000 pieces, this issue ranks seventh in terms of overall rarity in the Indian eagle series. This example is softly struck and displays lightly abraded surfaces that have a mildly scuffy appearance. NGC ID# 28GX, PCGS# 8872

4398 1915 MS63 PCGS. This charming Select example exhibits well-detailed design elements and lustrous yellow and orange-gold surfaces, with a few scattered minor contact marks. From a mintage of 351,075 pieces. NGC ID# 28H5, PCGS# 8878

4399 1915 MS63 NGC. An attractive Select example of the 1915 Indian eagle, with well-detailed design elements that show just a touch of softness on the leading edge of the eagle's wing, and pleasing orange and rose-gold surfaces with a scattering of minor contact marks on both sides. NGC ID# 28H5, PCGS# 8878

4400 1916-S AU58 NGC. An attractive, lightly-circulated example with satiny, yellow-gold surfaces that display a slight degree of high-point friction and a few scattered toning specks on each side. A pleasingly lustrous example of this San Francisco Indian eagle issue. NGC ID# 28H7, PCGS# 8880

4401 1932 MS64 NGC. Radiant luster and wheat-gold color embrace the each side of this available near-Gem. The 1932 eagle is the last collectible date in the series (the 1933 issue is essentially unobtainable) and the most frequently encountered Indian Head ten in type collections because of its high mintage. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, XF45 Desirable First Year of Type

4402 1850 XF45 NGC. An extremely popular issue as the first year of the twenty-dollar double eagle, the 1850 is not rare at this Choice XF grade level, but it is highly desirable as a first-year type representative. This example exudes warm green-gold color and shows clean, only slightly marked surfaces. NGC ID# 268F, PCGS# 8902

4403 1850 — Improperly Cleaned — NGC Details. AU. Bright, green-gold patina blankets luminous surfaces on each side of this first-year type coin. Slight wear is evident over the high points of the design, though the definition remains nearly complete. NGC ID# 268F, PCGS# 8902

4404 1851 — Rim Repair — NGC Details. XF. The obverse rim between 11 and 12 o'clock is smoothed, and the reverse rim is lightly filed near 7:30. Liberty's curls and eyebrow display minor wear, and distributed marks include a pinscratch in front of Liberty's eye and another through the 5 in the date. NGC ID# 268H, PCGS# 8904

1851 Double Eagle, AU55

4405 1851 AU55 NGC. CAC. This Philadelphia Mint issue saw a huge mintage well in excess of 2 million coins, due to the influx of vast amounts of gold from California. This Choice AU example is bright and well-detailed, with pleasing khaki-gold toning. Both sides are peppered with tiny abrasions, but these are not troubling or a detriment to the overall eye appeal of the piece. NGC ID# 268H, PCGS# 8904

1851-O Twenty, XF Details Popular Second-Year New Orleans Issue

4406 1851-O — Improperly Cleaned — NGC Details. XF. Variety 2. Some of the design details are softly struck, especially near the peripheries and particularly on the upper half of the obverse. The coloration is a light greenish-khaki hue over both sides. Improper cleaning is implied by the rather drab overall appearance of the piece; while telltale hairlines are present but minimal. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, AU Details

4407 1851-O — Improperly Cleaned — NGC Details. AU. Variety 2. This otherwise pleasing example displays wispy hairlines and a somewhat granular texture in some of the fields, usually indicative of whizzing. Light green toning mingles with occasional accents of coppery-red color. This popular second-year issue had a moderate mintage of 315,000 pieces, and examples are readily available in circulated grades, according to Garrett and Guth (2008), but scarce in AU or Mint State. NGC ID# 268J, PCGS# 8905

1852 Liberty Twenty, AU53
Popular Type One Issue

- 4408** 1852 AU53 NGC. From a huge mintage of 2 million pieces, the 1852 Liberty double eagle is a plentiful issue in lower circulated grades, but high-quality specimens are elusive. This attractive AU53 example displays light orange-gold surfaces that retain significant amounts of original mint luster. The design elements are well-detailed and lightly worn and the fields show the expected number of minor contact marks. NGC ID# 268K, PCGS# 8906

1853 Double Eagle, AU55

- 4409** 1853 AU55 NGC. CAC. This issue had a reasonably extensive mintage of more than 1.2 million pieces, and it is a common date overall, according to Garrett and Guth. It becomes rare in Mint State, however. This is a well-detailed Choice AU specimen that is moderately worn and has a somewhat scuff appearance on each side. NGC ID# 268M, PCGS# 8908

1855 Double Eagle, Luminous AU55

- 4410** 1855 AU55 PCGS. The 1855 double eagle had a moderate mintage in excess of 364,000 pieces, but it circulated extensively with the result that most extant examples are only in the VF to XF grade range. High-end AU coins are scarce, and Mint State pieces are rare. This Choice AU example displays bright yellow-gold patina and nearly complete detail. Scattered abrasions accompany the grade. Population: 28 in 55, 42 finer (9/14). NGC ID# 268V, PCGS# 8914

1855 Double Eagle, Mint State Sharpness
Sea-Salvaged Representative

- 4411** 1855 — Saltwater Damage — PCGS Genuine. Unc Details. A few 1855 double eagles were salvaged alongside the numerous San Francisco coins from the S.S. *Central America* and S.S. *Republic* shipwrecks, though these hardly affected the limited number of high-grade survivors. Mint State coins remain rare, and the date is only moderately available in the AU grade range. This sharply detailed honey-gold representative is not pedigreed to any specific shipwreck find, but its surfaces exhibit the unmistakable granular luster characteristic of a coin that spent years immersed in salt water. PCGS felt the etching was a little too advanced to warrant a numeric grade, though the overall eye appeal is nonetheless pleasing. *The Valley View Life Collection, Part Three*. NGC ID# 268V, PCGS# 8914

1856-S Double Eagle, AU55
Ex: S.S. Republic

- 4412** 1856-S AU55 NGC. Variety 17A. Ex: S.S. *Republic*. Medium S. The 1856-S is most widely known for its connection with the S.S. *Central America* treasure, though some examples were also recovered from the S.S. *Republic*. This Choice AU coin is pedigreed to the latter shipwreck, and displays substantial yellow-gold luster. Slight friction precludes a Mint State assessment from NGC, though any abrasions are light and even distributed over both sides. NGC ID# 2692, PCGS# 8919

1856-S Liberty Double Eagle, AU58
Rare Issue in Finer Grades

- 4413** 1856-S AU58 NGC. The 1856-S Liberty double eagle claims a substantial mintage of more than 1.1 million pieces, but most of the coins were released into circulation near the time of issue and few high-quality pieces have survived. This impressive near-Mint example exhibits well-detailed design elements with just a trace of wear, and moderately abraded lustrous yellow and greenish-gold surfaces. NGC has graded 36 numerically finer examples (8/14). NGC ID# 2692, PCGS# 8919

4414 1857-S XF45 NGC. The 1857-S is an always-popular issue, due largely to its connection with the S.S. *Central America* shipwreck. This is a well-detail Choice XF example, displaying bright olive-gold patina, with hints of deeper coppery-gold in the protection regions. Numerous abrasions accompany the grade. NGC ID# 2696, PCGS# 8922

4415 1858 VF30 PCGS. This piece is probably about as nice an example as the average collector will ever find at the VF30 grade level. Evenly worn over both sides and showing only normal marks from moderate circulation, with attractive khaki-gold coloration. NGC ID# 2697, PCGS# 8923

4416 1858 — Improperly Cleaned — NGC Details. AU. Bright green-gold coloration covers each side of this lightly circulated double eagle, and original mint luster remains hidden within the protected regions. The design elements are sharply struck, and myriad abrasions are peppered over each side.

**1860 Twenty, AU55
Possible Shipwreck Survivor**

4417 1860 AU55 PCGS. This is a relatively scarce issue, although its availability has increased with the recovery of a significant number of examples from the wreck of the S.S. *Republic*. This Choice AU coin displays the extra-bright shimmer often seen on shipwreck pieces, but it is not designated as such on the PCGS label. The deeper honey-gold toning is imbued with strong accents of rose. Abrasions and hairlines are consistent with the AU55 designation. NGC ID# 269D, PCGS# 8929

4418 1860-S XF45 NGC. Plentiful in lower grades, this San Francisco issue becomes distinctly scarce in Mint State condition. This Choice XF example retains pleasing detail, with original olive-gold patina overall. A number of minor surface abrasions are present, not unusual for the grade level. NGC ID# 269F, PCGS# 8931

4419 1861 XF40 NGC. The issue's mintage falls just short of the 3 million-coin mark, making it the most readily collectible date among No Motto double eagles. This lightly circulated example features khaki and reddish-gold coloration. The devices show much detail and marks are evenly scattered throughout. Good for type. NGC ID# 269G, PCGS# 8932

4420 1861 XF45 PCGS. Khaki-gold color and reddish accents affirm the originality of this No Motto double eagle, and a high mintage makes it appropriate for type purposes. Abrasions are scattered over each side, but a only shallow linear depression to the left of and parallel to Liberty's neck merits mention. NGC ID# 269G, PCGS# 8932

4421 1861 — Improperly Cleaned — NGC Details. AU. The 1861 is plentiful in most grades, making it a popular issue among type enthusiasts. This About Uncirculated No Motto double eagle exhibits light yellow-gold surfaces with a number of abrasions scattered throughout. Partial luster remains in the recesses. NGC ID# 269G, PCGS# 8932

1861 Type One Double Eagle, AU50

4422 1861 AU50 NGC. With a mintage of nearly 3 million pieces, the 1861 double eagle is readily available in most grades for type purposes. This example retains substantial original mint luster and exhibits only light high-point wear. A few scattered ticks and abrasions are present, not uncommon for the grade level. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, AU55
Choice Type Representative**

4423 1861 AU55 NGC. Until the salvage of the S.S. *Central America* treasure, the 1861 was widely regarded as the most plentiful Type One double eagle. With a mintage of more 2.9 million coins, it is, not surprisingly, still widely popular for type purposes. This Choice example displays substantial yellow-gold luster and minimal surface marks. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, Lustrous AU58

4424 1861 AU58 NGC. Warm honey-gold hues accent frosty yellow-gold surfaces on this richly lustrous near-Mint example. Light, scattered abrasions are present, as expected at this grade level, though none are individually noteworthy. This issue is one of the more plentiful Type One double eagles, ideal for type representation. NGC ID# 269G, PCGS# 8932

1861 Double Eagle, AU58
Lustrous, Pleasingly Toned Example

- 4425 1861 AU58 NGC.** Lovely orange-gold toning is uniformly distributed across each side of this lustrous near-Mint specimen. High-point friction is minimal, and only modest abrasions are seen on each side of this pleasing example. From a popular type issue that was once the most readily-available of all double eagles. NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar, Unc Details
Attractive, Lightly Cleaned Example

- 4426 1861 — Cleaning — PCGS Genuine. Unc Details.** Well struck with light green-gold and peach-gold toning, and faint hairlines in the fields. All of the star centers are complete, as are the eagle's head and talons. Distracting abrasions are absent on both sides. A scarcer date in Choice Uncirculated condition, or finer; but relatively common at lower grade levels. NGC ID# 269G, PCGS# 8932

- 4427 1868-S — Altered Surfaces — PCGS Genuine. AU Details.** Extensive cartwheel luster confirms that the present Type Two double eagle had only a momentary stay in Old West commerce. The canary-gold surfaces are nicely struck and show few bagmarks. Thorough examination locates a smoothed area on the reverse field beneath the right (facing) wing. NGC ID# 26A4, PCGS# 8954

- 4428 1872-S AU53 PCGS.** Small Squat S. From a mintage of 780,000 coins, the 1872-S is a relatively available date, generally found in lower circulated grades. This lightly circulated, khaki-gold example features abundant remaining luster and a predictable number of abrasions scattered throughout. Housed in a green label holder. NGC ID# 26AF, PCGS# 8965

1872-S Double Eagle, AU58
Original Patina

- 4429 1872-S AU58 NGC. CAC.** The mint luster is essentially complete on the reverse, and partially penetrates the obverse field. An attentively struck and moderately abraded example of this conditionally challenging issue. Finer examples are elusive. Ex: *Long Beach Signature (Heritage, 2/2007)*, lot 4960. NGC ID# 26AF, PCGS# 8965

- 4430 1873 Closed 3 AU53 PCGS.** Khaki-gold color blankets each side of this lightly circulated double eagle. The Closed 3 variant is significantly scarcer than its Open 3 counterpart, and only a single example turned up in the Saddle Ridge Hoard, attesting to its rarity. Housed in a green label holder. NGC ID# 26AG, PCGS# 8966

- 4431 1873 Open 3 MS61 NGC.** Like most Type Two double eagles, the 1873, Open 3 twenty was produced in large numbers, but few were saved and high-quality examples are elusive in today's market. This well-detailed MS61 specimen offers lustrous surfaces with the expected number of minor contact marks on each side. NGC ID# 26AH, PCGS# 8967

- 4432 1873 Open 3 MS61 NGC. CAC.** The second date logotype variety of the date, and much easier to obtain than examples of its Closed 3 counterpart. This coin is highly lustrous, well-struck, and moderately abraded. An attractive honey-gold representative of this popular type issue. NGC ID# 26AH, PCGS# 8967

1873 Double Eagle, MS62
Open 3 Variant

- 4433 1873 Open 3 MS62 PCGS. CAC.** This issue is readily available in grades through MS62, but it becomes scarce in MS63, and finer pieces are decidedly rare. This example displays frosty original luster in soft shades of rose and green-gold, with overall well-defined relief elements. Scattered abrasions contribute to the grade. NGC ID# 26AH, PCGS# 8967

- 4434 1873-S Closed 3 MS60 NGC.** "It is unknown how many of the 1873 Philadelphia double eagles were of the Close 3 variety. It was surely very few, however, as the variety is much more rare than the Open 3," wrote Garrett and Guth (2006). This Mint State example showcases peach-gold color and frosty luster over well-struck and lightly abraded surfaces. *The Valley View Life Collection, Part Three*. NGC ID# 26AL, PCGS# 8969

**1874-CC Double Eagle, VF30
Elusive Gold CAC Seal**

- 4435** 1874-CC VF30 PCGS. Gold CAC. Variety 2-A. According to CAC, only approximately 2% of submissions secure a Gold CAC seal. Usually, the coins are in older generation holders, such as the present green label example certified during the 1990s. Liberty and the eagle display high point wear but luster illuminates protected areas. Small marks are distributed. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, AU50

- 4436** 1874-CC AU50 NGC. Variety 2-A. Easily obtainable in circulated grades, this Carson City issue is rare in Mint State, and none have graded finer than MS62. This AU representative exhibits lustrous yellow-gold surfaces. Slight wear accounts for the grade, while light, scattered abrasions are to be expected at this level. NGC ID# 26AP, PCGS# 8971

1875-CC Double Eagle, XF40

- 4437** 1875-CC XF40 NGC. Variety 1-A. This is one of the more plentiful double eagles from this mint, and is widely popular among type collectors seeking a single example from the Carson City facility. This lightly circulated representative displays bright olive-gold patina, with the usual array of scattered abrasions seen at this grade level. NGC ID# 26AT, PCGS# 8974

**1875-CC Twenty Dollar, XF40
Gold CAC Seal**

- 4438** 1875-CC XF40 PCGS. Gold CAC. Variety 6-B. Only a scant percentage of CAC submissions obtain the coveted Gold seal. Like many such coins, the present Carson City double eagle is housed in a green label holder from the past millennium. The original apricot-gold surfaces display relatively few marks for the XF level. NGC ID# 26AT, PCGS# 8974

- 4439** 1875-CC — Improperly Cleaned — NGC Details. AU. Variety 9-D, Wide CC. This is the rare Wide CC mintmark variant, which shares the same reverse die as the 1876-CC Variety 3-D. The yellow-gold surfaces are well-detailed and show myriad hairlines from the noted cleaning.

**1875-CC Double Eagle, AU53
Rare Wide CC**

- 4440** 1875-CC AU53 NGC. Variety 9-D, Wide CC. A recently discovered variety of the 1875-CC double eagle, featuring the Wide CC reverse of 1876 paired with an 1875 obverse die; a rare and intriguing die pairing for the variety enthusiast. This example displays luminous yellow-gold surfaces, with minimal wear and only minor surface abrasions. NGC ID# 26AT, PCGS# 8974

**1875-CC Twenty, Unc Details
Still Attractive Despite Cleaning**

- 4441** 1875-CC — Improperly Cleaned — NGC Details. Unc. Variety 2-B. Dramatic strike doubling is apparent on many of the reverse devices, especially along the periphery, and both Cs in the mintmark are filled. The obverse is lightly cleaned, producing some hairlines, intermingled with die polish striations, and a semi-reflective sheen. A reeding mark is noted just to the right of the date.

4442 1875-S MS61 PCGS. This issue's availability declines sharply beyond the MS61 grade level, and pieces grading finer than MS62 are rare. This frosty, straw-gold example exhibits scattered abrasions, as the grade suggests, though they are light and evenly dispersed. Well-defined motifs increase the overall appeal. NGC ID# 26AU, PCGS# 8975

4443 1876-CC XF40 NGC. Variety 2-C. The 1 in the date is positioned further from the bust, and the second C in the mintmark is left of the second T in TWENTY. Although the 1876-CC claims the highest mintage among Carson City double eagles (138,411 coins), the 1875-CC is slightly more available. This Extremely Fine example displays orange-gold color and reddish accents over lightly worn and abraded surfaces. A nice, problem-free representative. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU Details Well-Struck, Carson City Type Coin

4444 1876-CC — Improperly Cleaned — NGC Details. AU Details. Variety 5-B. The first C in the mintmark is centered over the right upright of the N and the second C is positioned over the left serif of the second T in TWENTY. This lightly circulated representative features sharply detailed motifs, remaining luster, and minimal marks, save for wispy hairlines from the cleaning. Yellow-gold color dominates each side. NGC ID# 26AW, PCGS# 8977

4445 1876-S MS61 PCGS. CAC. A pleasing Mint State representative from the final date of Type Two double eagle production. A well-struck piece with dazzling semi-reflective fields and appealing orange-gold coloration. NGC ID# 26AX, PCGS# 8978

1876-S Double Eagle, MS62 Elusive in Finer Grades

4446 1876-S MS62 NGC. CAC. A typical San Francisco issue from the late 1870s, the 1876-S double eagle is available in grades through MS62, but is scarcely seen finer. This representative exhibits flashy apricot-gold luster, with well-defined devices. A small toning spot is noted near the first T in TWENTY, while light, scattered surface marks identify the grade. NGC ID# 26AX, PCGS# 8978

4447 1877 MS61 PCGS. The first year for the Type Three double eagles, with several positional and design changes to Liberty's portrait, star positions, and the spelling out of the word DOLLARS on the reverse creating a new type. This brightly lustrous, sharply struck example is moderately abraded as expected for the assigned grade. Nice, medium gold color covers the frosty surfaces. NGC ID# 26AY, PCGS# 8982

1883-CC Double Eagle, XF45 Choice Carson City Type Coin

4448 1883-CC XF45 NGC. Variety 2-A. Like many other Carson City double eagles, the 1883-CC survives in fairly large numbers, though it is most frequently encountered in circulated grades. This Choice XF example displays strong detail for the grade, with attractively smooth honey-gold surfaces. Noticeable luster remains in the recesses. NGC ID# 26BH, PCGS# 8999

1883-CC Liberty Twenty, AU50 Original Patina

4449 1883-CC AU50 NGC. Variety 2-A. An Almost Uncirculated example, this richly patinated Carson City double eagle exhibits nearly complete detail, with special notice given to the hair curls around Liberty's face, which are frequently soft. Luminous orange-gold luster in the recesses attractively complements original bronze-gold patina overall. NGC ID# 26BH, PCGS# 8999

1884-CC Double Eagle, Sharp XF40

4450 1884-CC XF40 NGC. Variety 1-A. The 1884-CC is one of the more available double eagles from the Carson City Mint, and is often chosen by collectors seeking a single representative from the Nevada facility. This honey-gold XF example retains strong detail for the grade, and exhibits only minor surface abrasions, the most noticeable being an old tick behind Liberty's eye. NGC ID# 26BK, PCGS# 9001

**1884-CC Liberty Double Eagle, AU50
Luminous Original Coloration**

4451 1884-CC AU50 NGC. Variety 1-A. A highly attractive AU representative of this moderately available Carson City issue, this 1884-CC double eagle boasts unusually clean surfaces, with substantial luster shining through original orange and honey-gold hues on each side. The coin is significantly more appealing than is typically seen at this grade level. NGC ID# 26BK, PCGS# 9001

4452 1887-S MS61 NGC. This attractive MS61 specimen offers vivid orange-gold surfaces that show a moderate number of minor contact marks for the grade. Vibrant mint luster and sharply detailed design elements add to the considerable visual appeal. NGC ID# 26BS, PCGS# 9007

**1888 Double Eagle, MS62
Pleasing, Lustrous Type Coin**

4453 1888 MS62 PCGS. According to Garrett and Guth large numbers of this issue were exported, then returned to the United States, and examples are "fairly common" in grades ranging from VF to MS62. It must be noted, however, that more than 90% of the certified coins at PCGS and NGC are graded below MS62. This is a pleasing honey-gold example with plenty of original mint luster and a mildly scuffy appearance that limits the grade. NGC ID# 26BT, PCGS# 9008

1888 Double Eagle, MS62+

4454 1888 MS62+ NGC. The 1888 double eagle is available in quantity in MS61 and lower grades, but the certified population declines in MS62, and finer pieces are genuinely rare. This Plus-graded MS62 piece exhibits frosty golden mint bloom and sharp design elements. The surfaces are lightly abraded, as the grade suggests, but the marks are minor and evenly distributed. NGC has encapsulated only 14 numerically finer examples (8/14).
The Valley View Life Collection, Part Three. NGC ID# 26BT, PCGS# 9008

1890-CC Double Eagle, Choice XF

4455 1890-CC XF45 NGC. Variety 1-A. A late die state example, as die lapping has effaced some of the shallow tailfeathers, and a prominent die crack circumnavigates the reverse periphery, connecting the tops of the UNITED STATES OF AMERICA. The coin displays attractive green-gold patina, with hints of apricot-gold luster shining through. A few minor surface ticks accompany the grade. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU53
Strong Mint Luster**

4456 1890-CC AU53 NGC. Variety 1-A. A highly attractive representative, this sharply detailed AU coin showcases remarkably strong mint luster that engulfs each side in yellow-gold radiance. A few small surface abrasions are observed upon closer examination, one on Liberty's cheek, though these hardly inhibit the eye appeal. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, Lustrous AU55

4457 1890-CC AU55 NGC. Variety 1-A. The later die state, with die lapping visible on the outer tailfeathers. This Choice AU piece boasts substantial honey-gold luster over each side, with nearly complete detail on the relief elements. Scattered abrasions are noted, though they are minor and hardly noticeable without magnification. NGC ID# 26BY, PCGS# 9014

4458 1894 MS63 NGC. CAC. Coins finer than this Select representative are decidedly scarce. Attractive peach-orange hues supplement light lemon-gold color, and the design features are crisply impressed. Abundant luster illuminates each side, and marks are consistent with the grade. NGC ID# 26CB, PCGS# 9025

- 4459 1894-S MS63 PCGS.** Flashy yellow-gold surfaces provide this Select example with lovely visual appeal. Scattered marks are present, as expected at this grade level, but none poses a significant distraction. The certified population drops sharply in higher grades, adding to the desirability of MS63 pieces. NGC ID# 26CC, PCGS# 9026

**1895 Double Eagle, MS64
Splendid, Eye-Appealing Example**

- 4460 1895 MS64 NGC. CAC.** Lovely rose and lime-gold toning helps to ensure the splendid visual appeal of this well-struck, carefully preserved example from the Philadelphia Mint. This issue is easy to find at the current near-Gem level, but becomes rare any finer. A lustrous coin with a few trivial, yet grade-limiting marks on the obverse. Housed in an older-style NGC holder. NGC ID# 26CD, PCGS# 9027

**1895 Double Eagle, MS64
High-End for the Grade**

- 4461 1895 MS64 NGC. CAC.** More than a million double eagles were struck in 1895, at the Philadelphia Mint, and many were exported for purposes of international trade, sparing them from the American melting pots of the 1930s. This is a boldly struck example with intensely lustrous surfaces that display appealing, light wheat-gold toning. A couple of superficial marks are seen, but they seem minor for the MS64 grade level. Just nine coins are graded finer by NGC (8/14). NGC ID# 26CD, PCGS# 9027

**1897-S Double Eagle, MS64
A Pleasing Example for the Grade**

- 4462 1897-S MS64 NGC.** Well-struck and intensely lustrous, this lightly toned example reveals strong undertones of lime-green in the fields. A hair-thin pinscratch extends vertically through Liberty's upper hair curls. Although found in large numbers in grades up to MS63, near-Gem and finer pieces are scarce-to-rare. NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, MS64
Lustrous and Delightfully Toned**

- 4463 1897-S MS64 PCGS. CAC.** This old green holder example displays rich, effulgent mint luster that immediately grabs the attention of the viewer. The mixture of mint-green, gold, and red-peach coloration is captivating. The design elements are well-struck, and surface marks are only typical for the grade. Rare any finer, at both services. NGC ID# 26CJ, PCGS# 9032

**1897-S Twenty Dollar, MS64
Delightful, Conditionally Scarce Example**

- 4464 1897-S MS64 NGC. CAC.** "Choice examples are scarce, but they are a bit more readily available than some San Francisco issues of the last few years," according to Garrett and Guth. This is a delightful near-Gem example with radiant mint luster and lovely honey-gold and rose coloration. Surface marks are entirely consistent with the MS64 assignment. Only 19 examples are graded finer by NGC as of (8/14). NGC ID# 26CJ, PCGS# 9032

**1897-S Liberty Head Twenty, MS64
Conditionally Rare in Higher Grades**

- 4465 1897-S MS64 NGC. CAC.** The 1897-S is a true condition rarity. Examples are plentiful up to and including Select condition. Choice representatives prove challenging, and Gems are rarely seen — NGC has certified a mere 19 coins in higher numeric grades (8/14). Medium yellow-gold color covers this lustrous S-mint twenty. The surfaces are fully struck and lightly marked with vivid eye appeal. Housed in a former generation holder. NGC ID# 26CJ, PCGS# 9032

**1897-S Liberty Head Twenty, MS64
Outstanding Visual Appeal**

4466 1897-S MS64 NGC. CAC. This incredibly preserved near-Gem is apparently high-end for the assigned technical grade. A needle-sharp strike characterizes the design elements, most prominently on the obverse stars and Liberty's hair curls, and cartwheel luster graces the flashy butter-gold surfaces. Housed in a former generation holder. NGC has certified only 19 numerically finer submissions (8/14). NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, MS64
Frosty and Sharply Struck**

4467 1897-S MS64 NGC. CAC. CAC has awarded this Choice S-mint twenty with a coveted green label approval sticker for quality, and deservedly so. A thick layer of mint frost and honey-gold coloration embrace the boldly detailed surfaces. Marks are lightly scattered, but none are individually significant. Housed in a former generation holder. Only 19 coins are certified in higher numeric grades (8/14). NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, MS64
Premium Quality for the Grade**

4468 1897-S MS64 NGC. CAC. Intensely lustrous and showing few surface marks, this near-Gem example seems high-end for the grade. Well-struck on all elements save for a few of the obverse stars, with lovely uniform coloration that is a rich honey-gold, with undertones of rose. NGC ID# 26CJ, PCGS# 9032

**1897-S Liberty Double Eagle, MS64+
Vivid Color, Vibrant Luster**

4469 1897-S MS64+ PCGS. CAC. Although the 1897-S Liberty double eagle claims a substantial mintage of 1.4 million pieces, the issue is a condition rarity in grades above the MS64 level, making this high-end Choice example an excellent combination of quality and value. This coin exhibits sharply detailed design elements throughout, and vibrant mint luster radiates from the lightly marked orange-gold surfaces. PCGS has graded 10 numerically finer examples (9/14). NGC ID# 26CJ, PCGS# 9032

**1899-S Double Eagle, MS64
Lustrous and Attractive**

4470 1899-S MS64 PCGS. CAC. This issue is popular as the last pre-1900 double eagle from the San Francisco Mint, and Choice examples are seen occasionally, according to Garrett and Guth. This intensely lustrous example, housed in an old green PCGS holder, displays vibrant orange-gold coloration and well-detailed design motifs. A few small abrasions keep it from grading finer. PCGS has seen just four higher-graded examples of this conditionally scarce issue as of (8/14). NGC ID# 26CN, PCGS# 9036

**1901-S Double Eagle, MS63 Prooflike
Elusive With a Prooflike Designation**

4471 1901-S MS63 Prooflike NGC. As a date, the 1901-S double eagle is not overly scarce in Mint State, but NGC has awarded only 21 pieces a Prooflike designation, with this MS63 coin being the sole finest (9/14). Boldly struck design elements compliment glassy, apricot-gold fields, while the surfaces exhibit only minor abrasions, none of which are particularly detracting. PCGS# 79040

4472 1903 MS64 PCGS. Fully struck with intense, shimmering mint luster and deep orange-gold toning. The obverse shows a few grade-limiting marks, but they are not excessive. NGC ID# 26CW, PCGS# 9043

**1903-S Twenty, MS64
Pleasingly Toned and Lustrous**

4473 1903-S MS64 NGC. An eye-appealing near-Gem example of this San Francisco issue, which has seen the return of exported coins from foreign points in recent decades. The deep rose-gold toning is accented by vibrant mint frost, and surface marks are not excessive on either side of the piece. Just 22 coins from this issue are graded finer than MS64 by NGC as of (8/14). NGC ID# 26CX, PCGS# 9044

4474 1904 MS64 NGC. A mintage of 6.2 million pieces ensures the 1904 double eagle as a popular type coin. This Choice representative displays a full strike and radiant cartwheel luster over each side, while a tiny graze above the eagle's head prevents a Gem designation. *The Valley View Life Collection, Part Three*. NGC ID# 26CY, PCGS# 9045

4475 1904 MS64 NGC. Radiant luster cascades over the orange-gold surfaces. Liberty's hair and the stars show full detail, while a touch of softness occurs over eagle's shield. Each side is notably clean for the Choice designation. Housed in a former generation holder. NGC ID# 26CY, PCGS# 9045

4476 1904 MS64 NGC. This is a lustrous Choice example with incredibly smooth, medium yellow-gold surfaces and bold detail. Housed in a former generation holder. A small chip is noted on the top edge, but it does not compromise the integrity of the slab. NGC ID# 26CY, PCGS# 9045

4477 1904 MS64 NGC. Far and away the most plentiful, and arguably one of the most eye-appealing issues in the series, the 1904 double eagle is an ideal candidate for type representation. This Choice example shows frosty lemon-gold luster and sharp motifs. A few faint luster grazes on Liberty's cheek preclude a Gem grade assessment, but do not overly detract. NGC ID# 26CY, PCGS# 9045

4478 1904 MS64 NGC. CAC. Far and away the most plentiful Type Three Liberty double eagle, the 1904 is widely popular for type representation. This piece showcases sharp design definition and luminous apricot-gold color. Luster disturbances on Liberty's cheek limit the grade. NGC ID# 26CY, PCGS# 9045

4479 1904 MS64 NGC. CAC. Frosty lemon-gold luster and razor-sharp design elements are the hallmarks of this near-Gem representative. A few faint grazes on Liberty's cheek preclude a finer grade, but hardly impede the visual appeal. NGC ID# 26CY, PCGS# 9045

4480 1904 MS64 NGC. CAC. This issue claims the highest-mintage in the Liberty Head double eagle series with production of over 6.2 million coins. In addition to the issue's availability, this Choice representative also features spectacular eye appeal, a full strike, and remarkably few abrasions that make it ideal for type purposes. Housed in a former generation holder. NGC ID# 26CY, PCGS# 9045

4481 1904 MS64 NGC. CAC. Spectacular lemon-yellow color and vibrant mint luster grace the surfaces of this high-end Choice representative. The devices show full definition, and the eye appeal is impressive. Housed in a former generation holder. NGC ID# 26CY, PCGS# 9045

4482 1904 MS64 NGC. CAC. Type enthusiasts looking to acquire a Liberty Head twenty would do well to obtain this beautiful Choice example. Surprisingly few marks adorn each sharply struck side. Yellow-gold color and abundant luster contribute to the CAC-recognized eye appeal. Housed in a prior generation holder. NGC ID# 26CY, PCGS# 9045

4483 1904 MS65 PCGS. Vivid lemon-gold luster adorns nearly undisturbed, frosty surfaces on this Gem Type Three Liberty double eagle representative. Bold design definition completes the immense visual appeal. Housed in an old green label holder. NGC ID# 26CY, PCGS# 9045

4484 1904 MS65 PCGS. For type purposes, the 1904 double eagle is readily available in Gem condition, but this example is in a minority of pieces remaining in old green label holders. Orange-gold luster engulfs each side in frosty radiance, and a few insignificant disturbances on the cheek are seemingly all that preclude an even finer grade. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+
Attractive Type Coin**

4485 1904 MS65+ PCGS. This is the perfect type issue. More than six million pieces were produced, and many thousands have been graded in Mint State at the major services. This is an attractive Gem example, typically well-produced and highly lustrous, with lovely deep orange-gold coloration and few surface marks. Several minor streaks are noted on the obverse fields that fail to impair the assigned grade level. NGC ID# 26CY, PCGS# 9045

**1905 Twenty, MS61
Challenging Low-Mintage Issue**

4486 1905 MS61 PCGS. After the massive mintage of 6.25 million double eagles by the Philadelphia Mint in 1904, the mintage for this denomination decreased enormously in 1905, to just 58,900 coins. This is solidly struck representative overall, showing just a bit of softness on Liberty's coronet; and on the eagle's head and talons. Deeper honey-gold coloration enhances the eye appeal of this moderately marked example. NGC ID# 26D2, PCGS# 9047

4487 1906-S MS63 PCGS. Strong mint luster radiates in bold cartwheels from the centers of this brilliant, medium-gold double eagle. Fully struck and nicely attractive, the coin earns its Select Uncirculated grade with outstanding eye appeal and mint-fresh appearance. A few too many small, non-distracting abrasions are the only grade-limiting factors. NGC ID# 26D6, PCGS# 9051

4488 1907 MS64 PCGS. The transition from the long-lived Liberty design to Saint-Gaudens' new design took place in 1907, yet the Mint was able to produce a high mintage of 1.45 million double eagles prior to the changeover. Gem representatives are exceedingly elusive, making this sharply struck and lustrous Choice example highly collectible. NGC ID# 26D7, PCGS# 9052

4489 1907-S MS62+ NGC. This final-year Liberty twenty is one of over 2 million coins struck at the San Francisco Mint in 1907. The surfaces feature attractive rose-gold coloration with green accents. The strike is a trifle soft over the high points, but the remaining design elements are boldly detailed. High-end for the grade. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

4490 1907 Arabic Numerals MS64 NGC. Among Saint-Gaudens twenties, the 1907 Arabic Numerals is the first collectible issue for most collectors, and enough survive to meet the demand. This near-Gem features lustrous, honey-gold surfaces. The strike is boldly impressed, especially on the Capitol and Liberty's leg. An excellent type coin.

The Valley View Life Collection, Part Three. NGC ID# 26F5, PCGS# 9141

4491 1907 Arabic Numerals MS64 NGC. Vibrant apricot-gold luster and pleasantly clean surfaces are among the pleasing attributes this near-Gem first-year type coin possesses. Liberty's knee is not fully brought up, though the strike is otherwise sharp. NGC ID# 26F5, PCGS# 9141

4492 1907 Arabic Numerals MS64 PCGS. CAC. The 1907 Arabic Numerical issue is the first collectible date in the series, and examples often serve as a first-year type. This sharply detailed Choice representative features orange-gold color overall with lilac and rose accents. A small planchet void occurs under the E in TWENTY. High-end for the assigned grade. Housed in a green label holder. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Double Eagle, MS65 High-End Arabic Numerals Example

4493 1907 Arabic Numerals MS65 NGC. For type purposes, few pieces are as suitable as a Gem example of the first-year issue. This beautiful representative showcases a level of eye appeal that seems to defy its numeric grade. Each side is awash in radiant lemon-gold luster, while the motifs are sharply defined and any minute surface ticks are restricted to secondary areas, leaving this Gem with a high degree of "pop."

The Valley View Life Collection, Part Three. NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Double Eagle, MS65 Important First-Year Saint-Gaudens Variety

4494 1907 Arabic Numerals MS65 PCGS. A wonderfully attractive Gem example of this first-year type, one of a series of design modifications related to the new Saint-Gaudens design. This example is boldly struck, with only minor incompleteness noted in a few areas, and the appealing coloration includes a variegated display of apricot-gold and lilac hues. Other than a faint contact mark in the right obverse field and a handful of microscopic ticks on the lower reverse, surface marks are not an issue. NGC ID# 26F5, PCGS# 9141

1907 Arabic Numerals Double Eagle, MS65 Delightful, Lustrous First-Year Example

4495 1907 Arabic Numerals MS65 NGC. Charles Barber succeeded in his efforts to have the new Saint-Gaudens double eagle design changed, and the design's relief lowered in order to make the coins easier to fully strike up. This resulting variety shows Arabic rather than Roman numerals on the date, making it easy to identify. This is a boldly struck, highly lustrous example with lovely light orange-gold coloration and remarkably clean surfaces. NGC ID# 26F5, PCGS# 9141

4496 1908 No Motto MS65 NGC. Long Rays Obverse. This radiant Gem example is typically well-struck with booming luster and rich orange-gold coloration. Availability and technical quality make this an strong opportunity for the type enthusiast.

The Valley View Life Collection, Part Three. NGC ID# 26F6, PCGS# 9142

4497 1908 No Motto MS65 NGC. Long Rays Obverse. The Mint struck more than 4.2 million double eagles in 1908 prior to the Congressionally mandated addition of IN GOD WE TRUST. This Gem offers softly frosted luster and warm honey-gold color that combine over well-defined and minimally marks surfaces.

The Valley View Life Collection, Part Three. NGC ID# 26F6, PCGS# 9142

4498 1908 No Motto, Wells Fargo Nevada MS66 PCGS. Ex: Wells Fargo Nevada Gold. Many of the high-grade survivors of this plentiful No Motto issue can trace their origin to the Wells Fargo Hoard, these being among the most beautifully preserved Saint-Gaudens double eagles in the series, as they laid in bags undisturbed for decades. This Premium Gem example displays nearly pristine surfaces and well-defined motifs. Swirling yellow and orange-gold hues blanket vibrant, satiny luster on each side. Housed in an old green label holder. PCGS# 99142

- 4499 1908-D No Motto MS64 PCGS. CAC.** While not nearly as available as its Philadelphia-issued counterpart, the 1908-D No Motto double eagle is plentiful enough to be considered for type representation. This is a pleasing Choice example with satiny rose-gold luster. Liberty's knee is not fully brought up, though the strike is otherwise pleasing. NGC ID# 26F7, PCGS# 9143

**1908 Motto Double Eagle, MS64
Scarcely Seen Finer**

- 4500 1908 Motto MS64 NGC.** With a mintage of little more than 150,000 pieces, the 1908 With Motto double eagle is not nearly as plentiful as its No Motto counterpart. Choice examples can be located with frequency, but finer coins are decidedly elusive. This piece shows satiny green-gold luster and well-defined motifs. Light, scattered surface grazes contribute to the grade. NGC has certified only 30 numerically finer representatives (8/14).

The Valley View Life Collection, Part Three. NGC ID# 26F8, PCGS# 9147

- 4501 1909 MS62 PCGS.** A bright, satiny representative of this scarcer Philadelphia Mint issue that becomes scarce at or above the MS63 grade level. The radiant surfaces offer attractive honey-gold and lime-gold coloration. Surface marks are not excessive for the assigned grade. NGC ID# 26FB, PCGS# 9150

**1909-S Double Eagle, MS65
Outstanding Eye Appeal**

- 4502 1909-S MS65 NGC.** Easily available in lower grades, this San Francisco issue is only infrequently encountered in Gem condition, and finer pieces are rare. This representative showcases vibrant honey-gold luster with only a few insignificant ticks, mostly restricted to the reverse. The strike is bold and the eye appeal is immense. NGC has certified just 10 numerically finer representatives (8/14). NGC ID# 26FE, PCGS# 9153

**1910-D Saint-Gaudens Twenty Dollar
Gorgeous Gem Example**

- 4503 1910-D MS65 PCGS.** Although the Philadelphia Mint struck 53,000 more coins than the Denver Mint in 1910, the D-mint coins are more often available in high grades. The strike is typically sharp throughout, and satiny luster blankets the smooth, honey-gold surfaces. Expect strong bidding for this high-end representative. Housed in an old green label holder. NGC ID# 26FG, PCGS# 9155

**1910-D Saint-Gaudens Double Eagle, MS65
Popular, Well-Produced Type Issue**

- 4504 1910-D MS65 PCGS.** A lovely Gem example of this Denver Mint date, this piece exhibits clean honey-gold surfaces and exceptional strike definition. One of the first issues to be readily available as a Gem type coin, the 1910-D is known as a well-produced, popular date that remains reasonably priced at higher grade levels. NGC ID# 26FG, PCGS# 9155

**1910-D Twenty, MS65
Attractive, Solidly Graded Example**

- 4505 1910-D MS65 PCGS.** Of comparable rarity to the Philadelphia Mint issue, which had a higher mintage, this Denver Mint production had solid technical quality and is reasonably available at the current Gem grade level. Attractive coloration, plentiful luster, and minimal surface disturbances make this a solid MS65 example. NGC ID# 26FG, PCGS# 9155

- 4506 1910-S MS64 PCGS.** A well-struck example of this San Francisco issue, this coin displays vibrant luster in shades of green and orange-gold. Close examination reveals light, grade-consistent abrasions. NGC ID# 26FH, PCGS# 9156
- 4507 1910-S MS64 PCGS.** Many 1910-S double eagles were melted during the mid-1930s, contributing the scarcity of Gem-quality survivors. This near-Gem example displays frosty luster in blended shades of green and rose-gold, with well-defined motifs. Scattered, grade-consistent grazes are seen upon close examination. NGC ID# 26FH, PCGS# 9156
- 4508 1911-D MS65 NGC.** An attractively clean Gem, this representative shows deep orange-gold luster over satiny surfaces. Struck from lightly worn dies, as evidenced by slight softness on the central gown folds and microscopic granularity in portions of the fields. NGC ID# 26FK, PCGS# 9158

**1911-D Saint-Gaudens Twenty, MS66
Remarkable, Pleasing Example**

- 4509 1911-D MS66 NGC.** A lovely example of this popular type issue from the Denver mint facility, with soft, shimmering mint frost and remarkably clean surfaces that display mattelike field textures. The strike definition is solid and essentially full on both sides. The warm honey-gold coloration is imbued with pleasing undertones of rose. NGC ID# 26FK, PCGS# 9158

**1911-D Double Eagle, MS66
Strong for the Grade**

- 4510 1911-D MS66 PCGS.** Nearly undisturbed surfaces and rich, satiny luster are the hallmarks of this Premium Gem example, though the boldness of the design elements also contributes to the immense visual appeal. Pale green and rose-gold hues encompass each side. The 1911-D double eagle is not overly challenging in this grade, but numerically finer examples are rare, with PCGS having seen only seven such pieces (9/14). NGC ID# 26FK, PCGS# 9158
- 4511 1911-S MS64 NGC.** Strong honey-gold luster enlivens each side of this minimally abraded Choice representative. Struck from well-worn dies, as evidenced by faint metal flow lines in the recesses, but nonetheless exhibiting sharp design definition. NGC ID# 26FL, PCGS# 9159

- 4512 1911-S MS64 NGC.** A sharply struck representative, displaying frosty luster in varying shades of green and yellow-gold. A few minor abrasions contribute to the grade, though this remains a pleasing Choice example of this San Francisco issue. NGC ID# 26FL, PCGS# 9159
- 4513 1913 MS63 PCGS.** Golden-yellow and golden-orange compete for territory on this broadly lustrous Select Mint State 1913 twenty, kept from a higher grade by a scattering of minor, individually insignificant marks. The strike is bold throughout, creating great eye appeal. NGC ID# 26FN, PCGS# 9161
- 4514 1913 MS63 NGC.** The 1913 double eagle is a conditionally rare issue in Gem condition, though enough eye-appealing examples survive in the MS63 to MS64 grade range to satisfy the majority of collectors. This example displays a bold strike and deep yellow-gold luster. Light, scattered abrasions define the grade. NGC ID# 26FN, PCGS# 9161
- 4515 1913-S MS61 NGC.** Despite its low mintage of only 34,000 coins, the 1913-S issue is readily available in grades up to and including MS64. According to Garrett and Guth, quite a few examples were apparently saved, probably sitting out much of the 20th century in European and South American bank vaults. This example is satiny and boldly detailed, save for softness on Liberty's torch hand and flame and the Capitol building. Scattered small abrasions keep it from a higher grade. NGC ID# 26FR, PCGS# 9163

**1914 Saint-Gaudens Twenty, MS63
Pleasing, Well-Produced Example**

- 4516 1914 MS63 PCGS.** The Philadelphia Mint upped its production quality this year and improved the overall merit of its double eagles, compare to those struck in 1913. This is a satiny, highly lustrous, well-struck example with pleasing honey-gold surfaces that only display a handful of shallow abrasions on the upper obverse. NGC ID# 26FS, PCGS# 9164
- 4517 1914-D MS65 NGC.** The 1914-D is a common issue even in Gem condition. However, finer examples are very scarce. This piece features typical orange-gold color and a boldly impressed strike. Impeccably preserved and highly attractive. Housed in a prior generation holder. NGC ID# 26FT, PCGS# 9165
- 4518 1914-D MS65 PCGS.** Ex: Richard P. Ariagno, M.D. Collection. The exposed right (facing) thigh of Liberty, despite a single nick, shows fewer marks than usually seen at this grade level, and the rich orange-gold color complements a decent while incomplete strike, well brought up in most areas save for the Capitol building. This Gem is an excellent coin for type purposes, as Premium Gems are far more elusive. NGC ID# 26FT, PCGS# 9165
- 4519 1914-D MS65 NGC.** CAC. This gorgeous Gem displays orange-gold coloration overall with peach and rose accents, accounting for the CAC approval sticker. Radiant luster, sharp definition, and the absence of any individually noteworthy impairments further enhance the already-strong appeal. Housed in a former generation holder. NGC ID# 26FT, PCGS# 9165

4520 1914-S MS65 NGC. Green and orange-gold color combine over softly frosted surfaces. The design elements offer bold detail with minor softness over the lower obverse, and handling marks from years of storage are minimal. Housed in a prior generation holder. NGC ID# 26FU, PCGS# 9166

4521 1914-S MS65 NGC. A sharply struck representative, this coin is also free of any significant abrasions that would inhibit the eye appeal. Intermingled green and rose-gold hues encompass each side. Numerically finer representatives of this San Francisco issue are seldom seen. NGC ID# 26FU, PCGS# 9166

4522 1914-S MS65+ PCGS. This high-end Gem displays vivid orange-gold surfaces with no mentionable distractions and vibrant mint luster throughout. The design elements are well-detailed and eye appeal is terrific. NGC ID# 26FU, PCGS# 9166

4523 1914-S MS65+ NGC. CAC. This issue is available up to Gem condition and is scarce in higher grades. The softly frosted, medium yellow-gold surfaces exhibit lavender and mint-green shadings that generate the CAC-affirmed eye appeal. Sharply struck and of premium quality for the grade. NGC ID# 26FU, PCGS# 9166

4524 1915-S MS65 NGC. Satiny, nearly unabraded surfaces display rich apricot-gold luster, while the design elements exhibit overall sharp definition. An available date in lower grades, the 1915-S becomes elusive in grades finer than MS65. NGC ID# 26FW, PCGS# 9168

4525 1915-S MS65 NGC. Overseas hoards have yielded vast quantities of the 1915-S, and examples are readily obtainable through Gem condition. Finer examples are scarce. This coin features frosty luster over honey-gold surfaces an minimal marks. An excellent type coin. Housed in a former generation holder. NGC ID# 26FW, PCGS# 9168

4526 1915-S MS65 PCGS. Vivid apricot and orange-gold hues encompass satiny luster on this Gem representative, while the strike is sharp and only a few small ticks on the obverse limit the grade. Finer coins are seldom encountered. NGC ID# 26FW, PCGS# 9168

**1915-S Saint-Gaudens Twenty, MS65
Attractive and Technically Sound Type Coin**

4527 1915-S MS65 PCGS. CAC. From a mintage of 567,500 coins, this is a readily available issue at grades up to and including the current level of MS65. A highly recommended example for type purposes, with an excellent appearance and fine Gem-quality technical merit. The lustrous orange-gold surfaces display sharply struck devices and minimal surface flaws. Housed in an old green PCGS holder. NGC ID# 26FW, PCGS# 9168

4528 1915-S MS65 NGC. CAC. This is a favorite issue among type collectors because of its quality and availability. Orange-gold color and thick mint frost blanket each wonderfully preserved and minimally marked side. The eye appeal is undeniably strong. NGC ID# 26FW, PCGS# 9168

**1916-S Double Eagle, Bold MS65
An Attractive, High-End Coin**

4529 1916-S MS65 NGC. CAC. The 1916-S was a scarce date in the series prior to the discovery of a South American hoard in 1983, which yielded 4,000 mint condition examples. Today the issue is available up to the Gem level, and finer coins are scarce. This piece is certainly among the finest certified with an MS65 designation. The surfaces exhibit softly frosted luster and intense orange-gold color. A minute tick on Liberty's right (facing) leg is the only mentionable mark. High-end for the grade with CAC approval for quality. Housed in a former generation holder. NGC ID# 26FX, PCGS# 9169

**1916-S Double Eagle, MS65
Vibrantly Lustrous and Well-Preserved**

4530 1916-S MS65 NGC. CAC. Garrett and Guth contend that this issue displays typically weak luster, a fact contested by the current Gem example. Well-struck with a vibrant satiny shimmer across both sides, and attractive light lime-green and rose patina. There are a couple of wispy grazes in the outer field areas, but they are too superficial to prevent the MS65 assessment by NGC. NGC ID# 26FX, PCGS# 9169

**1920 Saint-Gaudens Twenty, MS64
Prohibitively Rare Any Finer**

4531 1920 MS64 NGC. This issue is moderately available in MS64 and lower grades, but at the Gem level its availability plunges even more drastically than most other issues in the series; NGC and PCGS have seen only eight pieces in MS65 (seven coins and one coin, respectively), with none finer (8/14). This near-Gem example displays vibrant orange-gold luster and sharp design elements. There are a few minute surface abrasions noted upon close examination, though the eye appeal is high-end for the issue. NGC ID# 26FY, PCGS# 9170

1922 Twenty Dollar, MS65

4532 1922 MS65 PCGS. A charming olive-gold Gem that boasts booming luster and exemplary preservation. The strike is crisp and the eye appeal is exceptional for the issue. Although several dates from the 1920s are readily obtained above the MS65 level (especially the 1924 and 1927), the 1922 is a condition rarity any finer. NGC ID# 26G3, PCGS# 9173

4533 1922-S AU58 PCGS. CAC. The well-detailed design elements show just a trace of wear on the high points and the pleasing orange-gold surfaces are lightly abraded. Vibrant mint luster enhances the strong visual appeal. NGC ID# 26G4, PCGS# 9174

1923 Double Eagle, Gleaming MS65 Seldom Seen in Finer Grades

4534 1923 MS65 PCGS. Only 566,000 1923 double eagles were produced, but enough survived the melting pot via overseas hoards that the date is fairly available for type purposes. Still, examples grading higher than MS65 are prohibitively rare. This Gem displays swirling orange and green-gold hues over the obverse, with orange and bronze-gold ribbons stretching diagonally across the reverse. The designs are well-impressed, and a lens reveals only a few scattered, minor imperfections not readily obvious to the unaided eye. A scant three coins have graded numerically finer at PCGS, with none so graded at NGC (9/14). NGC ID# 26G5, PCGS# 9175

1923 Double Eagle, MS65 Rarely Seen Finer

4535 1923 MS65 PCGS. The 1923 double eagle is easily available in grades through MS64, but its availability declines somewhat in MS65, and finer pieces are exceedingly rare. This Gem representative displays a beautiful bold strike and satiny honey-gold luster. A few scattered, minute ticks are observed upon close examination, not out of line for the grade. PCGS has encapsulated only three numerically finer representatives (8/14). NGC ID# 26G5, PCGS# 9175

4536 1923-D MS65 NGC. The 1923-D, known for sharp strikes and radiant luster, is widely popular among type specialists. This frosty example is firmly in the upper end of its assigned grade, with sharp motifs and almost no readily perceptible surface flaws. Swirling hues of rose, green, and yellow-gold luster complete the immense visual appeal. NGC ID# 26G6, PCGS# 9176

4537 1923-D MS65 NGC. Deep rose-gold luster enlivens frosty surfaces on this Gem branch mint type coin. Slight softness is noted on Liberty's knee, though the strike is otherwise well-executed. A few grade-consistent grazes are present. NGC ID# 26G6, PCGS# 9176

4538 1923-D MS65 NGC. CAC. The 1923-D is a readily available issue in the series and a frequent choice among type collectors. This Gem is minimally marked, and the luster, strike, and eye appeal are certainly suggestive of a higher grade. Housed in a prior generation holder. NGC ID# 26G6, PCGS# 9176

4539 1923-D MS66 PCGS. Vivid orange-gold color and vibrant mint luster are the calling cards of this delightful Premium Gem. The design elements are sharply detailed and the well-preserved surfaces are free of mentionable distractions. NGC ID# 26G6, PCGS# 9176

4540 1924 MS65 PCGS. Well struck and highly lustrous, this pleasing Gem example displays light orange-gold toning that is intermingled with accents of pastel rose, mint-green, and high-point peach coloration. A couple of small alloy spots are noted on the obverse. NGC ID# 26G7, PCGS# 9177

4541 1924 MS66 NGC. This remarkably preserved Premium Gem offers beautiful sun-gold color and swirling mint luster. A crisp impression further enhances the visual appeal, and magnification fails to show any noteworthy flaws. An excellent type candidate. NGC ID# 26G7, PCGS# 9177

4542 1924 MS66+ NGC. The 1924 is far and away the most plentiful Saint-Gaudens double eagle in the series, and is ideal for type representation. This Plus-graded Premium Gem example displays vibrant, frosty luster in shades of green and honey-gold, while the nearly undisturbed surfaces beautifully showcase sharp design definition. Finer pieces are elusive. NGC ID# 26G7, PCGS# 9177

- 4543 1925 MS65 PCGS. CAC.** Frosty orange-gold luster engulfs each side of this Gem representative, while the design elements exhibit pleasing definition and the surfaces reveal only grade-consistent abrasions. Housed in an old green label holder. NGC ID# 26GA, PCGS# 9180
- 4544 1925 MS66 NGC.** Sun-gold color and lavender accents blanket each sharply struck side. This Premium Gem exhibits vibrant mint luster, and only a few small ticks likely prohibit an even higher grade. Good for type. NGC has certified only 25 numerically finer submissions (8/14). NGC ID# 26GA, PCGS# 9180
- 4545 1926 MS65 NGC.** The devices are fully struck with strong detail on the Capitol. Frosty luster and warm honey-gold color blend over each side to provide this Gem with CAC-recognized visual appeal. Carefully preserved and housed in a former generation holder. NGC ID# 26GD, PCGS# 9183

**1926 Saint-Gaudens Twenty, MS66+
Exceedingly Rare Any Finer**

- 4546 1926 MS66+ NGC.** Like many double eagle issues that were preserved in quantity in overseas bank vaults, the 1926 is easily obtainable in grades through MS66. In MS67, however, the date becomes a major rarity, with NGC having encapsulated only eight coins at that level (8/14). This Plus-graded Premium Gem displays frosty green-gold luster and is virtually free of any discernable abrasions. The strike is well-executed, with sharp separation on Liberty's torch fingers. The eye appeal is excellent. NGC ID# 26GD, PCGS# 9183
- 4547 1927 MS65 NGC.** The 1927 twenty is a plentiful issue in all grades and often serves as a type for the Saint-Gaudens series. This lustrous Gem features gorgeous honey-gold color and boldly impressed devices. *The Valley View Life Collection, Part Three.* NGC ID# 26GG, PCGS# 9186
- 4548 1927 MS65 NGC.** The appeal of this Saint-Gaudens Gem is undeniable. For the type collector, it offers an opportunity to obtain a carefully preserved and lustrous representative with vivid orange-gold coloration and no singularly distracting impairments. Well-struck. *The Valley View Life Collection, Part Three.* NGC ID# 26GG, PCGS# 9186
- 4549 1927 MS65+ PCGS.** Green and rose accents complement butter-gold color overall. This minimally marked Gem shows sharply detailed design elements and swirling cartwheel luster. The availability of the 1927 double eagle makes this an ideal type representative. NGC ID# 26GG, PCGS# 9186

- 4550 1927 MS65+ PCGS. CAC.** As one of the most plentiful, and also most eye-appealing issues in the series, the 1927 double eagle is widely popular for type representation. This Plus-graded Gem example displays well-frosted straw-gold luster, with a couple tiny alloy spots noted on the reverse. A few small grazes on Liberty's raised knee and torso are seemingly all that preclude full Premium Gem status, leaving this coin with a high degree of raw eye appeal. NGC ID# 26GG, PCGS# 9186
- 4551 1927 MS66 NGC.** While its San Francisco and Denver counterparts are more difficult (or nearly impossible) to acquire, the 1927 P-mint twenty is the second most available issue in the series. This high-end piece is remarkably clean and mostly well-struck, save for mild softness over Liberty's leg and the Capitol building. NGC has certified only 56 examples numerically finer (8/14). *The Valley View Life Collection, Part Three.* NGC ID# 26GG, PCGS# 9186
- 4552 1927 MS66+ NGC.** Coruscating luster shimmers over the khaki-gold surfaces of this boldly defined Premium Gem double eagle. A few small alloy spots are noted, but they do not affect the eye appeal. NGC has certified only 56 coins finer (8/14). NGC ID# 26GG, PCGS# 9186
- 4553 1927 MS66+ NGC.** The 1927 Saint-Gaudens double eagle is readily available as fine as Premium Gem. However, in Superb Gem condition it is a true condition rarity. This Plus-designated coin showcases frosty luster and orange-gold color over essentially pristine surfaces. The strike is strong throughout, and a small alloy spot occurs above the O in GOD. NGC ID# 26GG, PCGS# 9186
- 4554 1928 MS65 NGC.** A beautiful representative of Saint-Gaudens' double eagle design, this Gem displays pleasing honey-gold surfaces with coruscating luster and sharply detailed design motifs. The few scattered marks are well-hidden and do not distract. NGC ID# 26GK, PCGS# 9189
- 4555 1928 MS65 PCGS. CAC.** Rich orange and rose-gold hues accent frosty green-gold luster on each side of this Gem example. The strike is boldly impressed, and the preservation is outstanding, even for the MS65 grade level. Housed in an old green label holder. NGC ID# 26GK, PCGS# 9189
- 4556 1928 MS65 PCGS. CAC.** Struck to the extent of over 8.8 million coins, the 1928 double eagle claims the highest mintage among all Liberty Head or Saint-Gaudens twenties. This remarkable Gem is thickly frosted and sharply detailed, and orange-gold color dominates the minimally abraded surfaces. Housed in a green label holder. NGC ID# 26GK, PCGS# 9189

TERRITORIAL GOLD

(1837-1842) C. Bechtler Five Dollar, AU Details 134G, With Star, K-20

4557 (1837-42) C. Bechtler Five Dollar, 134G, With Star — Repaired — PCGS Genuine. AU Details. K-20, R.4.

Probably produced either during the fifth or sixth series of Bechtler coinage and dating from between 1837 to 1842, this is an example of the most available of the Bechtler half eagles, even if it is a very scarce R.4. variety. Well-struck with bright green-gold surfaces that show faint hairlines but no large or obvious abrasions, the “Repaired” designation by PCGS is difficult to verify, even with the aid of a high-powered lens. The reverse die is rotated dramatically in relation to the obverse; clockwise by more than 100 degrees. An attractive example of this popular, conditionally scarce issue. Population: 12 in 50, 37 finer (8/14). PCGS# 10097

August Bechtler Gold Dollar K-24, Choice About Uncirculated

4558 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge AU55 PCGS. K-24, R.3. Long after the opening of the branch mint at Charlotte, local residents still preferred the private gold coinage of the Bechtlers, especially in the sparsely populated areas of central and western North Carolina. Without a doubt, the Charlotte Mint and its officials were considered outsiders. The Bechtlers, Christopher and August, gained the trust of their neighbors through the production of well-made gold coins, such as this gold dollar that contained 27 grains of 21 karat gold. This Choice AU specimen has a wavy planchet as usual, with brilliant green-gold color and nearly full luster. An impressive specimen. Listed on page 382 of the 2015 Guide Book. PCGS# 10040

CALIFORNIA FRACTIONAL GOLD

4559 1853 Liberty Round 50 Cents, BG-415, Low R.5, MS64 NGC. State II. This is a well-preserved, sharply struck example of one of the scarcer round fifty cent pieces produced by M. Deriberpie in 1853. Deriberpie struck fractional gold pieces in that city only for a limited period between the fall of 1852 and January 1854. This coin is well-struck for the variety, with moderately reflective fields and medium green-gold color. Light clash marks are noted on the reverse, as is diagnostic of the later die state. This piece is the sole finest BG-415 example certified by NGC (9/14). PCGS# 10451

4560 1870 Liberty Octagonal 25 Cents, BG-713, R.4, MS66 PCGS. A lovely prooflike piece with undisturbed surfaces and deep green- gold toning. As well struck as an example of this scarcer fractional issue can be. Population: 8 in 66, 1 finer (8/14). PCGS# 10540

1871 Liberty Octagonal Quarter Dollar BG-717, MS67

4561 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS67 PCGS. State III. A moderately obtainable issue made by Frontier & Co. in 1871. Die polishing has weakened some of the low-relief elements on the obverse of this piece, and the reverse is lightly rusted among the wreath leaves. The strike is sharp, however, with apricot and green-gold hues complimenting semiprooflike fields on each side. Population: 4 in 67, 0 finer (9/14). PCGS# 10544

4562 1870 Liberty Round 25 Cents, BG-835, R.3, MS65 NGC. A well-detailed piece with flashy, semiprooflike surfaces that are abrasion-free. A pleasing example of this round quarter dollar gold variety. PCGS# 10696

1870 ‘Goofy Head’ Round Quarter Dollar BG-867, MS66 Prooflike

4563 1870 Goofy Head Round 25 Cents, BG-867, R.4, MS66 Prooflike NGC. By an unknown maker, per the Breen and Gillio reference. This piece displays bright yellow-gold color with deep mirroring in the fields. The central devices are sharp, though the reverse borders are weakly defined. Several prominent die cracks are seen on the reverse, and there is a small planchet lamination on the obverse near the rim at 10 o’clock. Census: 1 in 66 Prooflike, 0 finer (9/14). PCGS# 710728

4564 1859 Liberty Octagonal 50 Cents, BG-901, High R.6, MS65 Prooflike NGC. The 9 in the date is clearly repunched. This medal-turn example has flashy fields and a precise, consistent strike. Portrait details are partially lapped, as usual for the rare Breen-Gillio marriage. Census: 2 in 65 Prooflike, none finer (9/14). PCGS# 710759

4565 1875 Indian Octagonal 50 Cents, BG-946, R.4, MS65 Prooflike NGC. Spectacular prooflike contrast and lustrous, lemon-gold surfaces generate outstanding eye appeal for this octagonal Period Two 50 cent piece. Walter Breen and Ron Gillio (2003) note: "Weakness on hair behind ear (always present) may represent die failure associated with the break across cheek. Typically brilliant Prooflike Uncirculated." Census: 2 in 65 Prooflike, 3 finer (8/14). *The Valley View Life Collection, Part Three*. PCGS# 910804

4566 1873 Indian Octagonal 1 Dollar, BG-1123, High R.4, MS62 PCGS. A well-detailed specimen with prooflike fields and lightly abraded surfaces. The antique-gold devices overlook glassy, sea-green fields. Population: 17 in 62, 23 finer (8/14). PCGS# 10934

**1875 Octagonal Indian Head Gold Dollar
BG-1127, MS64 Prooflike**

4567 1875 Indian Octagonal 1 Dollar, BG-1127, R.4, MS64 Prooflike NGC. Yellow gold plating over 9-karat gold core. This is an attractive near-Gem example of one of the slightly more plentiful octagonal gold dollar varieties produced by Christopher Ferdinand Mohrig of San Francisco in 1875. The strike is slightly soft in the centers, as always, though the field-motif contrast is pleasing. Medium green-gold color blankets both sides. Struck from rotated dies. Census: 2 in 64 Prooflike, 1 finer (9/14). PCGS# 710938

NUGGETS

Two Nuggets, 15.5 Grams and 7.4 Grams

4568 Two Nuggets, 15.5 grams and 7.4 grams. The two nuggets are apparently from the same undetermined source. Both exhibit dusky golden-brown color. The lighter nugget shows considerable quartz intermixed with the gold. (Total: 2 pieces)

**Two Australian Nuggets
16.1 Grams and 8.2 Grams**

4569 Two Australian Nuggets, 16.1 grams and 8.2 grams. These two Australian nuggets appear to be alluvial. The larger of the two weighs 16.1 grams and the small one is 8.2 grams. Deep reddish-russet encrustation is seen on each in the recessed areas. (Total: 2 pieces)

**Gold Nugget From Montana
Dusky Brown Patina, 21.7 Grams**

4570 Montana Gold Nugget, 21.7 grams. Deep brown patina covers each side of this compactly formed nugget from Montana with only slight golden brightness showing on part of one side.

**Australian Nugget With Distinctive Shape
23.6 Grams**

4571 Australian Nugget, 23.6 grams. This alluvial 23.6 gram Australian nugget has a pair of horn-like protrusions that give it a distinctive character. The recesses show deep reddish-russet patina.

**Bright 36.6 Gram Nugget
Intricately Detailed**

4572 Bright 36.6 gram Gold Nugget. This 36.6 gram nugget is bright golden with an intricate, crystalline structure and deep recesses. No quartz or patina is apparent. A prize for the nugget collector.

Australian Gold Nugget, 43.4 Grams

4573 Australian Gold Nugget, 43.4 grams. This Australian alluvial nugget weighs 43.4 grams and has an unusual shape. The surfaces show slight reddish patina and an occasional presence of quartz intermixed.

**Alluvial Gold Nugget, 75.9 Grams
Interesting and Distinctive Shape**

4574 Alluvial Gold Nugget, 75.9 grams. This fascinating 75.9 gram alluvial nugget has a substantial central hole created by eons of water erosion. Three small outcroppings of quartz are seen, each close to the hole in the center. Bright color with just a bit of reddish patina.

S-Shaped 152.6 Gram Gold Nugget

4575 Alluvial 152.6 gram Gold Nugget. This substantial 152.6 gram nugget is roughly in the shape of the letter S. Considerable smoothing is seen over the high points and deep russet patina present in the recesses as well as the occasional dab of quartz.

PREMIER SESSION FOUR

COLONIALS

1662 Oak Tree Twopence, XF45
Well-Preserved Noe-34 Example

- 4576** 1662 Oak Tree Twopence XF45 PCGS. Noe-34, W-240, Salmon 1-B, R.5. 11.1 gn. This Choice XF Oak Tree twopence is a fairly well-preserved example of this elusive early American coin. The obverse was struck from a misaligned die, but the reverse is perfectly centered. The surfaces are sharply defined overall with a spot of weakness on each side — the upper-right obverse and the corresponding area on the upper-left reverse. The silver-gray surfaces show no mentionable abrasions on either side. Listed on page 38 of the 2015 *Guide Book*.
Ex: FUN Signature (Heritage, 1/2002), lot 5003; New York Signature (Heritage, 6/2002), lot 5630. PCGS# 17

1662 Oak Tree Twopence, Small 2, AU58
Rare Noe-31, W-240, Salmon 1-A

- 4577** 1662 Oak Tree Twopence AU58 NGC. CAC. Noe-31, W-240, Salmon 1-A, High R.6. Small 2. 10.6 gns. A horizontal die break from the top of the 2 in the date identifies the rare Noe-31 variety. The obverse is misaligned toward 5:30, as seen on the two Ford examples of the variety (lot XII:69 is Noe-31.5), while the reverse centering is nearly perfect. This golden-brown and gunmetal-gray example is surprisingly free from marks aside from a faint thin mark concealed between branches of the tree. Substantial luster shimmers from the legends, tree, and beads. Listed on page 38 of the 2015 *Guide Book*. Census for Small 2 Variety: 3 in 58, 9 finer (8/14).
Ex: Central States Signature (Heritage, 4/2008), lot 2213. PCGS# 17

1652 Oak Tree Shilling, VF30
Noe-1, Flat Top 5

- 4578** 1652 Oak Tree Shilling VF30 PCGS. Noe-1, W-430, Salmon 1-A, R.3. 69.4 gn. About a third of the planchet was not fully impressed on this Noe-1, reportedly the earliest rocker press variety for the Oak Tree shillings. The rest of the coin shows a strong strike and near-perfect centering, which suggests either the pronounced waviness of the planchet or uneven pressure when the planchet was struck (or both factors) created the void. Still, a handsome piece with old-silver patina and considerable eye appeal. Listed on page 39 of the 2015 *Guide Book*. PCGS# 20

1652 Oak Tree Shilling, Noe-14, VF35

- 4579** 1652 Oak Tree Shilling VF35 PCGS. Noe-14, W-530, Salmon 11a-Gi, R.4. 69.4 gn. Noe-14. As with most Noe-14s, this piece is slightly off-center on the obverse, while the reverse is perfectly centered. This is a result of the strip slipping as it was squeezed from between the rocker dies during striking, common on Oak Tree and even more pronounced on the Pine Tree coinage. This piece was struck on a slightly wavy planchet so that the obverse details are weak on the tree but strong on THVSET, while the reverse is strong throughout. The surfaces are rather deeply toned in shades of deep sea-green and rust. The fields, especially on the reverse, display numerous shallow crisscrossing pinscratches. Listed on page 39 of the 2015 *Guide Book*. PCGS# 20

1652 Pine Tree Sixpence, Noe-33, XF40

- 4580** 1652 Pine Tree Sixpence XF40 PCGS. Noe-33, W-670, Salmon 2-B, R.3. 30.9 gn. A deep battleship-gray representative with attractive surfaces and the usually seen die break above the V in VI. The obverse is somewhat off-center toward 12 o'clock, as usual for Noe-33, while the reverse is slightly off-center toward 7 o'clock, affecting the tops of the legends in that area. The central obverse is wavy, as made from a rocker press. Listed on page 39 of the 2015 *Guide Book*.

Ex: Palm Beach Signature (Heritage, 11/2004), lot 5004; San Jose Collection / FUN Signature (Heritage, 1/2009), lot 10. PCGS# 22

1652 Pine Tree Shilling, AU53
Noe-9, Much Luster Remains

- 4581** 1652 Pine Tree Shilling, Large Planchet AU53 PCGS. Noe-9, W-750, Salmon-7a-Diii, R.6. 64.8 gn. A shorter, small 6 in the date is diagnostic of this scarce variety. The advanced state of the die is particularly noticeable on the tree, which appears weak and somewhat faded. The letters THVSET show marked strengthening of the characters compared to previous die states. Considerable luster remains on both sides of the coin, with pleasant iridescence over the silver surfaces. The strike is well-centered on a fully round planchet, with no mint-related clips to adjust the weight. Listed on page 39 of the 2015 *Guide Book*. PCGS# 23

1652 Pine Tree Shilling, VF20
Noe-29, W-930, Small Planchet

- 4582** 1652 Pine Tree Shilling, Small Planchet VF20 PCGS. Noe-29, W-930, Salmon 11-E. R.3. 69.4 grains. An attractive glossy, steel-gray example, misaligned on a smaller-than-normal planchet resulting in (M)ASATHV(SETS) largely pushed off the coin, considerably off-center left. The reverse is well-centered in comparison, although squeezed off the edges as a result of the small diameter. Struck from a late state of the obverse die, with noticeable die cracks at the top of SETS. The Noe-29 variety is distinctive with the bottom-most branches curving first downward, then sharply upwards at the ends. The reverse shows punctuation between NEW and England. Listed on page 39 of the 2015 *Guide Book*. PCGS# 24

(1670-75) St. Patrick Farthing, AU50
Rare This Nice
Breen-208, "Nothing Below King"

- 4583** (1670-75) St. Patrick Farthing AU50 PCGS. Breen-208, W-11500 Walter Breen estimated about 70 different varieties exist of the Breen-208 "Nothing Below King" St. Patrick farthings. This example is extremely sharp, with minimal wear that allows some of St. Patrick's facial features to remain visible. FLOREAT is smaller than some varieties and distant from the crown. Toned a rich chocolate brown, the devices are a lighter tan for nice contrast. The surfaces are lightly granular on each side. There is little evidence of a brass splasher on the crown. Listed on page 41 of the 2015 *Guide Book*. Population: 9 in 50, 12 finer (9/14). PCGS# 42

1776 Continental Dollar, AU Details
CURRENCY, Pewter, Newman-2C

- 4584** 1776 Continental Dollar, CURRENCY, Pewter — Corroded — NCS. AU Details. Newman-2C, W-8455, R.3. It is believed that the Continental Currency dollars were issued late in 1776 by the Continental Congress. They were intended to take the place of one dollar paper notes issued earlier in the year. Specimens are known in brass, pewter, and silver, from seven different die combinations. The pewter specimens account for the great majority of the coins we know about today.

The present coin is struck in pewter and features the correct spelling of CURRENCY, without the EG FECIT notation, identifying the Newman-2C variety. As noted on the holder, the surfaces are somewhat granular and a few dark spots of corrosion appear on both sides. The design elements are sharply rendered and the lustrous surfaces are vividly toned in shades of champagne-gold and lavender. Listed on page 85 of the 2015 *Guide Book*. PCGS# 794

**1787 Newman 13-X Fugio, MS64 Brown
Misaligned Dies**

- 4585** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Brown PCGS. Newman 13-X, W-6855, R.2. The Newman 13-X was a significant part of the Bank of New York hoard. This example has heavy obverse clash marks and a vertical die crack at the bottom of the reverse, the usual state for the variety. However, unusual is the noticeable misalignment of the dies. The obverse is clearly off-center to 3 o'clock while the reverse is centered. Splendid olive-brown surfaces with cartwheel luster and a few scattered toning spots. Listed on page 87 of the 2015 *Guide Book*. PCGS# 883

**1787 Newman 13-X Fugio, MS64 Red and Brown
Bank of New York Hoard Variety**

- 4586** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Red and Brown PCGS. CAC. Newman 13-X, W-6855, R.2. A Bank of New York Hoard variety, the Newman 13-X was a major component of that large group, variably estimated at between 5,000 and 9,000 Fugio coppers. This Red and Brown example has delicate blue toning and considerable orange mint luster on its light brown surfaces. Unlike many examples, this piece has minimal planchet laminations or flaws. Listed on page 87 of the 2015 *Guide Book*. PCGS# 884

**1783 Chalmers Shilling, VF30
Long Worm Variety, W-1790**

- 4587** 1783 Chalmers Shilling, Long Worm VF30 PCGS. CAC. Breen-1012, W-1790, R.4. John Chalmers was a Maryland silversmith whose private issues attempted to replace problematic worn-out and cut-down Spanish-American silver. The significance of his enigmatic types have long been debated by specialists. The "worm" is the vertical object between the two birds. Long and Short Worm varieties are known, with the Long Worm considered slightly rarer. This lightly abraded cream-gray example shows a well-defined obverse and a softer impression on the central reverse. Listed on page 51 of the 2015 *Guide Book*. PCGS# 595
-

**Bar Copper, Pleasing AU50
W-8520, Popular Circa 1785 Issue**

- 4588 (1785) Bar Copper AU50 PCGS. Breen-1145, W-8520, R.4.** The Bar coppers have seen much popularity among collectors in recent years, despite their enigmatic origins. This pleasing, AU natural brown example displays scattered olive patina in the protected areas. The reverse shows the diagnostics seen on originals (a small "spur" on the right end of the second bar from the top, and a faint die break connecting the sixth and seventh bars). This piece has smooth, clean surfaces and is struck slightly off-center. This piece is housed in an early blue-label PCGS holder. When we last offered this piece in 2006, it brought \$9,458.75. Listed on page 74 of the 2015 *Guide Book*.
Ex: Tide Collection / Dallas Signature (Heritage, 10/2006), lot 24. PCGS# 599

**1787 Immunis Columbia Copper, XF40
Large Eagle Reverse, Plain Edge, W-5680**

- 4589 1787 Immunis Columbia Piece, Eagle Reverse XF40 PCGS. W-5680, High R.4.** A scarce issue, but often the only collectible variety that is available from the Immunis Columbia series of late Federation-era coppers. This dark chocolate-brown example is smooth, pleasingly unmarked, and well-detailed for the assigned grade. The moderate wear suggests these were circulating pieces, whether struck as patterns or not (a subject of continuing debate among Colonial issues scholars). Listed on page 55 of the 2015 *Guide Book*. Population: 13 in 40, 39 finer (9/14). PCGS# 841

**1796 Castorland Medal, XF45
Silver Original, W-9100**

- 4590 1796 Castorland Medal, Silver XF45 NGC. W-9100, R.5.** The Castorland medals, or jetons, were issued in connection with a proposed French settlement near Watertown, New York, that never became fully established. It is thought that Benjamin Duvivier engraved the dies. This Choice XF specimen shows light wear on the well-detailed design elements and the lightly marked surfaces retain traces of mint luster under shades of gold and lavender-gray toning. Listed on page 77 of the 2015 *Guide Book*. Census: 1 in 45, 5 finer (9/14). PCGS# 653

**(1792) Washington Born Virginia Copper, VF20
W-10730, Smooth, Glossy Surfaces**

- 4591** 1792 Washington Born Virginia Cent, Inscribed Reverse VF20 PCGS. Baker-60, W-10730, R.5. This is the “second die” as listed by Walter Breen, and it is the more plentiful of two varieties. An easy attribution point is the relationship between TE of UNITED and the 1 of 1789. The “first die” has the 1 of the date below the space between TE, favoring the E. The “second die” has the digit 1 below the right base of the T. There are several other differences between these dies. This issue is described as “undated,” but it is generally believed that it was issued circa 1792. The inscription on the reverse lists three different years, 1775, 1783, and 1789, representing important years in the life of Washington.

Walter Breen attributed the coinage of these pieces to Birmingham, England, and he described them as medals that were not fancy enough to suit the desires of medal collectors in that country. Therefore, the Washington Born Virginia pieces were shipped to America, where they circulated, most likely as one cent coins, due to their size relationship to the federal cents.

This is a lovely example with smooth dark brown surfaces and lighter tan at the periphery. The surfaces are not pristine, but are far nicer than normally encountered, with only minuscule abrasions. The only mentionable flaw is a short diagonal scratch at the upper reverse, from the border at 12:30 to the E of GENERAL. While not a major rarity in the colonial series, this is an extremely important offering of a scarce issue that is seldom found nice. Listed on page 82 of the 2015 *Guide Book*.

Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 5040; *Long Beach Signature* (Heritage, 2/2005), lot 5055. PCGS# 723

**1820 North West Company Token, Brass, VF30
Breen-1083, W-9250**

- 4592** 1820 North West Company, Brass VF30 PCGS. Breen-1083, W-9250, R.4. These extremely rare tokens, produced by John Walker in Birmingham, England, were reportedly exchanged with Native Americans for beaver pelts in the Pacific Northwest. All but two of the known specimens, including the current example, are holed at 12 o'clock. A well-detailed olive-green token with two or three superficial, diagonal die cracks that bisect the obverse. Struck in brass. Listed on page 78 of the 2015 *Guide Book*. Population: 2 in 30, 1 finer (9/14). PCGS# 952

**1820 North West Company Token, XF Details
W-9250, Used in the Pacific Northwest Indian Trade**

- 4593** 1820 North West Company, Engrailed Edge — Holed, Corroded — NCS. XF Details. Breen-1083, W-9250. Struck in brass with an engrailed edge. The North West Company tokens were likely struck in Birmingham by John Walker & Company, but were used in the Indian trade in the Pacific Northwest. The North West Company merged with the Hudson's Bay Company in 1821, though these tokens continued in use throughout the decade. This piece is heavily corroded, as are almost all known examples. A clean hole at 12 o'clock is also normal for the issue, as Bowers knows of only two pieces that are reported without holes. The holes were bored so that the tokens could be hung on a string, and are diagnostic of pieces that were actually used in trade and not saved by period collectors. Despite the given impairments, this piece is boldly struck and well-detailed. Each side displays deep russet-brown color, though the central reverse shows the bright brass planchet surface. Listed on page 78 of the 2015 *Guide Book*. PCGS# 952

HALF CENTS

**1802/0 Half Cent, Fine 12
C-2, Reverse of 1802**

- 4594** 1802/0 Reverse of 1802, C-2, B-2, R.3, Fine 12 PCGS. The C-2 variety, known as the Reverse of 1802 or the Second Reverse, was struck before and after the rare C-1 variant, known as the Reverse of 1800. Most examples exist in lower circulated grades, and the finest-known examples are in Extremely Fine condition. Dark chocolate-brown patina covers the surfaces. Much of Liberty's hair detail is worn away, but the remaining design elements show pleasing detail. HALF CENT is lightly struck. Our EAC grade VG8. PCGS# 35125

**1809 Half Cent, C-1, B-2, VF25
Attractive Mid-Grade Example**

- 4595** 1809 C-1, B-2, FS-301, High R.5, VF25 NGC. Manley Die State 2. Star 7 is recut on this rare variety. Most known examples are well-worn or plagued by environmental impairments, and problem-free examples with any degree of moderate detail remaining are a numismatic find for the variety specialist. This piece is just such a coin, with smooth chocolate-brown surfaces and somewhat glossy patina. A few minor marks are noted near the lower reverse rim and around the L in HALF, not out of line for the VF grade level. The reverse is minutely off-center toward 12 o'clock, a normal characteristic of this variety which was struck with the reverse die slightly out of alignment with the obverse. Our EAC grade Fine 15. PCGS# 35218

**1856 C-1 Half Cent, MS65 Red
None Finer at Either Service**

- 4596** 1856 C-1 MS65 Red NGC. C-1, B-2a, R.1. A rare, full-Red example with a bold strike including the star centers, dentils, and leaf detail. No hoard of 1856 half cents in original mint Red have been found, explaining the rarity of the issue in full Red. A scattering of small flecks are seen on each side with a glass, but the visual impression of the coin is a coppery, flame-red coloration. No significant marks or abrasions interrupt the Gem surfaces. Our EAC grade MS64. NGC Census (all varieties) : 2 in 65 Red, 0 finer (9/14). PCGS# 35338

PROOF BRAIDED HAIR HALF CENT

**1844 Original Half Cent, PR65 Brown
B-1, Only 35 Known**

- 4597** 1844 Original PR65 Brown NGC. B-1, R.5. Small Date, Large Berries. In his *Proof Encyclopedia* (1989), Breen wrote of this issue: "About sixteen known, none of them being restrikes; four are in museums (Smithsonian, from Mint proof set; ANS; Johns Hopkins; Mass. Historical Society)." Today, the number of Original 1844 half cent proofs known stands at 35 examples. This Gem representative shows light chocolate-brown color overall with golden-tan and jade-green elements. As one would expect, the devices are needle-sharp, and signs of contact are minimal. Mild reflectivity occurs in the fields. Our EAC grade PR60. NGC ID# 26ZA, PCGS# 1272

LARGE CENTS

1793 Chain Cent, VF Sharpness
Sheldon-1, AMERI.

4598 1793 Chain, AMERI., S-1, B-1, R.4 — Environmental Damage — PCGS Genuine. VF Details. Sheldon-1 was likely the first variety produced of the Chain cent type, included in the slightly more than 11,000 large cents delivered on March 1, 1793. Chain cent production in general lasted only until March 12, by which time 36,103 pieces had been coined. The halt in coinage primarily due to a shortage of planchets, though by the time additional blanks were prepared, the Wreath type dies had replaced those of the Chain variant.

This first variety of the Chain type exhibits AMERICA abbreviated as AMERI. It has been suggested that this may have been deliberate, following the style of the Masonic Unfinished Pyramid on the reverse of the Great Seal. More likely, however, the word was abbreviated as a result of poor word spacing by the engraver, who seems to have run out of room for the entire word. This was corrected on later dies.

A few examples of this variety are known in higher grades (XF and finer), likely saved as first-year issue curiosities, but most examples are well-worn and often impaired to some extent. This representative falls into the latter group; wear is not excessive, though the eye is drawn to some fine granularity over the right-hand portion of the reverse. All legends are clear and the borders are strong, with deep olive-brown color overall. A still-pleasing example of this scarce variety. Our EAC grade VG10. PCGS# 35432

1793 Chain Cent, Fine 15
AMERICA, Periods, S-4

4599 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, Fine 15 ANACS. Breen Die State II. The 1793 Chain cents were among the first regular-issue coins struck inside the walls of the Philadelphia Mint. The dies were engraved by Chief Coiner Henry Voigt, as no engraver had been hired by the time coinage operations began. Unfortunately, the Chain reverse proved unpopular with the American public, as it was seen as an emblem of slavery, rather than unified strength. The design soon gave way to the Wreath reverse. Ironically, the Chain cents became one of the most revered and sought-after issues in American numismatics when coin collecting became popular in this country.

The present coin represents the S-4 variety, recognized by the periods after LIBERTY and the date, and the fully spelled out AMERICA on the reverse. The chocolate-brown surfaces of this Fine-15 example are slightly granular and the rims are worn smooth in places, but the date and legends remain legible, though sometimes weak. The chain and denomination on the reverse remains bold. Altogether, a pleasing example of this historic issue. Our EAC grade VG10. PCGS# 35444

**1793 Wreath Cent, XF Sharpness
S-6, Vine and Bars Edge**

- 4600** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Burnished — NGC Details. XF. A sharp example of the fleeting Wreath cent type, coined for only a few months during 1793. The lavender-brown surfaces are moderately glossy and lightly granular in the recesses. A few old, dull abrasions are noted near ONE CENT and the ribbon. The obverse exhibits an old, minor scratch near the jaw. Our EAC grade Fine 12.

**1838 N-1 Cent, MS66 Red and Brown
Exemplary Eye Appeal**

- 4601** 1838 N-1, R.1, MS66 Red and Brown PCGS. CAC. A broken upper-left serif on the E in LIBERTY and recutting on the I in UNITED confirm the variety. This piece displays nearly unmarked surfaces, with substantial coppery-red luster amid hues of rich burgundy-blue patina. The central devices are sharp, though the stars are somewhat weakly defined, as is typical. Our EAC grade MS64. PCGS# 37181

**1843 Petite Head Large Cent, MS65+ Brown
N-4, N-13 Large Letters
Second-Finest Certified at PCGS**

- 4602** 1843 Petite Head, Large Letters, N-4, N-13, R.1, MS65+ Brown PCGS. CAC. A splendid lavender-brown example, exceedingly lustrous with fantastic eye appeal. The glossy surfaces are smooth and deeply colorful. On the reverse, areas of bold magenta mix with the lavender and violet overtones. It is no surprise this Plus-graded Gem is the second-finest example at PCGS, limited only by a few light field ticks and a bit of softness on the stars. Elsewhere, the motifs are fully brought up and bold. A much better variety, combining the “old” Petite Head obverse with the “new” large letters reverse — listed as a separate variety on page 110 of the 2015 *Guide Book*. Our EAC grade MS63. Population: 5 in 65 (1 in 65+) Brown, 1 finer (8/14). PCGS# 403922

**1853 N-25 Cent, MS66 Red
Exceptional Orange-Red Color**

- 4603** 1853 N-25, R.1, MS66 Red PCGS. Grellman Die State b. The base of the 1 is lightly repunched south, and a short “bar” emerges from the dentils between stars 1 and 2. These two diagnostics identify N-25, the most prevalent variety of the date in Uncirculated grades. However, examples of the present quality are unquestionable rare. The lustrous orange-red surfaces exhibit only minor field contact above the hairbun, along with a slender mint-made strike-through near star 11 and the occasional small fleck. Our EAC grade MS65. PCGS# 403925

PROOF LARGE CENT

1838 Coronet Cent, N-11, PR64 Brown

4604 1838 PR64 Brown PCGS. N-11, Low R.6 as a Proof. This early die state N-11 proof has myriad die lines on Liberty's neck and jaw, as seen on other proofs of this variety. This example has stars 1 through 5 flat, and stars 6 through 13 nicely detailed, although they could be even sharper. A single carbon fleck on Liberty's jaw identifies the pedigree of this proof. Smooth, modestly reflective fields offers glimmers of faded orange-brown color in the protected areas. Our EAC grade PR62.

Ex: *Stack's* (9/1996), lot 1041; *John Gervasoni*; *Bowers and Merena* (12/2003), lot 171; *Goldberg Coins* (5/2005), lot 24; *Goldberg Coins* (2/2006), lot 496; *Heritage* (1/2007), lot 443; *Adam Mervis*; *Adam Mervis Large Cent Collection*. (Heritage, 1/2014), lot 2217. PCGS# 1811

FLYING EAGLE CENT

1856 Flying Eagle Cent, Fine 12
Snow-3, Judd-180
Scarce Business Strike Variant

4605 1856 Snow-3 Fine 12 PCGS. The Snow-3 Flying Eagle cents were struck in 1856 to demonstrate the design of the proposed small-diameter cent to Congressmen and other VIPs. The cents proved so popular with collectors that restrikes were made in later years, from different dies. This still-attractive Fine 12 specimen displays reddish-brown surfaces with the expected number of contact marks for the grade. Although some wear is evident on the design elements, the details of the eagle's head and feathertips are bold. PCGS# 391479

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, Snow-5, PR64
Seminal First-Year Small Cent Type Issue

4606 1856 Snow-5 PR64 PCGS. The concept of a small cent to replace the traditional large cent format in use since 1793 was realized in 1856 with the introduction of the Flying Eagle cent, a brief type that was only struck for three years before being replaced by the long-lived Indian Head cent. Approximately 1,500 to 2,500 1856 Flying Eagle cents were created in proof and business strike formats, most of the coins being business strikes; although the exact production numbers are unknown.

This near-Gem proof specimen boasts an impressive strike impression, especially on the eagle's motif. TES in STATES and 856 in the date are a trifle weak, but not to the extent of limiting the grade or distracting the viewer of the piece. The surfaces display typical tan coloration, with golden border accents and satiny, smooth, unmarked fields. An attractive and conditionally scarce example of this important key issue, coveted by innumerable type collectors and Flying Eagle cent specialists. PCGS# 401220

1856 Flying Eagle Cent, PR35
Snow-9, Circulated Proof

4607 1856 Snow-9 PR35 PCGS. Snow-9 was struck around 1859 to satisfy collector demand for the rare 1856 flying eagle cent. This specimen retains much interior design detail and shows the diagnostic center dot below the top left serif of N in CENT. The reddish-brown surfaces show the expected number of minor abrasions and an obverse rim bruise is evident at 8 o'clock. The 1856 Flying Eagle cent is prized by series specialists and pattern collectors alike. PCGS# 147890

1856 Flying Eagle Cent, PR64
Snow-9, Sharply Struck Throughout

4608 1856 Snow-9 PR64 PCGS. Snow-9 is the most frequently encountered 1856 Flying Eagle cent variety. It is not known exactly when this variety was coined, though studies of die marriage sequences suggests the Snow-9 coins were likely produced between late 1857 and early 1860, after which active coinage of this highly sought-after issue petered out and collector sales declined. It has been suggested that the onset of the Civil War in 1861 limited demand for the coins from collectors, and that some "leftover" pieces may have been released into circulation, resulting in the existence of worn examples.

This representative displays bold design definition and noticeably reflective fields. The color is mainly olive-gold, though cheerier hues of champagne and pale cherry are seen in the recesses when turned in-hand. An attractive near-Gem representative of this famous key-date issue. PCGS# 147890

1857 Flying Eagle Cent, PR64
Immensely Appealing Second-Year Example

4609 1857 PR64 PCGS. According to Rick Snow, in *A Guide Book of Flying Eagle and Indian Head Cents*:

"The proofs are much rarer than the published mintage suggests. The Red Book lists an estimated mintage of 485 pieces; however, nowhere near those numbers are known today. Perhaps no more than 50 were struck. Unimpaired specimens in PF-63 or higher are easily five-figure coins. Needless to say, this is one of the toughest dates in the series."

Well-struck with deeply-mirrored fields, this piece has immense eye appeal and also boasts a high degree of technical merit. The strike definition is razor-sharp, and the surface preservation on both sides is remarkable. A great near-Gem example of this second-year issue in the brief, extremely popular Flying Eagle cent series. Population: 21 in 64, 13 finer (9/14). NGC ID# 227B, PCGS# 2040

**1858 Flying Eagle Cent, PR64
Large Letters, High Leaves, Snow-PR1**

- 4610 1858 Large Letters, High Leaves PR64 PCGS. Snow-PR1.** The 1858 Large Letters obverse, with the High Leaves reverse, is the only proof die pair listed in Rick Snow's 2001 reference. The Philadelphia Mint began its program of commercial proof coin offerings in 1858, with an unknown, but undoubtedly small, mintage of Flying Eagle cents. Experts believe no more than 100 proofs were struck and possibly half that number survive today. This coin is sharply detailed throughout, with reflective copper-red fields that have mellowed to light brown and lilac in places. Only minor signs of contact are evident. Population: 19 in 64, 18 finer (9/14). NGC ID# 227C, PCGS# 2042

**1858 Small Letters, Snow-PR2, PR64
Impressive Premium Quality Example**

- 4611 1858 Small Letters PR64 PCGS. Snow-PR2.** Low Leaves reverse. Open E in ONE. A bold diagonal die line resides within the dentils beneath the right ribbon end, on the lower reverse. This specimen displays remarkably glassy fields and even golden-tan coloration over each side. The strike definition is razor-sharp. A well-preserved proof example that will impress even the casual viewer. Population: 44 in 64 (2 in 64+), 8 finer (9/14). NGC ID# 227D, PCGS# 2043

INDIAN CENTS

**1861 Indian Cent, MS67
Conditionally Rare**

- 4612 1861 MS67 PCGS.** Though not as plentiful as the 1863, the 1861 Indian cent is nonetheless easily obtainable in most grades, though the lofty level of MS67 would be a distinct exception; PCGS has certified only 12 pieces in this grade, and just one numerically finer (8/14). This representative is not only virtually perfect in terms of preservation, it is also razor-sharp in strike, with radiant luster. Lovely bronze-gold hues encompass much of each side, with deeper rose shadings seen around the right obverse border. This piece is sure to please even the most discerning specialist. NGC ID# 227G, PCGS# 2061

**1862 Indian Cent, MS66+
Boldly Struck Throughout**

- 4613 1862 MS66+ PCGS. CAC.** Although not quite as plentiful overall as the 1863, the 1862 Indian cent becomes slightly more available than 1863 in the upper Mint State grades, being ideal for type representation. This Plus-graded Premium Gem example displays sharp design definition and radiant tan-gold luster. A few microscopic toning specks are noted upon close examination, though the eye appeal is hardly inhibited. Population: 84 in 66 (7 in 66+), 12 finer (9/14). NGC ID# 227H, PCGS# 2064

**1862 Indian Head Cent, MS67
Among the Finest at PCGS and NGC**

4614 1862 MS67 PCGS. Between 1860 and 1864, Indian Head cents were struck on copper-nickel planchets and featured the Oak Wreath design that continued to the end of the series. The five issues form a popular subtype set, and the 1862 is one of the most collectible dates with a mintage exceeding 28 million coins. Examples are plentiful through Gem condition, Premium Gems are scarce, and Superb Gems such as this are very rare. PCGS has certified only 12 pieces in MS67, and NGC has seen six submissions in the same grade. Neither service reports an example certified finer (8/14).

The impeccably preserved surfaces show razor-sharp devices with four full diamonds on the ribbon. Beautiful golden-tan color and swirling luster grace each side, and a loupe fails to yield any mentionable impairments aside from a few minuscule carbon specks. NGC ID# 227H, PCGS# 2064

**1870 Indian Cent, MS65+ Red
Low-Mintage, Underrated Issue**

4615 1870 MS65+ Red PCGS Secure. Bold N reverse. Lustrous, fire-orange surfaces display attractive red highlights on both sides of this lovely semikey cent. A bold strike shows strong detail on the headdress, wreath, and shield. Two or three microscopic spots on the reverse are visible with a glass, but do not distract in the least from the appeal of this vibrant Gem example. This is the only Plus-graded Mint State coin seen by PCGS for the issue. Population: 36 in 65 (1 in 65+) Red, 7 finer (8/14). NGC ID# 227U, PCGS# 2099

**1872 Indian Cent, MS64 Red
Scarce With Full Mint Luster**

4616 1872 MS64 Red PCGS. CAC. Bold N. Indian cents from the 1870s are widely popular in Mint State grades, being somewhat elusive as a rule. Following this trend, the 1872 is decidedly scarce in high grades, and full Red examples are seldom seen in any grade. This Choice example displays radiant coppery-orange luster and few noticeable abrasions. The central devices are bold, though the beginning signs of die wear are seen on portions of the peripheral lettering. A few minute carbon specks are not immediately obvious. Population: 48 in 64 (1 in 64+) Red, 16 finer (8/14). NGC ID# 227W, PCGS# 2105

1873 Indian Head Cent, MS63 Red and Brown
FS-101, Snow-1
Impressive Series Rarity

- 4617 1873 Doubled LIBERTY, Snow-1, FS-101, MS63 Red and Brown PCGS Secure.** This satiny and nicely struck Select example displays variegated olive-brown and brick-red. LIBERTY is strongly die doubled northeast. Other areas of doubling include the eye and the lines in the headdress. Only minor marks are evident, though we note a small strike-through (as made) near the first T in STATES. Perhaps the most famous *Guide Book* variety of the series, and key to a complete collection, along with the 1888/7. Population: 10 in 63 Red and Brown, 10 finer as Red and Brown, just one example finer as Red (8/14). PCGS# 37505

1889 Indian Cent, MS66 Red
Tied for the Finest Certified

- 4618 1889 MS66 Red PCGS. CAC.** Despite a mintage in excess of 48 million coins, few Gem quality 1889 cents have survived with full red mint luster. This frosty Gem example displays original orange-red color, with sharp design elements. The surfaces are beautifully preserved, with no traces of carbon or other detractors. There are no unusual die characteristics on this late die state cent with evidence of die wear visible in the peripheral areas. An impressive cent for the PCGS Set Registry collector. Population: 8 in 66 Red, 0 finer (8/14).
Ex: FUN Signature (Heritage, 1/2005), lot 5106. NGC ID# 228H, PCGS# 2174

PROOF INDIAN CENTS

1860 Indian Cent, PR66 None Numerically Finer at PCGS

4619 1860 PR66 PCGS. Mint records report the production of 1,000 proof Indian cents in 1860, though as many as 450 were purportedly unsold and dumped into circulation. Surviving examples are sometimes available in lower grades, though striking quality is often a problem. This Premium Gem representative is not only conditionally rare, it is also fully struck throughout, with glassy fields that display faint orange and rose hues amid the primarily tan-gold luster. The preservation is nearly flawless, only adding to the overall immense eye appeal. Population: 13 in 66, 0 finer (9/14). NGC ID# 229A, PCGS# 2253

1862 Indian Cent, PR66 Attractive Patina

4620 1862 PR66 PCGS. CAC. Needle-sharp design definition and nearly undisturbed surfaces are among the pleasing attributes this Premium Gem proof possesses, though the soft rose and olive-gold hues that encompass the moderately reflective fields also contribute to the overall appeal. A few tiny carbon flecks do not detract. Population: 26 in 66, 1 finer (8/14). NGC ID# 229C, PCGS# 2259

1865 Indian Cent, PR66 Red Tied for Finest at PCGS

4621 1865 PR66 Red PCGS. Mint records report 500 proof 1865 cents being coined for silver proof sets, though a small, unknown number of additional pieces were struck for sale in minor proof sets. As no precious metal was involved, the Mint was not required to keep records of these copper and nickel proof coin sales.

Regardless of the actual number struck, the proof 1865 Indian cent is elusive in all grades, and rare in Gem or finer condition. This Premium Gem example showcases rich coppery-gold patina over deeply mirrored fields, while the fully struck, softly frosted devices deliver subtle field-motif contrast. The surfaces are impeccably preserved, and a couple microscopic carbon specks are virtually undetectable to the unaided eye. Population: 2 in 66 Red, 0 finer (9/14). NGC ID# 229H, PCGS# 2284

LINCOLN CENTS

1909-S VDB Cent, MS66 Red Perennial Collector Favorite

- 4622 1909-S VDB MS66 Red PCGS.** The ever-popular 1909-S VDB cent appears here as a Premium Gem with brilliant orange mint luster and bold design elements. Both sides are free of spots and toning. An exceptional example and rarely found finer, with only 11 better PCGS certified submissions (8/14). NGC ID# 22B2, PCGS# 2428

1911-D Lincoln Cent, MS66 Red Just One Coin Numerically Finer at PCGS

- 4623 1911-D MS66 Red PCGS Secure.** Full original red examples are rare for this Denver issue, especially when well struck with rich, orange-red luster such as this conditionally rare coin. A few tiny flecks on the reverse near the O in ONE do not hinder the excellent eye appeal. A wonderful Lincoln cent near the pinnacle of the certified scale at PCGS, where just one coin is graded numerically finer. Population: 23 in 66 (1 in 66+) Red, 1 finer (8/14). NGC ID# 22B8, PCGS# 2446

1911-D Cent, MS66 Red Underrated Condition Rarity

- 4624 1911-D MS66 Red PCGS. CAC.** This first D-mint cent is an undeniable condition rarity, as PCGS has seen only 23 submissions in MS66 Red (one in 66+), with one finer (8/14). The burnt-orange color over the satiny surfaces of this piece is typical, and the obverse shows some die fatigue around the date and mintmark area. A few light flecks appear in the left obverse field; the reverse is trouble-free. NGC ID# 22B8, PCGS# 2446

1913-D Lincoln Cent, MS66 Red None Numerically Finer

- 4625 1913-D MS66 Red PCGS. CAC.** For the Registry Set collector, this full Red Premium Gem is a must-have coin; it is among the finest certified at PCGS, and is also numerically equal to the example in the current highest-rated Registry Set. Rich coppery-orange luster engulfs each side in satiny radiance, while the motifs are sharp and abrasions are nearly nonexistent. A few faint carbon specks are noted in the upper-left obverse field. Population: 18 in 66 (1 in 66+) Red, 0 finer (8/14). NGC ID# 22BE, PCGS# 2464

**1914-D Lincoln Cent, MS65+ Red
Sought-After Denver Issue**

4626 1914-D MS65+ Red PCGS. CAC. Not only is the 1914-D Lincoln cent a well-known key date in the series, it is also significantly scarcer in full Red Mint State condition than even the much more popular 1909-S VDB. Furthermore, most surviving examples of this Denver issue exhibit moderate signs of die erosion, particularly on Lincoln's lapel and over the entire reverse. This piece is a typical coin in that regard, though the design definition is better than usually seen. Soft coppery luster envelops each side in satiny radiance, revealing only a few minute, scattered carbon specks, as allowed by the grade. The surfaces are otherwise well-preserved, and the eye appeal is pleasing for this conditionally scarce issue. Population: 62 in 65 (3 in 65+) Red, 3 finer (8/14). NGC ID# 22BH, PCGS# 2473

**1915-D Cent, MS66 Red
Registry Set Candidate**

4627 1915-D MS66 Red PCGS. While full Red examples of this Denver issue are not particularly scarce in an absolute sense, those certified at the Premium Gem grade level are. This piece is tied numerically with the example in the current highest-rated Registry Set, displaying rich coppery-orange and rose-red hues over satiny luster. The coin is unusually sharp for the date, and exhibits only a few tiny carbon specks, only discernable with magnification. Population: 28 in 66 Red, 1 finer (8/14). NGC ID# 22BL, PCGS# 2482

**1918 Lincoln Cent, MS67 Red
Unavailable Any Finer**

4628 1918 MS67 Red PCGS. Flashy mint luster emphasizes the smooth, orange-red patina and essentially full details of this Superb Gem cent. A single MS68 example is firmly tucked away in an advanced collection, making MS67 the highest available grade for this date despite more than 288 million pieces struck. A single tiny carbon mark is hidden in seam behind Lincoln's shoulder and is visible at an angle with a glass. Population: 23 in 67 (1 in 67+) Red, 1 finer (9/14). NGC ID# 22BV, PCGS# 2506

**1918-S Lincoln Cent, MS65 Red
Conditionally Rare Registry Coin**

- 4629 1918-S MS65 Red PCGS.** The 1918-S had a mintage in excess of 34 million coins, but these circulated extensively, with the result that this issue is readily available in circulated condition, but elusive in the finer Mint State grades. Full Red examples are especially scarce, and those worthy of a Gem grade are distinctly rare. This satiny representative exhibits deep burgundy-red color and nearly carbon-free surfaces. The reverse is somewhat softly defined, a result of die wear more than striking pressure, as the obverse is much sharper. In an effort to reduce production costs, tail dies, which were undated, were often used well into the following year or until they completely failed, with the result that many coins of this period are known with soft reverse elements. This piece will be of great importance for the Registry collector, as it ranks a full grade point finer than the coin in the current highest-rated Registry Set. Population: 16 in 65 Red, 0 finer (8/14). NGC ID# 22BX, PCGS# 2512

**1929-S Cent, MS66 Red
Registry-Quality Example**

- 4630 1929-S MS66 Red PCGS. CAC.** The 1929-S is one of the more challenging issues in the Lincoln cent series in Gem or finer full Red grades, and is rare at the Premium Gem Red level. This piece is tied with just 25 others as the finest certified at PCGS (8/14), and is numerically equal to the example represented in the current highest-rated Registry Set. Satiny coppery-orange luster encompasses each side, while the design elements show above-average definition. A few tiny carbon specks are noted upon close examination, though the surfaces are otherwise beautifully preserved. NGC ID# 22CW, PCGS# 2602

**1936 Lincoln Cent, MS66+ Red
Doubled Die Obverse, FS-102**

- 4631 1936 Doubled Die Obverse, FS-102, MS66+ Red PCGS. CAC.** This interesting variety was initially hubbed with a hub from 1935 that had a broken left upright on the R in LIBERTY. It was then rehubbbed with a normal hub, producing strong doubling on the date, motto, and legend. This high-end Premium Gem is well-detailed and impeccably preserved, with brightly lustrous original red surfaces. Population: 13 in 66 (1 in 66+) Red, 0 finer (9/14). PCGS# 92650

**1946 Lincoln Cent, MS67 Red
Tied for Finest at Both Services**

- 4632 1946 MS67 Red PCGS.** Registry Set specialists are sure to recognize the importance of this immaculately preserved Superb Gem, exhibiting fiery-red coloration and sharp strike definition throughout. The surfaces are essentially flawless with only a few carbon specks noted on each side. PCGS reports 18 grading events (likely including resubmissions) in MS67 Red and no examples finer (8/14). NGC ID# 22EK, PCGS# 2743

**1953 Cent, MS67 Red
Registry Set Contender**

- 4633 1953 MS67 Red PCGS. CAC.** An available date in full Red Gem condition, the 1953 Lincoln cent suddenly becomes rare at the MS67 Red grade level, where PCGS has certified only 12 pieces, with none finer (8/14). This representative, showing frosty coppery-orange and pinkish luster, also ranks a full grade point finer than the coin in the current highest-rated Registry Set. The usual soft points, around the O in ONE and the finer details of the obverse portrait, are not full brought up, though the surfaces appear to be void of carbon spotting. NGC ID# 22F9, PCGS# 2806

**1955 Lincoln Cent, MS65 Red and Brown
FS-101, Doubled Die Obverse**

- 4634 1955 Doubled Die Obverse, FS-101, MS65 Red and Brown ANACS.** This popular *Guide Book* variety is rare at the Gem grade level, regardless of color designation, and finer pieces nearly nonexistent. This Red and Brown representative displays well-balanced coppery-orange and auburn-brown hues, with faint hints of olive seen when turned in-hand. The strike is well-executed for the issue, and there is only a single carbon speck seen near the reverse border at 6 o'clock. PCGS# 37911

**1955 Lincoln Cent, MS64 Red
Famous Doubled Die Obverse**

- 4635 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS. CAC.** All lettering and the date show strong doubling on this most famous of all doubled die issues. This delightful Choice example offers well-detailed design elements and vibrant mint luster throughout. The original red surfaces show only minor signs of contact and eye appeal is outstanding. PCGS has graded only 18 numerically finer examples (9/14). PCGS# 37912

**1962 Cent, MS67 Red
Registry-Quality Blazer**

- 4636 1962 MS67 Red PCGS.** For the Registry collector, this full Red Superb Gem is virtually the ultimate; tied numerically with the example in the current highest-rated Registry Set, the coin is also among the finest certified at PCGS. Full coppery-gold mint bloom engulfs each side, while the devices are bold and the surfaces are seemingly pristine. Population: 12 in 67 (1 in 67+) Red, 0 finer (8/14). NGC ID# 22G3, PCGS# 2878

**1972 FS-101 Lincoln Cent, MS67 Red
Doubled Die Obverse**

- 4637 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS.** Only the 1955 and 1969-S Doubled Die cents are more obvious than the 1972. This amazing Superb Gem exhibits fiery orange mint luster with reflective surfaces and eye appeal galore. The cataloger was a young numismatist when these were discovered, and clearly remembers the excitement of discovery. Population: 24 in 67 Red, 1 finer (8/14). PCGS# 38013

PROOF LINCOLN CENTS

1936 Type One — Satin Finish — Lincoln Cent, PR66 Red Attractive High-End Specimen

- 4638** 1936 Type One — Satin Finish — PR66 Red PCGS. The rich orange-red surfaces show slight hints of yellow-green and magenta on this scarce Type One cent. Minuscule flyspecks can also be seen under a loupe. Although more examples of the Satin Finish were struck, it appears that more examples were mishandled than of the Type Two coins that followed. Population: 27 in 66 (1 in 66+) Red, 1 finer (8/14).
Ex: *Central States Signature* (Heritage, 5/2007), lot 1303; *Dallas Signature* (Heritage, 11/2007), lot 176. NGC ID# 22L2, PCGS# 3332

1940 Lincoln Cent, PR67 Red Tied for Finest-Graded at Both Services

- 4639** 1940 PR67 Red PCGS. CAC. Deep cherry-red toning covers the glassy fields of this razor-sharp specimen, while the frosted devices show bright mint-red color. Expertly preserved and seemingly pristine, this fully brilliant Superb proof cent is tied for finest-graded at both of the major services. Population: 13 in 67 Red, 0 finer (8/14). NGC ID# 22L7, PCGS# 3347

1990 No S Cent, PR68 Red Deep Cameo Key Lincoln Memorial Proof Issue

- 4640** 1990 No S, FS-101, PR68 Red Deep Cameo PCGS Secure. A beautiful orange-gold specimen of the famous mint error. The strike is complete and the sole post-strike imperfection is a tiny fleck at 4 o'clock on the reverse. The fields have a pebbled surface, as made and caused by the thin copper plate over the zinc interior. On several occasions (1968, 1970, 1975, and 1983) the Mint failed to punch an S mintmark into a proof dime die. However, for the cent denomination, the blunder category is confined to the present variety. PCGS# 408239

1990 No S Cent, PR69 Red Ultra Cameo Tied for Finest Certified

- 4641** 1990 No S, FS-101, PR69 Red Ultra Cameo NGC. This is an immensely popular *Guide Book* variety, produced with a proof obverse die that was prepared without a mintmark. Since, by 1990, mintmarks were included on the hubs rather than being individually punched into each working die, it is likely that the specific die used to strike the No S proof cents was actually a regular Philadelphia die that was shipped to San Francisco and prepared for proof coinage, with apparently no notice given to the absence of a mintmark.

This proof die coined about 3,700 No S cents before being retired, 145 of which are known to have been found and destroyed by the mint. This leaves an estimated net mintage of 3,555 pieces, but significantly fewer are actually known to exist (the certification services report a combined population of only 222 examples in all grades), and the discovery rate of new representatives is so low that many collectors question whether or not all 3,555 pieces actually left the mint.

This is one of just 21 coins certified at the PR69 Ultra Cameo grade level at NGC; PCGS has seen another 30 submissions in this grade, but neither service has encapsulated a finer coin (9/14). The surfaces are essentially flawless, and the heavily frosted devices provide stark field-motif contrast. PCGS# 408239

TWO CENT PIECES

1865 Two Cent Piece, MS66 Red FS-1301, Repunched Date Variety

- 4642** 1865 Fancy 5, Repunched Date, FS-1301, MS66 Red PCGS. The 1 and 8 in the date are boldly repunched southeast. As a date, this issue is distinctly scarce at the MS66 grade level with full Red mint luster, and finer examples are prohibitively so. This representative displays rich coppery-orange luster and fully struck design elements. A couple microscopic carbon specks are detect upon close scrutiny with a loupe, though the eye appeal is hardly affected. This coin is likely one of the finest-known examples of this *Cherrypickers'* variety. PCGS# 38261

1869 Two Cent Piece, MS65+ Red Conditionally Challenging

- 4643** 1869 MS65+ Red PCGS. CAC. While moderately available in an absolute sense, the 1869 two cent piece is scarce with full Red luster, and rare with such at the Gem grade level. This Plus-graded representative exhibits bold design definition and satiny bronze-gold luster. A few faint, scattered carbon flecks are noted upon close examination, though the unaided eye finds nothing to inhibit the aesthetic appeal. Population: 25 in 65 (1 in 65+) Red, 2 finer (8/14). NGC ID# 22ND, PCGS# 3605

1872 Two Cent Piece, MS66 Red and Brown Conditionally Rare Key Date

- 4644** 1872 MS66 Red and Brown PCGS. CAC. The year 1872 was the final production year for business strike two cent pieces, the Mint striking only 65,000 examples. The date is proportionately elusive in the context of the series, and Mint State representatives are widely sought in all grades. Full Red representatives are rare, but at the Gem grade level, this issue becomes rare regardless of color designation. This representative displays sharp motifs with a degree of semiprooflike mirroring in the reverse fields. Fiery copper-orange luster illuminates the surfaces, while rich burgundy overtones accent portions of each side, residing primarily in the obverse recesses. An immensely attractive example of this final-year business strike issue. NGC ID# 22NG, PCGS# 3613

**1872 Two Cent, MS66 Red
Among the Finest Certified**

4645 1872 MS66 Red PCGS. CAC. The Civil War era brought about a number of unusual denominations and methods of paying for goods and services, including encased postage stamps, fractional currency notes, paper scrip (known today as obsolete notes) and tokens. The federal two cent coins were introduced in 1864, with the three cent nickel coins debuting the next year, closely followed by the nickel five cent piece.

As the new denominations were issued, the two cent pieces dwindled in popularity. The initial production figure for the denomination was in excess of 19 million pieces, but annual mintages would only decline from this point forward. Although the series officially ended in 1873, production of business strikes ceased in 1872, with a mintage of only 65,000 coins. Survivors of this final-year issue are among the most sought-after of the series, especially in full Red grades.

Bright orange-red surfaces along with strong luster are attributes of this Premium Gem example. In addition, the strike is sharp. A few wispy die cracks are present. An as-made lint mark appears on the leaf near 3 o'clock on the obverse. Minor scattered carbon does not pose a distraction.

An exceptional coin with strong visual appeal, this piece is tied with only two others as the finest surviving example and is housed in a first generation holder. PCGS has awarded the MS66 Red grade to three examples, with none so-graded at NGC. Neither service has awarded a higher grade to a single piece (8/14), and this is the only CAC-designated MS66 Red. NGC ID# 22NG, PCGS# 3614

PROOF TWO CENT PIECE

**1871 Two Cent Piece, PR65 Red Cameo
Extremely Rare With a Cameo Designation**

4646 1871 PR65 Red Cameo PCGS. The proof 1871 two cent piece was included in both silver and minor proof sets of the period; 960 pieces were struck for the former, and likely 105 for the latter, though it is unknown if all were actually distributed, or if some were left unsold and later melted. Full Red survivors are scarce, but Cameo representatives are undeniably rare in any grade. This piece is one of just three Red Cameo examples certified by PCGS, with the others being a PR66 and a PR67 coin (8/14). Bold die doubling is observed on the motto IN GOD WE TRUST, the wreath leaves, and the arrowheads. This doubling is evident on all proof 1871 two cent pieces, as all were coined from the same die pair. Frosted devices deliver bold contrast with the deeply reflective, coppery-red fields, and the strike is crisp throughout. PCGS# 83647

THREE CENT SILVER

1851-O Three Cent Silver, MS66 Attractive Pastel Toning

- 4647 1851-O MS66 PCGS.** The only silver three cent piece struck at the New Orleans Mint, the 1851-O is widely sought in all Mint State grades, but is rarely located at the Premium Gem level. This piece displays subtle semiprooflike mirroring in the fields beneath blended pastel hues of green-gold, lavender, and pale rose. The upper-left portion of the shield is not fully defined, though the strike is otherwise pleasing. Contact marks are seemingly nonexistent. Population: 24 in 66 (1 in 66+), 0 finer (9/14). NGC ID# 22YY, PCGS# 3665

1863 Three Cent Silver, MS66 Semiprooflike Fields

- 4648 1863 MS66 PCGS. CAC.** With a low mintage of only 21,000 coins, the 1863 three cent silver is understandably elusive in Mint State condition. This Premium Gem example displays glassy reflectivity in the fields, with splashes of sea-green and rose-gold toning settling over the mirrors. Faint clash marks are noted upon close examination, a common characteristic on this small-diameter type. Population: 21 in 66 (1 in 66+), 3 finer (8/14). NGC ID# 22ZD, PCGS# 3682

1869 Three Cent Silver, MS67 Only One Finer Coin at PCGS

- 4649 1869 MS67 PCGS. CAC.** The mintage of business-strike three cent silver pieces was uniformly low in the late 1860s, as the series was winding down in favor of the nickel version of this denomination. One wonders if the Mint struck a token mintage every year just to prevent the proof issues from becoming instant rarities. In 1869, only 4,500 examples were struck, and the present coin is among the finest survivors. The design elements exhibit razor-sharp definition in most areas, with just a touch of softness on a few star centers. The impeccably preserved surfaces show just a hint of greenish-gold toning and the fields display prooflike reflectivity throughout. Population: 1 in 67, 1 finer (9/14). NGC ID# 22ZK, PCGS# 3689

1872 Three Cent Silver, MS65
Prooflike; Final Year of Circulation Strikes
Just 1,000 Pieces Struck

- 4650 1872 MS65 PCGS.** Survivors of the business strike production from 1872 are much rarer than proofs struck for the year, although a nearly equal number of both formats were produced. Visually, there is little to differentiate the proofs from the surviving circulation strikes because all were struck from the retired proof dies, and most were decidedly prooflike in their appearance. This example is brilliant and deeply prooflike on the obverse, with frosted motifs. A crescent of light gold and ocean-blue patina covers the left half of the reverse. Aside from weakness on many of the reverse stars, bold motifs accompany the Gem eye appeal. Population: 3 in 65 (1 in 65+), 7 finer (8/14). NGC ID# 22ZN, PCGS# 3693

1872 Three Cent Silver, MS66+
Beautiful Multicolor Toning

- 4651 1872 MS66+ NGC.** The Mint produced only 1,000 silver three cent pieces in the final year of business strike production, and high-grade survivors are rare. This Plus-graded Premium Gem example delivers profound visual allure with razor-sharp devices and semiprooflike fields. Vivid toning in bands of green-gold, violet, and ocean-blue surround a rich orange-gold core on the obverse, while the reverse displays pale hues of sky-blue and deep champagne color around a light golden center. Census: 5 in 66 (1 in 66+, 1 in 66 ★), 0 finer (8/14). NGC ID# 22ZN, PCGS# 3693

PROOF THREE CENT SILVER

1869 Three Cent Silver, PR67 Cameo
Myriad Die Finishing Lines

- 4652 1869 PR67 Cameo PCGS. CAC.** This Superb Gem Cameo proof is a stunning three cent silver piece from a mintage of only 600 pieces. Fully mirrored fields accent the lustrous devices. Cobalt-blue, amber, violet, and golden-rose toning gather in the peripheral areas and provide impressive eye appeal. Myriad raised die lines in different directions are evident within the spaces between the vertical shield stripes on the obverse. This example is tied for the finest that PCGS has certified, with only one finer Cameo proof certified at NGC. Population: 3 in 67 Cameo, 0 finer (8/14). PCGS# 83719

PROOF THREE CENT NICKELS

1876 Three Cent Nickel, PR66 Ultra Cameo

- 4653 1876 PR66 Ultra Cameo NGC.** Examples of this Centennial-year proof are fairly obtainable in higher grades, but pieces qualifying for the Ultra Cameo designation are exactly the opposite. This impressive Premium Gem exhibits intensely frosty mint luster on the devices over deeply mirrored fields. Both sides are essentially brilliant, with just a hint of champagne toning. Census: 8 in 66 Ultra Cameo, 3 finer (8/14). PCGS# 93772

1884 Three Cent Nickel, PR66 Deep Cameo Pleasing Field-Device Contrast

- 4654 1884 PR66 Deep Cameo PCGS.** This Deep Cameo Premium Gem proof is the sole finest example of its category graded by PCGS (8/14). Both sides are clearly contrasted with only hints of blue and gold-rose color to the fields. A small planchet depression on Liberty's cheek should not be taken for post-striking damage. PCGS# 93780

SHIELD NICKEL

1879 Shield Nickel, MS66 None Numerically Finer at PCGS

- 4655 1879 MS66 PCGS. CAC.** A lack of demand for nickels was largely to blame for the low production total in 1879 (only 25,900 coins), and this issue remains one of the scarcer overall in Mint State grades. This Premium Gem example displays remarkably bold design definition, with a surprising lack of the usual die cracks. Strong, satiny luster illuminates well-preserved, golden-gray surfaces, giving this piece a high degree of eye appeal. Population: 25 in 66 (1 in 66+), 0 finer (9/14). NGC ID# 276D, PCGS# 3808

PROOF SHIELD NICKEL

1882 Shield Nickel, PR66 Rare Deep Cameo Example

- 4656 1882 PR66 Deep Cameo PCGS.** The mintage of 3,100 pieces suggests more high-grade proofs should exist, but PCGS and NGC each have seen just four coins in Premium Gem condition or finer. This excellent example is framed by a thin margin of almond-gold toning. Fully struck devices show strong contrast with the deep, mirrored-silver fields. There are no carbon flecks or other marks, although a glass reveals some tiny, cloudy freckles across the surfaces. Population: 2 in 66 Deep Cameo, 2 finer (9/14). PCGS# 93837

LIBERTY NICKELS

1886 Nickel, MS65 Overlooked Condition Rarity

- 4657 1886 MS65 PCGS.** This conditionally rare nickel is brightly lustrous with a light powdering of almond-gray patina at the centers. Numerous wispy die cracks meander among the stars and legends of its silvery surfaces, apparently having no effect on the boldly struck motifs. Fewer 1886 Liberty nickels are certified at the MS65 grade or finer than any other date in the series, even though the mintage is more than double its more-recognized predecessor, the 1885 issue. Population: 39 in 65, 7 finer (8/14). NGC ID# 22PK, PCGS# 3847

**1896 Liberty Nickel, MS66
Tied for Finest Certified**

- 4658 1896 MS66 PCGS Secure.** The issue often displays a weak strike and marginal luster, although this example is both boldly struck and sharply lustrous as expected for the Premium Gem grade. A pleasing hint of champagne gold covers the virtually mark-free surfaces, which show only a small carbon spot between the rim and star 12 and one or two tiny nicks. The wreath shows minimal blending on the ear of corn and other high points. A true condition rarity in this MS66 state, with no coins graded numerically higher by either service. PCGS Population: 14 in 66 (2 in 66+), 0 finer (9/14). NGC ID# 277B, PCGS# 3857

**1912-S Liberty Nickel, MS65+
Keystone Date in the Series**

- 4659 1912-S MS65+ PCGS.** Purple-pink and peach-orange intermingle at the borders on each side, while the centers remain largely brilliant. The design elements are sharply detailed throughout, notably on the stars and the reverse wreath. This key date Gem shows minimal marks, and only a small tick on Liberty's cheek merits mention. From a low mintage of 238,000 pieces, PCGS has certified just 15 coins finer (8/14). NGC ID# 277R, PCGS# 3875

**1912-S Nickel, MS65+
Elusive in Finer Grades**

- 4660 1912-S MS65+ PCGS. CAC.** The 1912-S nickel boasts the lowest mintage of the series (238,000 pieces), but is also popular as the only S-mint issue of the Liberty Head type. This Plus-graded Gem displays deeply satiny luster as usual, with a small tick on Liberty's neck being the only grade-limiting surface flaw. Iridescent golden-gray toning blankets each side, while the lower-left portion of the wreath exhibits the only measurable degree of striking weakness. PCGS has seen only 17 numerically finer submissions (9/14). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

**1883 Liberty Nickel, PR66 Deep Cameo
Scarcer With Cents Variant**

- 4661 1883 With Cents PR66 Deep Cameo PCGS.** Despite a significantly higher mintage (more than 16 million pieces versus fewer than 6 million pieces), the proof 1883 With Cents Liberty nickel is somewhat scarcer overall than its No Cents counterpart, especially in Deep Cameo grades. This piece is one of just five coins to receive a Deep Cameo designation from PCGS, only one of which is numerically finer (9/14). The strike is crisp throughout Liberty's hair curls and the stars, and even the lower-left portion of the wreath is unusually well-defined. A blush of light golden color accents stark field-motif contrast, while the surfaces are nearly void of flaws. Population: 3 in 66 Deep Cameo, 1 finer (9/14). PCGS# 93881

**1890 Nickel, PR67 Cameo
Sole Finest Numerically at PCGS**

- 4662 1890 PR67 Cameo PCGS.** This piece ranks as the single finest Cameo proof certified of the date at PCGS (8/14). Four Deep Cameo pieces are reported on the population charts, but none grade finer than PR66. This Superb Gem exhibits bold design definition and ample frost over the devices. Hues of pale green-gold toning accent the mirrored fields. PCGS# 83888

**1896 Liberty Nickel, PR67 Deep Cameo
Virtually Flawless Preservation**

4663 1896 PR67 Deep Cameo PCGS. Proof nickel production dipped to just 1,862 pieces in 1896, but the striking quality is often excellent, which makes this date an ideal candidate for type purposes. This example, however, ranks as the single finest of just four Deep Cameo representatives at PCGS; NGC has similarly seen just three Ultra Cameo pieces, also with just one achieving the PR67 grade level (9/14). Neither service has graded a numerically finer example, regardless of field-device contrast.

This piece showcases frost-white motifs set against deeply mirrored recesses. The strike is bold throughout, and just a trace of light golden color graces the extreme outer peripheries. Surface marks are nonexistent, though a couple small, threadlike strike-throughs are noted, one on the reverse amid the E in CENTS and the smaller one on Liberty's chin. Overall, this is an immensely appealing Deep Cameo proof. PCGS# 93894

**1903 Liberty Nickel, PR68
Unsurpassed Technical Grade**

4664 1903 PR68 NGC. This magnificent Liberty nickel is one of nearly 1,800 proofs struck in 1903. However, an unsurpassed technical grade elevates this otherwise common date to a true rarity. When held under a lamp, the pristine surfaces exhibit attractive powder-blue and apricot-orange toning, and the design elements are predictably pinpoint-sharp. Census: 6 in 68 (1 in 68 ★), 0 finer (8/14). NGC ID# 278D, PCGS# 3901

**1906 Nickel, PR67 Cameo
Beautiful, Conditionally Rare Specimen**

4665 1906 PR67 Cameo PCGS. CAC. A fully struck Superb Gem that appears to show profound Deep Cameo contrast, and a stark white-on-black effect similar to that of some modern proofs from the U.S. Mint. A pristine piece that is conditionally rare and virtually unavailable finer. Population: 19 in 67 (1 in 67+) Cameo, 2 finer (8/14). PCGS# 83904

BUFFALO NICKELS

**1913 Type One Buffalo Nickel, MS68
Razor-Sharp Detail, Delicately Toned**

4666 1913 Type One MS68 NGC. A top-notch example of a popular one-year type, this incredibly preserved representative features strongly lustrous surfaces with the sharp and rugged detail that makes the variety so prized. Pale nickel-blue patina drapes the centers, while the margins show varying degrees of green-gold and olive toning. Census: 11 in 68 (3 in 68 ★), 0 finer (8/14). Ex: Baltimore Signature (Heritage, 3/2009), lot 597; FUN Signature (Heritage, 7/2009), lot 238. From The Pannonia Collection, Part Two. NGC ID# 22PW, PCGS# 3915

**1913 Type One Buffalo Nickel, MS68
Superb, Tied for Finest at PCGS**

4667 1913 Type One MS68 PCGS. For type purposes, the Philadelphia issue is by far the most easily obtainable of the three Type One Buffalo nickels; it is readily available in virtually all grades, even MS67. At the MS68 level, however, even this issue becomes conditionally rare. PCGS has encapsulated only 14 pieces in this grade and none finer (8/14). This Registry-quality Superb Gem showcases shimmering mint bloom beneath hues of gold, lavender, and sky-blue toning that deliver profound visual appeal. A few faint flow lines are noted in the recesses, a result of die wear, but the strike is nonetheless sharp. NGC ID# 22PW, PCGS# 3915

**1913-S Type One Nickel, MS67
Only One Numerically Finer at PCGS**

4668 1913-S Type One MS67 PCGS. CAC. The scarcest of the three Type One issues in high grades. This Superb Gem example delivers exceptional overall appeal with boldly defined motifs and rich satiny luster. Warm lavender-gold toning blankets nearly flawless surfaces, further heightening the coin's visual allure. Population: 22 in 67 (1 in 67+), 1 finer (8/14). NGC ID# 22PY, PCGS# 3917

**1916 Buffalo Nickel, MS67
Among the Finest Certified at PCGS**

4669 1916 MS67 PCGS. CAC. This issue is moderately available in grades through MS66, though striking quality is sometimes an issue; Superb Gems are rare, regardless of strike quality. This representative is among the more sharply struck examples of the date, showing strong definition on the hair braid and the bison's head and shoulder. Satiny luster exhibits just a blush of light golden toning on the reverse, while on the obverse it illuminates soft hues of gold, lavender, and silvery-blue. Population: 20 in 67 (1 in 67+), 0 finer (9/14). NGC ID# 22RA, PCGS# 3930

1916 Buffalo Nickel, VF25
Rare Guide Book Doubled Die Obverse

- 4670 1916 Doubled Die Obverse, FS-101, VF25 PCGS.** The 1916 Doubled Die Obverse is a well-known, but quite rare, variety in the Buffalo nickel series. Examples are in great demand and always command a stiff premium. High-grade specimens show doubling on the chin, throat, feathers, and tie on the braid, but it is most easily seen on the date on circulated coins. This pleasing VF25 example shows the undertype 9 and 6 plainly, to the lower right of the primary digits. Although the design elements show some wear, most of the bison's horn is visible and the Indian's cheekbone is only slightly worn. This variety is listed and pictured on page 133 of the 2015 *Guide Book*. Population: 7 in 25, 72 finer (9/14). PCGS# 145628

1919 Buffalo Nickel, MS67
None Numerically Finer at PCGS

- 4671 1919 MS67 PCGS.** Untoned silver-nickel surfaces are pearlescent, satiny and fully struck. While the eye appeal and mint luster are well-represented, the boldness of strike sets this Superb Gem example apart from less deeply impressed examples. Bowers suggests only 1 in 20 coins shows full details.

More than 60 million pieces were minted, but like all of the Buffalo nickels, the issue circulated heavily. Those that were put aside are frequently no finer than Gem coins, with barely more than a dozen coins reaching Superb status at PCGS. Just one coin is certified numerically finer by both services combined (a single MS68 piece at NGC). PCGS Population: 13 in 67 (1 in 67+), 0 finer (9/14). NGC ID# 22RL, PCGS# 3941

**1920-S Buffalo Nickel, MS65
Condition Rarity in the Series**

- 4672 1920-S MS65 NGC.** Despite a mintage of nearly 9.7 million pieces, the 1920-S nickel is a great condition rarity at the Gem level and virtually unavailable any finer. For the most part, this issue was poorly produced and little-saved, making attractive examples a tiny minority. This luminous example offers rich green-gold, tan, and magenta hues draping both sides. The devices are soft on the high points but far better-defined than the norm. The holder permits examination of the edge, which shows beveling in places, particularly at the upper obverse. Census: 15 in 65 (1 in 65 ★), 3 finer (8/14). NGC ID# 22RS, PCGS# 3946

**1921 Buffalo Nickel, MS67+
Sharply Detailed and Attractively Toned**

- 4673 1921 MS67+ NGC.** The 1921 Buffalo nickel is often seen with a sharp strike and this high-end Superb Gem does not disappoint in this area. All design elements are sharply detailed and the impeccably preserved lustrous surfaces are blanketed in attractive shades of champagne-gold and ice-blue toning. Census: 14 in 67 (1 in 67+, 3 in 67 ★, 1 in 67+★), 0 finer (9/14). NGC ID# 22RT, PCGS# 3947

**1937-D Three-Legged Nickel, FS-901, MS63
Well-Struck Example**

- 4674 1937-D Three-Legged, FS-901, MS63 PCGS. CAC.** Excessive die polishing was the cause of this popular *Guide Book* variety, with the bison's forward right leg being mostly effaced. Surviving examples are widely sought in all grades, but Mint State pieces are the most coveted. This Select example is better-struck than usual for the variety, with only minor signs of the typical die erosion seen in the recesses. Warm golden-gray toning blankets satiny luster on each side. PCGS# 38475

**1937-D Three-Legged Nickel, MS64
Attractively Toned, *Guide Book* Variety**

- 4675 1937-D Three-Legged, FS-901, MS64 NGC.** This *Guide Book* variety is the result of excessive die polishing on the part of Denver Mint officials. The dramatic error makes it one of the most popular and widely sought-after issues in 20th century U.S. numismatics. Golden-orange and nickel-gray intermingle over each side with abundant, satiny luster throughout. This Choice example is sharply impressed, and only the bison's head and shoulder show the slightest sign of incompleteness. Minimally marked and eye-appealing. PCGS# 38475

PROOF BUFFALO NICKELS

1914 Buffalo Nickel, PR67 Exquisite Matte Proof Surfaces

- 4676 1914 PR67 PCGS. CAC.** Deeply impressed with a powerful full strike, this exceptional matte proof nickel is superbly detailed and loaded with eye appeal. A touch of amber-gold toning graces the otherwise untuned, gleaming surfaces. The rugged features on the Indian's portrait and bison are fully brought up. The satiny, textured fields are pristine. Population: 80 in 67 (4 in 67+), 11 finer (9/14). NGC ID# 278T, PCGS# 3991

1915 Buffalo Nickel, PR67 Only Two Proofs Finer at PCGS

- 4677 1915 PR67 PCGS. CAC.** This Superb Gem offers the typical characteristics of a 1915 Buffalo nickel proof, including a uniformly bold impression and satiny luster. With mintage of 1,050 proofs, this high-end and eye-appealing example is an ideal type candidate. Population: 58 in 67 (6 in 67+), 2 finer (8/14). NGC ID# 278U, PCGS# 3992

JEFFERSON NICKEL

1949-D/S Nickel, MS66 Full Steps FS-501, Overmintmark Variety

- 4678 1949-D/S FS-501 MS66 Full Steps PCGS.** A popular *Guide Book* variety, with the D mintmark punched over an errant S. This variety is quite rare on Full Steps coins. The example here offered is of great importance to the Registry Set collector, as it ranks a full grade point finer than the piece in the current highest-rated Major Varieties Registry Set. It is one of just three Full Steps examples certified at the MS66 grade level at PCGS, and only one other is numerically finer (8/14). Iridescent golden-gray toning warms frosty luster on each side, while the strike is bold and the surfaces are beautifully preserved. PCGS# 38512

EARLY HALF DIME

1805 Half Dime, V-1, LM-1, AU Details

- 4679 1805 V-1, LM-1, R.4 — Obverse Scratched — NGC Details. AU.** A single die pair produced the entire 15,600-coin mintage of the 1805 half dime and, unlike the ten cent piece of the same year which is obtainable in high grades for type purposes, the 1805 half dime is scarce in all grades, and Mint State pieces are prohibitively rare. This olive-gray example displays nearly complete detail, though a couple old scratches on the lower bust preclude a numeric grade assessment from NGC. As the issue is known for being weakly struck, this piece understandably exhibits considerable softness on the right obverse border and the upper-right portion of the reverse, though the central motifs are well-defined. PCGS# 38611

SEATED HALF DIMES

1838-O No Stars Half Dime, MS63 First O-Mint Issue

- 4680 1838-O No Stars MS63 NGC. V-2.** The New Orleans Mint produced only a limited number of half dimes during its first year of operation (70,000 pieces), and survivors are among the most sought-after of all early Seated Liberty issues. Examples are sometimes made available in the lower circulated grades, but Mint State pieces are rare at all levels. This representative displays deep gunmetal, olive-gold, and pale lavender toning over each side, with satiny underlying luster. Die fatigue is noted on the lower portion of the obverse, though the devices are otherwise well-defined. Census: 3 in 63, 5 finer (9/14). NGC ID# 232N, PCGS# 4314

1853 Arrows Half Dime, MS67
None Numerically Finer

- 4681 1853 Arrows MS67 NGC. V-11. This is a plentiful issue, popular among type collectors, though its availability declines somewhat at the Superb Gem level, where it is rare. This example displays vibrant, frost-white luster with a few faint traces of light golden toning. The strike is bold throughout, and the surfaces are almost perfectly preserved. Heavy clash marks are observed, most prominent on the reverse. Census: 23 in 67 (8 in 67 ★), 0 finer (9/14). NGC ID# 233Y, PCGS# 4356

1868 Seated Half Dime, MS67
Tied for Finest Certified

- 4682 1868 MS67 PCGS. CAC. V-2. The 1868 half dime's moderately low mintage of 88,600 coins likely contributes to its scarcity in Mint State. For the collector who simply must have the best available, however, this little coin deserves a closer look. Substantial semiprooflike mirroring in the fields illuminates splashes of pale olive, gold, lavender, and sea-green toning, while the central devices are essentially well-defined, with the exception of the upper-left portion of the wreath, as usual. Tied with just two others as the finest certified at PCGS, this coin is further rivaled only by six numerically equal coins at NGC (8/14). NGC ID# 234N, PCGS# 4392

PROOF SEATED HALF DIMES

1855 Half Dime, PR65
Exceedingly Rare as a Proof

- 4683 1855 Arrows PR65 PCGS Secure. CAC. V-6. The number of proof half dimes produced in 1855 is unknown, though most estimates suggest only 15 to 20 examples are extant today. As the combined certified populations of PCGS and NGC report 29 examples in all grades, it is almost certain that these figures are inflated by resubmissions. This is a lovely Gem proof with extraordinary eye appeal. Deeply mirrored fields gleam beneath gorgeous sea-green, gold, and iridescent toning, while the sharply detailed motifs (save for softness on stars 3 and 4) are frosty and contrast nicely against the mirrored fields, although the toning is just deep enough to prevent a Cameo designation. An eye-appealing example of this rare early proof issue. Population: 2 in 65, 2 finer (9/14). NGC ID# 235T, PCGS# 4433

1858 Half Dime, PR66 Cameo
Tied for Finest Certified

1859 Half Dime, PR67 ★ Cameo
Impeccable Preservation, Sole Finest at CAC

4684 1858 PR66 Cameo NGC. In 1858, the Mint broke a decades-old tradition and began marketing proofs to the general public. The estimated mintage is a meager 300 coins, and all proof examples are scarce. However, Cameo representatives such as this are extremely rare. At NGC and PCGS combined, only 11 coins are certified with a Cameo designation, and this remarkably preserved Premium Gem is tied with just one other example for finest certified (8/14). Well-struck and untoned. PCGS# 84437

4685 1859 PR67 ★ Cameo NGC. CAC. V-1. Al Blythe writes in *The Complete Guide to Liberty Seated Half Dimes* that 60 to 75 half dime proofs of 1859 survive. NGC reports a mere 17 pieces in Cameo and Ultra Cameo, of which only one Cameo has been assigned the coveted Star designation — the present Superb Gem Cameo. This is also the sole finest CAC-certified example of this issue. Electric-blue and reddish-brown patination gravitates to the margins, more extensively so and deeper in tone on the obverse. The centers remain silver-white. Excellent definition appears on the design elements, which yield strong contrast with the mirrored fields. Both sides are impeccably preserved. The date numerals are repunched, a diagnostic of this proof die pair. Census: 3 in 67 Cameo (1 in 67 ★ Cameo, 1 in 67+★ Cameo), 0 finer (9/14). PCGS# 84438

**1867 Half Dime, PR67 Cameo
Among the Finest Certified**

- 4686 1867 PR67 Cameo NGC.** The business strike mintage for this issue amounted to a paltry 8,000 pieces which circulated extensively, making the proof variant, while in no way common itself, somewhat more obtainable in high grades for date collectors. From a mintage of just 625 pieces, this razor-sharp Superb Gem displays strong cameo contrast and exceptional preservation, fully warranting of the assigned grade. Vivid orange-gold, violet, and lavender-blue hues melt into the fields on each side, giving this piece a high degree of visual appeal. Census: 3 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (8/14). PCGS# 84450

**1871 Half Dime, PR67 Cameo
Sharply Struck and Nicely Toned**

- 4687 1871 PR67 Cameo NGC. V-1.** Ex: Brian Loncar Collection. This Superb proof example displays lustrous devices surrounded by mirrored fields, all beneath light iridescent toning. The upper right obverse and lower right reverse exhibit vivid blue and lavender colors, with pale silver-gray elsewhere. This is one of the finest proof examples of this date to be certified, and is an ideal candidate for the half dime specialist or the collector of high-quality type coins. Census: 8 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo, 1 in 67+★ Cameo), 1 finer (8/14). Ex: *Long Beach Signature* (Heritage, 6/2005), lot 5733; *Long Beach Signature* (Heritage, 9/2005), lot 2316. PCGS# 84454

EARLY DIME

**1804 Dime, JR-2, AU Details
Key-Date Issue**

- 4688 1804 14 Stars Reverse, JR-2, R.5 — Improperly Cleaned — NGC Details. AU.** This reverse die was also used to strike the BD-2 variety of the 1804 quarter eagle, as the two denominations were virtually equal in diameter. As a date, the 1804 dime is rare in all grades and nearly unknown in Mint State. The two varieties, differentiated by the number of stars on the reverse, are relatively similar in overall availability, though the 14 Stars Reverse variant is slightly rarer in an absolute sense. This representative displays nearly complete detail, with dusky olive-gray patina encompassing each side. No adjustment marks are present, though the border dentils grown weak at 9 o'clock due to slightly uneven striking. PCGS# 38767

PROOF BUST DIME

1831 Capped Bust Dime, PR66 Cameo Only Known Proof of the JR-1 Variety Finest Cameo Example at PCGS

4689 1831 PR66 Cameo PCGS. CAC. JR-1, Possibly Unique as a Proof. When William Kneass succeeded Robert Scot as Chief Engraver in 1823 after Scot's death, he implemented a number of changes at the U.S. Mint to increase production and standardize the designs. Among the changes was the implementation of a close collar in place of the open collar, making the addition of a reeded edge part of the mechanical process rather than a manual one as had been the case previously. The Capped Bust dimes were produced with that method beginning in 1828. Several changes occurred, including the production of a smaller, but thicker dime that met the weight standards that had already been established. The border detail was changed from dentils to small beads within a circular rim. The use of the close collar led to uniform striking pressure, which provided stronger detail at the outer rims than could be achieved prior, most evident on the Proof coins produced. Although the changes increased the degree of uniformity, the date, stars, and legends remained hand punched on the dies for the dimes, resulting in a number of die varieties for each date. A total of six die varieties are known for 1831.

According to the authors of *Early United States Dimes 1796-1837*, all known proofs of 1831 were struck from the JR-2 or JR-4 dies, making this JR-1 specimen a new, and possibly unique, discovery. In any case, the proof mintage for the entire Capped Bust, Close Collar or Modified Design dimes as they are also known (1828-1837) is believed to be less than 200 coins. There are only 15 to 20 known surviving 1831 dimes, with only five examples having achieved the Cameo designation from NGC and PCGS combined. This piece is tied with one other NGC-graded example at the PR66 Cameo level as finest known within the designation (9/14)

An outstanding piece, this Premium Gem Cameo example boasts sharply struck design elements and lustrous surfaces. Attractive toning is present on both sides and includes shades of apricot, deep green-blue, orange, and small splashes of red. We expect intense competition from early proof specialists when this lot is called. PCGS# 84553

SEATED DIMES

1837 No Stars Seated Dime, MS66 The Large Date Variant

- 4690 1837 No Stars, Large Date MS66 NGC. Fortin-101b, R.2.** An early stage of this shattered die variety, with a prominent die crack from the obverse rim at 4 o'clock toward the knee, but with the matching crack from the rim at 7 o'clock not yet formed. As a date, the 1837 Large Date dime is scarce in Gem or finer condition, and are highly sought-after as the more easily obtainable of the two No Stars Seated dime issues (the other is the elusive 1838-O). This Premium Gem example is essentially free of post-Mint surface flaws, exhibiting soft, satiny luster and bold design definition. Soft lavender-gray overtones accent blended multicolor hues in the fields, giving this piece ample visual appeal. Census: 23 in 66, 9 finer (9/14). NGC ID# 237R, PCGS# 4561

1857 Dime, MS66 Attractive Multicolor Toning

- 4691 1857 MS66 PCGS. Fortin-104, R.3.** This variety exhibits noticeable small die chips around stars 3 through 6, with smaller chips around select others, as well. The 1857 is one of the more plentiful Seated dime issues of the period in Mint State condition, though Gems are distinctly scarce, and finer coins are rare. This Premium Gem example displays beautiful splashes of multicolor toning in shades of lavender, blue, sea-green, and rose-gold. The strike is sharp and the preservation is outstanding. Population: 4 in 66 (2 in 66+), 1 finer (8/14). NGC ID# 238X, PCGS# 4614

1859 Seated Dime, MS67 Green-Label Holder

- 4692 1859 MS67 PCGS. CAC.** Delicate gold and light brown toning graces this lustrous and sharply struck Superb Gem, including the bowknot, an area usually flat. Only the hair atop Liberty's head displays the usual softness. Examination with the aid of a loupe fails to locate any significant marks. Struck from moderately clashed dies, and encapsulated in a green label holder. The final Philadelphia issue for the laurel wreath reverse. Population: 15 in 67 (1 in 67+), 1 finer (8/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 382. NGC ID# 2394, PCGS# 4619

1867-S Dime, MS65 Extremely Rare Any Finer

- 4693 1867-S MS65 NGC.** From a small mintage of 140,000 pieces, the 1867-S Seated Liberty dime is a very rare issue at the MS65 grade level. This delightful Gem displays well-detailed design elements and well-preserved lustrous surfaces, under shades of greenish-gold and bluish-gray toning. Census: 3 in 65, 2 finer (9/14). NGC ID# 239V, PCGS# 4646

1877-CC Seated Liberty Dime, MS67 ★ Only Three Finer Coins at NGC

- 4694 1877-CC MS67 ★ NGC.** A magnificent Superb Gem from the famous Carson City Mint, with sharply detailed design elements and vibrant mint luster, under a blend of greenish-gold, dark lavender, silver-gray, and electric-blue toning. The surfaces are free of mentionable distractions and the star designation attests to the outstanding eye appeal. Census: 11 in 67 (1 in 67 ★), 3 finer (9/14). NGC ID# 23AM, PCGS# 4683

PROOF SEATED DIMES

1837 No Stars Seated Dime, PR64 Rare Early-Date Proof Important Two-Year Design Type

4695 1837 No Stars PR64 PCGS. CAC. Large Date. Mint Engraver William Kneass began the process of new designs for U.S. coins to replace the Capped Bust series, but his work was cut short when he suffered a stroke. Christian Gobrecht took over the project, and with the assistance of renowned artists Thomas Sully and Titian Peale, the new design for Seated Liberty coinage evolved. Both Capped Bust and Seated Liberty dimes were coined in 1837.

The Seated Liberty motif is a favorite with collectors — a model of simplicity and purity of design. Only the 1837 and 1838-O dimes display Gobrecht's original vision of the design and represent an important two-year type. In 1838, the Philadelphia Mint added stars to the obverse margin, first as hand-punched small stars into the die, followed by larger stars later in the year. Later, in 1840 drapery was added to Liberty's elbow, the shield was placed upright, and Liberty gained some weight. A larger reverse legend and a revised wreath further distanced the design from Gobrecht's initial artistic intent.

The current boldly struck example shows a wonderful mottled patina of blue, reddish-umber, and fuchsia pink. The depth of the mirrors is obvious when viewed at the proper angle. A few stray, delicate lines are hidden in the toning and account for the near-Gem grade. Just 30 proofs is the estimated mintage, although the PCGS-NGC reports are inflated by resubmissions. Population: 10 in 64, 4 finer (9/14). NGC ID# 23BN, PCGS# 4718

1857 Seated Dime, PR66 Beautiful Multicolor Toning

4696 1857 PR66 PCGS Secure. CAC. Fortin-101, R.6. Ex: Simpson. The Mint did not record the exact number of proof dimes struck in 1857, though it is likely the total was around 70 pieces, as 30 to 50 are believed to still exist today. The certified population figures, totaling 75 coins in all grades, are obviously inflated by resubmissions. This Premium Gem representative displays razor-sharp devices set against moderately reflective fields. Beautiful shades of green-gold, ocean-blue, lavender-gray, and sun-gold toning limit the cameo contrast, but deliver substantial eye appeal in their own right. Population: 4 in 66, 1 finer (9/14). NGC ID# 23CB, PCGS# 4746

1858 Seated Dime, PR66 None Finer at PCGS

4697 1858 PR66 PCGS. CAC. A glittering, reflective proof with a large amount of cameo contrast. Burnt-orange, peach, and lilac shades visit the vibrant silver surfaces. A full strike completes the Premium Gem appeal. 1858 was the first year of "official" public proof sales by the Mint. Although Breen estimated just 80 proofs issued and later estimates suggested 100 or so proofs, the current *Guide Book* lists the most recent research as 300+ proofs produced. Very few, however, are the equal of this gleaming example. Population: 4 in 66, 0 finer (9/14). NGC ID# 23CC, PCGS# 4747

1859 Dime, PR66 Cameo
Challenging Cameo Representative

- 4698 1859 PR66 Cameo NGC.** Mint records indicate 800 proof Seated Liberty dimes were struck in 1859, but a number of coins probably went unsold and were melted after the end of the year. This spectacular Premium Gem displays sharply detailed and thickly frosted design elements that contrast boldly with pristine, deeply mirrored fields. A few hints of pale gold toning add to the outstanding eye appeal. Census: 8 in 66 Cameo (1 in 66 ★ Cameo), 13 finer (8/14). PCGS# 84748

1859 Seated Dime, PR67 Cameo
Conditionally Scarce Stars Obverse Specimen

- 4699 1859 PR67 Cameo NGC.** The final proof issue in the Stars Obverse Seated dime series, with an official mintage of 800 coins, some of which may have been spent or melted. Around 400 coins have been certified by NGC and PCGS combined, including any possible resubmissions; but not nearly that many are rated as Cameo examples. This untuned Superb Gem exhibits remarkably glassy fields and beautifully frosted design motifs. Census: 12 in 67 Cameo (3 in 67 ★ Cameo), 1 finer (9/14). PCGS# 84748

1865 Seated Dime, PR66 Cameo
Tied for Finest at PCGS

- 4700 1865 PR66 Cameo PCGS. Fortin-102, R.4.** A low mintage of 10,000 circulation strikes put significant date pressure on the 500 proofs issued. This remarkable Premium Gem representative showcases lightly toned centers that progress to peripheral shades of blue, purple, and orange. Pronounced field-device contrast amplifies the visual appeal. Population: 2 in 66 Cameo, 0 finer (8/14). PCGS# 84758

1881 Seated Liberty Dime, PR67+
Exemplary Quality

- 4701 1881 PR67+ PCGS. CAC. Fortin-102.** Two sets of dies produced a total of 975 proofs for this notably scarce Seated dime date. The current example shows the date a bit further left than Fortin-101, with the first S of STATES not entirely broken, but nearly so. Often weakly struck at Liberty's head, this Superb Gem is about as strong as seen for the date. Magnificent toning covers the deep-mirrored fields with shades of orange-gold, blue, and violet. The coin is awarded both the PCGS Plus designation (the only PR67 example so-honored) and CAC approval for its outstanding eye appeal and technical quality. Population: 6 in 67 (1 in 67+), 0 finer (9/14). NGC ID# 23D6, PCGS# 4778

SPECIMEN SEATED DIME

1876-CC Seated Dime, SP65 Extremely Rare Specimen Striking One of Only Three Confirmed to Exist

4702 1876-CC SP65 NGC. Fortin-121, R.8. Ex: Simpson. Proof or presentation strike dimes were not officially produced at the Carson City Mint in 1876, according to the mint's records, though a few pieces are known that possess distinctly proof-like qualities. These characteristics include unusually deep mirroring in the fields, a degree of sharpness on the relief elements that suggests a second blow from the dies, and a distinct wire edge around much of, if not all of the peripheries.

The reason these coins were struck at all is unknown, though popular theories suggest they were made for an unofficial Centennial celebration, or possibly as presentation pieces for certain officials who might have visited the mint. As their production was not recorded, neither was their number. Researchers have estimated as few as two pieces exist today, though the combined NGC and PCGS population reports suggest the survival of as many as seven examples. We have been able to confirm the existence of three pieces certified as specimen strikings, a roster of which is given below. A fourth example has been suggested to reside in the Smithsonian Institution, though this has not been confirmed. The record auction price realized is held by the Irene Collection specimen, which brought \$178,250 in Superior's January 2008 Orlando sale.

All three examples are from the same die marriage, specifically Fortin's 17-P die pair. Diagnostics include die doubling on ONE DIME and an upward-sloping date with a knobbed 6. This die pair was later used for business strikes, meaning that the specimen strikings are most easily differentiated by the depth of mirroring in the fields and the profound sharpness of the relief elements. The piece here offered is a perfect match in that regard, and also displays attractive shades of green-gold, blue, and lavender-gray toning over each side. A small vertical depression in the middle of Liberty's left (facing) thigh is common to all three known specimens.

Unlike some other special issues in American numismatics, the specimen 1876-CC dime is recognized by both of the major grading services, erasing all doubt in the minds of collectors as to its presentation strike status. Fueled by profound rarity and immense appeal among Carson City enthusiasts, this piece represents a rare and important opportunity for the advanced specialist to acquire this beautifully produced and preserved Carson City Gem.

Roster of Confirmed Specimen 1876-CC Seated Dimes:

- 1. SP66+BM PCGS.** Public Auction Sale (Stack's, 9/1983), lot 677; Orlando Sale (Superior Galleries, 8/1992), lot 99; Baltimore '93 Auction (Superior Galleries, 7/1993), lot 230; ANA 2000 Auction (Superior, 3/2000), lot 286; Irene Collection; Orlando Elite (Superior Galleries, 1/2008), lot 110.
- 2. SP66BM PCGS.** Auction '90 (RARCOA, 8/1990), lot 612; ANA Bullet Sale (Heritage, 8/1992), lot 5190; FUN Signature (Heritage, 1/1996), lot 5311; Amherst & Waccabuc Collections (Stack's, 11/2007), lot 441.
- 3. SP65 NGC.** Long Beach Signature (Heritage, 2/2003), lot 6280; Simpson Collection. **The present coin.** PCGS# 4789

BARBER DIMES

1892-S Barber Dime, MS66 Conditionally Rare Issue

4703 1892-S MS66 PCGS. In the first year of Barber's Liberty Head dime, production of the denomination at the San Francisco Mint dipped below 1 million coins, a significantly smaller mintage than was accomplished at the Philadelphia and New Orleans facilities. As the result, the San Francisco issue of this year is the scarcest of the three 1892 issues in virtually all grades, though the contrast is especially prevalent at the MS66 grade level; PCGS has certified some 78 examples of the Philadelphia issue in this grade (1 in 66+) and 16 finer, 10 examples of the New Orleans issue (3 in 66+) and one finer, but only four representatives of the San Francisco issue (1 in 66+), this time with none finer (8/14).

The connoisseur will find much to love about this coin; the frosty luster attractively illuminates soft lavender, gold, and aquamarine hues on each side, while the strike is boldly executed. NGC ID# 23DM, PCGS# 4798

1894-O Barber Dime, MS65 Notable Condition Rarity

4704 1894-O MS65 PCGS. CAC. The scarcity of the 1894-O dime, an issue of which only 720,000 examples were struck, is recognized even in the lowest circulated grades where the date brings a substantial premium over higher-mintage common dates, but in Mint State, the issue emerges as one of the major keys in the series. At this level, the 1894-O is most often seen in the MS63 to MS64 range, though even in these grades it is distinctly rare. Gems are exceedingly challenging and are rarely offered at auction or on the bourse floor.

This frosty, light golden representative is struck to full definition and showcases nearly flawless surfaces that are fully deserving of the Gem grade assigned. The advanced Barber dime specialist will be hard-pressed to locate a technically or visually finer piece. Population: 4 in 65, 6 finer (8/14). NGC ID# 23DU, PCGS# 4804

**1900-O Barber Dime, MS66
Among the Finest at PCGS**

4705 1900-O MS66 PCGS. In the Barber dime series, the 1900-O is one of the most underrated issues, especially in Mint State. CoinFacts estimates that only 150 examples survive in Uncirculated condition, and PCGS has certified just seven coins in MS66 (one in MS66+) with none finer (8/14). While most representatives come poorly struck and lacking luster, this Premium Gem is quite the opposite. The devices exhibit razor-sharp detail, and frosty luster rolls over the brilliant and wonderfully preserved surfaces. NGC ID# 23ED, PCGS# 4822

MERCURY DIMES

1921 Mercury Dime, MS65 Full Bands

4706 1921 MS65 Full Bands PCGS. CAC. Even though the 1921 Mercury dime had a slightly higher mintage than its Denver-issued counterpart (more than 1.2 million pieces), the two issues are relatively similar in rarity with Full Bands definition. The surfaces of this Gem representative are nearly unabraded, with softly frosted luster and just a faint suggestion of light golden toning over each side. The strike is razor-sharp, while a lens reveals some faint die striations in the left obverse field. NGC ID# 23HE, PCGS# 4935

**1923-S Dime, MS65 Full Bands
Multihued Toning, Rare This Nice**

4707 1923-S MS65 Full Bands PCGS. The issue has a reputation as one of the most difficult San Francisco dates to locate with a full strike — not to mention it is an extremely scarce coin in high Mint State under any circumstances. Thankfully, there are a few exceptions, and this coin is one of them. The strike is outstanding for the issue, with the diagonal bands unmarked and rounded, complemented by full split bands over the fasces. Liberty displays strong hair detail. A wonderful, multihued patina covers both sides with vibrant mint luster shining beneath the toning. Few examples are any finer. Population: 36 in 65 Full Bands, 5 finer (8/14). NGC ID# 23HH, PCGS# 4941

PROOF TWENTY CENT PIECES

**1875 Twenty Cent Piece, PR65 Cameo
Deeply Reflective, Strongly Contrasted**

4708 1875 PR65 Cameo NGC. First year of issue for this short-lived series and one of only 2,790 proofs struck. This example displays deep mirror-like fields with strongly contrasting mint frost over the devices, yielding a distinct cameo effect. Brilliant on the obverse except for the slightest hint of golden around the margin. The reverse displays the faintest presence of milkiness in the fields, but is otherwise brilliant. Census: 13 in 65 Cameo (1 in 65 ★ Cameo), 13 finer (9/14). PCGS# 85303

1876 Twenty Cent Piece, PR66
Fully Patinated

- 4709 1876 PR66 PCGS. BF-2 Obverse, Unlisted Reverse.** A beautifully toned Premium Gem with rich navy-blue shades across the majority of both sides. The lower obverse exhibits peach patina. Fully struck and flashy with undisturbed surfaces. A scarce four-year proof type. The obverse die is the same as BF-2, confirmed by the diagonal die line in the drapery above the 6 in the date. However, the reverse die is unlisted, since there is no die doubling on STATES. Die markers for the reverse include a few missing feathers (due to lapping) on each wing near the eagle's body. Population: 12 in 66, 11 in 66 Cameo, 1 in 66 Deep Cameo, 1 in 67 Cameo (9/14). NGC ID# 27H3, PCGS# 5304

1876 Twenty Cent Piece, PR64+ Deep Cameo
Rare This Well-Contrasted

- 4710 1876 PR64+ Deep Cameo PCGS. BF-1, R.4.** The proof 1876 twenty cent piece is somewhat more plentiful in high grades than is its business strike counterpart, but Cameo representatives are scarce, and Deep Cameo pieces are decidedly rare. This near-Gem piece displays heavy frost over the central devices, with deep mirroring in the fields and just a faint blush of light golden toning overall. The strike is bold, and marks are minimal. A small mint-made strike-through is noted near Liberty's left (facing) elbow. Minor die doubling is seen on all reverse lettering, though this is characteristic of all 1876 twenty cent pieces, as only one tail die was used for both proof and business strike coinage. Population: 4 in 64 (2 in 64+) Deep Cameo, 2 finer (8/14). PCGS# 95304

EARLY QUARTERS

1796 Draped Bust Quarter, Fine 12
B-2, Attractive Original Patina

4711 1796 B-2, R.3, Fine 12 PCGS. Die State I, perfect dies. The first issuance of the silver quarters from the new United States Mint was in the amount of just 6,146 pieces produced in 1796 for silver depositors. The denomination was not coined again until 1804, long after the reverse design had been changed from the original Small Eagle motif to a rendition of the Great Seal, with a heraldic eagle. As a result, the 1796 quarter is not only the first issue of the denomination, but it is a scarce one-year type, mandatory for a complete type set of U.S. quarter dollars.

This representative is moderately worn, as are most examples of this issue, but the wear is remarkably even, with complete border dentils and well-defined central devices. An attractive circulation cameo, this piece displays deep iridescent gunmetal hues in the recesses, with lighter shades of gray over the relief elements. No adjustment marks are present, making this an immensely appealing representative for the grade. PCGS# 38920

First U.S. Mint Building

1796 B-2 Quarter, MS63
Widely Sought, One-Year Type

4712 1796 B-2, R.3, MS63 PCGS. The year 1796 was significant as the first time that the Mint was able to actually produce all coinage denominations authorized by the Mint Act of 1792. The quarter, dime, and quarter eagle were all minted for the first time in this year. Earlier, priority had been given to the more prestigious large denominations and to the smaller coins that were indispensable in daily transactions. The modest demand for the quarter is reflected in its minuscule mintage of 6,146 pieces.

The public must have found the new coins interesting, if not very useful. A relatively large number of examples were saved as curiosities or in bank vaults, and the issue is available in all grades today. After 1796, the denomination was not produced again until 1804, by which time the reverse had been changed to the Heraldic Eagle design. Thus, the 1796 quarter is one of the few one-year type coins, and it is among the most hotly demanded of those, with pressure coming from a wide spectrum of collectors that ranges from type enthusiasts to early quarter specialists who harbor the ambition of owning both die varieties for the issue.

The present example boasts deep reddish-gold and lavender tones across both sides. The strike is outstanding, with the only noteworthy weakness at the center of the eagle and the upper right of the wreath, undoubtedly a result of positioning the obverse and reverse high points directly opposite. The surfaces are free of any distracting impairments. Including both the B-1 and B-2 varieties, PCGS reports a total of 10 submission events at the MS63 level with only 13 examples finer (8/14). This is a magnificent specimen that appeals to type, date, series, and ultra-rarity collectors. *From The Pannonia Collection, Part Two.* PCGS# 38920

1796 Draped Bust Quarter, MS64
B-2, Spectacularly Toned

4713 1796 B-2, R.3, MS64 PCGS. The Mint Act of 1792 authorized coinage in denominations that ranged from milles (1/1000 of a dollar) to eagles. Pattern cents, half dismes, dismes, and quarters were produced in 1792, but only the half dismes were produced in any significant quantity, believed to be between 1,500 and 2,000 specimens. By September 1792 construction of the first United States Mint in Philadelphia was essentially completed and early the following year half cents and cents were struck.

The Mint Act, however, required that the Chief Coiner and Assayer each post a bond of \$10,000 in order to coin precious metal, and this huge sum delayed production of gold and silver coins. Jefferson pushed Congress to lower the amounts, and on March 3, 1794 an act reduced the bonds to \$5,000 for the Chief Coiner and \$1,000 for the Assayer. Production of dollars came first, and in December 1794 half dollars were struck. In February 1795 half dimes were struck, dated 1794, and gold half eagles and eagles were issued later that year. Dimes, quarters, and quarter eagles were not struck until 1796.

These final three denominations were relatively unimportant in commerce and few were minted. The 1796 quarter had a mintage of just 6,146 pieces, which were delivered in four batches: 1,800 on April 9, 2,530 on May 27, 1,564 on June 14, and 252 on February 28, 1797. These were struck from two obverse dies and one reverse die. The two die varieties are easily identified by the position of the date: on Browning-1 the 6 is low and evenly spaced between the bust and the denticles, while on Browning-2 (this piece) the 6 is high and nearly touches the bust. The first variety, B-1, is a High R.4, which ranks it somewhat rarer than the R.3 B-2. Both varieties, however, are rightfully considered very scarce.

The second Director of the Mint, Henry William DeSaussure, made it a priority to improve the designs of United States coinage. Although he lasted only a few months at the post, DeSaussure was able to contract Gilbert Stuart, one of the most prominent American portraitists, to design a figure of Liberty to replace the Flowing Hair style used on the first silver coins. Stuart's contribution was the Draped Bust design, which first appeared on the silver dollar in late 1795 and on all silver coins the following year. (The short-lived Small Eagle reverse was designed by the relatively unskilled John Eckstein.) Although the great sculptor Augustus Saint-Gaudens is well known in numismatic circles for his coinage designs in the early 20th century, the equally important Gilbert Stuart's work more than 100 years earlier is often ignored.

With such a low mintage, the 1796 was destined to be an elusive issue from the start. A small number appear to have been saved as first-year representatives by the American public. The dollar and half dollar may have had too high a face value for most people to afford, the half dime, dime and quarter afforded an opportunity for some better off Americans to save an example of the country's earliest silver coinage.

Breen (1988) writes that Colonel E. H. R. Green, famous for his ownership of the 1913 nickels, amassed a hoard of more than 200 Uncirculated 1796 quarters. Population figures from NGC and PCGS, however, reveal that the number reported by Breen is a gross exaggeration. Both services combined report a mere 63 examples in all Mint State grades, and when one accounts for multiple submissions of the same coin, the true number of Uncirculated survivors is probably fewer than 50 — perhaps dramatically less.

This pleasingly lustrous near-Gem features strong definition over Liberty's hair, though the eagle's breast shows more typical striking softness. Both sides show blue-green and gold patina, with hints of rose and violet-gray toward the centers. Minimally marked with outstanding eye appeal, this is a wonderful representative of America's first quarter. Including both varieties, PCGS has graded only five coins in MS64 and eight examples finer (8/14).

From The Pannonia Collection, Part Two. PCGS# 38920

BUST QUARTERS

1831 Large Letters Quarter, Toned MS63 B-5, Repunched Date

- 4714** 1831 Large Letters, B-5, FS-301, R.3, MS63 NGC. CAC. This *Cherrypickers'* variety shows the Large 1s in the date punched over Small 1s. Shades of blue, purple, green, and russet intermingle over each side and provide the well-preserved surfaces with strong eye appeal. Liberty's portrait and the eagle exhibit sharp detail, while the stars and olive leaves are a touch incomplete. PCGS# 38984

1835 B-1 Quarter, MS63 Reflective Fields

- 4715** 1835 B-1, R.1, MS63 PCGS. Business strikes of the Browning-1 die pair are plentiful while proofs are extremely rare with just two confirmed pieces. This Select Mint State specimen is not a proof, but it has reflective fields and is likely one of the earliest pieces struck after the small quantity of proofs were minted. Despite the common nature of the variety, high grade pieces are rarely seen and only half a dozen higher grade examples are known. This Select example displays blue-green, lavender, and peach-gold toning. We note scattered faint marks on the left obverse and an inconspicuous fingerprint beneath OF. PCGS# 38997

SEATED QUARTERS

1851-O Seated Liberty Quarter, MS62 Low Mintage, Low Survival Rate

- 4716** 1851-O MS62 PCGS. CAC. The influx of raw gold from California, off-setting the gold to silver value ratio, brought on widespread melting of minor silver coins in an attempt to profit from their increased bullion value, an act which effectively stunted the survival rate of many early Seated Liberty issues. The low mintage of the 1851-O quarter (just 88,000 coins), only aided in its near-demise. Closely rivaled by the also elusive 1849-O and 1852-O, the 1851-O is among the rarest Seated Liberty quarters produced at the New Orleans Mint; problem-free representatives are scarcely seen in any grade, and PCGS and NGC combined have certified only nine Mint State pieces, though even this paltry number likely includes resubmissions. This piece is tied with a purported two other specimens as the finest certified at PCGS (9/14). Rich burgundy-red, teal, and green-gold toning accents semiprooflike mirroring in the fields on each side, while the strike shows above-average definition for the issue. An exceptional example of this sought-after New Orleans issue. NGC ID# 23T7, PCGS# 5418

1854-O Seated Liberty Quarter, AU50
Popular Huge O Variety, Briggs 1-A, FS-501
Seldom Seen Finer

4717 1854-O Huge O, Briggs 1-A, FS-501, AU50 NGC. Seldom seen any finer than VF, this popular variety has its own listing in the *Guide Book*. It is scarce in XF condition and extremely rare in About Uncirculated — remarkably, it is still unknown in Mint State. In describing the variety, Larry Briggs says, “Comes with pale washed out luster in high grades as if “dipped to death.” The present coin has that look, although a bit of mint luster gleams at the margins and nice detail remains.

The mintmark was likely handcut into the reverse die, resulting in its ungainly size and irregular appearance. Briggs suggests the entire obverse was recut, including the stars, Liberty, the arrows, and date, making the obverse of this strange New Orleans issue perhaps even more interesting than the famous reverse. Together, the grading services report 139 grading events, yielding only six AU50 or finer coins (8/14). PCGS# 395933

1875 Seated Quarter, MS67
Tied for Finest Certified

4718 1875 MS67 NGC. Type One Reverse. This Superb Gem is tied for the finest certified, with four PCGS submissions and seven NGC submissions equaling the MS67 grade (8/14). Delicate peripheral die cracks are noted on each side. The surfaces are pristine with frosty luster beneath radiant gold, emerald, and iridescent toning. NGC ID# 23UX, PCGS# 5498

1877-CC Quarter, MS66
Conditionally Scarce

4719 1877-CC MS66 PCGS. CAC. Briggs 3-C. A bold strike and thickly frosted luster reside beneath hues of lavender-gray and sea-green patina on each side of this Premium Gem Carson City quarter. The design elements are boldly impressed, and the surface preservation is excellent. Housed in an old green label holder. Population: 16 in 66 (3 in 66+), 6 finer (9/14). NGC ID# 23V6, PCGS# 5505

1877-CC Quarter, MS67
Top-Notch Color and Preservation

- 4720 1877-CC MS67 NGC.** Impeccably preserved surfaces reveal an array of attractive toning hues, including pinkish-hold, amber, mint-green, and teal contrasting against some untuned central areas. Although the mintage of this midseries Carson City issue was plentiful at nearly 4.2 million pieces, both NGC and PCGS have seen only a half-dozen pieces each at the Superb Gem grade level. This splendid Carson City Type 5 (With Motto) quarter would be equally at home in a Seated quarter set, a type set, or a high-grade mintmark set. Undoubtedly one of the finest available today. The Gene Gardner example, MS67 PCGS-CAC, was offered as lot 30395 in our June 2014 Gardner auction, where it realized \$38,187.50. NGC ID# 23V6, PCGS# 5505

PROOF SEATED QUARTERS

1859 Seated Quarter, PR65
Dazzling Multicolor Toning
Tack-Sharp Striking Definition

- 4721 1859 PR65 PCGS. Briggs 2-B.** The Mint struck 800 proof quarters in 1859, though it is likely many were melted at the end of the year as unsold. Gems are scarcely encountered in the numismatic market, and finer coins are rare. This representative is far and away one of the most attractive proof Seated quarters this cataloger has ever seen. The design elements are produced to their full capacity, even on the most minute details; a degree of sharpness that is essentially unknown on a business strike. The obverse displays splashes of ocean-blue, violet, forest-green, and warm champagne toning overall, while the reverse showcases a mint-green peripheral ring around central hues of deep royal-blue and violet. Profound reflectivity in the fields completes the simply incredible visual appeal. Population: 7 in 65, 5 finer (8/14). NGC ID# 23WL, PCGS# 5555

1881 Seated Quarter, PR66+ Cameo
Repunched Date

- 4722 1881 PR66+ Cameo PCGS. CAC.** Both 8s are repunched, the first 8 in the upper loop and the second 8 in the lower loop. This Premium Gem Cameo proof has earned the PCGS Plus designation for its exceptional eye appeal. Both sides are brilliant with fully mirrored fields and lustrous silver devices, all within a delicate frame of gold patina. Population: 19 in 66 (3 in 66+) Cameo, 9 finer (8/14). PCGS# 85582

**1881 Quarter, PR67 Cameo
Starkly Contrasted**

- 4723 1881 PR67 Cameo NGC.** Only one-fifth of all 1881 proofs certified by NGC have been awarded a Cameo designation. Of those, just five have been graded PR67 (one in PR67 ★) with only two coins finer (8/14). This brilliant Superb Gem proof features dramatic white-on-black contrast and a needle-sharp strike. With only 975 proofs struck and only 12,000 business strikes minted, the 1881 is a popular and challenging date in any format. PCGS# 85582

BARBER QUARTERS

**1892 Type Two Quarter, MS67
Attractively Toned**

- 4724 1892 MS67 PCGS. CAC.** Type Two Reverse. Toning appears on both sides of this Superb Gem example, with the toning arguably more attractive on the reverse. The colors include hues of gold, sea-green, rose-gold, and frosty yellow. A sharp strike and minimal marks further enhances the eye appeal of this piece. Population: 29 in 67 (3 in 67+), 3 finer (8/14). NGC ID# 23XT, PCGS# 5601

**1892 Barber Quarter, Iridescent MS68
Among the Few Finest Survivors**

- 4725 1892 MS68 NGC. CAC.** Type Two Reverse. This magnificent first-year MS68 Barber quarter possesses extraordinary eye appeal to complement the highest available technical grade. The design elements are fully struck and vibrant mint luster shines through iridescent shades of gold, blue, gray, and amber toning. The impeccably preserved surfaces show no post-strike flaws, but a spidery die crack connects the 2 in the date with the point of the bust and star 13. Some of the stars show evidence of recutting. This delightful specimen is among the finest survivors and should find a home in a top-shelf collection or Registry Set. Census: 6 in 68 (2 in 68 ★), 0 finer (9/14). PCGS shows two in MS68 and one MS68+ finer. Ex: *Pittsburgh Elite Auction (Superior, 8/2004)*, lot 329. NGC ID# 23XT, PCGS# 5601

**1892-O Barber Quarter, Top-Notch MS68
Sole Finest Certified**

- 4726 1892-O MS68 NGC.** Type One Reverse. This MS68 NGC coin is the sole finest certified 1892-O Barber quarter at either leading grading service. Razor-sharp definition is evident on all design elements. Even the usual problem areas, such as the eagle's claw and shield point, are sharply detailed. The pristine surfaces radiate vibrant mint luster on both sides. Vivid shades of cobalt-blue and silver-gray toning enhance the high eye appeal on the obverse; the reverse is patinated in shades of lavender-gray, cerulean-blue, and golden-brown. This coin will improve any high-grade collection or Registry Set. Census: 1 in 68, 0 finer (9/14).
Ex: *Baltimore Auction (Bowers and Merena, 11/2009)*, lot 737. NGC ID# 23XU, PCGS# 5602

**1907-O Barber Quarter, MS66
Only Five Numerically Finer at PCGS**

- 4727 1907-O MS66 PCGS. CAC.** An available date in lower grades, the 1907-O Barber quarter becomes scarce in Gem condition and rare any finer. This Premium Gem representative displays satiny mint bloom and well-defined motifs. Dappled hues of coppery-orange, lemon-gold, and pale olive toning encompass the reverse and surround the obverse periphery. Population: 12 in 66 (2 in 66+), 5 finer (9/14). NGC ID# 23ZA, PCGS# 5647

**1916 Barber Quarter, MS67
Among the Finest Certified**

- 4728 1916 MS67 PCGS.** A deeply frosted coin of superlative eye appeal and strong strike, with lustrous shades of red-orange and ice-blue on the obverse and a brilliant, icy-silver reverse. Overshadowed by the rare, first-year 1916 Standing Liberty quarter, the final-year Barber issue is in fact equally rare when in Superb Gem condition (although far from equal in value compared to its Full Head Standing Liberty counterpart). Just four Barber quarters have earned the MS67 grade from PCGS. Population: 4 in 67, 0 finer (9/14). NGC ID# 2425, PCGS# 5673

PROOF BARBER QUARTERS

1894 Barber Quarter, PR68+ Technically and Aesthetically Unsurpassed

- 4729 1894 PR68+ NGC.** The proof 1894 Barber quarter was issued in moderately substantial numbers (972 coins), and is fairly plentiful in an absolute sense. This piece, however, is one of just six non-Cameo representatives certified at the PR68 grade level by NGC and PCGS combined, and is the only such coin to receive a Plus designation (8/14). Beautifully intermingled green-gold, royal-blue, violet, and golden-orange toning graces needle-sharp devices and melts into deeply mirrored fields, with the colors somewhat more intense on the obverse. Close examination finds the surfaces to be seemingly flawless, while the eye appeal is arguably unmatched. NGC ID# 2429, PCGS# 5680

1894 Quarter, PR67 Cameo Well-Contrasted and Well-Preserved

- 4730 1894 PR67 Cameo PCGS.** This spectacular Superb Gem proof displays well-detailed design elements with a richly frosted texture that contrasts boldly with the deeply reflective fields. The well-preserved surfaces are enhanced by shades of greenish-gold and cerulean-blue toning. The eye appeal is top-notch. Population: 4 in 67 (1 in 67+) Cameo, 0 finer (9/14). PCGS# 85680

1896 Quarter, PR67 Cameo Untoned, White-on-Black Example

- 4731 1896 PR67 Cameo PCGS.** A high-contrast, brilliant-white proof, entirely untuned and fully struck including full details on the eagle. It would be hard to imagine a proof any finer in terms of strike than this Superb Gem. Just 762 pieces were struck in proof format, and PCGS has seen just one numerically finer example. Population: 7 in 67 (1 in 67+) Cameo, 1 finer (9/14). PCGS# 85682

1897 Quarter, PR68 Among the Finest Certified

- 4732 1897 PR68 NGC.** A beautifully preserved, razor-sharp proof, this high-end Superb Gem showcases vivid peripheral toning in concentric rings of lemon-gold, lime-green, cherry-red, and pale lavender, while the central regions exhibit soft golden-orange and gunmetal-gray hues. The colors are more prominent on the obverse, while the reverse is somewhat softer overall. From a mintage of 731 pieces. Census: 6 in 68 (1 in 68+★), 0 finer (9/14). NGC ID# 242C, PCGS# 5683

1908 Barber Quarter, PR66+ Cameo Rare This Well-Contrasted

- 4733 1908 PR66+ Cameo PCGS. CAC.** As a date, the proof 1908 Barber quarter is easily obtainable in most grades, but Cameo representatives are decidedly rare in any condition. This high-end Premium Gem example displays razor-sharp devices and warm sun-gold toning over each side. Soft mint frost over the central motifs deliver a pleasing degree of contrast. Population: 1 in 66 (1 in 66+) Cameo, 3 finer (8/14). PCGS# 85694

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, VG8 Nice, Problem-Free Example

- 4734 1916 VG8 PCGS.** This is a pleasing lower-grade example of this key-date issue, with original battleship-gray patina over much of each side, and deeper olive and russet toning in the upper obverse recesses. The date is worn at the top, as is typical at this grade level, though the numerals remain readily readable. Despite making frequent appearances at auction, the 1916 Standing Liberty quarter remains a favorite in the series, and draws strong demand in all grades. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, XF45
In an Old Green Label Holder**

4735 1916 XF45 PCGS. The 1916 Standing Liberty quarter is frequently encountered in low circulated grades, and Mint State pieces are occasionally offered for a price, but XF and AU examples are somewhat elusive on the market. This Choice XF representative displays nearly complete detail, with just a touch of actual wear observed on either side. Deep lemon-gold toning blankets the surfaces, with deeper lavender-gray color seen over the lower-right reverse. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, AU58
Problem-Free, First-Year Example**

4736 1916 AU58 PCGS. The 1916 is both the inaugural and lowest-mintage issue in the Standing Liberty quarter series (52,000 coins), and demand for high-end examples such as this remains perennially high. Vibrant luster enlivens the pearl-gray surfaces, and the design motifs are typically struck with softness over Liberty's head and shield. For the near-Mint grade, marks are minimal, and a small rim nick adjacent to the L in LIBERTY is the only impairment of note. NGC ID# 242Y, PCGS# 5704

**1916 Standing Liberty Quarter, MS63
Immensely Appealing for the Issue**

4737 1916 MS63 PCGS. CAC. Due to poor design definition from the 1916-dated hub, the quarters of this year were struck with a distinctly "mushy" appearance. The head detail is usually of the most importance to collectors in regards to striking quality, but since few details were ever present in that area of the die, the 1916 quarters need not exhibit as much boldness in that region as do the 1917 Type One issues to qualify for Full Head status. That said, this piece actually exhibits remarkably strong head detail, despite the lack of a Full Head designation from PCGS. Original satiny luster illuminates iridescent pastel hues on each side, while surface abrasions are minor for the grade. Housed in a first generation holder. NGC ID# 242Y, PCGS# 5704

1918/7-S Quarter, FS-101, XF40
Bold Date Numerals

- 4738** 1918/7-S FS-101 XF40 PCGS. A great-looking collector-grade example of the popular Standing Liberty quarter overdate. Moderate, grade-consistent wear appears on each side of this lavender-gray piece, but there are no singular signs of contact. The diagonal of the 7 inside the 8 is still bold, although there is no “open space” right of the diagonal in the bottom loop due to wear. Nice for the grade. PCGS# 395949

1918/7-S Quarter, AU Details
Popular Overdate Variety

- 4739** 1918/7-S FS-101 — Cleaning — PCGS Genuine. AU Details. This is a lightly circulated and partly lustrous representative of one of the most well-known and in-demand overdate varieties, caused by two different dated hubs used to prepare the die. Each side shows mild friction over the otherwise well-struck devices, and although the noted cleaning accounts for somewhat subdued appearance, the eye appeal is not overly affected. PCGS# 395949

1918/7-S Quarter, AU58
Well-Struck for the Issue

- 4740** 1918/7-S FS-101 AU58 PCGS Secure. CAC. While the Barber quarter series contains no major *Guide Book* varieties in its 25-year history, the significantly shorter-lived Standing Liberty quarter series boasts one of the major overdates of the 20th century, the 1918/7-S. By 1918, the date was included on the hub, meaning that this overdate was created when a still-usable 1917-dated working die was rehubbbed with the 1918-dated master die. This variety is valued below the key-date 1916 in grades through XF, but becomes the most valuable coin in the series in AU and better, where its rarity begins to dwarf that of all other issues in the series. In near-Mint condition, this is an important and highly collectible example of this key issue. Both sides are nearly untuned with significant remaining mint luster. The underdigit is strong and the only abrasion of note is an angling field mark between the R in QUARTER and the middle star on the reverse. PCGS# 395949
-

**1923-S Quarter, MS66
Exceptional Striking Quality**

4741 1923-S MS66 PCGS. The 1923-S has long been considered one of the major key dates in the series, drawing strong attention when encountered in any grade. This Premium Gem representative is a stellar coin in virtually every respect. Above-average definition is seen on all relief elements, with special notice given to the date, which is bold, and Liberty's head, which is very nearly full. A couple small ticks on Liberty's knee are all that preclude an even finer grade. The obverse displays areas of champagne, pale olive, and lavender-gray patina, while the reverse shows softer hues of the same. Population: 29 in 66 (1 in 66+), 5 finer (8/14). NGC ID# 243K, PCGS# 5744

**1927-S Quarter, MS62
Cornerstone of the Type Two Series**

4742 1927-S MS62 PCGS. Boasting the second-lowest production total in the entire Standing Liberty series (396,000 coins) and a relatively high attrition rate, the 1927-S is an scarce date in lower Mint State grades. The typical example shows strike shallowness over Liberty's head and shield, as well as the eagle's wing and breast feathers. This MS62 coin exhibits the previously mentions characteristics, along with entirely brilliant, highly lustrous surfaces and remarkably few blemishes. NGC ID# 243W, PCGS# 5764

**1928 Quarter, MS67 Full Head
Significant Condition Rarity**

4743 1928 MS67 Full Head PCGS. Often considered a common date because of its 6.3 million-coin mintage, the 1928 Standing Liberty issue is scarce in Gem condition and very rare in Superb Gem when encountered with Full Head detail. As of (8/14), PCGS has certified only six submissions in MS67 Full Head and none finer.

This coruscant representative offers exceptionally razor-sharp devices. Liberty's head is strongly detailed, the shield lines are complete, and the chain mail is bold. Aside from occasional glimpses of golden-tan patina, the surfaces are brilliant. This impeccably preserved example is head and shoulders above any Registry Set coin at PCGS. NGC ID# 243X, PCGS# 5767

WASHINGTON QUARTERS

1939 Washington Quarter, MS68 Registry Set Candidate

- 4744 1939 MS68 PCGS.** The Registry collector's dream coin, this piece is tied with just six others as the finest certified at PCGS (8/14), and ranks nearly half of a grade point finer than the example represented in the current highest-rated Registry Set. Beyond the technical quality, however, the visual appeal of this piece is also superb; vibrant mint frost illuminates soft pastel rainbow hues, with the colors slightly more distinct on the obverse, while the strike is sharp and the surfaces are seemingly flawless. NGC ID# 244R, PCGS# 5808

1954-D Quarter, MS67 Among the Finest Certified

- 4745 1954-D MS67 PCGS.** PCGS has certified only 13 examples of the 1954-D quarter in MS67 (1 in 67+), with none finer (8/14), and as the Plus-graded piece is housed in the current highest-rated Registry Set, this coin is literally one of the finest obtainable examples of the date. Frosty luster in shades of pale gold and ice-blue enliven much of each side, with deep sun-gold and amber-brown crescents seen along the lower obverse and upper reverse peripheries. The strike is well-executed, and the surfaces are seemingly flawless. NGC ID# 2468, PCGS# 5856

1954-D Washington Quarter, MS67 None Numerically Finer

- 4746 1954-D MS67 PCGS. CAC.** PCGS has awarded only 13 examples of the 1954-D quarter an MS67 grade (1 in 67+), and none finer (8/14), and since the Plus-graded piece is housed the current highest-rated Registry Set, this MS67 example is quite literally one of the finest pieces currently obtainable for Registry Set inclusion. This piece displays deep olive-gold and coppery-orange toning over the obverse, while the reverse shows cool shades of ice-blue and pale lavender. The strike is sharp and there are no discernable surface abrasions. NGC ID# 2468, PCGS# 5856

1962-D Quarter, MS67 Beautiful Obverse Toning

- 4747 1962-D MS67 PCGS.** For the Registry Set collector, this Superb Gem is essentially the ultimate representative of the 1962-D quarter, as it is tied with just seven others as the finest certified at PCGS (8/14), and also ranks nearly half of a grade point finer than the example in the current highest-rated Registry Set. The obverse is awash in swirling rainbow hues, with warm champagne and deeper olive-gold hues residing amid the ribbons. The reverse is nearly brilliant, exhibiting only a trace of light golden toning. The technical appeal, however, rivals the immense visual attributes, boasting nearly flawless surfaces and bold design elements. The advanced Registry collector will want to bid accordingly. NGC ID# 246R, PCGS# 5873

**1963-D Quarter, MS67
Registry Set Contender**

4748 1963-D MS67 PCGS. CAC. This satiny Superb Gem displays blended amber-red and olive-gold toning over much of the obverse, while the reverse shows just a blush of light champagne color. The surfaces are attractively preserved, while the sharp strike further heightens the overall appeal. This coin is tied numerically with the example in the current highest-rated Registry Set. Population: 15 in 67 (1 in 67+), 0 finer (9/14). NGC ID# 246T, PCGS# 5875

PROOF WASHINGTON QUARTER

**1950 Quarter, PR68 ★ Cameo
Registry Set Example**

4749 1950 PR68 ★ Cameo NGC. This is an absolutely stunning quarter with incredible white mint brilliance over the devices and bold, mirrored fields. The design motifs seem to float across the surfaces of this superlative proof. Every detail on each side is as sharp as the dies themselves. Memorable and exciting. Census: 13 in 68 Cameo (4 in 68 ★ Cameo), 0 finer (8/14). NGC ID# 27HW, PCGS# 85982

EARLY HALF DOLLARS

**1794 Flowing Hair Half, Good 6
O-101a, Smooth Appealing Surfaces**

4750 1794 O-101a, R.4, Good 6 PCGS. An attractive example, smoothly worn by extensive circulation but with nice remaining detail over most of the coin. The rims and denticles are strong except for typical weakness at the lower right quadrant of the obverse, where some of the stars and the date are heavily worn but visible. The reverse shows complete rims and dentilation, with strong detail for the grade. The silver-gray toning is light and slightly iridescent. Struck from the late die state of the Overton 101 variety, with confirming die cracks through F in OF and from the top single leaf to the S in (STATE)S. PCGS# 39201

**1803 Draped Bust Half, Small 3, O-104, MS62
Vivid Multicolor Toning**

4751 1803 Small 3, Large Reverse Stars, O-104, R.3, MS62 NGC. Overton-104 is the only one of the four 1803 half dollar varieties featuring the small 3 in the date. Not surprisingly, then, this is the only use of this obverse, though the reverse die was previously employed for O-103. This Small 3 variant is also one of the scarcer varieties of the issue; only three Mint State examples have been certified by the two leading services, with this piece being second only to a single MS64 coin at PCGS (9/14).

As a date, the 1803 half dollar is moderately plentiful in comparison to early issues of the same type, but is not nearly as available as the 1806 and 1807. Mint State examples are rare in all grades, with none having been certified finer than MS64. This representative is by far one of the most attractive examples obtainable. Vivid toning in shades of green-gold, royal blue, violet, and orange-gold encompass each side, while the surfaces are free of major flaws, and the strike is above-average for the issue. Moderate clash marks are seen on each side, though no adjustment marks are observed. The specialist will find it nearly impossible to locate a visually finer example. PCGS# 39274

**1806 Draped Bust Half, AU53
O-107, Lustrous and Original**

- 4752 1806 Knob 6, Small Stars, O-107, High R.4, AU53 PCGS. CAC.** Bright orange luster remains beneath the original, edge-to-edge toning on this attractive Knobbed 6, Small Stars early half. The die pair is confirmed by five berries on the olive branch and ME of AMERICA joined at the bottom serifs. Gunmetal blue toning encircles the margins and visits the high points of the motifs. Characteristic of this scarce R.5 variety, Liberty's bust point and drapery folds lack detail and the opposing field stars and clouds are notably weak. This example easily ranks in the Condition Census for the variety according to Donald Parsley's 2013 reference and Stephen Herrman's most recent census. PCGS# 39307

**1806 Half Dollar, AU53
O-115, Pointed 6**

- 4753 1806 Pointed 6, Stem O-115, R.1 AU53 PCGS.** An available variety, ideal for type representation. This variety exhibits a heavy die crack from the date through the left-hand stars, and the T in LIBERTY is widely recut north. This example exhibits strong border dentils, though the eagle's head is softly defined. Deep lavender-gray and aquamarine hues encompass each side, the latter color seen primarily around the peripheries. PCGS# 39317

1807 Draped Bust Half, O-110a, AU58

- 4754 1807 Draped Bust, O-110a, R.3, AU58 PCGS.** The later die state, with prominent die cracks around the peripheries and noticeable clash marks on the reverse. Weakness is seen on the upper-left reverse and corresponding portion of the obverse, as result of die wear and not striking pressure. The remainder of the design elements are sharp, including the border dentils. This piece displays bright silvery color overall, with tinges of gold toning around the peripheries. PCGS# 39352

BUST HALF DOLLARS

**1812 Capped Bust Half, MS64
O-104, Nice Silver Luster**

- 4755 1812 Large 8, O-104, R.1, MS64 PCGS.** Bright silver luster shines through intermittent golden-gray shades on the obverse, with the reverse sharply lustrous and a shade lighter. A small dark toning spot below IB of LIBERTY and another on the horizontal lines of the reverse shield do not distract from the eye appeal of this centrally bold coin. The dies may have been misaligned slightly, with the right-side stars flat and OF AMERICA also weak on the opposite side. Few examples are finer of this variety according to the references. PCGS# 39447

**1813 O-105a Bust Half, MS64
Lustrous, Iridescent Appeal**

- 4756 1813 O-105a, R.3, MS64 PCGS.** A display of extensive die clashing adds interest to this lovely, iridescent half. As often seen on later die states of this Overton variety, the legend is boldly drawn to the left edge on the reverse, and the right stars are drawn to the edge (although less noticeably) on the obverse. A heavy, diagnostic die crack extends from the edge tangent to the lower olive leaves, where it travels across the stem, into the eagle's leg, across the shield, and ends at the eagle's neck. This example is not as advanced as some, where additional cracks circle the legend in a near-terminal state of the die. Few post-mint marks appear on the coin, which offers lustrous, smooth surfaces shimmering with silver luster. Pastel tones cover the margins and reach toward the centers of this boldly struck, near-Gem half. PCGS# 39464

1817/3 O-101a Half Dollar, MS64
Late Die State
Tied for the Finest at PCGS

4757 1817/3 O-101a, R.2, MS64 PCGS. This late die state half dollar is tied for the finest 1817/3 that PCGS has graded with the exception of a single MS64+ example. NGC has certified one finer example. Both sides exhibit light clash marks with a delicate reverse die crack. This Choice Mint State piece is richly toned in gold, gray-brown, and delicate sea-green. The surfaces are smooth and pleasing with subdued underlying toning. This example is numerically equal to the Eliasberg specimen, and easily ranks in the Condition Census. Population: 4 in 64 (1 in 64+), 0 finer (8/14). PCGS# 39512

1817 Half Dollar, O-113a, MS64
Radiantly Lustrous

4758 1817 O-113a, R.4, MS64 NGC. A scarce late die state identified by a slender die crack through UNITED. Gleaming luster rolls across remarkably clean fields. One minute tick on Liberty's breast and another within the eagle's shield are all that seemingly kept this gorgeous coin from receiving an even higher NGC grade assessment.

Ex: FUN Signature (Heritage, 1/2008), lot 1473; Central States Signature (Heritage, 4-5/2010), lot 853. PCGS# 39509

**1819/8 Capped Bust Half, MS65
O-102, Lustrous Overdate Variety**

4759 1819/8 Large 9, O-102, R.2, MS65 PCGS. Lustrous, gunmetal-gray surfaces display subtle rose highlights and traces of blue at the rims. The strike is particularly sharp on this example, with bold details at Liberty's cap, hair curls, and drapery folds. The eagle and scroll are equally well struck, and both sides show perfect centering and dentilation. There are no distracting marks or abrasions on the smooth, appealing surfaces.

The Overton-102 variety shares the same obverse with O-103, so the only distinguishing characteristics between the two varieties are on the reverse. The O-102 die pair features a slant 5 as compared to an upright 5 on O-103, and also shows all three T's with the "Timber T's" defect, where the upright appears to be chipped away just above the right bottom serif and about to fall like timber. An open dentil beneath the "O" in 50 C confirms the variety. This example is tied for second-finest certified in the Condition Census for the variety. PCGS# 39556

**1824/1 Half Dollar, MS63
O-101, Guide Book Variety**

4760 1824/1 O-101, R.2, MS63 PCGS. This popular *Guide Book* variety shows the 4 in the date clearly punched over a preexisting 1. The surfaces display lightly toned interiors, while multicolor toning hugs the borders in shades of blue, green, purple, and russet. The motifs are sharply struck, and only the olive leaves are slightly shallow. Any marks are well-hidden. Including all 4 over 1 Overton varieties, PCGS has graded nine coins in MS63 and 10 finer (8/14). PCGS# 39640

**1824 O-117 Half Dollar, MS64+
Vibrant Multicolor Toning**

4761 1824 O-117, R.1, MS64+ PCGS. CAC. Ex: Sandia Sunset Collection. A beautifully patinated near-Gem. Dusky golden-brown fields accompany gunmetal-gray motifs and iridescent powder-blue, sun-gold, and fire-red peripheries. Only minimal marks can be seen beneath a lens. The strike is precise at the centers though the borders show softness. Ex: *FUN Signature (Heritage, 1/2008)*, lot 329. PCGS# 39639

REEDED EDGE HALF DOLLARS

**1836 Reeded Edge Half, GR-1, MS62+
Conditionally Rare, Low-Mintage Issue**

4762 1836 Reeded Edge MS62+ NGC. GR-1, R.2. The Mint used a single set of dies to strike an estimated 1,200 Reeded Edge half dollars in 1836. This Uncirculated example exhibits deep violet-gray patina primarily with golden-tan, orange-rose, and cobalt-blue accents throughout. Partial luster radiates through the toning. The borders and dentils are sharply defined, as are most other design elements. Only the right-obverse stars and the eagle's left (facing) wing feathers show slight softness. Census: 12 in 62 (1 in 62+), 13 finer (8/14). NGC ID# 2U28, PCGS# 6175

**1836 Half Dollar, MS64
GR-1, Reeded Edge**

4763 1836 Reeded Edge MS64 PCGS. GR-1, R.2. The Thonnelier steam press was installed at the Philadelphia Mint in 1836, and used to coin a few copper medalets early in the year. Among regular issue coinage, the modified-design Capped Bust, Reeded Edge half dollars were among the first coins struck with the new technology. This Choice Mint State half dollar ranks high on the list of known survivors from a limited mintage of slightly more than 1,200 coins. A lovely Choice Mint State example, this piece is exceeded by only three finer certified examples. Both sides have mottled gold and iridescent toning over brilliant satin luster. Population: 6 in 64 (1 in 64+), 1 finer (8/14). NGC ID# 2U28, PCGS# 6175

**1837 Reeded Edge Half, MS64
GR-17, Attractively Toned**

4764 1837 MS64 PCGS. CAC. GR-17, R.1. A lengthy peripheral die crack on the reverse aids attribution. Electric-blue and pale plum borders frame dusky dove-gray and autumn-brown centers. A few wispy marks near the profile determine the grade. Well-struck except on UNITED STATES, as usual. This variety is one of the plentiful of the issue, and is frequently encountered in type specialists' cabinets. PCGS has certified just 31 numerically finer examples of this issue (8/14). NGC ID# 24G4, PCGS# 6176

SEATED HALF DOLLARS

**1846-O Medium Date Half, MS64
Extremely Rare in Choice Condition**

4765 1846-O Medium Date MS64 PCGS Secure. WB-101, Die Pair 8, R.4. The 1846-O is an underrated date and extremely rare in Choice condition. PCGS has certified only 15 coins in mint condition, while NGC has seen just four coins above the MS60 grade level. Although the latter service fails to report any examples higher MS63, PCGS shows two coins in MS64 and one example finer in MS65 — the Gardner coin, struck from Die Pair 5 (8/14). This die marriage (Obverse 4, Reverse G) features a weak die line above the upper edge of the ribbon and a number of die cracks around the reverse legends. Each side exhibits dappled shades of violet, blue, and green patina with subdued, satiny luster beneath the toning. The motifs are impressively detailed for an O-mint coin, and any marks or impairments are well-hidden. An important opportunity for the Seated half specialist. NGC ID# 27SW, PCGS# 6255

**1855/54 Seated Liberty Half, MS65
Arrows, WB-102**

4766 1855/54 Arrows, WB-102, FS-301, MS65 NGC. The WB-102 variety is an 1855/854 overdate in earlier die states, but in later states the undertype is not as plain due to die wear and die lapping. This example falls somewhere in the middle, with the underdigit 8 weak, but the doubling clearly visible on the upright and flag of the first 5, and the crossmember of a 4 visible within the loop of the second 5.

This original half dollar issue is rare with or without the overdate. Lustrous silver surfaces are thickly patinated with powder-gray toning on both sides of the coin. The strike is strong on Liberty's head and facial features, but a touch weak on some of the star centrils. Evidence of die clashing exists within the partial drapery beneath Liberty's elbow. Some softness of strike is seen on the eagle's talons and arrow fletchings. This overdate has an R.2 rarity rating in lower grades but is listed as R.7 in Mint State. Census (for the variety): 3 in 65, 0 finer (9/14). PCGS# 413720

CONFEDERATE STATES OF AMERICA

**1861 Breen-8003 Scott Token, PR64
One of 500 Struck on White Metal**

4767 1861 Scott Token PR64 NGC. Breen-8003. In 1879, leading rare coin dealer J.W. Scott purchased the original and lightly rusted C.S.A. half dollar die from Ebenezer Locke Mason, Jr., who in turn had obtained it from Dr. B. F. Taylor, a former Chief Coiner of the New Orleans Mint. Scott overstruck 500 1861-dated halves with the die after planing off the reverses, then paired the C.S.A. die with a 'token' die to strike another 500 pieces in white metal. This is a prooflike example of the latter striking, and it has light dove-gray color and problem-free surfaces. NGC characterizes this token in some cases as proofs, in others as business strikes, but in essence it makes little difference because the issue is collected as one of the 500 white-metal tokens. Many are prooflike as a result of the limited quantity produced. Census: 11 in 64, 1 finer (9/14). Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6234. PCGS# 340403

SEATED HALF DOLLARS

**1870-S WB-101 Half Dollar, MS64
Rare in Choice Mint State**

4768 1870-S MS64 NGC. CAC. WB-101, Die Pair 2, R.3. Strong Mintmark. Despite a mintage of 1,004,000, the number of 1870-S survivors in Mint State grades is exceedingly small. NGC and PCGS combined have awarded the MS64 grade to only 3 examples, with only 3 finer (9/14). Light tan toning appears on this near-Gem displaying matte luster, along with scattered flyspecks. The strike is sharp overall, with a few minor areas of incompleteness noted. NGC ID# 24K3, PCGS# 6329

**1873 Arrows Seated Half, MS65
WB-106, Heavy Mint Frost
Attractive, Low Population Issue**

4769 1873 Arrows MS65 PCGS. WB-106. Large Arrows. Thickly frosted and pleasantly iridescent, this Gem Arrows half is sharp and lustrous. Variegated pastel shades appear over the silver-white surfaces when rotated in light. None of the oft-seen weakness on Liberty's head or the surrounding stars is present, and the eagle is bold with only minimal blending at the left (facing) talon and nearby arrow fletchings.

All 1873 Arrows halves were struck with the Open 3 numeral, after the No Arrows strikes from earlier in the year. More than 1.8 million pieces were struck, but surprisingly few survive in Gem or finer condition. Population: 11 in 65, 4 finer (9/14). NGC ID# 24L7, PCGS# 6343

**1888 Seated Liberty Half, MS65+
Popular Low-Mintage Issue**

4770 1888 MS65+ PCGS. WB-101. The 1888 Seated Liberty half dollar had one of the higher mintages of the 1879 to 1890 production era, but it is no more available in high grades than are its lower-mintage counterparts. Traces of pale golden color graces otherwise brilliant, frosty surfaces on each side of this high-end Gem representative. The top of Liberty's head is not quite full, accompanied in that regard by the eagle's left (facing) talons, though the strike is otherwise well-executed. Clash marks are observed on each side, most notably below Liberty's right (facing) elbow. Population: 21 in 65 (1 in 65+), 31 finer (8/14). NGC ID# 24L3, PCGS# 6370

PROOF SEATED HALF DOLLARS

**1860 Seated Half, PR65
Colorfully Toned and Razor-Sharp**

4771 1860 PR65 NGC. Type Two Reverse. Apricot-orange, purple-pink, and blue iridescence color each side of this attractive Gem proof. The strike is razor-sharp, and the fields are deeply mirrored beneath the toning. The *Guide Book* reports a mintage of 1,000 proofs in 1860, but a substantial quantity of unsold coins were later melted. Census: 14 in 65, 27 finer (8/14). NGC ID# 27TK, PCGS# 6414

**1870 Seated Half, PR66
Rich Multicolor Toning**

4772 1870 PR66 NGC. WB-101. A mintage of 1,000 proof half dollars in 1870 ensured the survival of moderate quantities of the issue for date collectors though, as with most proof issues in the series, the 1870 becomes distinctly rare at the Premium Gem level, even without cameo contrast. This representative exhibits rich hues of sun-gold, sea-green, blue, and lavender-gray over each side, while the fields display glassy reflectivity, and the motifs are appropriately well-defined. Census: 8 in 66, 3 finer (8/14). NGC ID# 27U5, PCGS# 6428

**1880 Half Dollar, PR66
Deeply Mirrored Fields, Iridescent Toning**

- 4773 1880 PR66 NGC. CAC.** Type Two Reverse. Despite a large proof mintage of 1,355 pieces, relatively few Premium Gem or finer proofs exist of this late-series date. The strike is bold with nearly full details. A noticeable die lump in the eagle's left (facing) wing confirms the Type Two Reverse, which was used for both business strikes and proofs. The fields display substantial reflectivity enhanced by a light coating of dappled, iridescent patina on both sides. Census: 26 in 66 (1 in 66 ★), 10 finer (9/14).
Ex: Dallas Signature (Heritage, 11/2007), lot 797. NGC ID# 27UF, PCGS# 6441

**1880 WB-102 Seated Half, PR66 Cameo
Deeply Mirrored, High-End Proof**

- 4774 1880 PR66 Cameo PCGS. WB-102.** The fairly generous proof mintage of 1,335 coins is always under pressure from a woeful business strike issue of just 8,400 pieces, with many high-grade collectors preferring a proof to a less appealing circulation strike. This example will open many eyes with its thin margin of electric blue and overall clear shading of russet-red patina. The strike is impeccably bold. No Cameo proof is certified numerically finer at PCGS. Population: 31 in 66 (1 in 66+) Cameo, 0 finer (9/14).
PCGS# 86441

BARBER HALF DOLLARS

**1899-S Barber Half Dollar, MS66
Seldom Encountered Finer**

- 4775 1899-S MS66 NGC.** The 1899-S half dollar is seldom seen above the Premium Gem level of the present lovely coin. NGC has seen only eight submissions in this grade with three finer (9/14). Medium blue and rose toning covers each side, the strike is sharp throughout, and contact marks are a nonissue. NGC ID# 24M8, PCGS# 6485

**1903-S Barber Half Dollar, MS66+
Only Three Coins Finer at PCGS and NGC**

- 4776 1903-S MS66+ PCGS. CAC.** This issue's 1.9 million-coin mintage offers little insight into its rarity at the Gem grade level and above. PCGS has seen only six coins in MS65, and the service has certified an additional nine examples in MS66, two of which (the present piece included) have earned a Plus designation. Only three coins are certified finer, and they are tightly held (8/14).

This stunning representative exhibits softly lustrous and lightly toned surfaces that affirm its originality. The obverse stars are fully struck, and Liberty's hair shows strong definition. The reverse devices are similarly sharp, although typical incompleteness occurs on the upper-right portion of the eagle's shield as well as the arrow fletchings. Each side displays a number of parallel lines from the draw bench, a common trait among 1903-S halves, and a lack of any mentionable ticks or marks clearly indicates that this coin was carefully set aside by a conscientious collector. NGC ID# 24ML, PCGS# 6497

**1904 Barber Half Dollar, MS65
High-End for the Grade**

- 4777 1904 MS65 PCGS. CAC.** As with many issues in the Barber half dollar series, the 1904 is conditionally rare in Gem or finer condition. This MS65 example delivers the appearance of an even finer grade at first glance, and only upon close scrutiny with a loupe do a few faint luster grazes become evident. The obverse displays frosty golden-gray luster over the central regions, with deeper orange-gold hues around the peripheries, while the reverse is dappled in olive and amber-gold toning. A sharp strike further heightens the visual appeal. Population: 12 in 65 (2 in 65+), 7 finer (8/14). NGC ID# 24MM, PCGS# 6498

**1904-O Barber Half, MS64
Conditionally Elusive O-Mint Issue**

- 4778 1904-O MS64 PCGS.** Despite a mintage in excess of 1.1 million pieces, the 1904-O Barber half dollar is scarce in all Mint State grades, and genuinely rare above the MS64 level. This Choice representative displays mottled amber-red and olive-green toning over each side, with well-preserved surfaces. The eagle's right (facing) shoulder left leg are not fully defined, though the overall appeal is hardly affected. Population: 16 in 64, 13 finer (8/14). NGC ID# 24MN, PCGS# 6499

PROOF BARBER HALF DOLLARS

**1894 Half Dollar, PR67
Concentric Toning**

- 4779 1894 PR67 PCGS.** This third-year issue for the Barber design shows a dramatically reduced mintage for proofs of only 972 pieces, and a subsequent reduction in the number of high-grade pieces that were preserved. This is an exceptionally well-preserved example whose mirrored fields still flash strongly through the concentric multicolored toning seen on each side. The frosted devices are abundantly evident through the toning. Population: 10 in 67, 0 finer (9/14). NGC ID# 24NW, PCGS# 6541

**1894 Barber Half, PR67
Bold Peripheral Toning**

- 4780 1894 PR67 PCGS.** Splashes of blue, red, lilac, and gold surround silvery iridescence on both sides of this deeply-mirrored, Superb Gem proof. Mint frost covers the devices for nearly full cameo contrast, although not indicated as such on the holder. This is a coin of vivid presence and strong technical merit, fully struck and impressive. Among the finest certified at PCGS. Population: 10 in 67, 0 finer (9/14). NGC ID# 24NW, PCGS# 6541

**1899 Barber Half, Toned PR67
Deeply Reflective Fields**

- 4781 1899 PR67 PCGS.** A fully struck Superb Gem, this proof 1899 Barber half dollar is also vividly toned in shades of olive-gold, aquamarine, teal, and pale lavender, with the colors somewhat more varied on the reverse. Close scrutiny of the surfaces fails to find any mentionable marks, and any wispy hairlines in the fields are well-masked by the rich patina. Population: 6 in 67, 1 finer (8/14). NGC ID# 24P3, PCGS# 6546

1899 Half Dollar, Deeply Toned PR67

- 4782 1899 PR67 NGC.** The proof 1899 Barber half dollar, with a mintage of 846 pieces, is a moderately available issue in the context of the series, but becomes genuinely rare at the Superb Gem grade level, with or without a Cameo designation. This piece shows the crisp, full strike that is the hallmark of proof Barber coinage, with essentially perfect surfaces. Dusky multicolor toning in varying shades of violet, gold, olive, and deep navy encompass each side, partially masking the deep reflectivity in the fields. Census: 9 in 67, 2 finer (8/14). NGC ID# 24P3, PCGS# 6546

1902 Barber Half, PR65 Cameo
Immense Visual Appeal

- 4783** 1902 PR65 Cameo PCGS. CAC. The proof 1902 Barber half dollar is not notably elusive in an absolute sense, but Cameo representatives are scarce in all grades. This Gem Cameo displays stark field-motif contrast, with seemingly infinite depth of mirroring in the fields, while tinges of blue, violet, and sun-gold toning surround the peripheries. The strike is bold throughout, and a few faint, wispy hairlines on Liberty's cheek (not from cleaning), appear to be all that preclude an even finer grade. Population: 4 in 65 Cameo, 10 finer (8/14). PCGS# 86549

1903 Half Dollar, PR67
Immaculate, Deep-Mirrored Preservation

- 4784** 1903 PR67 PCGS. Fiery bands of orange-crimson appear on each side of the obverse, separated by a bluish-green midsection, an unusual but engaging toning pattern. The reverse shows bands of iridescence on the left side complementing a large untuned area on the right. The preservation is exemplary. Population: 4 in 67, 4 finer (9/14). NGC ID# 24P7, PCGS# 6550

WALKING LIBERTY HALF DOLLARS

1917-D Reverse Walking Liberty Half, MS65
Well-Struck, Conditionally Rare Example

- 4785** 1917-D Reverse MS65 PCGS. During the second year of the Walking Liberty half dollar type the design was altered and the mintmark was moved from the obverse to the reverse. Even though considerably more of the Reverse mintmark coins were struck than the Obverse mintmark pieces (1.9 million versus 765,000), the Reverse mintmark variety is much scarcer, and high-grade examples such as this Gem are conditionally rare. This is a well-struck specimen with nearly full definition on Liberty's branch hand and white, satiny, somewhat mattelike surfaces. Trivial surface marks are only evident with the aid of a loupe. Population: 43 in 65, 5 finer (9/14). NGC ID# 24PS, PCGS# 6571
-

**1918-D Half Dollar, MS64
Challenging Denver Issue**

4786 1918-D MS64 PCGS. The 1918-D half dollar is a somewhat scarcer issue in Mint State; the date is most often seen in the MS62 to MS64 grade range, but the certified population dramatically drops in MS65, with such pieces being decidedly rare. This Choice example is unusually well-struck for the issue, showing partial thumb separation and bold head detail. A blush of light golden toning visits satiny luster on each side, and grade-limiting abrasions are at a minimum. PCGS has encapsulated 30 numerically finer representatives (8/14). NGC ID# 24PW, PCGS# 6575

**1919 Half Dollar, Sharp MS64
Attractively Toned**

4787 1919 MS64 PCGS. The 1919 half dollar is a slightly scarcer issue in high grades, though its true appeal lies in the overall excellent quality of strike seen on most Mint State examples. This near-Gem representative is an outstanding piece in that regard, showing bold definition on Liberty's head, branch hand, and the eagle's rear leg, which is often weak, even on otherwise well-struck issues. Soft satiny luster illuminates blended shades of sky-blue, lavender, and golden-gray toning over each side, delivering ample visual appeal when turned in-hand. NGC ID# 24PY, PCGS# 6577

**1919-D Half Dollar, AU58
Better Denver Issue**

4788 1919-D AU58 PCGS. The 1919-D half dollar did not have a particularly low mintage for the period (more than 1.1 million pieces were produced), but most saw moderate to extensive circulation, and Mint State pieces are elusive. This high-end AU example shows pale golden-gray toning over substantial original luster. Moderate weakness of strike is seen on Liberty's leg and branch hand, as well as on the central eagle's feathers, though actual wear is hardly discernable. NGC ID# 24PZ, PCGS# 6578

**1919-D Half Dollar, MS62
Challenging in Mint State**

4789 1919-D MS62 NGC. The 1919-D is one of the great condition rarities in the Walking Liberty half dollar series. Like nearly all surviving Mint State pieces, this example has a deficient strike. However, strong luster is visible on both sides beneath a blanket of soft golden toning. A pleasing and important half dollar. NGC ID# 24PZ, PCGS# 6578

**1920-S Walking Liberty Half, MS66
Seldom-Offered, Registry Opportunity**

4790 1920-S MS66 PCGS. Although the 1920-D half dollar issue tends to command more attention than its San Francisco counterpart, the 1920-S is just as rare in this lofty grade. A comparison of the certified population at PCGS shows six 1920-D examples in MS66 and only five S-mint representatives in the same grade. Neither issue claims a Superb Gem representative (8/14).

The surfaces are essentially all-brilliant with intermittent whispers of faint golden-tan shading. Softly frosted luster coruscates over each side. Liberty's head displays good definition, while the branch hand, upper skirt lines, and the eagle's leg show a touch of typical softness. Pristine and eye-appealing. This Premium Gem example presents a seldom-offered opportunity for the advanced Walking Liberty Registry specialist. NGC ID# 24R5, PCGS# 6582

**1921 Half Dollar, Sharp MS65+
Only Four Numerically Finer at PCGS**

4791 1921 MS65+ PCGS. CAC. The 1921 Walking Liberty half boasts a low mintage of only 246,000 pieces, and ranks as one of the major key issues in the series, out-paced only by the lower-mintage 1921-D. Mint State examples are actively pursued in all grades by series specialists and key-date collectors alike, with the scarce Gem or finer pieces being the ideal representatives. This is a simply remarkable coin, as both Liberty's branch hand and the eagle's rear leg exhibit sharp definition. A few microscopic ticks on Liberty's leg limit the grade, though the frosty, gold-tinted luster is otherwise virtually undisturbed. An immensely appealing example not only of this elusive issue, but also of the type in general. Population: 61 in 65 (3 in 65+), 4 finer (8/14). NGC ID# 24R6, PCGS# 6583

1921-S Half Dollar, AU50
Seldom Seen at This Grade Level

4792 1921-S AU50 PCGS. The 1921-S is the most conditionally challenging of the three 1921 issues, being easily found in VF and lower grades, but distinctly elusive in XF and finer condition, with Mint State example bringing substantial premiums when offered at auction. This AU representative is one of only 22 pieces certified at this grade level by PCGS, and exhibits nearly complete detail. Pewter-gray patina blankets both sides, while tiny russet flecks are seen in the protected areas. NGC ID# 24R8, PCGS# 6585

1929-D Half Dollar, MS66
Only One Numerically Finer

4793 1929-D MS66 PCGS. CAC. The 1929-D half dollar was the first issue of that denomination produced at the Denver Mint since 1921, but was only struck to the extent of a little more than 1 million coins. The date is available through MS65, but Premium Gems become scarce, and the date is virtually unobtainable any finer. This piece displays radiant, satiny luster beneath pale golden toning on each side, while the design elements are essentially sharp, with partial thumb separation on Liberty's branch hand. Well-preserved surfaces contribute to the overall eye appeal, appropriately recognized by CAC. Housed in a green label holder. Population: 68 in 66 (1 in 66+), 1 finer (9/14). NGC ID# 24RC, PCGS# 6589

**1934-S Half Dollar, MS66+
Exceptional Technical and Visual Quality**

- 4794 1934-S MS66+ PCGS.** The San Francisco variant is the scarcest of the three 1934 issues, and is also frequently found well-struck. This representative is a stellar coin in that regard, showing bold definition on Liberty's head and branch hand, as well as the eagle's rear leg, which is often soft on S-mint issues. The surfaces are virtually pristine, with lightly dappled golden and lavender toning gracing each side. PCGS has certified only seven numerically finer representatives (8/14). NGC ID# 24RH, PCGS# 6594

**1935-S Half Dollar, MS66+
Intense Frost-White Luster**

- 4795 1935-S MS66+ PCGS. CAC.** This issue is similar in high-grade rarity to the 1934-S, being scarce in MS66 and exceedingly rare finer. This Plus-graded representative showcases frosty, brilliant mint bloom, with only the most minute disturbances limiting the grade. Liberty's branch hand and the eagle's rear leg exhibit some of the usual striking weakness, though the design elements are otherwise bold. PCGS has encapsulated only three numerically finer representatives (8/14). NGC ID# 24RL, PCGS# 6597

**1939-D Walking Liberty Half Dollar, MS67+
Only One Finer Coin at PCGS**

- 4796 1939-D MS67+ PCGS. CAC.** This high-end Superb Gem Walking Liberty half dollar displays sharply detailed design elements and impeccably preserved surfaces with vibrant mint luster on both sides. The surfaces are mostly brilliant, but a vivid patch of dark green and amber toning visits the obverse periphery. PCGS has graded one numerically finer example (9/14). NGC ID# 24RX, PCGS# 6607

**1939-S Half Dollar, MS67+
Exceptional Visual Appeal**

- 4797 1939-S MS67+ PCGS. CAC.** The 1939-S half dollar is readily available in grades through MS66, and is only marginally elusive in MS67. However, as PCGS has not certified any examples numerically finer, the eight Plus-graded MS67 pieces are the finest-obtainable examples of the date (8/14). This piece displays virtually flawless preservation, with vibrant luster shining through a veil of lemon-gold and lime-green toning. Partial thumb separation is observed on Liberty's branch hand, this being but one aspect of a pleasing, above-average strike. NGC ID# 24RY, PCGS# 6608

**1946 Walking Liberty Half Dollar, MS66
Doubled Die Reverse, FS-801**

- 4798 1946 Doubled Die Reverse, FS-801, MS66 PCGS. CAC. E** PLURIBUS UNUM shows dramatic doubling on this extremely popular *Cherrypickers* variety. The design elements of this spectacular Premium Gem are well-detailed and the well-preserved surfaces display hints of pale gold toning. Population: 13 in 66 (1 in 66+), 0 finer (8/14). PCGS# 145152

FRANKLIN HALF DOLLARS

**1953-S Half Dollar, MS63 Full Bell Lines
Condition Rarity in the Series**

- 4799 1953-S MS63 Full Bell Lines NGC.** The NGC Census shows 4,553 1953-S halves certified in all grades, but only 10 coins have been awarded a Full Bell Lines designation. This is the sole example reported in MS63, and just nine coins are graded finer (8/14). Olive-green and russet toning occurs over the right obverse field, while the remaining surfaces are otherwise brilliant. This coin is sharply struck, softly frosted, and minimally marked. NGC ID# 24T8, PCGS# 86666

**1961-D Franklin Half, MS66 Full Bell Lines
None Numerically Finer**

4800 1961-D MS66 Full Bell Lines PCGS. This beautifully preserved, frosty Premium Gem is one of just 19 examples certified at the MS66 grade level at PCGS (1 in 66+), with none finer (8/14), and is also numerically equal to the coin represented in the current highest-rated Registry Set. A pale golden hue graces vibrant luster on each side, while the strike is sharp, as evidenced by the Full Bell Lines designation from PCGS. A small reed mark, well-hidden within Franklin's hair strands, appears to be the grade-limiting factor for this piece, but is hardly detectable to the unaided eye. NGC ID# 24TP, PCGS# 86681

**1962-D Half Dollar, MS66 Full Bell Lines
Registry-Quality Representative**

4801 1962-D MS66 Full Bell Lines PCGS. Another coin that is numerically equal to its counterpart in the current highest-rated Registry Set, this 1962-D Franklin half ranks with just 13 others (1 in 66+) as the finest certified Full Bell Lines example at PCGS (8/14). Frosty mint bloom illuminates a thin veil of light golden toning, while the motifs are boldly defined and the surfaces are free of major abrasions.
Ex: Dallas Signature (Heritage, 12/2007), lot 8985. NGC ID# 24TS, PCGS# 86683

EARLY DOLLARS

**1795 Flowing Hair Dollar, Fine Details
Mint Silver Plug, B-3, BB-11**

4802 1795 Flowing Hair, Two Leaves, Silver Plug, B-3, BB-11, R.5 — Cleaning — PCGS Genuine. Fine Details. The mint-made silver plug is easily discerned as a delicate obverse circle that extends from the earlobe to the middle of Liberty's neck. The pearl-gray surfaces are hairlined. A lamination is noted on the eagle's neck and left (facing) wing. A slender mark connects star 5 to the L in LIBERTY. The reverse has a moderate rim ding at 5:30. A very scarce to rare die marriage made more desirable by the presence of the silver plug. PCGS# 39990

1795 Flowing Hair Dollar, AU58
B-1, BB-21, Two Leaves
Exceptional Toning and Luster

4803 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, AU58 PCGS. The B-1, BB-21 variety combines the Head of '95 with the Two Leaves reverse. Based on estimated survival of the variety, it is the second-most common die pair of the Flowing Hair dollars, trailing only the BB-27 (B-5) variety in availability. This variety is also notable as an overdate, with the 7 punched over an errant 1. The overdate remains boldly visible on this coin. Some numismatists call the issue "1795 over 1195."

Both the BB-21 and BB-27 die pairs feature Liberty's portrait deeply impressed into the dies, which resulted in higher relief strikes of Liberty's head where the hair strands were more susceptible to wear. The current BB-21 coin shows minimal circulation, yet the hair strands have started to show some flatness at the highest points.

AU58 is a favorite grade for collectors of early type of all denominations. Often, the eye appeal of coins with a touch of rub is superior to that of coins with a technically Uncirculated grade. This coin is a perfect example of the premise. Attractive, iridescent toning covers both sides with earthy shades of burnt orange, forest green, sky-blue, and golden-bronze. Excellent mint luster remains beneath the toning, and the smooth, hard fields. The coin shows a few scattered, tiny marks, but no significant abrasions of any kind, and no adjustment marks. A single minor scrape above the 9 in the date is mentioned for accuracy.

No doubt some of the slight flatness on Liberty's highest curls is from a centrally soft strike rather than rub. Similarly, the eagle's breast is not fully brought up, and although the breast feathers lack detail, chances are the flatness is more from incompleteness rather than actual wear. All BB-21 dollars appear to be struck from a perfect state of the dies, with no die cracks or other mint-caused anomalies. PCGS# 39986

1795 Flowing Hair Dollar, VF35
B-6, BB-25, Three Leaves

4804 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3, VF35 ANACS. The BB-25 variety is distinguished by the lowest curl curving near two points of star 1 without actually touching either on the obverse, and the two berries below the first T in STATES on the reverse. The present coin displays pleasing silver-gray surfaces, with some darker steel-blue areas on the obverse. All major detail remains visible, though moderate wear is evenly distributed over all surfaces. A few adjustment marks appear in the obverse dentils, near the date, as well as above LIBERTY.

Ex: Long Beach Signature (Heritage, 9/2010), lot 4297; ANA Signature (Heritage, 3/2011), lot 4458. PCGS# 39975

1795 Flowing Hair Dollar, XF45
Three Leaves, B-6, BB-25

4805 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3, XF45 NGC. Bowers-Borckardt Die State III. The reverse die was reworked between uses on Die State I and Die State III, now showing a cluster of four leaves below the first S in STATES, instead of the three leaves in Die State I. Some other details were strengthened, as well. This reworking of a previously hardened and used die is most unusual among early dollar issues.

The present coin is a Choice XF specimen that shows the usual softness in the centers, with some wear on the hair details. The pleasing surfaces are lightly abraded and blanketed in shades of gold, gray, and blue-steel toning. PCGS# 39975

**1795 Draped Bust Dollar, VF25
B-14, BB-51, Off-Center Bust**

- 4806** 1795 Draped Bust, Off-Center VF25 PCGS. B-14, BB-51, R.2. Die State II. The BB-51 variety is unique as the only variety struck with the off-center bust obverse; the bust was entered into the working die slightly to the left of center, an error that was corrected on subsequent dies. This lightly circulated piece shows strong borders, with bright steel-gray patina overall. No adjustment marks are observed on either side. Population: 2 in 25, 11 finer (8/14). PCGS# 39996

**1796 B-5, BB-65 Dollar, Choice XF
Large Date, Small Letters**

- 4807** 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF45 PCGS. Bowers-Borckardt Die State II. The prominent die lump between the letters I and C in AMERICA identifies the BB-65 variety. This well-detailed XF45 specimen exhibits attractive pink and gray toning over both sides. No adjustment marks are evident, and relevant contact is limited to a few wispy field marks near the beak. PCGS# 40002

**1798 Small Eagle Silver Dollar, VF25
B-1a, BB-82
13 Stars, Large Letters Reverse**

- 4808** 1798 Small Eagle, 13 Stars, B-1a, BB-82, R.3, VF25 NGC. Bowers Die State III. The reverse die used to strike the 13 Stars, Small Eagle silver dollars was the same as the one used to strike the 1797 Large Letters (B-1, BB-73) dollars, suggesting that the 1797 dollars were in fact struck in 1798 because most of the 1797 dollars show an even later state of the reverse die. This 1798 example is sharply detailed for the grade and attractive. The bronze-gray patina is thick with hints of golden luster remaining near the borders. The rims and denticles are complete and frame a fairly well-centered strike. A few light adjustment marks on the reverse are well-hidden and do not distract, while nice detail remains on the eagle and Liberty's hair. PCGS# 40006

**1798 Draped Bust Silver Dollar, XF45
B-1, BB-82 Small Eagle Reverse
13 Stars, Scarce This Nice**

- 4809** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, XF45 PCGS. Bowers Die State III. Type, date, and early dollar collectors eagerly seek original and problem-free examples of the Small Eagle reverse such as this sharp coin. The BB-82 variety pairs the 13-Star obverse with the Large Letters reverse, as opposed to the 15-Star obverse that features a Small Letters reverse. All other 1798 dollars are of the heraldic Large Eagle reverse design and they are considerably more available.

Deep, gunmetal-gray toning and bold details define this Choice XF dollar. Although the 15-Star variety is slightly more challenging to find, all Small Eagle dollars are scarce and highly desired when this nice. Multiple die cracks encircle the reverse, and evidence of die lapping on the obverse identify the late die state of this coin. The smooth, hard surfaces display a bold strike and both sides of the coin are free of any adjustment marks. Population: 19 in 45, 19 finer (8/14). PCGS# 40006

**1798 Draped Bust Dollar, AU58
B-9, BB-121
'Amateur Diecutter's Reverse'**

4810 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, AU58 PCGS. Ex: Cardinal/Hesselgesser. Bowers Die State II. A number of gaffs by an early diecutter occur on this interesting variety. Most of the trouble relates to star placement and alignment. On the obverse, too much space was allowed between stars 1, 2, and 3, crowding the rest of the stars on that side of the coin. Similar misalignment occurs with stars 8 through 13. More notably on the reverse, the "arc star pattern" of the field stars was bungled, a poor imitation of the correct arc pattern, described by David Bowers as "sloppy" die work.

This exceptional coin is listed second on Bowers' list of Notable Specimens in his 2013 *Encyclopedia*. Near-Mint State details and strong luster remain over the smooth, unabraded surfaces. Clear amber-gold toning lightly covers the silver surfaces. Liberty's portrait and hair strands are bold and the stars are sharp. The eagle shows only a touch of wear on the head.

Bolstered by the impressive pedigree and outstanding eye appeal, this coin should find a welcomed home in any high-grade early dollar collection or type set. PCGS# 40038

**1798 Large Eagle Dollar, AU50
B-24, BB-124, Pointed 9**

4811 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2 AU50 ANACS. Die State V, with numerous die cracks around the lower-right obverse. BB-124 is one of the most plentiful varieties of the 1798 issue, and is often encountered in type specialists' cabinets. This representative displays variations of battleship and pale golden-gray patina, with faint, isolated blushes of iridescent color seen periodically on each side. The border dentils are bold, and the upper-right reverse shows the only mentionable weakness, though here it is minor. Adjustment marks are not immediately apparent. PCGS# 40041

**1799 Dollar, B-19, BB-155, XF45
Rare Late Die State**

4812 1799 7x6 Stars, B-19, BB-155, R.4, XF45 ANACS. Die State IV, with prominent die cracks through stars 1 through 3 and the date. BB-155 is a distinctly scarce variety, and is rarely seen finer than the XF grade level. This Choice XF representative has pale golden-gray patina overall, with dusky amber, teal, and pale blue tinges also seen around the margins. The borders are strong and the central devices are well-defined. No adjustment marks are retained on either side. PCGS# 40047

**1799 7x6 Stars Dollar, Choice XF
B-5, BB-157, Middle Die State**

4813 1799 7x6 Stars, B-5, BB-157, R.2, XF45 PCGS. CAC. Bowers Die State III with a rising crack through AMER. Rich golden-brown and gunmetal-blue toning drapes this moderately circulated but minimally abraded Heraldic Eagle dollar. All letters in E PLURIBUS UNUM are sharp. The sole identifiers are minor reverse rim dings at 12:30 and 4 o'clock. PCGS# 40049

1799 Draped Bust Dollar, AU58
B-6, BB-162
Lightly Toned, Lustrous Example

4814 1799 7x6 Stars, B-6, BB-162, R.4, AU58 NGC. Bowers Die State III. Nice luster remains across the silver iridescent surfaces of this near-Mint early dollar. The fields are somewhat reflective (especially on the reverse) with amber-gold accents at the margins and on the high points of the motifs. Lilac overtones enhance the attractive, lightly toned fields and devices.

Bold detail shows light wear on Liberty's portrait, although the hair strands are fully defined and lustrous except at the highest points. The eagle is a bit weak at UNUM and the nearby head, neck, breast, and wing feathers as normally seen for the scarce die pair, which is the only use of this reverse. PCGS# 40053

1800 Draped Bust Dollar, MS61
B-4a, BB-186, Late Die State
Noticeably Out-of-Round Toward 8 O'Clock

4815 1800 B-4a, BB-186, R.4, MS61 ANACS. Bowers Die State III. BB-186 is one of the scarcer varieties for the issue, but a number of the surviving examples are in the XF to AU grade range, in contrast to some of the more plentiful varieties which are usually encountered well-worn. Mint State examples, however, are seldom seen at any level.

This MS61 piece is from an extreme late die state, with numerous, prominent die cracks spreading across the obverse. The coin is also, interestingly, noticeably out-of-round by more than a millimeter. The elongation of the planchet is seen plainly in the unusually wide rim from 6 to 9 o'clock on the obverse and the corresponding portion of the reverse. What caused the planchet to become elongated at the Mint is unknown, though it makes one wonder if perhaps this coin was struck out of collar or in a partially broken collar. Housed in an old white ANACS holder, it is impossible to see the edge to inspect the lettering for confirmation in that regard.

A number of crisscrossing adjustment marks are also seen over the central obverse, and areas of striking weakness are seen on both sides, not uncommon for this poorly produced variety. Pale amber-gold toning blankets otherwise bright silvery-gray surfaces on each side. All aspects considered, this is a most unusual and highly intriguing example of this seldom-seen variety. PCGS# 40072

1800 Bust Dollar, XF40
B-19, BB-192 AMERICA! Variety

4816 1800 AMERICA!, B-19, BB-192, R.2, XF40 PCGS. Bowers-Borckardt Die State II. The lightly abraded surfaces of this attractive XF specimen display pleasing gray and blue-steel patina and the design elements retain much of their original detail. The famous AMERICA! reverse, well known to Draped Bust dollar collectors, is shared by the BB-191 and BB-192 die pairs. The position of the obverse stars with star 1 closer to the curl than star 7 is to L identifies the BB-192 variety. Population: 11 in 40, 32 finer (8/14). PCGS# 40082

SEATED DOLLARS

1855 Seated Dollar, AU50
Scarce, Low-Mintage Issue

4817 1855 AU50 PCGS. According to Bowers' *Silver Dollars & Trade Dollars of the United States*, "Circulated examples of the 1855 Liberty Seated dollar are few and far between, and finding an acceptable specimen of this date has never been an easy task." Olive-green and violet-gray patina overall exhibits cobalt-blue and golden-orange accents. Brief circulation causes light rubbing over the high points, but the devices are clearly well-struck. From a mintage of only 26,000 coins. NGC ID# 24YU, PCGS# 6943

1870-CC Seated Dollar, XF45
First Carson City Emission

4818 1870-CC XF45 PCGS. Seated dollars from the Carson City Mint are among the scarcest and most sought-after dollars from that branch, largely due to their low mintages and correspondingly low survival rates. The 1870-CC was produced to the extent of only 11,758 pieces, which was still the highest mintage of any Carson City Seated dollar. This Choice XF example shows luminous steel-gray surfaces, with hints of lavender-gray and pale gold color visible when tilted beneath a light. Details remain sharp, despite slight high-point wear. NGC ID# 24ZE, PCGS# 6964

1870-CC Seated Dollar, AU53
Low-Mintage CC-Mint Issue

4819 1870-CC AU53 PCGS. Silver dollars were the first coins to be struck at the Carson City Mint, though production totals were limited, amounting to only 11,758 coins. Extant representatives of the 1870-CC dollar are elusive in all grades, and highly desirable as the first issue from the famous Nevada mint. This deeply toned AU example retains strong detail and exhibits few marks, though its true visual appeal lies in the rich orange-gold, violet, and ocean-blue hues than encompass each side beneath a veil of tan-gray patina. Population: 26 in 53, 66 finer (9/14). NGC ID# 24ZE, PCGS# 6964

1871 Seated Dollar, MS64
Only Six Numerically Finer at PCGS

4820 1871 MS64 PCGS. CAC. The 1871 is one of the most plentiful Seated dollar issues in the series, ideal for type representation. This Choice example was struck from a freshly polished die pair, as evidenced by moderate mirroring in the fields and sharply struck motifs. Pale amber-gold toning encompasses each side, growing deeper toward the borders where it is visited by small tinges of ocean-blue. Population: 38 in 64 (1 in 64+), 6 finer (9/14). NGC ID# 24ZG, PCGS# 6966

1872-CC Seated Dollar, AU50
Low-Mintage, Carson City Key Date

4821 1872-CC AU50 PCGS. In the four years between the opening of the Carson City Mint in 1870 and the end of the Seated dollar series in 1873, the Nevada facility struck only 18,584 dollars. The vast majority were minted in 1870 (11,758 coins), while the 1871 issue claims the lowest production total (1,376 pieces). Still, the 1872-CC is a formidable rarity with a mintage of only 3,150 examples. This lightly circulated representative exhibits bright, steel-gray surfaces with distinct prooflike reflectivity in the fields and significant remaining luster in the interstices. Despite moderate friction over the high points, the well-struck devices still show strong detail. A number of marks are scattered lightly over each side, the most notable of which occurs on the eagle's shield. Population: 16 in 50 (1 in 50+), 39 finer (8/14). NGC ID# 24ZK, PCGS# 6969

1872-CC Seated Dollar, AU55
Respected, Well-Known Rarity

4822 1872-CC AU55 PCGS. The following comments were offered by Rusty Goe with regard to this scarce issue in his 2003 book *The Mint on Carson City Street*: "It is not known whether the 3,150 1872-CC silver dollars were released into circulation, claimed by bullion traders, banks, or merchants, held in the miner's vaults, exported to China, buried in the ground, hoarded or melted — or, a combination of any or all of the above. Regardless what happened to them long ago, it appears that no more than 10% of the original mintage survived to the early years of the 21st century."

This piece offers sharply detailed motifs that appear to be nearly complete, even on the obverse which is often seen with soft definition. The untuned silvery-gray surfaces exhibit lighter silver-white coloration on some of the high points, including most of the eagle's motif. Surface marks are mostly small and located in the field areas.

Such a scarce and attractive Choice AU example should have no trouble locating a new owner when it is offered up for sale at our upcoming New York auction. Population: 11 in 55, 24 finer (9/14). NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

1858 Seated Dollar, PR63
Proof-Only Issue

1866 Motto Seated Dollar
Beautifully Preserved Gem Deep Cameo

4823 1858 PR63 PCGS. The Mint failed to produce any Seated dollars in business strike format in 1858, resulting in the sole proof-only issue in the series with a mintage of 300 coins. This was also the year the Mint began advertising proofs to the public, as specimens were previously struck to order. This Select example displays largely brilliant surfaces and an expectedly needle-sharp strike. Only the eagle's left (facing) wing tip shows minor softness. The fields are pleasingly mirrored, and a handful of wispy marks and ticks lightly are scattered over each side. Two small laminations occur above ED in UNITED. Population: 30 in 63, 11 finer (8/14). NGC ID# 252C, PCGS# 7001

4824 1866 Motto PR65 Deep Cameo PCGS. CAC. For this initial With Motto proof Seated dollar issue, just 725 specimens were struck. The overwhelming majority of PCGS-certified examples do not have Cameo-worthy contrast: 230 pieces, compared to 55 Cameo-rated coins and just 17 Deep Cameo specimens. This is a stunningly contrasted representative with profoundly mirrored fields and sharply rendered, thickly frosted devices. The splashes of indigo toning that appear sporadically around the obverse margins have greater coverage at the lower and left reverse, but the patina does not negatively impact the contrast. Population: 5 in 65 Deep Cameo, 3 finer (8/14). PCGS# 97014

1869 Seated Dollar, PR64 Cameo
Deep Mirrors

- 4825** 1869 PR64 Cameo PCGS. CAC. In 1869, the Mint did not take overly great care to produce proofs with frosted devices, and as a result, Cameo representatives of the proof 1869 Seated dollar are in the distinct minority. This near-Gem example displays profoundly deep mirroring in the fields and ample frost over the sharply defined relief elements. Shades of lavender-gray and ocean-blue toning accent portions of each side, attesting the originality of the surfaces. Population: 15 in 64 Cameo, 5 finer (8/14). PCGS# 87017

1869 Seated Dollar, PR64 Deep Cameo
Incredible White-on-Black Contrast

- 4826** 1869 PR64 Deep Cameo PCGS. CAC. This boldly struck near-Gem proof is the very definition of "eye appeal." Seemingly infinite depth of mirroring in the fields beautifully frames thickly frosted relief elements, delivering a degree of contrast that is downright rare on proof Seated dollars of the period and more reminiscent of the carefully manufactured modern proofs of the post-1950s era. Faint traces of tan-gold color highlight the devices, attesting to the originality of the surfaces. PCGS has certified only 25 Deep Cameo representatives of this issue, ten of which are in this grade (4 in 64+), with 11 finer (8/14). PCGS# 97017

TRADE DOLLARS

1873 Trade Dollar, MS64
Rich Original Toning

- 4827** 1873 MS64 PCGS. Type One Obverse and Reverse. Popular as the first-year issue of the type, the 1873 Trade dollar is also scarce in Choice condition and rare finer. This satiny representative exhibits some of the usual striking softness on the eagle's right (facing) talons and on Liberty's head and surrounding stars, though the definition is otherwise well-executed. Blended copper and olive-gold toning encompasses each side, with the obverse also displaying an area of lavender-blue around Liberty's torso. Population: 49 in 64 (3 in 64+), 15 finer (8/14). NGC ID# 252W, PCGS# 7031

1873-CC Trade Dollar, MS62
Frosty, Unusually Attractive Surfaces

- 4828 1873-CC MS62 PCGS. CAC.** Type One Obverse and Reverse. Silver dollar production at the Carson City increased dramatically with the introduction of the Trade dollar; 124,500 pieces were struck in the latter half of 1873, but nearly all were shipped to the Orient for trade. A few pieces circulated domestically, but little collector attention was paid to the issue, as Mint State survivors are seldom seen; most such coins are in MS62 and lower grades, but even at this level the date is scarce.

This representative is almost in a class by itself in terms of eye appeal for the grade. Light, scattered grazes and some small ticks in the fields limit the numeric grade, though the nearly untuned, unusually frosty luster balances the eye appeal, and the devices exhibit remarkably sharp definition. A pleasing lower-grade Mint State example of this first Carson City Trade dollar. Population: 19 in 62, 17 finer (9/14). NGC ID# 252X, PCGS# 7032

1875-S/CC Dollar, MS62
In-Demand, Overmintmark Variety

- 4829 1875-S/CC FS-501 MS62 PCGS.** Type One Reverse. Large S. An early die state with no die breaks and the usually seen S/CC variety. This popular overmintmark representative showcases entirely brilliant and highly lustrous surfaces with few marks for the grade. The design elements are mostly well-defined, especially the olive branch. A touch of softness is noted, however, over Liberty's head and foot, as well as the eagle's right (facing) claw and left (facing) wingtip. Population: 8 in 62, 15 finer (8/14). PCGS# 145813

PROOF TRADE DOLLARS

1879 Trade Dollar, PR65+
Gorgeous Multicolor Toning

- 4830 1879 PR65+ NGC.** Type Two Obverse and Reverse. A carefully preserved and attractive specimen from the first proof-only year of the Trade dollar series. The gleaming obverse has green-gold fringe toning around a blue and lavender-orange core, while the reverse has similar shadings in a more jumbled order. The glassy reflectivity in the fields is not overly affected by the beautiful patina. Census: 45 in 65 (3 in 65+), 37 finer (8/14). NGC ID# 27YR, PCGS# 7059

1883 Trade Dollar, PR65 Cameo
Lovely Peripheral Color

- 4831 1883 PR65 Cameo NGC.** Type Two Obverse and Reverse. Gorgeous toning along the extreme outer edges and the largely brilliant centers provide this near-Gem with a strong degree of visual appeal. The toning includes shades of yellow, gold, plum, cerulean-blue, and rose. The level of design detail is pleasing on this lustrous coin, and the Cameo contrast is bold. Census: 15 in 65 Cameo, 30 finer (8/14). PCGS# 87063

1883 Trade Dollar, PR66 Cameo
Immensely Appealing, Conditionally Rare

- 4832 1883 PR66 Cameo PCGS. CAC.** Type Two Obverse and Reverse. With the exceptions of the ultra rare 1884 and 1885 proofs, the proof 1883 Trade dollar is the final issue of the type. A mintage of 979 pieces was accomplished, but the vast majority of survivors grade no better than PR64, and Cameo representatives are scarce in all grades. This example is a truly eye-appealing Premium Gem, with seemingly infinite depth of mirroring in the fields and razor-sharp, softly frosted devices. Original orange-gold and pale lavender peripheral toning yields to light champagne hues in the centers, while noticeable hairlines and marks are nonexistent. Population: 12 in 66 (1 in 66+) Cameo, 2 finer (9/14). PCGS# 87063

MORGAN DOLLARS

1878 8TF Morgan Dollar, MS66
Broken R&B Variety

- 4833 1878 8TF Broken R&B, VAM-21, MS66 NGC.** The P, U, R, and B in PLURIBUS are prominently doubled, while other obverse devices show light doubling. This Premium Gem is well-struck and lustrous with splendid eye appeal. The semiprooflike and essentially brilliant surfaces offer an astonishing degree of flash and attractive cartwheel effects. Magnification fails to reveal any marks or other distracting imperfections. Census (all varieties): 25 in 66 (6 in 66 ★), 0 finer (8/14). PCGS# 133822

1878 Morgan Dollar, MS65 Deep Mirror Prooflike
7 Tailfeathers, Reverse of 1878

- 4834 1878 7TF Reverse of 1878 MS65 Deep Mirror Prooflike PCGS.** The top feather in the arrow fletching is parallel with the others, identifying the Reverse of 1878. This spectacular Gem exhibits razor-sharp definition on the richly frosted design elements and deeply reflective brilliant fields with no mentionable distractions. Population: 14 in 65 Deep Mirror Prooflike, 0 finer (9/14). NGC ID# 253K, PCGS# 97075

1878-CC Silver Dollar, MS66
Clean Cheek, Bold Hair Strands

- 4835 1878-CC MS66 NGC.** Brilliant-white except for a slight central blush of almond-gold patina, this first-year Carson City dollar is sharply lustrous and highly attractive. An unmarked cheek and full plumage on the eagle combine with a bold strike on the other motifs for a well-deserved Premium Gem designation. Just 15 coins are certified numerically finer by PCGS and NGC combined (8/14). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66
Attractive, First-Year Representative**

4836 1878-CC MS66 PCGS. CAC. Widely sought-after because of its first-year status and Carson City mintmark, the 1878-CC is scarce in Premium Gem and very rare in finer condition. Thick mint frost and the absence of any toning imbue this coin with CAC-approved visual appeal. The devices are sharply detailed with only mild softness over Liberty's ear. Housed in a green label holder. PCGS has certified only six numerically finer examples (8/14). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66
Beautifully Toned, Impressive Surface Quality**

4837 1878-CC MS66 PCGS. CAC. Fully struck and impressively preserved, this first-year issue displays dynamic cartwheel luster and lovely, variegated coloration across each side, in hues of electric-blue, rose-gray, and gold. On the reverse, a spindly die crack extends across the tops of UNITED STATES OF AMERICA, and faint, diagonal die polish lines are noted in the lower right field areas. There are no distracting marks or abrasions to be found on either side of this exceptional Carson City dollar. Few examples are certified finer. NGC ID# 253M, PCGS# 7080

**1879 Silver Dollar, MS66+
High-End, Frost-White Coin**

4838 1879 MS66+ PCGS. A bold strike delivers strong details above Liberty's ear and sharp feather definition on the eagle. The coin is brilliant and frost-white, with silver cartwheel luster on full display. Only minor grazes appear on the frosted surfaces; otherwise, there are no mentionable marks or abrasions. More than 12,000 examples of this issue have been certified by PCGS, but only four examples have been awarded a higher numeric grade than this high-end representative. Eight other coins own the PCGS Plus designation at the MS66 level (9/14). NGC ID# 253S, PCGS# 7084

**1879 Morgan Dollar, MS66+
Only Four Finer Coins at PCGS**

4839 1879 MS66+ PCGS Secure. CAC. Ex: Bella. The 1879 Morgan dollars were all struck with the slanting arrow feather Reverse of 1879. A huge mintage of 14.8 million pieces was accomplished, making the date an available one in lower Mint State grades, but problems with strike and surface quality limit the number of really high-grade specimens.

The present coin is a stunning high-end Premium Gem, with well-detailed design elements that show just a touch of the usual softness on the hair strands above Liberty's ear. The well-preserved, mostly brilliant surfaces show a few hints of greenish-gold toning at the peripheries. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded only four numerically finer examples (9/14). NGC ID# 253S, PCGS# 7084

1879-CC Morgan, MS62

Vibrant Mint Luster

- 4840 1879-CC MS62 NGC.** A significant portion of the 756,000 silver dollars produced at the Carson City Mint in 1879 were melted under the terms of the Pittman Act of 1918, resulting in the relative scarcity of high-grade Mint State representatives today. This example is light abraded, as the grade suggests, though the radiant cartwheel luster and highly reflective fields more than balance the eye appeal. Deep orange-gold peripheral toning frames light champagne centers, with the colors being somewhat more vivid on the obverse. NGC ID# 253T, PCGS# 7086

1879-CC Morgan Dollar, MS63

Popular, Scarce Early Issue

- 4841 1879-CC MS63 PCGS.** Normal mintmark. A frosty, brilliant example of this early Carson City issue, the second most-elusive issue from the legendary Nevada mint facility. This example is well struck and shows a slightly scuffy obverse combined with a relatively clean, minimally abraded reverse. NGC ID# 253T, PCGS# 7086

GSA DOLLAR

1879-CC GSA Dollar, MS64+

- 4842 1879-CC GSA MS64+ PCGS. VAM-5.** The date is lightly repunched, and the U in UNITED is die doubled, but perhaps the most interesting feature of VAM-5 is the die line down from the nose, near the upper lip. A well struck near-Gem with potent luster and only a hint of tan-gold toning. The fields are essentially immaculate, as is the eagle, and the grade is limited solely by a few light marks on the portrait. Among collectible GSA Carson City issues, the 1879-CC and 1890-CC are the two rarest. But between those two issues, the 1879-CC is more elusive outside of a GSA holder. Population: 4 in 64 (3 in 64+), none finer (9/14).

MORGAN DOLLARS

1879-CC Morgan, MS61 VAM-3, 'Capped Die'

- 4843** 1879-CC Capped Die, VAM-3, MS61 NGC. A Top 100 Variety. An early die state example, with the G in God clear. The strike is well-executed and the fields display a degree of semiprooflike mirroring. Scattered abrasions define the grade, though these are small and evenly distributed. Faint traces of light golden color are seen upon close examination. PCGS# 133869

1879-CC 'Capped Die' Dollar, MS64 Repunched Date

- 4844** 1879-CC Capped Die, VAM-3, MS64 PCGS. CAC. A Top 100 Variety. In addition to its curious Carson City mintmark, VAM-3 is distinctive for repunching on the top of the 18 in the date. A lustrous stone-gray Choice dollar. Smooth aside from a delicate diagonal graze on the cheek. The strike is good despite minor blending at the centers. PCGS# 133869

1879-CC 'Capped Die' Dollar, MS64+ Semikey Carson City Issue

- 4845** 1879-CC Capped Die, VAM-3, MS64+ PCGS. CAC. A Top 100 Variety. Traditionally called the "Capped Die" variety, but specialists know it as the Large Over Small CC. Per VAMworld.com, the myriad die chips below the wreath "are thought to be caused from attempts to obliterate the smaller underlying mint mark from the die with engraving tools." A pearl-gray near-Gem that has vibrant luster and no consequential abrasions. PCGS# 133869

1879-O Morgan Dollar MS65 Prooflike Tied for Finest at PCGS

- 4846** 1879-O MS65 Prooflike PCGS. From a mintage of 2.8 million pieces, the 1879-O Morgan dollar was struck with the slanted arrow feather Reverse of 1879. Examples with prooflike surfaces are known, but scarce. This attractive Gem displays sharply detailed design elements and moderately reflective prooflike fields that show only minor signs of contact. Population: 2 in 65 Prooflike, 0 finer (9/14). NGC ID# 253V, PCGS# 7091

1879-S Morgan Silver Dollar, MS68 Beautiful, Conditionally Unsurpassed Example

- 4847** 1879-S MS68 PCGS. CAC. It is surprising that nearly 100 examples of this second-year San Francisco issue have been graded at MS68 by PCGS. It seems unlikely, however, that many of those coins can match the current example for either outstanding eye appeal or overall technical quality. A fully struck piece with snow-white, intensely lustrous, virtually pristine surfaces. Housed in an old green PCGS holder. None are graded finer at either service as of (8/14). NGC ID# 253X, PCGS# 7092

**1881 Morgan Dollar, MS66+
Exceptional Surface Quality**

- 4848 1881 MS66+ PCGS. CAC.** The 1881 Morgan dollar is a high-mintage issue, boasting a production total in excess of 9 million coins, but the quality of strike and luster varies considerably among Mint State representatives. This Premium Gem example is a high-end, eye-appealing piece, showcasing vibrant, frosty mint bloom and above-average sharpness. Only a few microscopic luster grazes preclude an even loftier grade. PCGS has certified only four numerically finer coins (8/14). NGC ID# 2546, PCGS# 7124

1881-CC Dollar, Fully Struck MS67

- 4849 1881-CC MS67 PCGS. CAC. VAM-2.** Both 8s show die fill within the upper loops. The 1881-CC issue has an excellent reputation for sharp strikes, and this Superb Gem representative does not disappoint. The devices are fully struck, and each side displays radiant mint frost over entirely brilliant surfaces. This Registry-quality piece is free of any mentionable impairments and claims a low mintage of only 296,000 coins. Housed in a green label holder. PCGS has graded only four numerically finer examples (8/14). NGC ID# 2547, PCGS# 7126

**1881-S Morgan Dollar, MS68
Old Green Label Holder**

- 4850 1881-S MS68 PCGS.** This S-mint issue had a mintage in excess of 12.7 million business strikes and it has proven to be one of the most common dates in the ever-popular Morgan dollar series. Many thousands of Mint State survivors have been graded, but just a tiny fraction of that number that number, including this piece, have achieved the remarkable MS68 grade assessment at PCGS. This impressive Superb Gem is fully struck and both sides are seemingly pristine. The coin presents a nearly brilliant, highly lustrous appearance in the fields and centers, while slight pinches of peach-gold color are found near the borders. As an added bonus, this beautiful coin is encapsulated in an old green label holder. PCGS has encapsulated only two numerically finer pieces (9/14). NGC ID# 2549, PCGS# 7130

**1881-S Morgan Dollar, MS68
Impressive, Impeccably Preserved Example**

- 4851 1881-S MS68 PCGS. CAC.** Both sides of this untoned Superb Gem Morgan dollar display partially prooflike fields that offer mild contrast with the satiny motifs. An impressive strike leaves strong detail on the design features, including the hair at Liberty's ear and the eagle's breast feathers. Impeccably preserved throughout. Only two representatives of this issue have been rated even finer, both by PCGS, as of (8/14).
Ex: ANA Signature (Heritage, 7-8/2008), lot 2313. NGC ID# 2549, PCGS# 7130

**1882-CC Dollar, MS67
Impressive High-Grade Example**

- 4852 1882-CC MS67 PCGS.** A bright and shining Superb Gem, sharply struck with impressive cartwheel luster. Prominent mint frost graces the high points on the eagle, with a slightly more subdued appearance on the obverse. Nearly the finest-available, with only one higher-graded example certified by PCGS (8/14). NGC ID# 254B, PCGS# 7134

**1882-O/S Silver Dollar, MS65
VAM-5 'Broken' Variety, Late Die State**

4853 1882-O/S O/S Broken, VAM-5, MS65 PCGS. A Top 100 Variety. The VAM varieties in their current form are a tremendous help in clearing up the mysteries surrounding this important *Guide Book* variety. There were three different, re-purposed New Orleans dies (originally prepared for the San Francisco Mint), resulting in the overmintmark varieties. VAM-3 is the "Flush" variety, with curvature of the S most visible in Late Die States. VAM-4 is the "Recessed" variety, with the curvature of the S deeper in the recess of the O and lower, also most-visible in Late Die States. VAM-5 is the "Broken" S variety, with a partial S visible in Late Die States.

PCGS holders often designate Strong or Weak for the 1882 O/S variety. The designation does not relate to the quality of strike, but rather to the visibility of the overmintmark. The "Strong" designation usually applies to VAM-3 and VAM-4 Late Die States, where the curvature of the S is most visible within the O. The "Weak" designation usually applies to the VAM-5 Late Die State, with a partial S showing. It is possible Early Die States from all three VAM varieties are sometimes labeled "Weak" by PCGS, since they show lesser-presence of the S within the O.

Any O/S variety is rare in the Gem Mint State condition of this example. It is the VAM-5 Broken S variety, a Late Die State, with the partial S clearly visible. Brilliant and untoned, the coin shows few abrasions or marks of any kind on the smooth, appealing surfaces. This fully struck VAM-5 O/S is rare and desirable in Gem condition, and highly attractive. Population: 2 in 65, 0 finer (8/14). PCGS# 133893

**1883-CC Morgan, MS67
Exceedingly Rare in Finer Grades**

4854 1883-CC MS67 PCGS. CAC. The 1883-CC Morgan is only marginally scarce at the MS67 grade level due to the distribution of many examples in the GSA sales of the early 1970s, but finer pieces are prohibitively rare. This piece displays frosty luster over the devices, with subtle semiprooflike mirroring dominating the fields. Light champagne toning graces each side, but is deeper on the obverse where it is also visited by tinges of amber and pale olive color. A sharp strike complements the well-preserved surfaces. PCGS has certified only five numerically finer representatives (9/14). NGC ID# 254H, PCGS# 7144

**1883-S Morgan Dollar, MS64
Highly Attractive for the Grade, Ex: Redfield**

4855 1883-S MS64 NGC. Ex: The Redfield Collection. This frosty near-Gem 1883-S Morgan exhibits nearly brilliant centers, while the peripheries show bands of deep gold and ocean-blue toning. The strike is well-executed, and only a few light luster grazes on Liberty's cheek preclude full Gem status. Housed in a red Paramount International Coin Corp. rigid plastic holder with an NGC grade label affixed to the reverse. NGC has seen just 17 numerically finer representatives (9/14). NGC ID# 254K, PCGS# 7148

**1883-S Morgan, MS64
Rarely Encountered Finer**

4856 1883-S MS64 NGC. A conditionally challenging issue, the 1883-S Morgan dollar becomes genuinely rare at the Gem grade level. This Choice example displays frosty cartwheel luster beneath softly blended shades of apricot-gold and pale lavender toning. Slight softness is noted on the eagle's breast and the hair above Liberty ear, though it is minor. A few small abrasions limit the grade. NGC has seen 17 numerically finer submissions (8/14). NGC ID# 254K, PCGS# 7148

**1884 Morgan Dollar, Fully Struck MS67
Extremely Rare in Higher Grades**

- 4857 1884 MS67 PCGS.** The Registry Set specialist would require much patience and a significant budget to obtain an example finer than this Superb Gem. Faint russet toning around the dentils offers the only evidence of color over otherwise fully brilliant and thickly frosted surfaces. The design motifs are fully struck, and only a shallow graze on Liberty's cheek prevents an even higher grade. Population: 43 in 67 (6 in 67+), 3 finer (8/14). NGC ID# 254L, PCGS# 7150

**1885-CC Dollar, MS67
Superb in All Respects**

- 4858 1885-CC MS67 PCGS.** Despite being relatively plentiful in Mint State condition following the GSA sales of the early 1970s, the 1885-CC Morgan dollar is one of the most popular Carson City issues in the series. In high grades the date is especially sought-after, as it becomes scarce in MS67, and finer pieces are prohibitively rare. This remarkable coin showcases brilliant, vibrant mint bloom and frosty surfaces. A sharp strike and clean fields deliver a degree of eye appeal that is seemingly unmatched. Population: 63 in 67 (1 in 67+), 1 finer (8/14). NGC ID# 254S, PCGS# 7160

**1885-S Morgan Dollar, MS66
One of the Finer-Known Examples**

- 4859 1885-S MS66 PCGS.** Fully white and radiantly lustrous, this Morgan dollar condition rarity is destined for the specialist who cannot get enough frost and flash. This example is fully struck, with minimal flaws of any sort. The numerous 1885-S dollars in the extensive Redfield hoard did not materially increase the number of full Gem examples, since storage and handling of the Redfield coins left the majority in MS60 to MS63 condition. In MS66, this is a gorgeous, sharply struck piece that provides all the quality that could be asked for. Population: 39 in 66 (1 in 66+), 2 finer (8/14). Ex: Long Beach Signature (Heritage, 6/2006), lot 2401; Central States Signature (Heritage, 4-5/2009), lot 3061. NGC ID# 254U, PCGS# 7164

**1886-O Morgan Dollar, MS64
Essentially Unobtainable in Finer Condition**

- 4860 1886-O MS64 PCGS.** Bright, satiny luster characterizes this challenging O-mint dollar. Usually found in lower grades, this is an impressive near-Gem. The centers are sharply stuck, which is also an unusual attribute for this issue. The surfaces are lightly abraded and there is no trace of toning on either side. PCGS has graded only three numerically finer submissions (8/14). Ex: ANA Signature (Heritage, 3/2008), lot 1018. NGC ID# 254W, PCGS# 7168

**1886-S/S Dollar, MS66
Repunched Mintmark Variety**

- 4861 1886-S/S VAM-2 MS66 PCGS. CAC.** A Top 100 Variety. The mintmark is lightly repunched at the serifs. Dazzling luster sweeps the clean fields and boldly struck motifs. The obverse is magnificently preserved, and the reverse exhibits only infrequent and minor contact. Certified in a green label holder. Including all varieties, PCGS has graded 39 coins in MS66 (two in MS66+) and four finer (8/14). Ex: FUN Signature (Heritage, 1/2007), lot 7097. PCGS# 133906

**1887-S Dollar, MS66
Impeccably Preserved**

- 4862 1887-S MS66 PCGS.** This brilliant Premium Gem example is from a moderately difficult issue in the Morgan dollar series. The surfaces are devoid of any mentionable abrasions and exhibit attractive, frosty luster. Some roller marks from an incomplete strike appear over the centers on both sides, but the clean surfaces and lack of marks more than compensate. Population: 24 in 66 (1 in 66+), 1 finer (8/14). Ex: Long Beach Signature (Heritage, 10/2001), lot 7453; ANA Signature (Heritage, 3/2010), lot 1470. NGC ID# 2554, PCGS# 7180

**1889 Morgan Dollar, Brilliant MS66+
Vibrant Luster and Minimal Marks**

4863 1889 MS66+ PCGS. With a high mintage of nearly 22 million coins, it is unsurprising that the 1889 Morgan dollar issue tends to be irregularly struck. This Premium Gem exhibits strong definition over the eagle's breast feathers, and the only area of moderate softness occurs over Liberty's ear. The level of preservation is impressive, and each side maintains vibrant luster and gleaming brilliance. PCGS has seen only four coins in higher grades (8/14). NGC ID# 2558, PCGS# 7188

**1889 Silver Dollar, MS66+
Brilliant, Frost-White Example**

4864 1889 MS66+ PCGS. CAC. Only about 10% of Premium Gem 1889 dollars have qualified for the CAC green label representing high quality, and fewer than 8% of the PCGS-certified MS66 examples of this issue earn the PCGS Plus designation for high-end appeal. This brilliant-white, frosted coin displays both awards. Well struck for this high-mintage Philadelphia date, the coin shows no significant abrasions. Three tiny marks on Liberty's jawline are minor and non-distracting. Just seven coins are graded numerically finer by PCGS and NGC combined (9/14). NGC ID# 2558, PCGS# 7188

**1889-CC Dollar, AU50
Capstone in the Morgan Dollar Series**

4865 1889-CC AU50 PCGS. Nearly untoned, although a blush of olive-gold coloration is noted on DOLLAR. This lightly circulated CC-mint example retains a substantial amount of mint luster within the protected regions. No marks merit mention, and the highpoints show only moderate blending. A collectible example of a famous Carson City key date.
Ex: Houston Signature (Heritage, 11/2007), lot 61147. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan, AU50
Attractive for the Grade**

4866 1889-CC AU50 NGC. As most were paid out into circulation in the 1800s, many examples of this sought-after Carson City issue were lost or later melted, and few Mint State quantities were released from Treasury vaults during the 20th century. This AU representative exhibits flashes of luster in the recesses, while a thin veil of light golden toning blankets each side. The coin is much more appealing than most AU examples of this key-date branch mint issue. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar
Choice Almost Uncirculated Example

4867 1889-CC AU55 PCGS. All 350,000 1889-CC Morgan dollars were coined in the final three months of the year, and the majority were paid out into circulation shortly thereafter. As a result, a number of well-worn examples are available to collectors, but high-grade pieces are elusive. Mint State coins are available with some searching, but command strong premiums due to substantial collector demand. This Choice AU piece represents a well-detailed, lustrous alternative for the series specialist. Only a trace of actual wear is evident over the high points of the devices, and there remain areas of semiprooflike mirroring in the fields, most notably on the reverse. Steel-gray color blankets both sides, with traces of light gold seen in select areas. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU58
Significant Carson City Issue

4868 1889-CC AU58 PCGS. The mass melting of 250,000 to 325,000 1889-CC dollars created one of the undisputed key dates in the Morgan series. Of the original 350,000-coin mintage, CoinFacts estimates that only 25,250 pieces are extant, most of which are encountered in heavily circulated grades.

The surfaces of this minimally circulated example are entirely brilliant and exhibit cartwheel luster over each side. The devices are almost fully struck, and the reverse shows distinct prooflike contrast between thickly frosted motifs and mildly reflective fields. Only essentially imperceptible friction over the high points and lightly scattered marks preclude an Uncirculated designation. This near-Mint Carson City representative is sure to hold an important place in any high-end collection. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS63
Elusive Series Key

4869 1889-CC MS63 ANACS. Among Carson City Morgan dollars, the 1889-CC is easily the most elusive issue. The 1889-CC claims a low mintage of 350,000 pieces and most of the coins were released into circulation in the 19th century, where they suffered a high rate of attrition. High-grade specimens are scarce in an absolute sense, and collectors prize examples in all grades and conditions. This attractive Select specimen offers sharply detailed design elements throughout. The fields show prooflike reflectivity in most areas, with a scattering of minor hairlines and contact marks on both sides. The pleasing surfaces are enhanced by hints of bluish-gray and emerald-green toning. NGC ID# 2559, PCGS# 7190

1890-O Dollar, MS66 Prooflike
Outstanding Eye Appeal

4871 1890-O MS66 Prooflike PCGS. CAC. In *A Guide Book of Morgan Silver Dollars*, Bowers writes, "Some dies are prooflike and can be attractive in higher grades. However, among prooflike coins, strike is often soft." Such is the case with this Premium Gem representative. Thickly frosted design features and mirrorlike fields generate an impressive degree of contrast and visual appeal, accounting for both the Prooflike designation and the CAC approval sticker. Softness occurs most prominently around the peripheral legends on both sides, while the central devices are rather well-struck for a New Orleans dollar. Carefully preserved and largely brilliant. Population: 3 in 66 Prooflike, 0 finer (8/14). NGC ID# 255E, PCGS# 7201

1890-CC Dollar, MS65
Rare Any Finer

4870 1890-CC MS65 PCGS. CAC. VAM-7. The top of a 0 shows in the dentils below the date, and the first C in the mintmark is strongly doubled inside the loop. This is a sharply defined Carson City representative with frosty luster, brilliant surfaces and strong eye appeal. PCGS has certified only 13 coins numerically finer, all varieties included (8/14). NGC ID# 255D, PCGS# 7198

**1891 Morgan, MS64 Deep Mirror Prooflike
Elusive This Well-Contrasted**

- 4872 1891 MS64 Deep Mirror Prooflike PCGS.** The 1891 Morgan is usually available in grades through MS64 and only becomes genuinely scarce in Gem condition. Prooflike examples, however, are elusive at all grade levels, and Deep Mirror Prooflike pieces are exceedingly so. This sharp near-Gem example of the latter exhibits heavy frost over the devices that provides strong cameo contrast with the mirrored fields. Light, scattered abrasions are present, as allowed by the grade. Population: 21 in 64 Deep Mirror Prooflike, 1 finer (8/14). NGC ID# 255G, PCGS# 97205

**1891-O Dollar, MS65
Seldom Seen Finer**

- 4873 1891-O MS65 PCGS.** This brilliant Gem features excellent detail and abundant luster with occasional dots of tan patina across parts of the obverse. Carefully preserved with eye appeal that matches the grade. The Registry collector should note that this Gem is tied for the finest example certified by PCGS (8/14).
Ex: *Houston Signature* (Heritage, 12/2008), lot 3045. NGC ID# 255J, PCGS# 7208

**1891-O Morgan Dollar, MS65
Notable Condition Rarity**

- 4874 1891-O MS65 PCGS.** Brilliant-white, frosted examples of the 1891-O dollar are few and far between — in fact, PCGS has yet to certify a numerically finer piece than MS65 for this conditionally challenged issue (9/14). The current coin is lustrous and untuned, with bold mint bloom and eye appeal that ranks it among the finest certified representatives of the date and mint. Almost always found weak at the centers, this example is bolder than most with minimal softness over the ear and on the eagle's leg. Only a few tiny marks are seen, none significant enough for individual mention. NGC ID# 255J, PCGS# 7208

**1892 Morgan Dollar, MS65
Attractive, Conditionally Scarce Example**

- 4875 1892 MS65 PCGS. CAC.** The 1892 dollar is generally obtainable through the lower grades of Mint State, but Gem quality examples are scarce. Vibrant luster graces the untuned, well cared for surfaces of this MS65 piece, and the design features are well brought up, including the feather detail on the eagle's breast. PCGS has seen only four coins finer, and NGC just one in an even higher grade as of (8/14).
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 2650. NGC ID# 255L, PCGS# 7212

**1892 Morgan, MS65+
Luminous, Shimmering Luster**

- 4876 1892 MS65+ PCGS. CAC.** The 1892 Morgan is a slightly better date in Mint State condition, being easily obtainable in grades through MS64, but becoming elusive in MS65 and decidedly rare any finer. This Plus-graded Gem displays silky-smooth, frost-white luster, with only a few faint grazes on the cheek limiting the numeric grade. The hair above Liberty's ear is not fully defined, though the strike is otherwise well-executed. PCGS has certified only four numerically finer representatives (9/14). NGC ID# 255L, PCGS# 7212

**1892-CC Morgan Dollar, MS65
Conditionally Elusive With Few Known Finer**

- 4877 1892-CC MS65 PCGS.** This Carson City issue had a high mintage figure of 1.35 million circulation strikes, but Treasury hoard releases were not extensive and examples are scarce-to-rare in upper Uncirculated grade levels. This is a lovely Gem example with clean, lustrous, essentially untuned surfaces and sharp strike definition on all design elements. Only 29 pieces are rated even finer by PCGS (8/14). NGC ID# 255M, PCGS# 7214

1892-O Dollar, MS65
Frosty, Minimally Marked Surfaces

4878 1892-O MS65 PCGS. Widely spaced dies and a blatant disregard for quality among New Orleans Mint officials resulted in one of the most poorly struck issues in the Morgan dollar series. This Gem representative shows the typical softness over Liberty's ear and the eagle's breast. However, the remaining design elements are sharply detailed. Cartwheel luster, brilliant surfaces, and the absence of any noteworthy bagmarks contribute to the strong eye appeal of this coin. PCGS has certified only six examples in higher numeric grades (8/14). NGC ID# 255N, PCGS# 7216

1892-O Morgan, MS65
Highly Lustrous, Few Finer

4879 1892-O MS65 PCGS. Due to the rather poor production values that the New Orleans Mint was known for, the 1892-O Morgan is seldom found sharp enough to qualify for a Gem grade assessment, and finer pieces are rare. This coin exhibits some of the usual softness in the central regions, but the remarkably clean surfaces tip the balance its favor. Vibrant, frosty mint luster blankets each side, while a few splashes of faint russet toning attest to its originality. Only six coins have graded numerically finer at PCGS (9/14). NGC ID# 255N, PCGS# 7216

1892-O Dollar, MS65
Strong Appeal for the Issue

4880 1892-O MS65 PCGS. Notorious for a weak strike and subpar luster, this New Orleans date is seldom offered in attractive Gem condition. The present coin, however, is brilliant and frosty, with sharp cartwheel luster. While the hair detail is lacking above the ear, the coin is otherwise bold and far above average for the issue in eye appeal. Liberty's cheek is mark-free, and the fields are remarkably unabraded. Just six coins are certified numerically finer at PCGS (9/14). NGC ID# 255N, PCGS# 7216

1893 Morgan Dollar, MS65
Low-Mintage Philadelphia Issue

4881 1893 MS65 PCGS. This is a lustrous and virtually untuned Gem from a low-mintage Philadelphia issue (378,000 coins). The strike is crisp, and the eye appeal is impressive. Marks are few and inconsequential apart from a slender line or two above the upper arrowhead. PCGS has certified a scant five pieces finer (8/14). Ex: *Central States Signature (Heritage, 4/2008)*, lot 2863. NGC ID# 255R, PCGS# 7220

1893 Morgan, MS65
Better P-Mint Issue

4882 1893 MS65 PCGS. With a mintage of only 378,000 pieces, the 1893 Morgan dollar is a challenging issue in Mint State, especially at the Gem grade level. This representative displays bold design elements and attractively clean surfaces, with only a few luster grazes limiting the technical grade. Hints of rose-gold toning in the margins are observed upon close examination, with frosty luster overall. PCGS has encapsulated only five numerically finer representatives (8/14). NGC ID# 255R, PCGS# 7220

1893-CC Dollar, MS63
Full Strike, Brilliant-White Coin
VAM-2 Variety

4883 1893-CC MS63 PCGS. VAM-2, R.3. Dazzling semiprooflike fields surround frosted central motifs of this brilliant-white dollar. Scarce beyond its 677,000-piece mintage, the issue is a challenging end to the Carson City Mint's up-and-down history in gold- and silver-rich West. The date is nearly always either poorly struck or overly bagmarked. This Select Uncirculated example, however, is far above average in both regards. The late die state of the VAM-2 variety is notable not only for the "cap vee" clashmarks between the wreath bough and eagle's right (facing) wing, and also for a prominent die crack through AMERICA — a crack that has special significance for Carson City aficionados. This variety is believed to represent the very last coins struck at the Carson City Mint prior to suspension of coinage operations on June 1, 1893. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Flashy Final-Year Carson City Example

- 4884 1893-CC MS63 PCGS.** This is a highly lustrous, essentially brilliant example from the final issue of Carson City Mint Morgan dollars. The low mintage of 677,000 pieces only partly explains the scarcity of this date, which was probably not widely saved at the time of its production for purely numismatic purposes. There are some wispy marks on the flashy white surfaces that account for the Select Mint State assessment by PCGS. NGC ID# 255S, PCGS# 7222

1893-S Morgan, VF20

- 4885 1893-S VF20 NGC.** A well-detailed mid-grade example of this key-date San Francisco issue, this 1893-S dollar displays bright steel-gray color, with small areas of golden-tan toning on each side. No major abrasions are observed. This issue becomes increasingly elusive in higher numeric grades. NGC ID# 255U, PCGS# 7226

1893-S Dollar, VF25
Key Date in the Series

- 4886 1893-S VF25 PCGS.** Both sides show bright, steel-gray patina with olive-green toning in the protected regions. Blending occurs over the hair curls and breast feathers, while the remaining design elements maintain significant detail. Wispy marks are scattered throughout. A well-circulated representative of the keystone S-mint issue in the Morgan dollar series. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF45
Key San Francisco Issue

- 4887 1893-S XF45 PCGS.** With the lowest mintage of the series (only 100,000 coins), the 1893-S has long been considered a major key issue. The date circulated heavily in the Western regions, with the result that most surviving examples are heavily worn or damaged. Higher-grade circulated pieces are not truly rare, but are genuinely scarce in local markets. This Choice XF example presents the collector with a well-detail, still-lustrous example. Traces of light golden color are observed on each side, though the coin retains a primarily bright appearance. NGC ID# 255U, PCGS# 7226
-

**1893-S Morgan Dollar, Unc Details
Business-Strike Key to the Series**

4888 1893-S — Cleaning — PCGS Genuine. Unc Details. From a series-low business-strike mintage of 100,000 pieces, the 1893-S Morgan dollar is always in demand, in all grades and conditions. Most of the small mintage was released into circulation near the time of issue, and some examples held in government storage were undoubtedly melted under the provisions of the Pittman Act in 1918. As a result, the 1893-S was not well-represented in the Treasury releases of the early 1960s, and the issue is quite elusive today, especially in high grade. This still-attractive specimen offers sharply detailed design elements and lightly marked surfaces that show signs of a light cleaning sometime in the past. This coin will be a welcome addition to an otherwise high-grade collection of Morgan dollars. NGC ID# 255U, PCGS# 7226

**1894 Morgan Dollar, MS64
Rare in Higher Grades**

4889 1894 MS64 PCGS. Demand for this low-mintage Philadelphia key date is exceeded only by a few other issues in the Morgan dollar series, among them the 1889-CC, 1893-S, and 1895 proof. The surfaces of this Choice example are lustrous and mostly brilliant with a speck of brown toning in the left-obverse field. This is a boldly struck coin with a handful of marks lightly scattered over each side. PCGS has seen just 26 numerically finer pieces (8/14). NGC ID# 255V, PCGS# 7228

**1894 Morgan, MS64
Rare Any Finer**

4890 1894 MS64 PCGS. The 1894 Morgan boasts the lowest Philadelphia mintage of the series (110,000 pieces), and is appropriately popular in all grades. The date can easily be located in the AU and lower Mint State range, but Choice examples are seldom seen, and finer coins are decidedly rare. This sharply struck representative is a refreshingly attractive piece for the grade, showing frosty, essentially brilliant luster and only a few minor surface grazes overall. PCGS has encapsulated only 26 numerically finer examples (8/14). NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64
Key Philadelphia Business Strike**

- 4891 1894 MS64 PCGS. CAC.** A lovely Choice Mint State example that ranks among the finer 1894 Morgan dollars known, with only 26 higher grade pieces certified by PCGS (8/14). The 1894 is well-known as the key business strike of the series from the Philadelphia Mint, surviving from a mintage of only 110,000 coins. As Morgan dollars go, that is an extraordinary small mintage. Fully brilliant silver surfaces are entirely void of toning, with strong design features including excellent hair detail over Liberty's ear, and sharp breast feathers on the reverse. NGC ID# 255V, PCGS# 7228

**1894-O Morgan Dollar, MS63
Boldly Struck and Attractive**

- 4892 1894-O MS63 PCGS.** Bowers suggests that this issue is tough to locate with decent strike definition, and the current example may be one of those very coins. Only minimal weakness exists above Liberty's ear, and the eagle's breast feathers are individually outlined, if not razor-sharp. A brilliant piece with mild scuffiness noted on the obverse that seemingly limits the grade of this otherwise attractive New Orleans example. NGC ID# 255W, PCGS# 7230

**1894-S Morgan Dollar, MS65
Conditionally Challenging S-Mint Issue**

- 4893 1894-S MS65 PCGS.** The San Francisco variant is the most plentiful of the three 1894 Morgan dollar issues in Mint State, but it is still somewhat less than available at the Gem grade level, and finer pieces are rare. This example is sharply struck on the finer details, and displays remarkably clean surfaces, even for the MS65 grade. Frosty luster engulfs each side beneath a thin veil of light champagne toning. This piece will impress even the most discerning specialist. PCGS has seen 13 numerically finer submissions (8/14). NGC ID# 255X, PCGS# 7232

**1894-S Dollar, MS65
Bold and Original**

- 4894 1894-S MS65 PCGS.** A popular date and mint, known for its above-average technical quality and eye appeal, yet seldom found with the overt originality of this attractively toned Gem. The fields are partially prooflike beneath an iridescent patina of lavender, rose, and smoke-gray hues. The strike shows full details on the eagle, with just a tiny bit of blending over the ear. Silver luster shines in cartwheel fashion beneath the toning. PCGS has seen just 14 numerically finer coins (9/14). NGC ID# 255X, PCGS# 7232

**1894-S Morgan Dollar, MS65
Seldom Seen Finer**

- 4895 1894-S MS65 PCGS. CAC.** Sharply detailed in most areas, this delightful Gem displays just a touch of softness on the hair above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster on both sides and show just a hint of golden-tan toning. Eye appeal is terrific. PCGS has graded only 14 numerically finer examples (9/14). NGC ID# 255X, PCGS# 7232

1895-S Morgan Dollar, MS64
Conditionally Scarce, Low-Mintage Issue

4896 1895-S MS64 PCGS. CAC. One of the smallest Morgan dollar business strike mintages is claimed by this issue, which saw a mere 400,000 pieces produced. Well known for being heavily bagmarked, according to Bowers, this San Francisco issue is scarce in Uncirculated condition and rare any finer than MS64. This example is well struck and brilliant with prooflike fields and a few trivial marks and luster breaks on the obverse that keep it from grading as a Gem. Only 39 coins are rated finer by PCGS as of (8/14). NGC ID# 255Z, PCGS# 7238

1896-S Dollar, MS64
Repunched 6 Variety

4897 1896-S MS64 PCGS. VAM-2. The 6 in the date is repunched north. The 5 million-coin mintage belies this issue's scarcity, as coins were likely melted en masse under the Pittman Act of 1918. This Choice representative showcases mostly brilliant surfaces with faint, dappled toning over each side. The devices are typically struck with softness at the centers, and marks are lightly scattered throughout. NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, MS64
Scarce, Challenging Issue in Mint State

4898 1896-S MS64 PCGS. Despite a high mintage of 5 million pieces, the 1896-S Morgan dollar is a challenging date in Uncirculated condition, and was once even regarded as a key date. This example is flashy and highly lustrous on the obverse, where it is essentially untuned. The reverse shows a layer of mottled creamy-gray and terra cotta toning. There are just a few superficial marks found on the nicely preserved surfaces. NGC ID# 2564, PCGS# 7244

1896-S Morgan Dollar, MS64
Unusually Attractive Example

4899 1896-S MS64 PCGS. A substantial mintage of 5 million Morgan dollars was accomplished at the San Francisco Mint in 1896, but the issue was not well-produced, and most examples seen have soft strikes and subdued mint luster, with a generous number of surface marks to complete the unattractive picture. This coin is a welcome exception to the rule, and displays sharply detailed design elements and bright mint luster, with only a few minor contact marks on each side. NGC ID# 2564, PCGS# 7244

1896-S Morgan, MS64
Seldom Seen Numerically Finer

4900 1896-S MS64 PCGS. CAC. A scarcer date in Mint State grades, the 1896-S Morgan is only marginally available in MS64, and Gem-quality examples are distinctly scarce. This Choice representative exhibits mottled gold, gunmetal-blue, and sea-green toning, with the deeper colors more prominent on the obverse. The surfaces are well-preserved, though the hair above Liberty's ear and the eagle's breast feathers are typically soft. NGC ID# 2564, PCGS# 7244

1897 Morgan Dollar, MS67
Among the Finest at Both Services

4901 1897 MS67 PCGS. Ex: Jack Lee Collection. This Superb Gem displays excellent definition over the design features. The highly lustrous surfaces reveal just a touch of barely discernible color and are devoid of any mentionable contact marks. Population: 24 in 67 (1 in 67+), 0 finer (8/14). Ex: FUN Signature (Heritage, 1/2009), lot 4758. NGC ID# 2565, PCGS# 7246

1897-S Dollar, MS67
Beautiful, Impressive Type Coin

- 4902 1897-S MS67 PCGS. CAC.** Praised by Bowers as a “top-notch dollar,” the 1897-S is usually well struck, lustrous, and readily available. This Superb example is all of these things and more. Intensely lustrous, with a snow-white reverse, the obverse shows lovely lemon-yellow and lilac toning blended together across the lower half. Surface marks are nearly nonexistent. A great coin that should please the type collector in search of a suitable high-grade representative. Population: 21 in 67, 2 finer (8/14). NGC ID# 2567, PCGS# 7250

1898 Morgan Dollar, MS67
Smooth Surfaces

- 4903 1898 MS67 PCGS.** While the 1898 is readily available through Gem condition, anything finer proves challenging. This incredible Superb Gem is immensely lustrous with occasional whispers of cloud-white haze over otherwise brilliant surfaces. The design elements are boldly impressed. A spectacular coin at the acme of preservation for the issue, with no numerically finer survivors certified by PCGS or NGC (8/14).
Ex: ANA Signature (Heritage, 3/2008), lot 1171. NGC ID# 2568, PCGS# 7252

1898 Silver Dollar, MS67
None Numerically Finer at PCGS or NGC

- 4904 1898 MS67 PCGS.** The Mint set high standards of production in the late 1890s, and the 1898 issue was particularly well made. This Superb Gem representative is virtually unmarked by coin-to-coin contact, frosty, and distinctively embellished with orange and blue toning accents that emphasize the brilliant, silver-white surfaces. The technical quality and dramatic eye appeal of this coin are amazing. Population: 72 in 67 (3 in 67+), 0 finer (8/14). NGC ID# 2568, PCGS# 7252

1900 Morgan Dollar, MS67
Unmarked Surfaces, Beautifully Toned

- 4905 1900 MS67 PCGS.** Those who prefer beautifully toned coins will devote extra attention to this Superb Gem dollar. Pastel blues and deep amber tones encircle the obverse, with amber-gold shades embracing the unmarked, almond-silver portrait of Liberty. The fields are smooth and wholly unabraded. The complementary reverse toning is less deep at the margins but more encompassing over the motifs and equally unmarked fields. Neither PCGS nor NGC has certified a numerically finer example. PCGS Population: 36 in 67 (3 in 67+), 0 finer (8/14). NGC ID# 256E, PCGS# 7264

1900-S Silver Dollar, MS66+
VAM-8, Lightly Repunched Date

- 4906 1900-S MS66+ PCGS. VAM-8.** The 190 in the date is lightly repunched on this near date VAM. Light to medium chestnut-brown toning graces the reverse border and most of the obverse. A lustrous and uncommonly unabraded Premium Gem. The strike shows minor inexactness at the centers, usual for the issue. As of (9/14), just two coins are graded finer at PCGS. NGC ID# 256H, PCGS# 7270

1901-S Dollar, Frosty MS66
Extremely Rare in Higher Grades

- 4907 1901-S MS66 PCGS.** The 1901-S is well-established as a conditionally elusive issue even in Gem condition, and the present coin clearly exceeds that benchmark. Both sides of this well-struck example are pleasingly lustrous beneath dappled silver-gray and russet-tan shadings. Population: 34 in 66 (2 in 66+), 2 finer (8/14).
Ex: Long Beach Signature (Heritage, 2/2009), lot 1956. NGC ID# 256L, PCGS# 7276

1902 Morgan Dollar, MS67
Conditionally Rare, None Finer

4908 1902 MS67 PCGS. Ex: NFL Set. The 1902 is common through MS65. Premium Gems are more difficult to locate, and anything finer is elusive. Hints of faint gold color reside in some of the peripheral areas, and potent luster emanates from both sides. Impeccably preserved surfaces exhibit sharply struck design elements. Population: 29 in 67 (2 in 67+), 0 finer (8/14).
Ex: FUN Signature (*Heritage*, 1/2009), lot 4806. NGC ID# 256M, PCGS# 7278

1902-S Dollar, MS66
Condition Rarity

4909 1902-S MS66 PCGS. The 1902-S dollar was paid out in substantial quantities from the San Francisco Mint from the 1920s through the early 1950s. As a result, the issue is relatively available up to Gem condition. At the Premium Gem level, examples are rare. This representative exhibits softly frosted luster over brilliant, wonderfully preserved surfaces. The strike is sharp overall with slight incompleteness at the centers on each side, and light die striations occur over the reverse. Population: 44 in 66 (2 in 66+), 4 finer (8/14). NGC ID# 256P, PCGS# 7282

1903-S Dollar, Bold MS65
Lustrous and Untoned

4910 1903-S MS65 PCGS. The 1903-S is a somewhat better date in the Morgan dollar series, especially in Gem condition. Each side exhibits sharply struck design features with only minor softness on the eagle's breast feathers. The surfaces gleam with brilliance and swirling mint luster, and a few small scuffs are the only blemishes visible without the aid of a loupe. An attractive representative. NGC ID# 256T, PCGS# 7288

1903-S Morgan Dollar, MS66
Virtually Unavailable Any Finer

4911 1903-S MS66 PCGS. Less than four dozen Premium Gem-quality 1903-S dollars exist for the legions of Morgan dollar collectors — a paltry amount for a year that saw the lowest mintage of San Francisco dollars since the rare 1893-S issue. In all, fewer than 1,500 examples of the date are thought to exist in any Uncirculated grade.

Most of the 1,241,000 pieces minted were either circulated or melted. Typically no more than one or two MS66 coins are seen at auction in any year, and should a MS67 coin appear it is a true numismatic rarity. This coin shares the rarified air of the issue's elite. Fully struck with frosted fields and devices, a pearl-like patina shows slight orange-gold accents at the margins. Two or three inconsequential, tiny marks do not detract from the high technical merit of this impressive coin. Population: 36 in 66 (2 in 66+), 4 finer (9/14). NGC ID# 256T, PCGS# 7288

**1903-S Dollar, AU53
Rare Small S Mintmark, VAM-2**

4912 1903-S Micro S, VAM-2, AU53 PCGS. A Top 100 Variety. When seen at all, this rare VAM-2 variety is almost always in lower circulated grades. About Uncirculated examples are a prize. Both the VAM website and the Bowers *Morgan Silver Dollar* reference suggest the Small S mintmark was possibly intended for Barber quarters. All other 1903-S reverses display the proper Large S mintmark.

The present coin is softly lustrous with a light, silver-gray patina. There are no large abrasions — those that exist are minimized by moderate wear. Aside from a single AU58 PCGS coin, this notable representative matches the finest example we have offered in the past ten years. Population: 7 in 53, 5 finer (8/14). PCGS# 133967

**1904-O Morgan Dollar, MS67
Outstanding Visual Appeal, None Finer**

4913 1904-O MS67 PCGS. CAC. Ex: Jack Lee. For a common date issue, this Superb Gem boasts an uncommonly high technical grade. The surfaces are flashy and brilliant without a hint of toning. Sharply struck overall, only the hair strand over Liberty's ear is a touch incomplete. Strong eye appeal. Housed in a green label holder. Population: 37 in 67, 0 finer (8/14). NGC ID# 256V, PCGS# 7292

**1904-S Dollar, MS64
Scarce Key Issue in Mint State**

4914 1904-S MS64 PCGS. Despite a reasonably high mintage of 2.3 million coins, the 1904-S Morgan dollar is a scarce key issue in mint condition; partly due to production deficiencies. Boldly detailed except over the central high points, with brilliant surfaces and bright satiny mint luster. Slight amounts of milkiness in the fields fail to distract or to limit the grade of this outstanding example. Surface marks are minimal for the near-Gem level of preservation. NGC ID# 256W, PCGS# 7294

**1904-S Dollar, MS64
Conditionally Challenging Issue**

4915 1904-S MS64 PCGS. CAC. Although all San Francisco Mint Morgan dollars minted between 1898 and 1904 are scarce in Mint State grades, the 1904-S is the second-rarest behind only the 1903-S. Above the MS64 level, the 1904-S is actually rarer than the 1903-S. This lustrous and slightly-toned piece has refreshingly clean surfaces for the assigned grade, and the strike is good although not quite fully brought up in the centers.
Ex: FUN Signature (Heritage, 1/2004), lot 9146; ANA Signature (Heritage, 8/2007), lot 2506. NGC ID# 256W, PCGS# 7294

1904-S Morgan Dollar, MS65
Rich Original Toning

- 4916 1904-S MS65 PCGS.** Unlike the New Orleans issue of the same year, which survives in quantity due to the Treasury releases of the early 1960s, the 1904-S Morgan is an elusive issue in Mint State condition, and is rare above the Gem grade level. The obverse of this example displays mottled lavender-gold and sea-green toning, while the reverse exhibits peripheral hues of the same around a light golden center. The hair above Liberty's ear and eagle's breast feathers are slightly soft, though the strike is otherwise pleasing. PCGS has certified only 12 numerically finer representatives (9/14). NGC ID# 256W, PCGS# 7294

1921-S Morgan Dollar, MS66
None Finer at PCGS

- 4917 1921-S MS66 PCGS.** The West Coast mint struck over 21 million Morgan dollars in the long-lived design's final year. Despite the high mintage, this coin is among the finest examples certified at PCGS, and only one piece is certified in a higher numeric grade at both PCGS and NGC combined (8/14). This remarkable Premium Gem is awash in softly frosted mint luster, and the immaculately preserved surfaces gleam with brilliance. Liberty's hair shows full detail, while the lower-reverse design elements are a touch incomplete. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1878 Morgan Dollar, PR63 Cameo
Scarce Reverse of 1878

- 4918 1878 7TF Reverse of 1878 PR63 Cameo ANACS.** The parallel top arrow feather identifies the Reverse of 1878. Probably no more than 250 proof Morgan dollars were struck with the 7 Tailfeathers Reverse of 1878. This attractive Select example exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. The mostly brilliant centers yield to vivid rings of greenish-gold at the borders. Eye appeal is outstanding. NGC ID# 2573, PCGS# 7312

1880 Dollar, PR67 Cameo
Only 1,355 Proofs Struck

- 4919 1880 PR67 Cameo NGC.** In 1880 the Philadelphia Mint coined 1,355 proof Morgan dollars alongside 1,987 proof Trade dollars. There is little doubt that each of those coins fueled sales for the other. Dave Bowers writes: "Proof Mintage: 1,355, a figure caused by the carry-along factor from those who were speculating in proof Trade dollars this year." Although many proof 1880 dollars have been cleaned, the present piece offers original surfaces with only the faintest trace of peripheral gold toning. A top-shelf Superb Gem. Census: 27 in 67 Cameo (1 in 67+ Cameo, 3 in 67 ★ Cameo), 16 finer (8/14).
Ex: FUN Signature (Heritage, 7/2009), lot 1027.
From The Pannonia Collection, Part Two. PCGS# 87315

**1882 Morgan Dollar, PR66 Cameo
Attractive Multicolor Toning**

- 4920 1882 PR66 Cameo PCGS.** The Philadelphia Mint struck a generous proof mintage of 1,100 Morgan dollars in 1882, and the issue was uniformly well-produced and attractive. Most examples seen exhibit excellent striking characteristics and many have some degree of cameo contrast. Few examples can match the quality and eye appeal of the present specimen, however. This delightful Premium Gem displays razor-sharp definition on all design elements, with deeply mirrored fields that contrast boldly with the frosty devices. The surfaces are predominantly greenish-gold at the centers, with hints of cerulean-blue at the borders. Population: 7 in 66 (1 in 66+) Cameo, 8 finer (9/14). PCGS# 87317

**1882 Dollar, PR64 ★ Ultra Cameo
Amazing White-on-Black Contrast**

- 4921 1882 PR64 ★ Ultra Cameo NGC. CAC.** Only the most attractive and aesthetically desirable coins receive the ★ designation from NGC, and this example, from a mintage of 1,100 proofs, certainly has all of the qualifications. Both sides are fully brilliant with remarkable contrast. The sharply defined devices show intense and radiant mint frost, while the surrounding fields are deeply mirrored. A couple short hairlines in the right obverse field certainly account for the diminished numerical grade, but they do nothing to affect this representative's unrivaled eye appeal. Census: 3 in 64 Ultra Cameo (1 in 64 ★ Ultra Cameo), 10 finer (8/14). Ex: Dallas Signature (Heritage, 11/2006), lot 1515. From The Pannonia Collection, Part Two. PCGS# 97317

1885 Morgan, Toned PR66

- 4922 1885 PR66 PCGS.** From a proof mintage of 930 coins, this Premium Gem displays bold design definition and the delicate surfaces are well-preserved. Deep toning in varying shades of olive, gold, ocean-blue, and pale lavender encompass each side, slightly muting the mirroring in the fields. Population: 16 in 66, 1 finer (8/14). NGC ID# 27ZE, PCGS# 7320

**1886 Morgan Dollar, PR66
Magnificently Toned**

- 4923 1886 PR66 PCGS.** When held at the proper angle, dusky violet patina overall turns to iridescent ice-blue and sea-green hues. This Premium Gem example, one of 886 Morgan dollar proofs struck in 1886, exhibits predictably full device definition, and the surfaces would undoubtedly merit a Cameo designation if not for the toning. Housed in an old green label holder. Population: 11 in 66, 3 finer (8/14). NGC ID# 27ZF, PCGS# 7321

1891 Morgan Dollar, PR65 Cameo
Low Mintage of 650 Pieces

4924 1891 PR65 Cameo PCGS. A limited proof mintage of 650 Morgan dollars was achieved in 1891, and many survivors show incomplete detail on the central devices. Thankfully, this delightful Gem exhibits razor-sharp detail throughout, and the deeply mirrored fields contrast boldly with the frosty design elements. Delicate shades of champagne-gold toning add to the terrific eye appeal. Population: 7 in 65 (1 in 65+) Cameo, 11 finer (9/14). PCGS# 87326

1893 Morgan Dollar, PR64 Deep Cameo
Only 792 Pieces Struck

4925 1893 PR64 Deep Cameo ANACS. The design elements of this attractive Choice example are sharply detailed throughout, and the frosty devices create profound cameo contrast with the deeply reflective fields. Highlights of greenish-gold toning enhance the considerable eye appeal and only a few minor signs of contact are evident. From a small mintage of 792 pieces. NGC ID# 27ZN, PCGS# 7328

1894 Morgan Dollar, PR66 Cameo
Only Five Finer Coins at PCGS

4926 1894 PR66 Cameo PCGS. A relatively generous mintage of 972 proof Morgan dollars was accomplished in 1894, to accompany a low business-strike production of just 110,000 pieces. Predictably, high-quality business strikes are rare in today's market, putting considerable pressure on the small supply of proofs from date collectors. This delightful Premium Gem exhibits sharply detailed design elements throughout, and the richly frosted devices contrast boldly with the deeply mirrored fields. The well-preserved surfaces show just a trace of pale gold toning. Population: 10 in 66 Cameo, 5 finer (9/14). PCGS# 87329

1895 Proof Morgan, VF Sharpness
Unusually Attractive for a 'Details' Coin

4927 1895 — Environmental Damage — NGC Details. Proof, VF. The year 1895 was the only instance in the 1878 to 1904 production run that the Philadelphia Mint did not produce silver dollars for circulation. While the New Orleans and San Francisco facilities did strike limited numbers of business strikes that year (450,000 and 400,000 pieces, respectively), coinage at Philadelphia was restricted to just 880 proofs. Survivors of this issue are among the most sought-after of all Morgan dollars, being the capstone to a complete series set.

As with many proof issues of the period, a few examples of the proof 1895 dollar found their way into circulation during hard economic times, and these lightly circulated pieces are highly prized by collectors of modest means. This representative displays even wear, with deep charcoal-gray patina in the fields and lighter olive and pewter hues over the relief elements. The overall appeal is quite pleasing to the unaided eye, though a loupe reveals microscopic granularity in the deepest parts of the patina, likely what warranted the details grade from NGC. NGC ID# 27ZR, PCGS# 7330

1895 Morgan Dollar, PR63
Rare, Important Key Date Specimen

4928 1895 PR63 PCGS. Today the proof-only mintage of 880 coins is considered to be the total number of Morgan dollars produced in 1895, but, not so long ago, the *Guide Book* listed a business strike mintage of 12,000 coins as well. For many decades, numismatists searched in vain for a business strike example of this date without ever seeing one, however, and eventually the search was abandoned.

This Select Proof specimen is sharply struck, as expected, and the untuned surfaces display glassy fields and brilliant devices; although the eagle exhibits a bit of white mint frost. A handful of wispy slide marks, on Liberty's cheek, seem to define the grade of this rare key date example. NGC ID# 27ZR, PCGS# 7330

**1898 Morgan Dollar, PR64 Cameo
High Quality Proof Issue**

4929 1898 PR64 Cameo PCGS. Only 735 proof Morgan dollars were struck in 1898, but the issue was produced to an extremely high standard of quality. This impressive Choice example displays an intense cameo effect, created by the contrast between the deeply mirrored fields and the sharply detailed frosty design elements. Delicate shades of pale gold toning enhance the terrific eye appeal. Population: 11 in 64 Cameo, 10 finer (9/14). PCGS# 87333

**1900 Dollar, PR66 Cameo
Void of Toning and Free of Marks**

4930 1900 PR66 Cameo NGC. NGC has awarded a Cameo designation to approximately 25% of all 1900 Morgan dollars proofs. Moreover, only 15 examples are reported in PR66 (two in PR66 ★), and just 22 examples are certified finer (8/14). From a mintage of 912 proofs, this deeply contrasted and immaculately preserved Premium Gem shows fully struck devices. The surfaces are void of any toning and free of mentionable marks. The eye appeal is strong. PCGS# 87335

**1921 Zerbe Proof Morgan Dollar, PR64
Notably Strong Strike, Reflective Fields**

4931 1921 Zerbe PR64 NGC. All of the proper diagnostics appear on this example of the 1921 Zerbe proof dollar: the correct die pair (confirmed by a die line from the second U of UNUM to the rim), an especially bold strike, and dies polished to a high effect. While the merits of these characteristics continue to be debated, the popularity of the Zerbe proofs remain and the grading services continue to recognize their special stature. This near-Gem example is brilliant and attractive with a few almond-gray overtones on the obverse. Census: 15 in 64, 19 finer (9/14). NGC ID# 257A, PCGS# 7341

PEACE DOLLARS

**1922-D Peace Dollar, MS67
None Numerically Finer**

4932 1922-D MS67 NGC. While not nearly as plentiful as its Philadelphia counterpart, the 1922-D Peace dollar is easily obtainable in grades through MS66, but becomes distinctly rare in MS67, and is unknown numerically finer. This representative displays frosty, nearly undisturbed luster and sharp design definition. Faint traces of light golden color grace each side, completing the eye appeal. Census: 16 in 67 (1 in 67 ★), 0 finer (9/14). NGC ID# 257D, PCGS# 7358

**1923 Peace Dollar, MS67
Outstanding Quality and Appeal**

4933 1923 MS67 PCGS. Heavy mint frost and wispy champagne toning are the hallmarks of this beautifully preserved type coin. Any grade-limiting disturbances in the luster are not immediately apparent to the unaided eye. While the 1922 boasts the largest mintage of the series (more than 51 million pieces), the 1923 is slightly more available in Superb Gem condition for the type collector. Population: 53 in 67, 0 finer (8/14). NGC ID# 257E, PCGS# 7360

**1928 Peace Dollar, MS65
Smooth, Silver-White Surfaces**

4934 1928 MS65 PCGS. Housed in a green-label holder, this essentially brilliant-white dollar is nearly untuned, although both obverse and reverse display just a whisper of the light gold toning that usually accompanies the low-mintage issue. A glass reveals a few minute marks on the portrait and obverse fields, but the overall impression is one of a smooth, fully struck Gem. PCGS has certified just 13 pieces in a numerically higher grade (8/14). NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65+
Unusually Attractive for the Issue**

- 4935 1928 MS65+ PCGS. CAC.** This high-end Gem example showcases vibrant, remarkably frosty luster for this key-date issue which is known for being often dull and satiny. Each side is beautifully preserved, with very nearly Premium Gem surface quality. Faint traces of light golden color grace portions of each side, but leave this piece with a largely brilliant appearance. PCGS has certified only 13 numerically finer examples (9/14). NGC ID# 257V, PCGS# 7373

**1934-S Peace Dollar, MS65
Rarely Encountered Finer**

- 4936 1934-S MS65 NGC.** One of the more challenging late-series dates, this San Francisco issue is elusive in Gem condition, and rarely seen finer. This example displays immensely frosty luster, with shades of golden-gray and pale amber toning over each side. The strike is lacking only slightly in the centers, and the remarkably clean surfaces more than balance the eye appeal. NGC has seen only 16 numerically finer submissions (8/14). NGC ID# 257Z, PCGS# 7377

**1934-S Dollar, MS66
Key to the Peace Dollar Series**

- 4937 1934-S MS66 PCGS.** Two important factors must be taken into account when considering the rarity of the 1934-S. With a mintage of just over 1 million coins, the issue claims one of the lower mintages in the Peace dollar series. Additionally, most coins were released into circulation. As a result, Uncirculated examples are scarce through Gem condition, and Premium Gems are decidedly rare. In fact, PCGS and NGC have both failed to certify any finer examples (8/14). This blazing, Registry-quality representative offers largely brilliant surfaces and coruscating luster. As is frequently encountered with this issue, the strike is sharp throughout, and a glass reveals no distracting impairments. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS64
Doubled Tiara, Top 50 Variety**

- 4938 1934-S Doubled Tiara, VAM-3, MS64 PCGS.** A Top 50 Variety. VAM-3 is known as the "doubled tiara" variety, but the die doubling is strongest on the hair curl beneath the tiara band. Pastel shades of sun-gold and powder-blue patina grace this lustrous key date dollar. A handful of scattered grazes limit the grade but not the eye appeal. Ex: Milwaukee Central States (Heritage, 5/2010), lot 1447. PCGS# 133782

**1934-S Dollar, MS64
VAM-3, Doubled Tiara**

4939 1934-S Doubled Tiara, VAM-3, MS64 PCGS. CAC. A Top 50 Variety. In mint condition, the 1934-S is the hands-down key date in the Peace dollar series, as most of the 1 millions coins struck served their intended purpose and circulated extensively. In addition to its high grade, this Choice example features the "Doubled Tiara" variety, further enhancing its desirability. The obviously original and largely brilliant surfaces show pale toning and generally strong detail with minor softness over Liberty's hair. PCGS# 133782

**1935-S Peace Dollar, MS66
Immense Visual Appeal**

4940 1935-S MS66 PCGS. CAC. Three rays below ONE. Delicate caramel-gold toning visits portions of this beautiful and lightly patinated Premium Gem. Potent cartwheel luster sweeps exemplary surfaces. The strike is precise at the margins and shows only slight incompleteness at the centers. Only two pieces have been certified numerically finer at PCGS (9/14). NGC ID# 2583, PCGS# 7379

GOLD DOLLARS

**1851 Gold Dollar, Pristine MS66
Great Type Coin**

4941 1851 MS66 NGC. The golden-orange surfaces on this Premium Gem 1851 gold dollar are pristine and unabraded throughout amid generous luster and bold eye appeal. Some of the left-side obverse stars lack complete definition and Liberty sports a curious "mole" on her chin, as made at the Mint. The reverse is remarkably well-preserved, although die lapping has detached some of the left-side wreath berries from their stems. This high-mintage date is nonetheless elusive in Gem and finer grades, although popular for type purposes. Census: 21 in 66 (1 in 66+, 1 in 66 ★), 7 finer (9/14). NGC ID# 25BK, PCGS# 7513

**1851-D Gold Dollar, AU58
Vivid Color, Nice Strike**

4942 1851-D AU58 PCGS. CAC. Variety 3-E. An intermediate die state with clashes but no cracks. The orange-gold surfaces display consistent color save for a blush of tan-brown and sea-green near the TE in STATES. Nicely struck, partly lustrous, and without any flan flaws or remotely mentionable marks. This very scarce Dahlonega issue has a mintage of only 9,882 pieces. Population: 30 in 58, 23 finer (9/14). NGC ID# 25BM, PCGS# 7515

**1851-D Gold Dollar, MS62
Scarce in Mint State**

4943 1851-D MS62 PCGS. Variety 3-E. A late die state, with heavy clash marks on the reverse and a radial die crack from the rim at 3:30 on the same side. Although not nearly as plentiful as the 1849-D, the 1851-D is one of the more often seen gold dollars from the Dahlonega Mint, ideal for the collector seeking a pleasing Mint State representative from the Georgia facility. This piece is sharply struck, with satiny green-gold luster. No major abrasions are observed upon close examination. Population: 14 in 62, 7 finer (8/14). NGC ID# 25BM, PCGS# 7515

1851-D Gold Dollar, MS64
Conditionally Rare D-Mint Issue

4944 1851-D MS64 NGC. Variety 3-E. A late die state example, with a heavy radial die crack from the 1 in AMERICA. The 1851-D is one of the most plentiful gold dollar issues from this mint, but is still only about half as available as is the 1849-D. It is also somewhat better-struck as a rule, being ideal for the collector seeking a single piece from this mint. As with all Dahlonega issues, however, the 1851-D becomes rare in Mint State, with Choice examples being exceedingly so. This representative is one of just five coins for the grade at NGC, and there is only one finer piece (9/14). The strike is sharp on the primary design elements, including the stars, though the LLA in DOLLAR and the 5 in the date are softly defined as usual. Bright green-gold color blankets each side, imparting ample eye appeal. NGC ID# 25BM, PCGS# 7515

1852-C Gold Dollar, MS62
Popular Charlotte Issue

4945 1852-C MS62 PCGS. Variety 2. The 1852-C gold dollar is not quite as scarce as its low mintage of only 9,434 coins would suggest, though it is likely that the certified population reports are slightly inflated by resubmissions. This piece shows crisp central devices and rich honey-gold luster. A number of small abrasions are present, though none are particularly noticeable. Population: 7 in 62, 12 finer (8/14). NGC ID# 25BR, PCGS# 7518

1855-C Gold Dollar, AU58
Sole Type Two C-Mint Issue

4946 1855-C AU58 NGC. Variety 2. Ex: Charles Hay Collection. Despite a meager mintage of 9,803 pieces, two die varieties are known. Variety 2 shows the date slightly further right, relative to Variety 1. The 1855-C is essential to a Charlotte Mint type set, as it is the sole C-mint issue with a Small Indian Princess Head, as described by the Guide Book. Like most '55-C examples, the present coin displays clash marks at the centers, and retains traces of the planchet texture where the strike was incomplete, such as the T in UNITED and the final A in AMERICA. A lens also locates a couple of small, shallow strike-throughs, usual for the rare issue. The sun-gold surfaces show noticeable luster and are free from any post-strike detractors. NGC ID# 25C5, PCGS# 7533

1856-S Type Two Gold Dollar, MS62
FS-501, Repunched Mintmark

4947 1856-S/S FS-501 MS62 NGC. The mintmark is widely repunched, with the remnants of the errant S plainly visible to the upper-right of the primary. As many as half of the surviving examples of this issue are of this interesting variety. As a date, however, the 1856-S gold dollar is something of a rarity in Mint State condition. The San Francisco Mint was the only facility to strike Type Two gold dollars in 1856, producing only 24,600 pieces. As no Type Three dollars were coined that year in San Francisco, this issue is mandatory for a complete date and mintmark collection. Most examples seen are circulated, however, and Mint State pieces are seldom seen in any grade. This example displays bright yellow-gold luster and above-average design definition for the issue. The usual clash marks are seen upon close examination, but major abrasions are minimal. Census: 7 in 62, 5 finer (8/14). PCGS# 145703

1863 Gold Dollar, MS64
Scarce, Low-Mintage Date

4948 1863 MS64 PCGS. Only 6,200 gold dollars were struck in 1863 during the height of the Civil War. The coins are quite rare, with the estimated number of survivors standing at 100 to 140 pieces. Although 300 fewer coins were minted in 1864, the number of 1863 survivors is lower and they are scarcer. Lovely canary-gold color provides this Select example with a pleasing appearance. The strike details are remarkably strong throughout, and the coin was struck from slightly rotated dies. A couple of shallow scuffs in the left obverse field prevent an even higher grade. Population: 5 in 64, 7 finer (8/14). NGC ID# 25CX, PCGS# 7562

1867 Gold Dollar, MS66
Only One Numerically Finer at PCGS

4949 1867 MS66 PCGS. The 1867 gold dollar is an elusive issue from a small business-strike mintage of 5,200 pieces. Probably no more than 75-110 examples are extant in all Mint State grades, and circulated specimens are quite scarce as well. The true rarity of this date is not generally appreciated outside of series specialists. High-grade business-strike examples have often been mistaken for proofs in auction descriptions.

The present coin is a delightful Premium Gem with sharply detailed design elements and some interesting clash marks on both sides. The prooflike yellow-gold surfaces are well-preserved, with no large or distracting flaws. Population: 4 in 66, 1 finer (8/14). NGC ID# 25D3, PCGS# 7566

1870 Gold Dollar, MS67
One of the Finer Known Examples

4950 1870 MS67 PCGS. During the seven years following the Civil War, gold dollars were a low priority item at the Philadelphia Mint, where mintage numbers ranged from 7,100 pieces to a mere 3,500 coins. In 1870, the gold dollar mintage in Philadelphia was 6,300 examples, a meager number with perhaps a better rate of survival than some of the other low-mintage issues from this era. The current Superb Gem is one of the better representatives of this date that we have examined in recent years, as it presents an impressive and visually pleasing appearance, free of mentionable flaws. The motifs are sharply rendered and the lightly toned surfaces are highlighted by soft, shimmering mint frost. One of the finer examples known at either of the major services. Population: 8 in 67 (1 in 67+), 1 finer (9/14). NGC ID# 25D6, PCGS# 7569

1880 Gold Dollar, Lustrous MS67+
Only 1,600 Business Strikes Minted

4951 1880 MS67+ PCGS. A wonderful array of shadings including mint-green, lilac, crimson, and peach-gold provide this well-struck and immaculately preserved gold dollar with exceptional eye appeal. While a mintage of 1,600 coins would seem to have the makings of a true rarity, most 1880 gold dollars were set aside by collectors and few ever saw circulation. PCGS has certified 26 finer submissions (8/14). NGC ID# 25DJ, PCGS# 7581

PROOF GOLD DOLLARS

1861 Gold Dollar, PR65 Cameo
Rare in All Grades

4952 1861 PR65 Cameo NGC. CAC. Mint records show a mintage of 349 proof gold dollars in 1861, though it is likely that the majority were left unsold and were later melted, as survivors of this issue are nearly as rare as are those of the 1862 proof issue, which had a significantly lower mintage of only 35 coins. The certified population counts 34 survivors in all grades, though this number is likely inflated by resubmissions. This Gem example displays deep mirroring in the fields and soft frost over the devices. The strike is crisp, as is expected on a proof, and the preservation is on par with the immense eye appeal. Census: 3 in 65 Cameo, 5 finer (8/14). *From The La Jolla Lady's Collection.* PCGS# 87611

1862 Gold Dollar, PR65 Cameo
Rare as a Proof

4953 1862 PR65 Cameo NGC. The proof 1862 gold dollar had a paltry mintage of only 35 coins, and it is estimated that fewer than 20 survive today in all grades, one of which is housed in the Smithsonian Institution. As the PCGS and NGC population reports show a combined census of 34 coins, those figures are obviously inflated by resubmissions. Minor lint marks are common on this issue, as the dies received heavy polishing, and this piece exhibits a couple, one above Liberty's eye and the other above the 1 in the date. The devices are sharp and boldly contrast with the mirrored fields, while the surfaces are awash in warm honey-gold patina. Census: 4 in 65 Cameo, 2 finer (8/14). PCGS# 87612

1887 Gold Dollar, PR65+ Cameo
Intense Medium-Gold Surfaces

4954 1887 PR65+ Cameo PCGS. Popular with the public at time of issue as gifts or jewelry, and equally popular with speculators looking to make a quick profit, relatively few confirmed proofs survive of the 1887 gold dollar. David Bowers estimates 100 to 140 true proofs remain — a range supported by the number of grading events at PCGS/NGC.

This example displays intense gold patina and substantial contrast between the frosted motifs and the mirrored fields. Two small cloudy spots beneath the neck truncation and a lint mark above the denomination detract little from the Gem quality of this lustrous dollar. The PCGS Plus award signifies this coin is near the top of its grade in quality and eye appeal, and it is the only MS65 example with the Plus designation. Population: 9 in 65 (1 in 65+) Cameo, 7 finer (9/14). NGC ID# 25EX, PCGS# 87637

EARLY QUARTER EAGLE

1806/4 Two and a Half, AU58
BD-1, 8x5 Stars, Attractive Toning

- 4955** 1806/4 8x5 Stars AU58 NGC. BD-1, High R.4. Bass-Dannreuther Die State b/b. The intermediate state with a crack through the tops of LIBERTY, but no other indication of the eventual cud over LIB. The present example will please the specialist since it possesses original lemon-gold, mint-green, and orange-red toning, with the more vibrant shades along the margins. As always for BD-1, the centers are softly brought up, although peripheral details are bold. A lens reveals subtle areas of abrasion on the fields near the forehead and above the arrows. NGC ID# 25FA, PCGS# 7654

CLASSIC QUARTER EAGLE

1839-C Quarter Eagle, AU58
Ideal Classic Head Type Coin

- 4956** 1839-C AU58 NGC. Breen-6150, Winter-2, Variety 22, R.4. The 1839-C is one of the more plentiful Charlotte quarter eagles in the series, with 300 to 400 examples believed extant. Its availability, however, is restricted to circulated grades, as in Mint State the date is equally as rare as the lower-mintage 1838-C. This representative displays sharp motifs with just a trace of friction. Bright, green-gold patina graces both sides, and surface abrasions are minimal. Struck during a late die state, as evidenced by several radial die cracks on each side. Census: 65 in 58 (1 in 58 ★), 16 finer (9/14). NGC ID# 25G4, PCGS# 7699

LIBERTY QUARTER EAGLES

1840-O Quarter Eagle, MS61
Rare in Mint State

- 4957** 1840-O MS61 NGC. Variety 1. The 1840-O is a scarce early New Orleans quarter eagle issue with only 100 to 125 examples believed extant, per Doug Winter, and is rarely seen in any Mint State grade. This flashy representative displays bright yellow-gold luster and minimal abrasions. The central regions are softly struck, as is typical of this early branch mint issue. Census: 5 in 61, 6 finer (8/14). NGC ID# 25GD, PCGS# 7720

1844-C Quarter Eagle, MS62
Rare in Mint State

4958 1844-C MS62 NGC. Variety 1. The 1844-C is among the scarcer quarter eagle issues from this mint overall, with only 150 to 175 examples believed extant. Of these, the vast majority are moderately worn, with some grading as low as Very Good to Fine; only a handful of Mint State pieces are known, significantly fewer than are apparently reflected in the certified population reports. The finest is a single MS63 coin at PCGS. This MS62 piece shows luminous orange-gold surfaces, with minimal abrasions for the grade. This issue is known for softness of strike on the central devices, and this is seen only to a limited extent on this piece, which shows minor flatness on the eagle's feathers. In the context of the 1844-C, this coin is unusually high-end, representing an important opportunity for the Southern gold specialist. Census: 6 in 62, 0 finer (8/14). NGC ID# 25GU, PCGS# 7735

1845 Quarter Eagle, MS64
Conditionally Rare Philadelphia Issue

4959 1845 MS64 NGC. CAC. With a mintage of 91,051 coins, the 1845 quarter eagle is one of the more plentiful Philadelphia issues from the period, but that should not be translated into it being available. Any Mint State example is scarce, and those grading finer than MS63 are distinctly rare. This near-Gem representative displays luminous yellow-gold luster and the only noteworthy surface flaw is a small tick in the field near the 1 in the date. Some faint diagonal roller marks are noted on the portrait upon close examination, though the hair curls are well-defined. The eagle's left (facing) leg shows the only mentionable weakness. Housed in a prior generation holder. Census: 7 in 64, 1 finer (8/14). NGC ID# 25GW, PCGS# 7737

**1845 Quarter Eagle, Flashy MS65
The Single Finest Certified**

4960 1845 MS65 NGC. Even though this is one of the more available issues of the 1840's, Mint State examples are very scarce, and are virtually unobtainable in Gem condition. Indeed, the present MS65 is the only, and the finest, certified by either NGC or PCGS (8/14).

Both sides yield scintillating luster emitted from yellow-gold surfaces, and the design elements are sharply impressed except for the usually seen softness on the eagle's left (facing) leg. The surfaces are well-preserved on each side. These attributes combine to give this piece tremendous eye appeal, while an interesting bisecting die crack spans the reverse from 7 to 1 o'clock. This coin will be the centerpiece of a fine Liberty Head quarter eagle collection.

Ex: Dallas Signature (Heritage, 12/2005), lot 1111; Long Beach Signature (Heritage, 2/2006), lot 2614; Atlanta Signature (4/2006), lot 1610. NGC ID# 25GW, PCGS# 7737

**1850-C Quarter Eagle, Variety 2, MS61
Scarce, Impressive High-Grade Example**

4961 1850-C MS61 NGC. Variety 2. Two reverse dies were employed in the production of this Charlotte Mint quarter eagle issue. The mintmark on this variety is nearly centered above the diagonal fraction bar of 1/2, and it is very scarce compared to its Variety 1 counterpart. Although the 1850-C is generally regarded as the second most common C-mint quarter eagle from the 1850s, the issue becomes increasingly scarce in the higher circulated grades and only a handful of Mint State pieces are known. The peripheral details of this uncommonly high grade example are strongly struck while the interior devices have characteristic weakness, particularly the eagle's feathers and talons, rather surprising since the reverse die used here was only activated for a portion of the '50-C production and was its first and only usage. The green-gold surfaces are typically abraded and bathed in a delicate reddish patina. Census: 11 in 61, 3 finer (8/14).

Ex: FUN Signature (Heritage, 1/2003), lot 4688. NGC ID# 25HH, PCGS# 7756

**1852 Quarter Eagle, MS65
Carefully Preserved**

4962 1852 MS65 PCGS. CAC. With a mintage in excess of 1.1 million pieces, the 1852 is one of the more easily obtainable quarter eagle issues overall of the period, though it becomes conditionally rare at the Gem grade level. This representative displays satiny yellow-gold luster and attractively smooth surfaces. Some minor lightness of strike is noted on the eagle's left (facing) leg and right talons, as is typical of this issue, though the devices are otherwise well-defined. Population: 13 in 65 (1 in 65+), 2 finer (9/14). NGC ID# 25HR, PCGS# 7763

1852-O Quarter Eagle, MS61
Seldom Seen in Mint State

- 4963 1852-O MS61 NGC. Variety 1,** mintmark right of center. Scattered extensive but individually minor ticks on each side of this Mint State coin account for the grade, but generous luster on the orange-gold surfaces, along with the bold strike, ensure that the eye appeal remains high. This date is surprisingly scarce in any Mint State grade. NGC ID# 25HU, PCGS# 7766

1856-C Quarter Eagle, AU55
Challenging Charlotte Issue

- 4964 1856-C AU55 NGC. Variety 1.** Struck to the limited extent of just 7,913 pieces, the 1856-C is one of the scarcest quarter eagles from the Charlotte Mint, being rare in AU grades, and exceedingly so in Mint State. Doug Winter estimates as few as 95 to 125 examples are extant in all grades, with few retaining original coloration. This piece has rich olive-gold color. As is typical of nearly all examples of this poorly struck issue, much of each side exhibits considerable weakness, with fine roughness over portions of the recesses. A few faint, mint-made planchet depressions are noted in the left obverse and right reverse fields. Census: 14 in 55, 31 finer (8/14). NGC ID# 25J8, PCGS# 7778

1859-D Quarter Eagle, AU55
Desirable Issue, Only 2,244 Coins Struck

- 4965 1859-D AU55 PCGS. Variety 22-N.** Doug Winter (2013) estimates that of the 2,244 quarter eagles struck at the Georgia mint in 1859 (the facility's final year of production), 64 to 73 coins survive in About Uncirculated condition with only a handful of pieces finer. This light green-gold example is typically struck and expectedly abraded for the grade. Partial luster remains within the recessed areas. Population: 16 in 55, 25 finer (8/14). NGC ID# 25JM, PCGS# 7789

1875 Liberty Quarter Eagle, AU58
Only 400 Examples Struck

- 4966 1875 AU58 NGC.** Every American gold coin issue dated 1875 from the Philadelphia Mint is a legitimate rarity save for the double eagles, which were produced in the hundreds of thousands of coins. The 1875 three dollar gold issue was a proof-only affair. In the case of the quarter eagle, only 400 were struck for circulation, plus 20 proof examples. Fortunately this nice near-Mint example has been spared from most of the ravages of circulation. The surfaces are quite sharply struck and show only scattered tiny ticks in the fields, with lots of eye appeal and attractive wheat-gold color. A real rarity, and a date that makes every collector's eye gleam with anticipation. We suspect the population data are littered with duplications, but for what they are worth, Census: 16 in 58 (1 in 58+, 1 in 58 ★), 6 finer (9/14). NGC ID# 25KS, PCGS# 7822

1875-S Quarter Eagle, MS63
High-End for the Grade

4967 1875-S MS63 PCGS. The 1875-S quarter eagle had one of the lowest mintages from the San Francisco Mint in the series (only 11,600 pieces). Circulated examples are encountered with minor frequency, but Mint State pieces are rare in all grades, and exceedingly so above MS62. This Select example shows frosty orange-gold luster and remarkably clean surfaces for the grade. The eagle's left (facing) leg is the only area of noteworthy weakness, though here it is minor. Housed in an old green label holder. Population: 4 in 63, 1 finer (8/14). NGC ID# 25KT, PCGS# 7823

1900 Quarter Eagle, MS67
Tied for Finest at PCGS

4968 1900 MS67 PCGS. The 1900 quarter eagle is an available date in grades through MS65, but it becomes scarce in MS66, and finer pieces are rarely found. This Superb Gem representative showcases virtually undisturbed, frosty luster that engulfs each side in green-gold radiance. The design elements are struck to full definition, and the corresponding eye appeal is outstanding. Population: 11 in 67, 0 finer (9/14). NGC ID# 25LR, PCGS# 7852

PROOF LIBERTY QUARTER EAGLES

1867 Quarter Eagle, PR64 Ultra Cameo
Rare in All Grades

4969 1867 PR64 Ultra Cameo NGC. It is doubtful that all 50 proof quarter eagles coined in 1867 were actually sold, as the surviving population is estimated to be as few as just 15 pieces and no more than 25, one of which is permanently housed in the Smithsonian Institution. The certified population reports, showing a combined total of 25 examples, are likely inflated by resubmissions. This piece is one of just two pieces (both PR64 coins) to receive the Ultra Cameo designation from NGC (9/14), and the level of field-motif contrast is well-deserving in that regard. Deep mirroring in the fields yields to heavily frosted devices, while the strike is crisp throughout. A couple small marks, one in the obverse field near star 13 and the other on the reverse near the eagle's right (facing) wing tip are the only flaws of note. NGC ID# 287M, PCGS# 97893

**1890 Quarter Eagle, PR65
Bold Cameo Contrast, Gold CAC Label**

- 4970 1890 PR65 PCGS. Gold CAC.** The Mint produced 93 proof gold dollars in 1890, though as few as 50 to 60 examples survive for modern-day collectors. Extant examples span a wide grade range from PR55 to PR68, but those in the Gem or finer category are in the distinct minority. Housed in an old green label holder, this PR65 coin is not designation as a Cameo, though the field-motif contrast is unmistakable beneath the veil of warm apricot-gold patina. The strike is razor-sharp throughout, and the fields displays profound depth of mirroring. The proof gold specialist will find it challenging to locate a visually finer piece. Population: 7 in 65, 3 finer (8/14). *From The La Jolla Lady's Collection.* NGC ID# 288D, PCGS# 7916

**1905 Quarter Eagle, PR64
Only 144 Examples Struck**

- 4971 1905 PR64 NGC. CAC.** The availability of 1905 quarter eagle proofs is comparable to other issues between 1901 and 1907, though it claims a somewhat lower mintage of 144 proofs. This Choice example features reddish-gold patina and moderate mirroring in the fields. The design elements are fully struck, as expected, and marks are surprisingly scant for the grade. Housed in a former generation holder with an accompanying vintage dealer flip. Census: 18 in 64 (1 in 64+), 30 finer (8/14). NGC ID# 288V, PCGS# 7931

INDIAN QUARTER EAGLES

**1909 Indian Quarter Eagle
Beautifully Preserved Gem**

- 4972 1909 MS65 PCGS.** The 1909 quarter eagle is marginally available in Gem condition, though it is not nearly as plentiful in this grade as are the 1908 or late 1920s issues. This piece showcases nearly perfect surface preservation, as demanded by the grade, with satiny luster in shades of orange, olive, and yellow-gold. A bold strike completes the overall appeal. PCGS has encapsulated only 17 numerically finer representatives (8/14). NGC ID# 288Z, PCGS# 7940

**1909 Quarter Eagle, MS65
Conditionally Rare Issue**

- 4973 1909 MS65 PCGS. CAC.** The second year of production of Bela Lyon Pratt's distinctive Indian design saw a fall in production from 564,821 in 1908 to 441,760 in 1909. This Gem has rich yellow-gold luster with splashes of pale turquoise toning on each side. PCGS has only certified 17 submissions in higher grades (8/14). NGC ID# 288Z, PCGS# 7940

**1910 Quarter Eagle, MS66
Conditionally Rare Issue**

4974 1910 MS66 PCGS. CAC. The 1910 Indian quarter eagle had a fairly substantial mintage of 492,000 pieces, and is proportionately available in most grades. The vast majority of extant Mint State pieces, however, exhibit light to moderate abrasions, grading no finer than MS64. Gem-quality examples are scarce, and finer coins are profoundly rare in the context of the series.

Despite the typical piece being moderately abraded, the 1910 quarter eagle is often seen sharply struck with attractive, frosty mint luster. As such, the few high-grade survivors known to collectors are prime candidates for type representation. This Premium Gem is an outstanding representative in that regard, exhibiting bold design definition and rich yellow-gold luster, while the remarkably clean surfaces display seemingly unmatched eye appeal. Population: 10 in 66 (1 in 66+), 0 finer (9/14). NGC ID# 2892, PCGS# 7941

**1911-D Quarter Eagle
Well-Preserved Near-Mint Example**

4975 1911-D AU58 NGC. Strong D. As the only major key date in the heavily collected Indian quarter eagle series, the 1911-D is a much sought-after issue in all grades. This representative boasts sharp design definition, with remnants of satiny honey-gold luster in the recesses amid deeper bronze-gold overtones. Wear is almost nonexistent, though enough high-point friction is present to just smooth over any minor luster grazes that may have plagued the fields, giving the coin ample eye appeal for the grade. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS61
Nice Eye Appeal**

4976 1911-D MS61 NGC. Although this is the Strong D mintmark, it is not particularly bold near the rim due to an uneven strike, which is also evident on the high points of the Indian's bonnet. Elsewhere, the strike is sharp (if not bold) and the yellow-gold coloration is attractive and lustrous. All 1911-D quarter eagles are eagerly sought as the only key issue of the series. With just 15 coins needed to complete a set, this MS61 example will be a welcome addition to many Uncirculated collections waiting to fill the final slot. NGC ID# 2894, PCGS# 7943

**1911-D Quarter Eagle, MS62
Strong Mintmark Variant**

4977 1911-D MS62 PCGS. Strong D. This piece is boldly struck throughout, with bright yellow-gold luster. The surfaces are remarkably clean for the grade, giving this coin ample overall appeal. This issue appears at auction with some frequency, though quality is sometimes lacking. This is a pleasing lower-grade Mint State example of this key Denver issue. NGC ID# 2894, PCGS# 7943

**1913 Quarter Eagle, MS65
Highest Mintage of the Type**

4978 1913 MS65 PCGS. An exquisite Gem approaching the finest graded with only seven higher grade PCGS coins and six finer NGC coins (8/14). This beauty has brilliant and frosty luster with lovely khaki and pink-gold highlights. Despite the significant mintage of 722,000, highest of the series, high-grade survivors are elusive. NGC ID# 2897, PCGS# 7945

**1914 Indian Quarter Eagle, MS64
Semikey Issue in High Grades**

4979 1914 MS64 PCGS. The specialist will appreciate this coin's original olive and bronze-gold luster, while the sharp devices further contribute to the overall appeal. Scattered light surface grazes define the grade. Produced to the extent of 240,000 pieces, the 1914 is one of more conditionally challenging issues in the Indian quarter eagle series, as Gem-quality pieces are scarcely seen. This near-Gem example will prove satisfactory for many collectors. PCGS has seen 58 numerically finer submissions (8/14). NGC ID# 2898, PCGS# 7946

THREE DOLLAR GOLD PIECES

**1854 Three Dollar Gold, MS63
Lustrous Type Coin**

4980 1854 MS63 NGC. Not only does the 1854 three dollar gold piece rank as one of the three readily available dates in the series (alongside the 1874 and 1878), it is also the first-year issue of the denomination, a combination that makes it ideal for type representation. This luminous Select example displays shimmering green-gold luster and attractively smooth surfaces. The wreath bow is not fully defined, though the strike is otherwise well-executed. NGC ID# 25M3, PCGS# 7969

**1854 Three Dollar Gold, MS64
Rarely Seen Finer**

4981 1854 MS64 NGC. This issue is readily available for type purposes, though representatives become scarce in grades finer than MS64. This Choice example displays shimmering honey-gold luster and bold design definition. A few minute ticks on Liberty's cheek preclude a Gem grade assessment, though the surfaces are otherwise well-preserved. NGC has certified only 14 numerically finer representatives (8/14). NGC ID# 25M3, PCGS# 7969

**1871 Three Dollar Gold, MS62
Low-Mintage, Prooflike Surfaces**

4982 1871 MS62 PCGS. The scarcity of the 1871 three dollar issue (1,300 coins) was recognized early on, and contemporary collectors seem to have set quite a few pieces aside. Resultingly, examples can be located with patience in lower-Mint State grades, but MS62 representatives such as this are rare. The yellow-gold surfaces feature vivid luster and typical prooflike reflectivity in the fields. The strike is generally sharp with a touch of incompleteness on the reverse legends, and grade-consistent marks are lightly scattered throughout. Population: 24 in 62 (1 in 62+), 22 finer (8/14). NGC ID# 25MU, PCGS# 7993

**1889 Three Dollar Gold, MS63
Final-Year Issue**

4983 1889 MS63 PCGS. The Mint struck only 2,300 three dollar gold pieces the final year of production for the denomination, but enough examples were saved by collectors and speculators of the period that the date is surprisingly collectible in Mint State today. This Select example shows bright yellow-gold luster and semiprooflike mirroring in the fields. The bow knot is slightly soft, as usual, though the motifs are otherwise sharp. NGC ID# 25NC, PCGS# 8011

PROOF THREE DOLLAR GOLD PIECES

1858 Three Dollar Gold, PR65
Very Rare Landmark Proof Gold Issue
Finest Certified at PCGS, Ex: Trompeter

4984 1858 PR65 PCGS. CAC. Ex: Trompeter. The Philadelphia Mint began its commercial proof set offerings in 1858 and the program was met with gratifying enthusiasm by the general public. A substantial number of minor and silver proof coins were sold, but gold proofs were less popular, due to their higher face value. Mintage figures for proofs were not recorded, but the number of three dollar proofs distributed was undoubtedly small. The gold proofs were sold individually for the most part, but complete sets could be ordered. One such set was offered in lot 712 of the Catalogue of American and Foreign Coins (W. Elliot Woodward, 10/1860):

“1858 A most magnificent set of proofs, comprising \$20, \$10, \$5, \$3, \$2, \$1.”

Perhaps 8-10 examples of the 1858 three dollar gold piece survive today in all grades, with several recent offerings in impaired condition. The small supply for collectors is further reduced by the coins in institutional holdings, one in the collection of the American Numismatic Society, one in the Harry W. Bass, Jr. Foundation, and one in the Smithsonian Institution.

The 1858 three dollar gold piece also boasts a small business-strike mintage of 2,133 pieces, and high-quality coins in that format are just as rare as proofs. Q. David Bowers and Doug Winter provide some diagnostics to help distinguish between proofs and prooflike business strikes:

—On the obverse, the forward plume of the headdress was polished from the die.

—On the reverse, the lower right part of the 5 in the date is positioned over the highest peak of the ribbon bow. (Also seen on strikes for circulation.)

—The mirror surfaces is often incomplete on the obverse.

—Lint marks are commonly seen.

The present coin is a delightful Gem from the famous Trompeter Collection. Ed Trompeter was a connoisseur, and he assembled the finest gold proof collection of all time. This piece offers sharply detailed design elements throughout, and the deeply mirrored fields provide bold, if unacknowledged, cameo contrast with the frosty devices. The yellow and orange-gold surfaces are well-preserved, but a characteristic number of lintmarks are present, including one near the chin, one near the base of I in UNITED, another in the reverse field, above the left top of the wreath, and one near the lower knob of the 3. Eye appeal is terrific. The leading grading services have combined to certify a total of seven 1858 three dollar gold pieces in proof format, undoubtedly containing some resubmissions and crossovers. This piece is the single-finest certified example at PCGS, and is numerically tied with two other coins at NGC for finest known (8/14). Advanced collectors and Registry Set enthusiasts should bid accordingly. Housed in a green label holder. Ex: Ed Trompeter Collection (*Superior*, 2/1992), lot 100.

From *The La Jolla Lady's Collection*. NGC ID# 289W, PCGS# 8021

1885 Three Dollar, Deeply Mirrored PR62 Low Total Mintage for the Year

4985 1885 PR62 PCGS. The 1885 three dollar is a year that always garners interest when offered in proof or business strike format. Only 109 proofs were struck along with 801 business strikes. This is a unquestioned proof striking that exhibits deeply reflective mirrors in the fields. Light hairlining accounts for the grade. The reverse fields show the rippled orange-peel effect seen on many proof gold coins from the latter half of the 19th century. Population: 10 in 62, 44 finer (9/14). NGC ID# 28AU, PCGS# 8049

PROOF FOUR DOLLAR GOLD PIECES

1879 Flowing Hair Stella, Judd-1635, Pollock-1833, PR64
A Splendidly Attractive Example of this Famed Type

EARLY HALF EAGLES

1796/5 Half Eagle, XF Details BD-1, Small Eagle Reverse

4986 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR64 PCGS. CAC. The four-dollar gold “stellas” of 1879 and 1880 represent one of the most wildly popular of all U.S. coinage types, regardless of whether one discusses patterns, regular issues, fantasy coins, Colonials, or any other sub-category of medallion, commemorative, or experimental coinage. The reasons for this immense popularity are difficult to quantify, but they likely include: the beauty of the original designs, the unique denomination represented, the number of pieces created, and the manner of their distribution.

These lovely specimens are examples of an attempt to design and manufacture U.S. gold coins that would be struck in a metallic composition stated according to the metric system, and thereby encouraging more acceptance in the realm of international commerce; facilitating trade especially with countries located in Western Europe. The original impetus for the stellars was provided by a handful of individuals that included John A. Kasson — America’s minister to Austria — and several U.S. Congressmen including Richard “Silver Dick” Bland.

After 15 “originals” were made in 1879, from Charles Barber’s Flowing Hair design, an additional 400 to 700 pieces were struck of the same type (and dated 1879) in 1880, and distributed primarily to members of Congress and their staffers. Many of those coins are rumored to have been given to wives and mistresses of the Congressmen, including some Washington D.C.-area madams. All of the 1880 restrikes dated 1879, including this piece, display parallel die striations through Liberty’s hair curls while the “originals” do not, according to numismatic legend.

This appealing near-Gem is housed in an old green PCGS holder. It exhibits delicate mint-green toning in the fields and lovely apricot color on the design motifs. Most of the elements are sharply struck, except for the hair curls above the ear and forehead, and the surfaces reveal generally excellent preservation. One shallow abrasion is noted beneath the second U of UNUM. Overall, this is a splendidly attractive example of the famous stella pattern issue, and one that should produce spirited bidding activity when it crosses the auction block.

From *The La Jolla Lady’s Collection*. NGC ID# 28AZ, PCGS# 8057

4987 1796/5 Small Eagle — Damage — PCGS Genuine. XF Details. BD-1, High R.4. Bass-Dannreuther Die State a/b. All 1796 half eagles exhibit the 6 punched over an underlying 5. The issue is very scarce in all grades, and despite a reported mintage of 6,196 coins, Dannreuther (2006) estimates the true mintage to be between 1,057 to 2,000 examples. He further notes: “Although the mintage figures reported for the year 1796 undoubtedly contained coins dated 1795, there may be as many as 100 extant for this year.” This Extremely Fine representative displays bright green-gold surfaces with partial luster and moderate prooflike reflectivity in the hidden areas. Predictable wear covers Liberty’s hair and the eagle’s breast. Each side shows a number of wispy marks, and a few prominent linear depressions in the reverse fields account for the Details grade. NGC ID# 25NE, PCGS# 8067

1796/5 Small Eagle Half Eagle, BD-1, AU55
Rare and Important Overdate Issue

4988 1796/5 Small Eagle AU55 NGC. BD-1, High R.4. Bass-Dannreuther Die State a/b. All 1796 half eagles are overdates: 1796/5. The 6 in the date is punched over an obvious 5. The dies are both recycled from 1795: the reverse was first used to strike the 1795 BD-12 half eagle variety. Star 1 nearly touches the lowest curl, and the 1 in the date is near the other side of the same curl. The reverse has four berries: two on the outside left portion of the wreath above the eagle's head, and two on the right side of the wreath.

Jeff Garrett and Ron Guth describe the 1796/5 Capped Bust, Small Eagle half eagle as an underrated coin compared to its small mintage of 6,196 pieces. John Dannreuther argues that some of the coins reported for this issue were probably dated 1795; he estimates a surviving population of perhaps 80-100 examples in all grades. This mirrors the PCGS estimate of 75 to 100 survivors.

The obverse strike definition is remarkably bold; with strong definition on Liberty's hair curls and facial details. The reverse is somewhat less sharply struck, with typical softness on the small eagle motif, which was not well-designed and is almost always seen with considerable flatness on the eagle's head, neck, breast, and legs. The coloration over both sides is primarily a pleasing shade of olive-green, accented by hints of antique-gold on the central high points; especially on the reverse. The fields are distinctly semiprooflike on both sides. There are a number of tiny abrasions and planchet laminations in the obverse and reverse fields, but these superficial marks are generally too trivial to be discerned with the unaided eye. A visually pleasing example of this popular overdate issue, which is much scarcer than its numerous auction appearances would seem to imply: most of those appearances represent the resale of a relatively small number of coins that are available within the numismatic marketplace. Census: 4 in 55, 23 finer (8/14). NGC ID# 25NE, PCGS# 8067

1800 Half Eagle, BD-4, MS61
Rich Original Color

4989 1800 MS61 PCGS. BD-4, R.4. Bass-Dannreuther Die State d/c, with thin cuds above NIT in UNITED and STA in STATES. Bold recutting on the M in AMERICA easily identifies this variety. BD-4 is the third use of this obverse, and the only use of this reverse die; the obverse was employed yet a fourth time for BD-5. While not the most available (both BD-2 and BD-5 boast more survivors), BD-4 is one of the more plentiful varieties of the 1800 half eagle issue, with 125 to 175 pieces believed extant. This Mint State representative displays original lemon-gold luster and bold design definition. Light, scattered abrasions limit the grade, but hardly inhibit the eye appeal. Population: 13 in 61, 49 finer (8/14). NGC ID# 25NW, PCGS# 8082

1802/1 Half Eagle, MS62
BD-1, 'Low Overdate' Obverse

4990 1802/1 MS62 NGC. BD-1, High R.4. Bass-Dannreuther Die State a/a. Curiously, all of the 53,176 half eagles struck in 1802 bear the overdate, yet no coins were produced with an 1801 date. This obverse die, known as the Low or Centered overdate, was used to strike five varieties and another obverse was used to strike an additional three varieties, resulting in eight die pairs for the year. In *Early U.S. Gold Coin Varieties* (2006), Dannreuther estimates that 75 to 100 examples of the scarce BD-1 variant are extant. Including all varieties, NGC has certified 26 coins in MS62 and 28 examples finer (8/14). This piece features bright lemon-gold color over minimally abraded surfaces. A degree of semiprooflike reflectivity adorns the fields, and the motifs are uniformly sharp. NGC ID# 25NX, PCGS# 8083

1807 BD-8 Bust Left Five Dollar
Uncirculated Details

4991 1807 Bust Left — Obverse Damage — NGC Details. Unc. BD-8, R.2. Bass-Dannreuther Die State d/b. Liberty's cheek has a short and slender mark, but it is entered somewhat deeply. The remainder of this apricot-gold type representative lacks mentionable abrasions. Luster dominates the margins and motifs. A small area of moderate granularity is noted near the eagle's neck. NGC ID# 25P9, PCGS# 8101

1807 BD-8 Half Eagle, MS63
The Usual Capped Bust Variety

4992 1807 Bust Left MS63 PCGS. BD-8, R.2. John Reich joined the Mint engraving department on April 1, 1807, and immediately began creating new designs for all coinage denominations. First to appear were the half dollars and half eagles in 1807. The transition from the Draped Bust Right design to the Capped Bust Left design took place later in the summer; the Mint struck 32,488 of the former and 51,605 of the latter. This example has brilliant yellow luster and sharp design motifs with trivial surface marks. The reverse is rotated about 30 degrees counterclockwise from its normal coin-turn alignment. Population: 39 in 63 (1 in 63+), 28 finer (8/14). NGC ID# 25P9, PCGS# 8101

1808 Wide 5D Half Eagle, BD-4, MS60
First Generation Green Label Holder

4993 1808 Wide 5D MS60 PCGS. BD-4, High R.3. Bass-Dannreuther Die State c/a, the only known die state for this marriage. BD-4 is the most plentiful variety of the 1808 half eagle, though not by a large margin, as only 175 to 225 examples are believed extant. This is the second and final use of this obverse, and the first use of this reverse die, which was later employed for the sole 1809 variety. This representative displays somewhat frosty, yellow-gold luster over original surfaces. Some of the finer high-point details are not fully defined, though the strike is otherwise well-executed. Light, scattered abrasions define the grade. Housed in a first generation, green label holder. NGC ID# 25PA, PCGS# 8102

1811 Small 5 Half Eagle, BD-2
Uncirculated Details

4994 1811 Small 5 — Tooled — PCGS Genuine. Unc. Details. BD-2, R.3. A caramel-gold Reich design type coin that boasts a sharp strike throughout the devices. The upper reverse has a slightly incomplete strike and retains mint-made roller marks. Liberty's cheek, the left obverse field, and portions of the reverse field have been carefully smoothed, but the naked eye appeal remains impressive. NGC ID# 25PH, PCGS# 8109

1830 Capped Head Half Eagle, AU58
Rare Large D, BD-1 Variety
Unacknowledged Overdate

4995 1830 AU58 NGC. Large D, BD-1, R.6. Bass-Dannreuther Die State a/b. A substantial mintage of 126,351 Capped Head half eagles was accomplished in 1830, using a combination of one obverse and two reverse dies to complete the entire production run. After the publication of *Early U.S. Gold Coin Varieties* in 2006, John Dannreuther discovered that the obverse die is actually an unused die from 1829, which was overdated for use the following year. The remnants of the undertype 29 can be seen below the primary digits with magnification. The most obvious pickup point is the top curve of the 9 showing above the top of the 0. The obverse die was used to strike both varieties of the date, so all 1830 half eagles are overdates, a fact not often mentioned in the literature.

The present coin represents the BD-1 variety, easily recognized by the Large D in the denomination. This was the second, and final, use of the reverse die, which had been used previously to strike the rare and famous 1829 Small Date half eagles. The BD-1 is a rare variety, with a surviving population of just 25-35 examples in all grades. It probably accounted for 50,000-75,000 pieces of the reported mintage.

The coin offered here is an attractive near-Mint example that exhibits well-detailed design elements with just a trace of wear on the high points. The pleasing antique-gold surfaces display prooflike reflectivity in many areas, with a scattering of minor abrasions on both sides. Eye appeal is outstanding. This coin should find a home in an advanced collection of early gold. Census: 3 in 58, 14 finer (8/14). NGC ID# 25RA, PCGS# 8152

CLASSIC HALF EAGLES

1834 Classic Half Eagle, MS61
McCloskey 3-B, Plain 4

4996 1834 Plain 4 MS61 PCGS. CAC. Breen-6501, McCloskey 3-B, R.1. The Plain 4 variant of the 1834 Classic Head half eagle is the most plentiful issue in this short-lived series, ideal for type representation. This example displays bright yellow-gold luster with a degree of semiprooflike mirroring in the fields, an attractive characteristic seen on many examples of this issue. The hair curls above Liberty's ear are not fully defined, though the strike is otherwise well-executed. Light, scattered abrasions contribute to the grade. NGC ID# 25RR, PCGS# 8171

1835 Classic Half Eagle, MS61
McCloskey 1-A

4997 1835 MS61 PCGS. Breen-6504, McCloskey 1-A, R.2. Wispy green color appears on the brilliant yellow surfaces of this lovely Mint State Classic Head half eagle. Both sides have satin surfaces and bold design motifs with outstanding eye appeal. Both dies are perfect with no clash marks or die cracks. The letters of LIBERTY are slightly doubled, most evident on the L. NGC ID# 25RV, PCGS# 8173

1836 Script 8 Half Eagle, XF40
Extremely Rare Classic Head Variety
Only Three Known of McCloskey 7-F

4998 1836 Script 8 XF40 NGC. CAC. McCloskey 7-F, R.8. There are only three examples of McCloskey 7-F known to us, and it constitutes an important variety that deserves a listing in the *Guide Book*. The obverse has a Script 8 in the date, rather than the usual Block 8 style. The reverse has the U in UNITED widely recut. John McCloskey discovered this variety after the 1989 publication of his article on Classic Head half eagles. He announced the discovery in 1997, and the second example was located by the present cataloger five years later. The present green-gold example has scattered grade-consistent marks with traces of luster in the protected areas. A glass reveals a faint die crack in the left obverse field on this example that is heavy on the McCloskey discovery coin. That die crack likely explains the rarity of the variety, and suggests that few additional pieces will be found. NGC ID# 25RY, PCGS# 8174

LIBERTY HALF EAGLES

1849-C Half Eagle, MS63
Rare in Mint State

4999 1849-C MS63 NGC. Variety 1. The 1849-C is one of the more plentiful half eagle issues from the Charlotte Mint, with 275 to 375 examples extant, per Doug Winter, but it is also one of the better-struck dates overall, which makes it ideal for the collector seeking a single representative from this facility. At the Mint State level, however, survivors are rare, following the pattern of the other C-mint issues in the Liberty half eagle series.

This piece displays bold stars and border dentils, and the central devices show just a touch of striking softness on the eagle's left (facing) leg and the hair curls around Liberty's face. Flashy yellow-gold surfaces display a bright appearance when tilted beneath a light, and reveal few immediately obvious bag marks or other heavy abrasions. Census: 4 in 63, 3 finer (9/14). NGC ID# 25TW, PCGS# 8241

1851-O Half Eagle, MS61
Exceedingly Rare in Mint State

5000 1851-O MS61 PCGS. CAC. Variety 2. The 1851-O half eagle, with a mintage of 41,000 pieces, is a scarce issue in all grades, with only 85 to 95 examples believed extant. The date becomes rare in AU, and Mint State pieces are some of the rarest from this mint. The certified population reports show 10 Uncirculated examples, but this figure is likely inflated by resubmissions. Though most prevalent at the Mint State level, the 1851-O seems somewhat underrated in all grades when compared to the more easily obtainable but more widely popular Dahlonega and Charlotte issues of the period.

This representative displays original green-gold luster, with the grade-limiting abrasions being light and evenly dispersed. Some lightness of strike is noted on the hair curls around Liberty's face and on eagle's talons, as is typical of this New Orleans issue. Population: 3 in 61, 4 finer (8/14). NGC ID# 25U9, PCGS# 8249

1857-D Half Eagle, AU58
Rare at This Grade Level

- 5001 1857-D AU58 PCGS. Variety 42-HH.** The 1857-D half eagle is among the scarcer late-date issues from the Dahlonega Mint, with only 150 to 200 examples believed extant. Most are in the VF to XF grade range, with high-end AU examples being rare, and Mint State pieces being exceedingly so. This representative shows bright honey-gold color, with substantial luster remaining in the recesses. As is typical of this issue, the strike is slightly soft on the hair curls around Liberty's face and on the lower portion of the eagle, but the surfaces are only minimally abraded. Population: 8 in 58, 7 finer (8/14). NGC ID# 25V4, PCGS# 8273

1857-O Half Eagle, AU53
Only 13,000 Pieces Struck

- 5002 1857-O AU53 NGC. Variety 1.** A scant production of 13,000 pieces ensures the rarity of the 1857-O half eagle. Many survivors no longer retain their natural patina, but the present coin has rich apricot fields with olive-green luster in protected regions. The strike is above average for the New Orleans facility, despite blending on the fletchings and upper right curls. A loupe reveals only occasional moderate marks, including two nicks on the obverse rim at 12 o'clock. NGC ID# 25V5, PCGS# 8274

1860-S Half Eagle, AU53
Elusive San Francisco Issue

- 5003 1860-S AU53 NGC.** The 1860-S had a low mintage of only 21,200 coins, and circulated heavily, with most pieces being well-worn or lost overtime. In fact, the date is significantly scarcer in all grades than the more popular and slightly lower-mintage Charlotte and Dahlonega issues of the same year. In Mint State this is especially prevalent, as the 1860-S is represented in this condition by just two coins (8/14), the finest of which is a PCGS MS62 example tracing its origin to the Harry W. Bass, Jr. Collection. This luminous AU representative shows original orange-gold patina with remnants of soft luster in the protected regions of the fields. Grade-accompanying abrasions are light and evenly dispersed, leaving this piece with substantial eye appeal for the grade and issue. Census: 6 in 53, 18 finer (8/14). NGC ID# 25VJ, PCGS# 8287

1884-CC Half Eagle, AU58
Exceedingly Rare Any Finer

- 5004 1884-CC AU58 PCGS. Variety 1-A.** Ex: Battle Born/Nevada Collection. The 1884-CC is one of the scarcer half eagle issues from this mint, being elusive in the AU grade range and genuinely rare in Mint State, with none having been certified finer than MS62. This near-Mint representative is one of finer pieces seen from an eye appeal standpoint, with original honey and peach-gold patina retaining substantial mint luster in the recesses. The strike is only slightly soft on the eagle's neck, being above-average overall for the issue. Population: 12 in 58, 3 finer (8/14). NGC ID# 25XP, PCGS# 8365

1898-S Half Eagle, MS65
Condition Rarity

5005 1898-S MS65 PCGS. Although the San Francisco Mint struck more than twice as many half eagles as the Philadelphia facility in 1898, the S-mint coins are less often seen. Choice examples are rare, and anything finer is very rare. This Gem showcases frosty luster over yellow-gold surfaces. A bold impression characterizes the devices and marks are only apparent with magnification. Population: 6 in 65 (1 in 65+), 4 finer (8/14). NGC ID# 25YR, PCGS# 8397

1904 Half Eagle, MS66
Conditionally Rare, Splendid Appeal

5006 1904 MS66 PCGS. CAC. An extremely important condition rarity, this Premium Gem is highly lustrous with satin surfaces, brilliant lemon-yellow color, and bold design features. The mintage of 392,000 suggests an issue that is available in all grades. However, population reports confirm otherwise — the average certified grade is only MS62. Population: 17 in 66, 5 finer (8/14). NGC ID# 25Z4, PCGS# 8409

PROOF LIBERTY HALF EAGLE

1903 Half Eagle, Deeply Mirrored PR65
First Generation Holder

5007 1903 PR65 PCGS. CAC. In 1903, the Mint made no effort to produce a cameo effect on its proof coinage, with the result that most examples are fully brilliant. The proof half eagle of this year had a mintage of 154 pieces, one of the more substantial production totals of the period, but the issue survives in significantly lower numbers, likely fewer than half of the original mintage. The certified population figures, totaling some 114 pieces, are no doubt inflated by resubmissions. This piece, housed in a first generation holder, exhibits remarkably deep mirroring in the fields, with somewhat satiny luster seen over the devices. The strike is bold, as expected, and grade-limiting hairlines are nearly nonexistent. A small, coppery alloy spot is noted in the field near the back of Liberty's neck. Population: 4 in 65, 1 finer (8/14).
From The La Jolla Lady's Collection. NGC ID# 28D9, PCGS# 8498

INDIAN HALF EAGLES

1909-O Half Eagle, AU53 Final New Orleans Issue

5008 1909-O AU53 NGC. The New Orleans Mint ceased regular coinage in early 1909, following the limited production of just 34,200 half eagles. The low mintage itself would have been enough to rank the coin as a significant key, though the issue's status as the only O-mint half eagle in the Indian Head series only increases the appeal among collectors.

In terms of rarity, the 1909-O is offered at auction with some frequency, but in the context of the series, the issue has one of the lowest Mint State populations overall.

This is a lightly circulated AU representative, though it retains much of the finer design definition on the headdress and eagle's feathers. Luminous yellow-gold luster remains in the recesses, while the fields exhibit deeper bronze-gold overtones. An undeniably original example of this final New Orleans half eagle. NGC ID# 25ZK, PCGS# 8515

1910-D Half Eagle, MS64+ Only Ten Numerically Finer at PCGS

5009 1910-D MS64+ PCGS. CAC. The 1910-D half eagle is moderately available in grades through MS63, but it becomes scarce in Choice condition, and finer pieces are rare. This high-end MS64 coin exhibits satiny yellow-gold luster and unusually well-struck design elements. As the Plus designation implies, the surfaces are remarkably clean for the numeric level, exhibiting nearly Gem-quality preservation. Population: 53 in 64 (6 in 64+), 10 finer (9/14). NGC ID# 28DL, PCGS# 8518

1910-S Half Eagle, MS62 Scarcer Branch Mint Issue

5010 1910-S MS62 PCGS. Despite a mintage in excess of 770,000 pieces, the 1910-S half eagle is elusive in Mint State, and genuinely scarce finer than MS62. This representative is limited numerically by a number of small abrasions in the left obverse field, though the surfaces exhibit rich green-gold luster and the design elements are generally well brought up. PCGS has certified 47 numerically finer examples (9/14). NGC ID# 28DM, PCGS# 8519

1911-D Half Eagle, AU58 Better Date in the Series

5011 1911-D AU58 NGC. With a mintage of only 72,500 coins, the 1911-D is one of the most elusive dates in the Indian Head half eagle series after the 1929 and the 1909-O. Still, it fails to command the same attention as its quarter eagle brother. Light peach-gold coloration covers the minimally marked surfaces of this near-Mint example. Well-struck with remaining luster in the recesses. NGC ID# 28DR, PCGS# 8521

1911-S Half Eagle, MS63
Rarely Seen Finer

- 5012 1911-S MS63 PCGS. CAC.** The 1911-S, with a rather substantial mintage of more than 1.4 million coins, is only marginally available in Mint State condition, and in grades finer than MS63, becomes nearly as rare as the semikey-date 1911-D. This CAC-endorsed representative displays soft bronze-gold luster and well-defined design elements. A few light disturbances in the luster limit the grade, though the fields are much less-abraded than usually seen. PCGS has seen only 31 numerically finer representatives (8/14). NGC ID# 25ZM, PCGS# 8522

1913-S Half Eagle, MS62
Notable Originality

- 5013 1913-S MS62 PCGS.** The 1913-S half eagle is only marginally elusive in MS62, but its availability declines rapidly in succeeding finer grades, with the date being genuinely rare at the Choice level. This representative exhibits deep orange-gold luster with prominent olive overtones on each side. The strike is lacking slightly on the lower headdress feathers, though the surfaces are only minimally abraded. NGC ID# 25ZP, PCGS# 8526

1929 Half Eagle, MS62
Heavily Melted Late-Series Key

- 5014 1929 MS62 PCGS.** The 1929 Indian half eagle had a fairly substantial mintage of 662,000 pieces, but the coins were largely unneeded in commerce, and most remained in Treasury vaults when President Roosevelt confiscated all non-collectible gold coins in 1933. This fate was shared by the double eagle of the same year, and the half eagle is equally as elusive and widely sought-after. Not unlike its double eagle counterpart, the 1929 half eagle is typically seen in Mint State grades, and usually exhibits well-defined motifs. This piece does not disappoint in that regard, and also displays satiny bronze-gold luster. Light, scattered abrasions defined the grade, but none are individually detracting. A must-have, key-date coin for the Indian half eagle specialist. NGC ID# 2800, PCGS# 8533

EARLY EAGLE

1795 Eagle, BD-1, XF Details
Lightly Circulated Small Eagle Type Coin

5015 1795 13 Leaves — Rim Filing — NGC Details. XF. BD-1, High R.3. Bass-Dannreuther Die State a/a. This is the first and only use of this obverse, though this reverse die was later employed for BD-2, as well. BD-1 is the most available of the five 1795 eagle varieties, with an estimated 225 to 325 examples believed to survive, but it still can hardly be considered common. As the first issue of the denomination, the 1795 ten dollar gold piece is widely sought in all varieties.

This representative exhibits slight wear, with bright green-gold patina. NGC notes rim filing, the signs of which are detectable at 9 and 12 o'clock with magnification, but these are virtually invisible to the unaided eye. Remnants of faint adjustment marks are observed in the dentils upon close examination. This piece remains a pleasing example of this early Small Eagle variety.

LIBERTY EAGLES

1841-O Liberty Eagle, AU50
Low-Mintage Antebellum Issue

5016 1841-O AU50 NGC. Variety 1. The New Orleans Mint eagles are a rewarding series to collect, particularly those that predate the Civil War, which are far more elusive than the later issues. The 1841-O issue was the first O-mint eagle coinage, a meager 2,500 pieces. Examples are rare in all grades, usually seen in no better than XF condition, and the issue is the second-rarest O-mint eagle overall, behind the ultralow-mintage 1883-O (800 pieces struck). This eye-appealing AU example boasts yellow-gold surfaces that show a fairly sharp strike and a scattering of mostly small marks on each side, although two thin, straight scrapes appear on the reverse under the eagle's left wing. Census: 9 in 50, 13 finer (9/14). NGC ID# 262J, PCGS# 8583

1862-S Ten Dollar, AU58
Just a Single Coin Finer

5017 1862-S AU58 PCGS. The recovery of the *S.S. Republic* produced only a single example of this date, testifying to the issue's rarity. Only 12,500 coins were struck, and the issue served its intended purpose as a medium of exchange in West Coast commerce. As a result, examples are rare in all grades. This is the only piece PCGS has seen in AU58. Both PCGS and NGC report a single coin finer in MS61, possibly one and the same (8/14). The NGC coin surfaced in 2011 and was sold by Heritage as lot 5427 in the Central States Signature sale (4/2011), where it realized \$103,500.

This near-Mint ten retains ample luster in the interstices and exhibits yellow-gold color overall. A number of small marks are scattered over each side, and the slightest trace of friction occurs on the high points of the otherwise sharply detailed design elements. This is an important opportunity to acquire one of the finest examples from a rare San Francisco Mint issue. NGC ID# 264A, PCGS# 8636

1863-S Liberty Eagle, XF45
Elusive, Low-Mintage Issue

5018 1863-S XF45 NGC. Double eagle production in San Francisco was much greater during the Civil War than for any of the smaller gold denominations. This point is well illustrated by the contrast between eagle and double production in 1863. A mere 10,000 eagles were struck at the California mint, versus nearly a million twenty dollar pieces. This is a conditionally scarce example from that small mintage figure, as the heavily circulated ten dollar coins did not survive in large numbers at the XF grade level or finer.

A well-balanced appearance includes lovely orange-gold coloration, with deeper maroon accents that surround the peripheral devices on the obverse. Shallow marks pepper each side, as expected, while even high-point wear is also typical for the Choice XF level of preservation. A lovely high-end coin that should satisfy the needs of any serious date or San Francisco type collector. Census: 6 in 45, 14 finer (9/14). NGC ID# 264C, PCGS# 8638

**1865 Ten Dollar, Richly Patinated AU50
Rare in All Grades**

5019 1865 AU50 NGC. Ex: Bently Collection. As gold coins generally did not circulate during the Civil War period, except in the Western regions, the Philadelphia Mint produced only limited quantities of ten dollar gold pieces each year. The production total in 1865, therefore, was a typical mintage figure for the period, even if only 3,980 pieces were struck. A couple Mint State survivors have been certified by the leading services, though this issue is nonetheless rare in all grades, especially above the XF grade level. This example is undeniably original, exhibiting rich orange-gold patina over each side that deepens to bold reddish-orange around the margins. Light, even wear is noted over the high points, and the abrasions present are small and in concert with the grade. Census: 7 in 50, 17 finer (9/14). NGC ID# 264F, PCGS# 8641

**1865-S Liberty Ten, XF45
Inverted Date Variety**

5020 1865-S 865 Over Inverted 186 XF45 NGC. The 1865 Liberty eagle claims an extremely low mintage of 3,980 pieces, split between the Normal Date and Inverted Date varieties. The coin offered here represents the popular and interesting Inverted Date variety. An inverted three-digit logo punch was initially punched into the die, and was subsequently punched again right-side-up, to produce the Inverted Date effect. This Choice XF example of this popular *Guide Book* variety offers attractive apricot-gold surfaces that deepen slightly near the rims and show bold evidence of the underdigits. Census: 7 in 45, 15 finer (9/14). NGC ID# 28ED, PCGS# 8643

1865-S 865 Over Inverted 186 Eagle, AU55
Deep Original Coloration

5021 1865-S 865 Over Inverted 186 AU55 NGC. This highly collectible *Guide Book* variety was created when the diesinker first punched the first three date digits into the die upside down, and then corrected the error. Despite this mistake, the die was employed for production, coining a significant portion of the 16,700 gold eagles struck that year in San Francisco.

As a date, the 1865-S eagle is scarce in all grades, and nearly unknown in Mint State. For the advanced collector, obtaining an example of both the inverted date variety and the plain date variety will prove immensely challenging, especially in high grades.

This Choice AU representative of the inverted date variant features original coppery-orange patina, with hints of underlying luster seen when turned in-hand. The strike is sharp, and high-point wear is minimal. Census: 5 in 55, 2 finer (8/14). NGC ID# 28ED, PCGS# 8643

1868 Ten Dollar, AU58
Exceedingly Rare Any Finer

5022 1868 AU58 NGC. The 1868 is one of the most plentiful Philadelphia issues from the 1860s, but this should not be translated into it being common. The date is also one of the great condition rarities of the period. About Uncirculated examples can be obtained with some searching, but Mint State pieces are distinctly rare, as only six have been certified by NGC and PCGS combined and none are finer than MS62 (8/14). This near-Mint representative displays traces of original luster in the recesses around warm honey-gold patina. The design elements are sharp and virtually complete, though an array of the typically seen abrasions coats much of each side. Census: 31 in 58 (1 in 58+), 4 finer (8/14). NGC ID# 264N, PCGS# 8653

1871-CC Ten Dollar, AU58
Conditionally Rare

5023 1871-CC AU58 NGC. Variety 1-A. The 1871-CC eagle had a paltry mintage of only 8,085 coins, and fewer than 100 are believed to survive in all grades. The typical piece is well-worn and heavily abraded, grading only in the VF to XF range (the Smithsonian's example grades only XF45, per Garrett and Guth); AU examples are rare, and only two Mint State pieces have been certified, the finer of which grades just MS62 at NGC. This high-end AU representative retains nearly complete detail on the devices, with bright yellow-gold patina overall. Scattered abrasions accompany the grade, but none are individually detracting. Census: 10 in 58, 2 finer (9/14). NGC ID# 264X, PCGS# 8661

1883-O Liberty Eagle, AU50
Rare and Important Philadelphia Issue
Only 800 Pieces Struck

5024 1883-O AU50 NGC. Variety 1. The 1883-O ranks among the rarest Liberty Head eagles, with an astonishingly low mintage of just 800 pieces. Only four other ten dollar pieces from the 19th and 20th centuries can claim a mintage below 1,000 coins. Unsurprisingly, the 1883-O seldom appears at auction, and when it does, it is subject to fierce competition from bidders. Remarkably, this is the second time Heritage has offered this specific piece, marking once again an important opportunity for the advanced specialist to acquire a high-end example of this classic rarity.

Substantial semiprooflike reflectivity enhances the yellow-gold surfaces. The strike is a bit weak, most notably on the obverse, and there are a number of light abrasions as consistent with the grade, though none are worthy of individual mention. An appealing example of this highly desirable issue. NGC and PCGS combined report just 47 pieces in all grades, some of which are likely multiple submissions of the same coin, as Doug Winter estimates no more than 35 to 45 examples actually survive. Only two Mint State coins have been certified, both MS61 pieces, though it is possible these numbers also reflect the same coin. Census: 3 in 50, 12 finer (9/14).

Ex: Long Beach Signature (Heritage, 9/2009), lot 1667, which realized \$43,125. NGC ID# 2668, PCGS# 8701

**1888 Ten Dollar, MS63
Among the Finest Certified**

5025 1888 MS63 PCGS. While European hoards have yielded vast quantities of eagles from other issues, few 1888 coins have surfaced, and the date is very rare in Select condition. In fact, PCGS has graded only eight coins in MS63 (one in MS63+) with none finer. NGC has also failed to certify any pieces in finer condition (8/14). Peach-gold and lavender combine with frosty mint luster to generate strong eye appeal. This coin is well-struck with softness on the stars and olive leaves, and marks are lightly peppered over each side. NGC ID# 266K, PCGS# 8712

**1895-S Eagle, MS62
Radiantly Lustrous**

5027 1895-S MS62 PCGS. The 1895-S is every bit as scarce in high grades as its moderately low mintage of only 49,000 coins would suggest. Most survivors are in the XF to AU grade range, and Mint State pieces are rare in any condition. This sharply struck piece showcases remarkably radiant yellow-gold luster over softly frosted surfaces. Light, scattered abrasions, primarily on the obverse, define the grade, though the coin retains substantial eye appeal for the numeric level. Population: 5 in 62, 3 finer (8/14). NGC ID# 267A, PCGS# 8734

**1891-CC/CC Eagle, FS-501, MS63
Gold Cherrypickers' Variety**

5026 1891-CC/CC FS-501 MS63 PCGS. Gold *Cherrypickers'* varieties are an underexplored and underappreciated area of the numismatic marketplace. This Select Mint State coin shows the second C in the mintmark boldly repunched and displaced by a considerable gap from the first punching. The *Cherrypickers'* authors put it succinctly: "Any CC mintmark variety is interesting." The lustrous, golden-orange surfaces of this piece show scattered light ticks amid excellent eye appeal. Population: 2 in 63, 0 finer (9/14). PCGS# 145728

**1899 Ten Dollar, MS65+
Boldly Impressed and Frosty**

5028 1899 MS65+ PCGS. Although this is an accessible issue with a high mintage of over 1.2 million coins, surviving examples become challenging at the MS65 grade level. This high-end Gem displays frosty luster and orange-gold color. The strike is sharp, and abrasions are minimal, adding to the strong visual appeal of this piece. Population: 36 in 65 (3 in 65+), 5 finer (8/14). NGC ID# 267J, PCGS# 8742

1906-O Ten Dollar, MS65
Final New Orleans Eagle Issue

New Orleans Mint Building

5029 1906-O MS65 NGC. CAC. Variety 1. The 1906-O represents the final ten dollar issue from the New Orleans Mint. Only 86,895 coins were struck, and locating examples in any grade proves challenging. The majority of the certified population ranges from AU58 to MS62. Select and Choice representatives are rarely seen. NGC has graded only four coins in MS65 with two submissions finer (8/14). This amazing Gem exhibits attractive orange-gold color and softly frosted mint luster. The motifs are fully struck, and a small alloy spot below the I in UNITED acts as a future pedigree marker. This coin is remarkably preserved aside from a few minuscule ticks. Housed in a former generation holder with an accompanying vintage dealer flip. NGC ID# 2686, PCGS# 8761

PROOF LIBERTY EAGLES

1867 Ten Dollar, PR64 Cameo Ultra Rare as a Proof

5030 1867 PR64 Cameo NGC. CAC. Despite having one of the higher proof mintages of the period (still only a paltry 50 pieces), the proof 1867 gold ten dollar is no more available today than are those issues with 25 and 30-coin mintages, and is arguably rarer in high grades. Most survival estimates suggest no more than a dozen examples are extant in all grades, though the two leading certification services report having seen only eight individual coins, counting an unknown number of resubmissions. Of these, two are slightly impaired, grading PR53 and PR55 at PCGS. A Gem Cameo example (grade, per Garrett and Guth) resides in the National Numismatic Collection in the Smithsonian Institution, out of reach of collectors, while the finest-known representative is a sole PR66 Cameo coin at NGC (8/14).

This piece is an exceptional Choice example, with sharp, heavily frosty devices and remarkably deep mirroring in the fields. Warm honey-gold color engulfs each side, though the fields display areas of milky patina, attesting to the originality of the surfaces. Contact marks are seemingly nonexistent, and only a few wispy hairlines in the fields preclude a finer numeric grade.

Produced chiefly for inclusion in proof sets with the other gold denominations of the period, the proof ten dollar pieces are every bit as rare as their sought-after double eagle counterparts, and in many cases are rarer. Early proof gold issues are among the most highly prized relics in 19th century numismatics, and this Choice representative of the 1867 ten dollar issue is a must-have for the advanced proof gold or Liberty eagle specialist. Its sheer rarity alone makes it worthy of special attention. Census: 2 in 64 Cameo, 2 finer (8/14).

From The La Jolla Lady's Collection. NGC ID# 28F5, PCGS# 88807

1883 Proof Ten Dollar, Unc Sharpness
Moderate Cameo Contrast

5031 1883 — Altered Surfaces — PCGS Genuine. Proof, Unc Details. The proof 1883 Liberty ten dollar had a mintage of only 40 coins, and it is estimated that fewer than half of those exist today. PCGS and NGC show a combined population of 17 examples, a figure that likely includes resubmissions. This representative displays bold design elements with deeply mirrored fields and moderate field-motif contrast. PCGS suggests the surfaces have been altered, though the effects are not immediately obvious to the unaided eye. NGC ID# 28FM, PCGS# 8823

INDIAN EAGLES

1907 No Periods Ten, MS66
First Collectible Date in the Series

5032 1907 No Periods MS66 NGC. Writing in *Striking Change* (2008), Michael Moran explains the criticism the Saint-Gaudens' ten dollar coin endured for its design, especially when compared to the lauded double eagle. He notes, "it was obvious that the \$20 gold piece far surpassed the \$10 in beauty. The latter coin came in for criticism of the Indian headdress. The public failed to see the headdress as the unique American symbol of liberty as Theodore Roosevelt had." Perceptions have shifted over time, and today the famed sculptor's eagle series is popularly collected.

The 1907 No Periods issue is the first collectible date in the series, and often serves as a type because of its availability in high grades. This Premium Gem enjoys outstanding eye appeal and well-detailed motifs. Swirling mint frost and rich orange-gold color embrace the nearly pristine surfaces, and examples are rarely seen finer. NGC ID# 28GF, PCGS# 8852

**1910-S Indian Ten Dollar, MS62+
Rich Original Patina**

- 5033 1910-S MS62+ PCGS.** Despite a mintage of 811,000 pieces, the 1910-S Indian eagle is one of the more conditionally challenging dates in the series; Mint State examples can be found with little searching in MS62 and lower grades, but are scarce in MS63, and rarely seen finer. This Plus-graded example shows frosty orange-gold luster and sharp motifs. Scattered abrasions limit the grade. NGC ID# 268D, PCGS# 8867

**1910-S Indian Eagle, MS63
Conditionally Elusive**

- 5034 1910-S MS63 NGC.** Unlike the Denver issue of the same year, which is readily available in grades through MS64, the 1910-S Indian eagle is only marginally available in MS62 and lower grades, and becomes scarce as quickly as the MS63 level. This representative displays satiny honey-gold luster and well-defined central devices. A few minute ticks on the obverse limit the grade. Census: 24 in 63, 25 finer (9/14). NGC ID# 268D, PCGS# 8867

**1911-S Ten Dollar, MS62
Better S-Mint Issue in Mint State**

- 5035 1911-S MS62 NGC.** With a low mintage of only 51,000 coins, the 1911-S is a key-date issue in Mint State condition, being scarce finer than MS62. This representative displays strong rose-gold luster and well-struck design elements. Numerous abrasions limit the grade, though these are evenly dispersed so as to not be overly detracting. Census: 30 in 62, 27 finer (8/14). NGC ID# 28GV, PCGS# 8870

**1912 Indian Eagle, MS66
Frosty Mint Bloom**

- 5036 1912 MS66 NGC.** The 1912 Indian eagle is one of the more plentiful issues in the series in grades through MS64, but it becomes distinctly scarce in Gem condition, and finer pieces are genuinely rare. This Premium Gem representative displays frosty, very light yellow-gold luster, with pale hints of rose toning in the central regions. The strike is sharp on Liberty's hair strands and the eagle's feathers, as well as the headdress feathers, and the surfaces are free of any noticeable distractions. An immensely appealing representative of this conditionally scarce Philadelphia issue. Census: 13 in 66 (1 in 66+★), 1 finer (9/14). Ex: Long Beach Signature (Heritage, 2/2005), lot 8872. NGC ID# 28GW, PCGS# 8871
-

**1914-D Indian Eagle, MS64
Sharply Struck and Lustrous**

5037 1914-D MS64 NGC. From a substantial mintage of 343,500 pieces, the 1914-D Indian eagle is reasonably easy to locate in lower Uncirculated grades, but it becomes very scarce above the MS64 level. This impressive Choice example exhibits sharply detailed design elements and lustrous, lightly marked green and rose-gold surfaces. NGC has graded 59 numerically finer examples (9/14). NGC ID# 28H3, PCGS# 8876

**1914-D Ten Dollar, MS64
Elusive in Finer Grades**

5038 1914-D MS64 NGC. The 1914-D eagle is most often seen in the MS61 to MS62 grade range; Choice examples are sometimes available, but pieces grading MS65 or finer are scarcely encountered. This lustrous MS64 coin displays boldly struck design elements and satiny honey-gold luster. A few minor surface grazes limit the grade. NGC has seen 59 numerically finer submissions (9/14). NGC ID# 28H3, PCGS# 8876

**1914-D Eagle, MS64
Radiant Mint Luster**

5039 1914-D MS64 PCGS. Ex: Gary Lee Rozinski Collection. Much of this issue's 343,500-coin mintage was later melted, but enough Mint State pieces survived (likely in European hoards) that the date is somewhat collectible today. This near-Gem representative exhibits the vibrant mint luster and well-struck devices the issue is known for, with primarily orange-gold color throughout. A lens reveals a few grade-defining ticks, though the eye appeal is hardly affected. PCGS has certified only 33 numerically finer examples (9/14). NGC ID# 28H3, PCGS# 8876

LIBERTY DOUBLE EAGLES

**1850 Double Eagle, AU53
Semiprooflike Surfaces**

5040 1850 AU53 NGC. As the first regular-issue date for the denomination, the 1850 double eagle is widely sought for type purposes. This lightly circulated representative features partly lustrous, yellow-gold surfaces with semiprooflike reflectivity in the fields. Mild friction occurs over the devices, and marks are lightly scattered over each side.

The Valley View Life Collection, Part Three. NGC ID# 268F, PCGS# 8902

**1850 Liberty Twenty, AU55
Popular First-Year Type Coin**

5041 1850 AU55 NGC. A tiny dollop of crimson and a handful of small teak-toned copper spots are present at the margins of the luminous surfaces. Well struck with light, even wear across the devices of this first-year piece. Likely made from California-mined gold, shipped to the Philadelphia since no government-sanctioned mint existed on the West Coast until the Assay Office opened in 1850.

Ex: Houston Signature (Heritage, 11/2007), lot 6178. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, MS62
High-End for the Assigned Grade**

5042 1850 MS62 PCGS. California Gold Rush yields and demand for a large gold coins in circulation served provided the impetus for the creation of the double eagle denomination. While the Philadelphia Mint struck an unknown number of twenty dollar coins in 1849, only one example survives, and it is safely housed in the Smithsonian Institution. The same facility struck over 1.1 million double eagles the following year, making 1850 the first regular year of issue and a widely sought-after date for type purposes.

At arm's length, this mint condition survivor appears remarkably clean for the designated grade. Closer inspection reveals tiny ticks lightly scattered over each side, but they are undistracting. The surfaces exhibit yellow-gold color and radiant luster with boldly struck devices. Population: 39 in 62 (2 in 62+), 8 finer (8/14). NGC ID# 268F, PCGS# 8902

1850-O Double Eagle, Choice XF

5043 1850-O XF45 PCGS. Variety 2. Prior to the establishment of the San Francisco Mint, the New Orleans Mint played a key role in the coinage of the vast amount of raw gold that was being mined in California. As a side effect of the resulting higher mintages, the O-mint double eagles coined from 1850 to 1853 are the only easily collectible issues in the series from that mint. This example of the 1850-O is lightly circulated, as are the majority of known survivors, but displays original orange-gold patina. Scattered abrasions accompany the grade, the most notable being an old cut on Liberty's jaw. PCGS has certified 57 numerically finer representatives (8/14). NGC ID# 268G, PCGS# 8903

**1851-O Liberty Double Eagle, AU55
Ideal O-Mint Type Coin**

5044 1851-O AU55 NGC. Variety 1. The 1851-O Liberty twenty claims a substantial mintage of 315,000 pieces, the largest production total of any double eagle from the New Orleans Mint. As might be expected, the 1851-O is the most available O-mint double eagle in absolute terms, and a favorite choice of mintmark type collectors. Like all Type One double eagles, few examples were saved by contemporary collectors, and the 1851-O has not been well-represented in recent shipwreck finds. Accordingly, most examples seen are in lower circulated grades. This attractive Choice AU specimen displays just a touch of wear on the well-detailed design elements and the lightly abraded greenish-gold surfaces retain much of their original mint luster. NGC ID# 268J, PCGS# 8905

**1851-O Twenty Dollar, AU55+
Elusive in Higher Grades**

5045 1851-O AU55+ NGC. CAC. Variety 2. The 315,000-coin mintage is the highest among New Orleans double eagle issues, yet it would be misleading to call the 1851-O a "common date." Most coins were commercial workhorses, and surviving representatives usually display prominent handling marks and substantial wear. Choice About Uncirculated examples are scarce, near-Mint coins are rare, and only a few pieces exist in mint condition. This AU55 coin boasts a Plus designation from NGC and a CAC approval sticker, both of which attest to its quality. The surfaces display light-green and yellow-gold shadings and strong definition for an O-mint coin. This is a lightly abraded and partly lustrous coin with excellent eye appeal. NGC ID# 268J, PCGS# 8905

1852 Double Eagle, Lustrous AU58

5046 1852 AU58 PCGS. The 1852 double eagle had an impressive mintage of more than 2 million pieces, but these experienced widespread circulation, and Mint State survivors are scarce and rarely grade finer than MS62. This near-Mint example displays bright yellow-gold luster and virtually complete detail. As is typical at this grade level, scattered abrasions are observed over each side. NGC ID# 268K, PCGS# 8906

1853 Liberty Twenty, AU58
Ex: S.S. Republic

5047 1853 AU58 NGC. Like many high-grade Type One double eagles, this coin was recovered from a recent shipwreck find (the S.S. Republic in this case). The well-detailed design elements show just a trace of high-point wear and the lustrous yellow-gold surfaces show a scattering of minor contact marks on both sides. NGC ID# 268M, PCGS# 8908

1854 Twenty Dollar, AU58
Scarce Large Date Variety

5048 1854 Large Date AU58 NGC. The Small Date 1854 double eagles (also called the Medium Date) outnumber the Large Date variety by a factor of at least 6 to 1, based on the number of grading events and also by shipwreck recovery data. In near-Mint condition or finer, the Large Date twenties are rare.

This example shows excellent remaining mint luster and a natural, orange-gold patina. The bagmarks are generally light, although somewhat numerous across the surfaces, suggesting this boldly struck representative is not one of the few recovered Large Date coins from sea salvage — both by virtue of its original color and evidence of handling via overland transport. Census (for the variety): 19 in 58 (1 in 58+), 11 finer (9/14). PCGS# 98911

1854-S Twenty, AU Sharpness
Low-Mintage Introductory Issue

5049 1854-S — Environmental Damage — PCGS Genuine. AU Details. The 1854-S is the first San Francisco issue, and also ranks among the scarcest and lowest mintage Liberty double eagle issues from the facility. There was a shortage of parting acids, necessary to provide the correct 90% gold alloy. The facility was crowded, noisy, and had a foul odor. Nonetheless, it was vital to West Coast commerce, whose economy was based upon gold coin. The present twenty dollar example has minimal wear and moderate abrasions. Orange-red and sea-green stains are present on both sides, but are mostly located near Liberty's chin and hairbun. NGC ID# 268U, PCGS# 8913

**1855-O Twenty, AU Details
Important Southern Gold Rarity**

- 5050 1855-O — Filed Rims — PCGS Genuine. AU Details. Variety 1.** From the scant mintage of 8,000 pieces, fewer than 100 examples are known in all grades, per the Garrett-Guth *U.S. Gold Encyclopedia*. The survivors are subject to tremendous demand from two overlapping groups of collectors: those assembling Liberty double eagle sets by date and mintmark, and specialists of the New Orleans facility. This well struck representative displays myriad pockets of bright luster, especially prominent on the reverse. Marks are relatively minor given its short stint in antebellum commerce, but the reverse rim is lightly filed near 12 o'clock. The cost of an 1855-O advances rapidly with progressively higher AU grades, but the present coin provides an opportunity for acquisition at a comparatively affordable price. NGC ID# 268W, PCGS# 8915

**1855-S Liberty Twenty, AU55
Most Often Found in Shipwrecks**

- 5051 1855-S AU55 PCGS.** Once a great rarity in high grade, the 1855-S Liberty double eagle was well-represented in recent shipwreck finds, making coins in AU and finer grades much more available. This Choice AU specimen offers moderately abraded orange-gold surfaces that retain much original mint luster. Population: 62 in 55, 71 finer (9/14). NGC ID# 268X, PCGS# 8916

**1855-S Double Eagle, AU58
Beautifully Preserved and Lustrous
Ex: S.S. Central America**

- 5052 1855-S Broken A, Full E, Variety 14A, AU58 PCGS. CAC.** Ex: S.S. Central America. As a date, the 1855-S is elusive in Mint State, with most such survivors originating from the S.S. Central America treasure. The wreck contained more than 300 examples of this issue overall, and these are some of the more attractive surviving representatives of the date. This example showcases radiant mint bloom in varying shades of orange and honey-gold frost. The details are complete, and close examination is needed to detect any signs of grade-limiting friction. A few light, scattered abrasions are present, not unusual for the grade. Population: 22 in 58, 21 finer (8/14). PCGS# 70040

**1855-S Double Eagle, AU58
Original Khaki-Gold Surfaces**

- 5053 1855-S Broken A, Full E, Variety 14A, AU58 PCGS. CAC.** Medium S. This near-Mint twenty shows the "Broken A" variety with an incomplete crossbar in the A in STATES. The variant is the result of a hub defect, which Mint officials usually corrected by hand, though this example failed to benefit from such modifications. Khaki-gold color blankets each side, and the design motifs exhibit good definition. Minor high-point friction and lightly scattered marks prevent a rare Uncirculated grade. Population: 48 in 58, 22 finer (8/14). PCGS# 70040

1855-S Double Eagle, AU55

Ex: S.S. Central America

- 5054 1855-S S Tilted Right, Variety 14C, AU55 PCGS.** Ex: S.S. Central America, 6406. The 1855-S, 1856-S, and 1857-S double eagles were all found in significant quantities among the treasure of the S.S. Central America shipwreck. This example of the 1855-S is one of more than 300 examples recovered from the salvage, and is pedigreed in a special gold label holder. A trace of friction over the high points of the design precludes a Mint State grade, though the details remain virtually complete, and the frosty honey-gold luster delivers outstanding eye appeal for the grade. Population: 21 in 55, 18 finer (8/14). PCGS# 70042

1856-S Double Eagle, AU58

Ex: S.S. Central America

- 5055 1856-S No Serif, Full A, Variety 17M, AU58 PCGS.** Ex: S.S. Central America, 5547. In excess of 1,000 examples of this issue were recovered from the S.S. Central America, many of which are in Mint State condition. This near-Mint representative is pedigreed to the famous shipwreck and is encapsulated in a gold label holder. Essentially full mint bloom engulfs each side in frosty yellow-gold radiance, while the motifs are bold, and wear is almost nonexistent. Population: 21 in 58, 10 finer (8/14). PCGS# 70022

1857-S Double Eagle, Lustrous AU58

- 5056 1857-S AU58 PCGS. CAC.** The 1857-S double eagle was made one of the more available Type One issues when thousands of examples were recovered from the S.S. Central America shipwreck, though its popularity from the event increased proportionately, and this date remains widely sought in all grades. A trace of high-point friction limits this piece from a Mint State grade, but the frosty surfaces retain nearly full mint bloom, and the details remain virtually complete. Scattered abrasions accompany the grade. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS64

Immensely Attractive for the Grade

- 5057 1857-S Spiked Shield, Variety 20A, MS64 PCGS.** Most Mint State survivors of this popular San Francisco issue can trace their origins to the S.S. Central America treasure, which yielded more than 5,000 examples of the date overall. While not pedigreed to the shipwreck, this example nonetheless displays the shimmering, frosty luster and immense visual appeal that is often characteristic of the S.S. Central America coins. Lovely rose-gold hues complement bold design definition, while only a few small ticks on the obverse preclude a full Gem grade assessment. PCGS# 70000

1857-S Double Eagle, MS64

Likely S.S. Central America Coin

- 5058 1857-S Spiked Shield, Variety 20A, MS64 PCGS. CAC.** Although no pedigree is indicated, this double eagle was undoubtedly part of the S.S. Central America recovery, since the preservation is exceptional and the reverse is the Spiked Shield variety, which constituted much of that shipwreck's bounty. The rich butter-gold toning, sweeping luster, intricate strike detail, and remarkably smooth surfaces will please even the jaded double eagle specialist. Ex: FUN Signature (Heritage, 1/2010), lot 4829. From The Pannonia Collection, Part Two. PCGS# 70000

1857-S Twenty Dollar, MS65
Exceptional Recovery Coin
S.S. Central America

- 5059 1857-S Spiked Shield, Variety 20A, MS65 PCGS. CAC.** Ex: S.S. *Central America*. SSCA 2168. The Spiked Shield variety is the most common of the several varieties that were identified by S.S.C.A. numismatist Robert Evans when studying the 5,000+ 1857-S double eagles recovered by the Columbus-America Discovery Group. Two die lines at the left shield border, including one that noticeably crosses the border into the shield, define the Variety 20A reverse paired with the Bold 7 obverse.

This exceptional example offers sweeping cartwheel luster over wonderfully smooth and attractive medium-gold surfaces. The eye appeal is fantastic, with a full strike on all the motifs. A few tiny abrasions on the reverse are all that limit this exceptional double eagle from an even higher grade. Housed in a gold-label PCGS holder of its original distribution. PCGS# 70000

1857-S Liberty Twenty, MS61
Ex: S.S. Central America

- 5060 1857-S Bold S, Variety 20B, MS61 NGC. CAC.** Ex: S.S. *Central America*. An exuberantly lustrous shipwreck piece with vibrant lemon-gold surfaces that show glints of green and sun-yellow. The strike is characteristically bold, and while the obverse shows a number of wispy abrasions close to the portrait, the reverse is comparatively clean. PCGS# 70001

1857-S Double Eagle, MS62
Ex: S.S. Central America

- 5061 1857-S Bold S, Variety 20B, MS62 PCGS.** Ex: S.S. *Central America*, 1262. The 1857-S double eagle was represented by the thousands in the S.S. *Central America* treasure, and the resulting popularity of the date has earned it a spot among Garrett and Guth's *100 Greatest U.S. Coins*. This Mint State example displays the radiant frosty luster that the shipwreck coins are known for, with sharp detail and remarkably clean surfaces for the grade. For either the type collector or the shipwreck enthusiast, this coin is an outstanding example. Housed in a gold label holder. PCGS# 70001

1860 Double Eagle, MS60
Elusive in Mint State

- 5062 1860 MS60 PCGS.** With a mintage in excess of 577,000 pieces, the 1860 double eagle is one of the more easily obtainable Type One issues, though it is still not nearly as plentiful in high grades as are the 1861 and 1857-S. XF and AU coins are encountered with some frequency, but Mint State pieces are scarce at all levels. This coin is moderately abraded, as evidenced by the grade, but retains original green-gold luster with subtle honey-colored hues in the recesses. The design elements are well brought up, giving this piece moderate overall appeal for the grade. Population: 14 in 60, 42 finer (9/14). NGC ID# 269D, PCGS# 8929

1860-S Twenty Dollar, AU53
Popular Type One S-Mint Issue

- 5063 1860-S AU53 NGC.** Even wear is present on this representative that displays light reddish-gold color. As expected at this grade level, numerous abrasions are present, however they are well distributed and there are none worthy of individual mention. The San Francisco Mint produced substantial quantities of double eagles every year and those coins circulated for a substantial time and as a result the majority of the survivors grading in the VF to XF range. NGC ID# 269F, PCGS# 8931

1861 Double Eagle, MS60
Unusually Attractive for the Grade

- 5064 1861 MS60 PCGS.** Prior to the salvage of the S.S. *Central America* shipwreck, the 1861 was the most available Type One double eagle in high grades, and the issue remains an excellent type candidate. This piece displays bright, yellow-gold luster and well-defined design elements. Scattered abrasions limit the grade, though they are primarily minor and evenly dispersed, imparting minimal distraction. NGC ID# 269G, PCGS# 8932

1861 Double Eagle
Mint State Sharpness

- 5065 1861 — Altered Surfaces — PCGS Genuine. Unc. Details.** A lustrous peach-gold double eagle from the advent of the Civil War. Most of the coin is minimally marked, but the obverse field has a narrow area near stars 3 through 6 that has been textured with a series of carefully placed small abrasions. A whisper of struck-in grease noted near obverse star 1. NGC ID# 269G, PCGS# 8932

1861-S Double Eagle, AU58
Remarkably High-End for the Grade

- 5066 1861-S AU58 PCGS.** For an About Uncirculated double eagle, this 1861-S representative showcases remarkably smooth surfaces, with only a trace of friction precluding a Mint State grade. Frosty lemon-gold luster illuminates each side, delivering a high degree of eye appeal. Due to the profound rarity of higher-grade pieces, this near-Mint coin represents an important opportunity for the quality conscious collector. Population: 37 in 58, 16 finer (8/14). NGC ID# 269K, PCGS# 8935

1862-S Double Eagle, AU58
Popular Type One Issue

- 5067 1862-S AU58 NGC.** Ample luster remains evident on the surfaces of this near-Mint example, as copper-orange remnants mingle with green-gold coloration. Boldly struck with a modicum of highpoint wear on the obverse, and a mildly scuffy overall appearance. Still a scarce issue in Uncirculated condition, but more available in AU after the recovery of around 200 mostly AU coins from the S.S. *Brother Jonathan* and S.S. *Republic* shipwrecks. Ex: *Long Beach Signature* (Heritage, 5/2008), lot 3583. NGC ID# 269N, PCGS# 8938

**1862-S Double Eagle, MS61
Conditionally Rare S-Mint Issue**

- 5068 1862-S MS61 PCGS.** The 1862-S double eagle is an issue that circulated extensively in Western commerce. Small quantities were recovered from the *S.S. Brother Jonathan* and *S.S. Republic* shipwrecks (68 and 127 coins, respectively), but the vast majority of these were in lower AU or XF condition, and only a handful of Uncirculated pieces were added to the existing supply. Today, Mint State representatives are rare in all grades, and are exceedingly so finer than MS61. This example shows frosty rose-gold luster and sharp motifs. Light, scattered abrasions define the grade, but the overall appeal is pleasing for the numeric level. Population: 9 in 61, 9 finer (8/14). NGC ID# 269N, PCGS# 8938

**1863 Twenty, AU55
Scarce, Low-Mintage War Issue**

- 5069 1863 AU55 NGC.** All gold denominations were produced in small numbers by the Philadelphia Mint in 1863, to the extent that no quarter eagles at all were minted. Just 142,790 double eagles were produced. Collectors put aside few circulation strikes during the war years, and hardly any shipwreck coins of the issue are known — just 35 examples were recovered from the *S.S. Republic*, and none were found on the *Brother Jonathan*. This Choice About Uncirculated coin shows light wear and minimal abrasions for the assigned grade. Considerable mint luster glows beneath the attractive, light-gold patina. NGC ID# 269P, PCGS# 8939

**1864-S Double Eagle, AU58
Ex: *S.S. Republic*, Nice Eye Appeal**

- 5070 1864-S AU58 NGC.** Light, yellow-gold coloration displays rim-to-rim mint luster that remains despite the seawater salvage of this attractive, near-Mint San Francisco twenty. The sharply struck devices and frosted fields show only minor abrasions and widely distributed small marks. An inventory of the recovered double eagles from the *S.S. Republic* reports 168 examples of the issue were returned to the surface and into collector hands. NGC ID# 269T, PCGS# 8942

1866 Twenty, AU55
First Year With Motto

5071 1866 AU55 NGC. A sizeable mintage of 678,775 pieces introduced the Type Two “With Motto” design to the series. Few high-grade coins were saved (they were too valuable as currency and seldom put aside), although some double eagles were exported and later repatriated. Even so, Mint State examples are rare and expensive. Sharp, minimally abraded About Uncirculated coins such as this representative are a good alternative. Original orange-gold patina remains lustrous despite minimal circulation, with deeper russet-gold accents in the recesses of the sharply struck motifs. NGC ID# 269X, PCGS# 8949

1868-S Double Eagle, AU58
Underrated Type Two Issue

5072 1868-S AU58 PCGS. CAC. Produced in large numbers, the 1868-S Liberty double eagle is surprisingly difficult to locate in high grade. This impressive near-Mint example exhibits well-detailed design elements with just a trace of wear, and the lightly abraded yellow-gold surfaces radiate vibrant mint luster. Population: 72 in 58 (1 in 58+), 24 finer (9/14). NGC ID# 26A4, PCGS# 8954

1870-CC Double Eagle, VF30
Premier Carson City Gold Rarity

5073 1870-CC VF30 PCGS Secure. Variety 2-B. The establishment of the Carson City Mint in the Nevada Territory was largely in response to the discovery of silver ore in the Comstock Lode, though gold bullion deposits were also accepted. Production during the facility's first year of operation was primarily limited to the larger silver denominations (quarters through dollars), and small amounts of five, ten, and twenty dollar gold pieces. The double eagle had the lowest production total overall, with records reporting a total of only 3,789 pieces. The entirety of this small figure was soon dispersed into local commerce, where it was left to slowly fade away from loss and widespread circulation. As a result, the few surviving representatives exhibit light to moderate wear and are plagued by heavy abrasions. Apparently no examples were retained by contemporary collectors and those pieces that still exist likely survived only by chance or as part of small gold hoards.

Survival estimates vary slightly, though most researchers agree the known population is only in the 35 to 45-coin range. Of these, most are in the VF to XF grade range, with AU examples being prohibitively rare. No Mint State pieces are known, and the finest certified example of the date is a sole AU58 coin at NGC (8/14).

Besides its profound rarity (the greatest of any gold issue from the Carson City Mint), the 1870-CC double eagle also stands as one of the most sought-after of all American gold coins in general. Many collectors endeavor to complete a set of CC-mint double eagles, with the 1870-CC being the only legitimate "stopper," a factor which only increases its desirability. The coin ranks among Garrett and Guth's *100 Greatest American Coins*, third edition, where it is heralded as the "King of Carson City gold."

This example exhibits bright yellow-gold patina with pleasing detail for the grade. As always, scattered abrasions are present, some being significant in nature. The most noticeable are a pair of short cuts near the obverse rim adjacent to stars 5 and 7. The sheer rarity and historical allure of the issue, however, balances the appeal of this coin, making it an important find for the advanced Carson City gold specialist. NGC ID# 26A8, PCGS# 8958

1874-S Double Eagle, MS62

- 5074 1874-S MS62 NGC.** Small Squat S, one of three mintmark sizes used on this conditionally challenging Type Two issue. Caramel-gold and olive-green alternate across the well struck and typically abraded surfaces. A trace of struck-in grease (as made) is near the left shield border. Census: 30 in 62, 3 finer (9/14).
Ex: Baltimore Signature (Heritage, 7/2003), lot 10631. NGC ID# 26AR, PCGS# 8972

1875-CC Liberty Head Twenty Dollar
Near-Mint Type Representative

- 5075 1875-CC AU58 PCGS. Variety 4-A.** This lustrous near-Mint twenty is an ideal Carson City type coin. The issue is the most accessible among With Motto CC double eagles, and the assigned grade strikes a balance between condition and affordability. Peach and green-gold surfaces show minor friction over Liberty's curls. A number of ticks and a small scrape in the right reverse field define the grade. NGC ID# 26AT, PCGS# 8974

1875-S Double Eagle, MS63
Rare This Well-Preserved

- 5076 1875-S MS63 PCGS.** The San Francisco Mint produced more than 1.2 million double eagles in 1875, a rather significant number for the period. Many pieces found their way into overseas shipments and have made their way back in recent decades. As a result, AU and Mint State survivors are plentiful in grades through MS61. In MS62 the population declines significantly, and Select or finer pieces are decidedly rare. This frosty representative shows vibrant golden luster and sharp design elements, particularly on the reverse. Grade-limiting abrasions are primarily restricted to faint grazes in the luster, making this piece a high-end coin for the grade. A shallow planchet void near star 3 is mint-made and not immediately obvious. Population: 13 in 63 (1 in 63+), 6 finer (8/14). NGC ID# 26AU, PCGS# 8975

1876 Double Eagle, MS62
Appealing for the Grade

- 5077 1876 MS62 NGC. CAC.** Light Motto. Dazzling cartwheel luster shines beneath the warm yellow-gold patina that envelops both sides. A tiny violet spot on Liberty's hair adds color to the otherwise uniform surfaces. Scattered abrasions limit the grade, but none are worthy of specific mention. NGC has certified just 53 examples numerically finer (9/14).
Ex: Long Beach Signature (Heritage, 9/2009), lot 1830. NGC ID# 26AV, PCGS# 8976

1876-CC Double Eagle, AU50

- 5078 1876-CC AU50 NGC. Variety 1-A.** The 1876-CC is one of the more plentiful double eagles from the Carson City Mint, due in part to quantities being discovered in overseas bank hoards, therefore the issue is ideal for the collector seeking a single representative from this mint. This AU example retains strong design definition and displays rich honey-gold color. A number of light, scattered abrasions accompany the grade. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU58
Semiprooflike Fields

- 5079 1876-CC AU58 PCGS. CAC. Variety 1-A.** A highly lustrous example of this popular Carson City issue, this nearly uncirculated 1876-CC double eagle displays essentially complete detail with substantial semiprooflike mirroring in the fields. Light, scattered abrasions accompany the grade, but are not particularly detracting. NGC ID# 26AW, PCGS# 8977

1882-S Double Eagle, MS62
Seldom Seen Finer

- 5080 1882-S MS62 PCGS. CAC.** This popular San Francisco issue is moderately available in grades of MS62 and lower, but becomes distinctly scarce in finer states of preservation. This representative displays frosty green-gold luster and boldly detailed motifs. As the grade suggests, scattered abrasions are present, largely on the obverse. PCGS has seen 41 numerically finer submissions (8/14). NGC ID# 26BG, PCGS# 8998

1883-S Twenty Dollar, MS63

- 5081 1883-S MS63 PCGS. Small Squat S.** Examples with a Tall S are also known, and judging by our auction archives, are approximately equal in scarcity. The present Select double eagle offers dynamic cartwheel luster and a sharp strike. Sea-green margins frame rich pumpkin-gold fields and motifs.
Ex: Baltimore Signature (Heritage, 7/2003), lot 10664, which realized \$5,761.50. NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, AU58
Popular Type Issue

- 5082 1884-CC AU58 PCGS.** This Carson City issue had a fairly low mintage of 81,139 pieces, but examples are readily available in grades up to MS61, according to Garrett and Guth. This AU58 example would make a fine type representative for a reasonable amount of money, while higher-graded coins are prohibitively expensive. An attractive, richly toned example with nearly full mint luster and minimal high-point rub apparent on both sides. NGC ID# 26BK, PCGS# 9001

**1885-S Liberty Twenty, MS63+
Elusive Issue in Finer Grades**

- 5083 1885-S MS63+ PCGS. CAC.** The 1885-S Liberty double eagle is a plentiful issue in circulated grades, but it becomes rare at the MS64 level, making this high-end Select example a good balance of value and quality. The design elements are sharply detailed and the lustrous orange-gold surfaces show a number of well-scattered minor contact marks. PCGS has graded 34 numerically finer examples (9/14). NGC ID# 26BP, PCGS# 9005

**1887-S Double Eagle, MS62
Sharp and Lustrous**

- 5084 1887-S MS62 PCGS.** The San Francisco Mint was the sole facility to coin double eagles for circulation 1887 (283,000 pieces), and most examples experienced extensive circulation. These factors account for significant pressure from date collectors and make Mint State representatives widely sought-after. Peach-gold and mint-green shadings color the lustrous surfaces. The design definition is full, and marks are lightly scattered throughout. NGC ID# 26BS, PCGS# 9007

**1888-S Double Eagle, MS63
Exceptional Premium Quality Example**

- 5085 1888-S MS63 PCGS.** Exceptional eye appeal is the hallmark of this conservatively graded Select Mint State coin from the San Francisco mint facility. Beautiful cartwheel luster enhances light orange-gold surfaces. The strike definition is sharp and nearly full throughout, save for a couple of the obverse stars. Considering the assigned grade level, the few surface marks seen are minimal indeed. NGC ID# 26BU, PCGS# 9009

**1888-S Double Eagle, MS64
Seldom Seen This Well-Preserved**

- 5086 1888-S MS64 PCGS.** As is characteristic of many double eagle issues from the 1880s, the 1888-S is a high-mintage (more than 859,000 pieces), but conditionally elusive date. Examples can be located in the MS61 to MS62 grade range with ease, and are still encountered with some frequency at the MS63 level; Choice examples, however, are distinctly scarce, and finer pieces are nearly unknown. This representative is sharply struck with pleasing olive-gold color and rose-tinted overtones. A few scattered luster grazes preclude a Gem grade, though the eye appeal is undeniable. Population: 57 in 64 (1 in 64+), 0 finer (9/14). Ex: FUN Signature (Heritage, 1/2005), lot 9749. NGC ID# 26BU, PCGS# 9009

1889-CC Twenty Dollar, AU58

- 5087 1889-CC AU58 PCGS. Variety 1-A.** A moderate mintage of 30,945 pieces marked the resumption of Carson City production in the latter part of 1889 — the first double eagles struck with the CC mintmark since 1885. This bright, yellow-gold example is semiprooflike with only small abrasions dotting the fields and devices and no heavy marks. Considerable mint luster remains over the well-struck surfaces. NGC ID# 26BV, PCGS# 9011

1889-S Double Eagle, MS64+
Lustrous, Near-Flawless Example

5088 1889-S MS64+ PCGS. This is a gorgeous, flashy example with intense cartwheel luster and near-flawless orange-gold surfaces that display crisply defined motifs. A hair-thin die line extends from around 8 o'clock on the reverse rim through the lower parts of UNITED back to the rim at approximately 10 o'clock; and a faint pin mark resides just above star 1 on the obverse. A rare date at this level until the recent discovery of the Saddle Ridge Hoard, which resulted in the certification by PCGS of at least 10 pieces at 64+, and at least five more at MS65. Population: 71 in 64 (17 in 64+), 5 finer in 65 (9/14). NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS64+
High-End Quality

5089 1889-S MS64+ PCGS. Until the Saddle Ridge Hoard was discovered and conserved, no MS65 examples of this San Francisco date were certified by either PCGS or NGC. At the time, this non-hoard coin was tied for the finest known of the issue by virtue of its PCGS Plus designation.

Five Saddle Ridge examples have since certified as MS65 at PCGS (including two coins with the Plus designation). At least one other Saddle Ridge coin has crossed over to NGC at the MS65 level. In total, more than 350 examples of the 1889-S double eagle were found among the 1,400-plus Saddle Ridge coins.

The present coin is of more traditional origin, and displays a wonderful, medium-gold patina with frosty, cartwheel luster. The fields and fully struck motifs are free of all but a few tiny, pinpoint abrasions. The eye appeal is tremendous. Population (including Saddle Ridge coins): 71 in 64 (17 in 64+), 5 finer (9/14). NGC ID# 26BW, PCGS# 9012

**1889-S Double Eagle, MS64+
Very Nearly Gem Quality**

5090 1889-S MS64+ PCGS. CAC. Prior to the discovery of the Saddle Ridge Hoard, this Plus-graded MS64 example of the 1889-S double eagle was outpaced only by two MS65 coins at NGC. The hoard yielded several hundred representatives of the date, most being in MS63 or lower grades, but five Gem examples were recovered and certified by PCGS, these now being the only coins at that service that are numerically finer than this piece (9/14). Glowing mint frost in shades of honey and yellow-gold engulfs each side, exhibiting only a few faint luster grazes on Liberty's cheek. The design elements are sharply defined, contributing to the overall intense visual appeal. Population: 71 in 64 (17 in 64+), 5 finer (9/14). NGC ID# 26BW, PCGS# 9012

**1889-S Twenty Dollar, MS65
Brilliant and Lustrous**

5091 1889-S MS65 NGC. Ex: Saddle Ridge Hoard. The incredible California Saddle Ridge Hoard yielded more than 1,400 gold coins including over 350 examples of the 1889-S double eagle. A half dozen of those coins are currently among the finest certified. As seen with other Saddle Ridge Hoard coins, the surfaces of this example are brilliant, boldly struck, and nearly free of abrasions. Light, wheat-gold color covers both sides with a few barely noticeable orange accents, and the coin displays strong cartwheel luster. A few tiny marks on the obverse may be the result of coin-to-coin contact from 100 years of storage in a buried tin can, but these marks are shallow and non-distracting. A small alloy spot is noted beneath the 9 in the date. Census: 2 in 65, 0 finer (9/14). PCGS# 109012

1890 Double Eagle, MS63
Only Four Numerically Finer at PCGS

5092 1890 MS63 PCGS. Double eagle production at the Philadelphia Mint in 1890 amounted to only a little more than 75,000 pieces, fewer than were even produced at the small Carson City branch that year. Mint State survivors are occasionally seen, but are almost always in MS62 and lower grades; MS63 pieces are rare, and finer coins are exceedingly so. This radiant, frosty representative showcases rich orange-gold luster and boldly detail motifs. A few surface grazes in the left obverse field preclude a finer grade, but do not overly inhibit the eye appeal. Population: 38 in 63, 4 finer (8/14). NGC ID# 26BX, PCGS# 9013

1890-CC Double Eagle, AU58
Attractive, Original Patina

5093 1890-CC AU58 NGC. CAC. Thick mint frost imparts a softly lustrous, natural green-gold patina to this near-Mint twenty. Abrasions are few and minor, with a single small nick near the eye the only mark worth individual mention. Sharp detail remains on both the obverse and reverse motifs. More available than some Carson City twenties, the issue is nevertheless a collector favorite and high-end, original pieces like this one always draw strong interest from collectors and specialists. NGC ID# 26BY, PCGS# 9014

1890-S Double Eagle, MS63
Conditionally Elusive

5094 1890-S MS63 PCGS. The 1890-S is another San Francisco issue that is moderately available in the lower Mint State levels, but becomes increasingly scarce the further one advances the grade scale. This sharply struck Select example displays frosty green-gold luster around the margins, with softer rose-gold hues in the centers. A few minor grazes on the obverse limit the grade. Finer examples are scarcely seen. NGC ID# 26BZ, PCGS# 9015

1890-S Twenty Dollar, MS65+
Former Finest-Known Example

5095 1890-S MS65+ PCGS. Nearly 100 1890-S double eagles were unearthed as part of the amazing Saddle Ridge Hoard, including two MS66 coins (one with the Plus designation, one without) that were certified by PCGS. Those exceptional examples surpassed the present Gem coin that had previously laid claim to the top spot in the population (by virtue of its Plus-graded status).

While the Saddle Ridge Hoard coins are without doubt impressive, this remarkable coin retains the qualities that for many years set the bar high for technical merit and original appeal. Sumptuous honey-gold patina embraces both sides of the coin, which are for all purposes unmarked and radiantly lustrous. The strike is absolutely full, bolstered by fields that gleam with prooflike character. It remains as the finest non-Saddle Ridge example. Population (non-Saddle Ridge): 4 in 65 (1 in 65+), 0 finer (9/14). NGC ID# 26BZ, PCGS# 9015

1890-S Double Eagle, MS64+
Vibrant Mint Bloom
Ex: Saddle Ridge Hoard

5096 1890-S MS64+ NGC. CAC. Ex: Saddle Ridge Hoard. Prior to the discovery of the Saddle Ridge Hoard, the 1890-S double eagle was moderately available in grades through MS63, due to numerous examples surviving in overseas bank vaults, but was rare in Choice or finer condition. The Hoard yielded a small number of additional high-grade pieces, though the date remains scarce at the MS64 level, and Gem-quality examples are still firmly within the rare category.

In terms of eye appeal, the coins pedigreed to the Saddle Ridge Hoard are seemingly unrivaled, with many exhibiting vibrant mint bloom and razor-sharp strikes. This high-end near-Gem example is an outstanding coin in that regard, and is limited numerically only by a few light luster grazes on the cheek and the adjacent field. Overall, NGC has encapsulated only 12 1890-S double eagles in MS64 (5 in 64+), with just two finer (9/14). PCGS# 109015

1890-S Double Eagle, MS65
Mint-Fresh Hoard Coin

5097 1890-S MS65 PCGS. CAC. Ex: Saddle Ridge Hoard. The recent Saddle Ridge find yielded 14 of the 18 highest-graded 1890-S double eagles PCGS has ever seen. This coin is one of 97 examples of the issue that came out of the ground. In all, more than 1,400 gold coins were discovered in a total of eight large cans, where they were preserved for more than 100 years — and many remained in pristine condition.

Several finest-known coins were found in the hoard, including an 1866-S No Motto double eagle valued at nearly \$1 million. The present coin is tied as third-finest numerically of the 1890 San Francisco issue. Splendid mint bloom remains over the yellow-gold surfaces, which are semiprooflike, nearly mark-free, and fully struck. A few tiny ticks above the date are hardly worth mentioning. Housed in the original, special gold-labeled PCGS holder. Population: 16 in 65 (6 in 65+), 2 finer (9/14). PCGS# 109015

1892-S Double Eagle, MS64
Ex: Saddle Ridge Hoard

5098 1892-S MS64 NGC. Ex: Saddle Ridge Hoard. The discovery of the Saddle Ridge Hoard added several dozen high-grade 1892-S double eagles to the population reports, though the issue remains scarce at the Choice level, and is decidedly rare any finer. This near-Gem representative showcases the radiant yellow-gold luster that the Hoard coins are known for, with bold design definition, and only a few faint grazes on the cheek to limit the grade. As a date, NGC has certified 74 examples in MS64 (15 in 64+, 1 in 64+★), with only six finer (9/14). NGC ID# 26C7, PCGS# 9021

1892-S Double Eagle, MS64+
Rarely Encountered in Finer Grades

5099 1892-S MS64+ PCGS. CAC. The 1892-S double eagle is another issue that was fairly well-represented in the Saddle Ridge Hoard. More than 100 examples were recovered, and while the date is now slightly more available in Choice condition than it was before the discovery, Gem examples are still rare on the market. The 1892-S twenty is also known for sharp strikes and vibrant luster, and this Plus-graded Choice example does not disappoint in that regard. A few faint grazes on the cheek preclude a Gem grade assessment from PCGS, but hardly inhibit the overall eye appeal which, on this coin, is exceptional. PCGS has certified only 11 numerically finer representatives, including eight pieces pedigreed to the Saddle Ridge Hoard (9/14). NGC ID# 26C7, PCGS# 9021

**1892-S Twenty, Vibrant MS64+
Ex: Saddle Ridge Hoard**

- 5100 1892-S MS64+ PCGS. CAC.** Ex: Saddle Ridge Hoard. The famous Saddle Ridge Hoard yielded some of the most well-preserved examples of this San Francisco issue known to numismatists, and these coins are highly sought-after by advanced double eagle collectors. Vibrant, frosty mint bloom and razor-sharp strikes are not uncommon for coins pedigreed to the hoard, and this Plus-graded representative, housed in a special gold label holder, is a beautiful specimen in that regard. Only a few “glassy” luster grazes on the cheek preclude full Gem status, leaving this piece with the overall appearance that it was just struck yesterday. Whether one is seeking a coin specifically from the hoard or just an impeccable example of the 1892-S double eagle, this coin will fill the bill perfectly. Population: 39 in 64 (16 in 64+), 8 finer (9/14). NGC ID# 26C7, PCGS# 9021

**1893-S Double Eagle, MS64
Essentially Unobtainable in Finer Condition**

- 5101 1893-S MS64 PCGS. CAC.** As banks were failing and the stock market crashed, an event known today as the “Panic of 1893,” the San Francisco Mint struck just under 1 million double eagles for overseas trade. The issue is readily encountered up to the Select grade level, yet PCGS has certified only 44 coins in MS64 and two pieces finer (8/14). This Choice example exhibits peach-gold color overall with khaki elements. Typical S-mint frost rolls over each side, and the design motifs show bold definition on the stars and hair curls. A small group of minute ticks is concentrated in the left reverse field below the eagle’s wing. NGC ID# 26CA, PCGS# 9024

1895-S Double Eagle, MS64
Rarely Encountered Finer

- 5102 1895-S MS64 NGC. CAC.** With a mintage in excess of 1.1 million coins, the 1895-S double eagle is easily obtainable in lower Mint State grades, but its availability declines at the Choice level, and finer pieces are rare. This near-Gem example displays sharp motifs and vibrant honey-gold luster. A few minor marks on the obverse define the grade. NGC has encapsulated only nine numerically finer representatives (8/14). NGC ID# 26CE, PCGS# 9028

1895-S Double Eagle, MS64+
Rare in Finer Grades

- 5103 1895-S MS64+ PCGS. CAC.** The 1895-S is a notable condition rarity from the final years of the 19th century, being relatively available in grades through MS64, but becoming distinctly rare in finer condition. This Plus-graded Choice example displays frosty apricot-gold luster and sharply impressed motifs. A few minor abrasions on Liberty's cheek limit the grade, but are not overly detracting. PCGS has encapsulated just eight numerically finer representatives (8/14). NGC ID# 26CE, PCGS# 9028

1899 Twenty Dollar, MS65
Original Surfaces, Sharply Struck

- 5104 1899 MS65 NGC.** The mintage was relatively high for the 1899 twenty with 1.6 million pieces struck. However, few Gems are known and the ones that do exist (such as this piece) are in strong demand by 19th century type collectors. The soft mint frost has original "skin" with subtle orange and golden-tan patina. Sharply struck throughout with no obvious marks. Census: 76 in 65, 2 finer (9/14). NGC ID# 26CM, PCGS# 9035

1901-S Twenty Dollar, MS64
Extremely Rare Any Finer

- 5105 1901-S MS64 NGC. CAC.** In writing their *Encyclopedia of U.S. Gold Coins*, Garrett and Guth explain: "Although the mintage for the 1901-S double eagle is far higher than for the 1901 Philadelphia issue, the 1901-S coins are considerably rarer in choice condition." This coruscating near-Gem shows peach-gold surfaces and sharply defined motifs; only the eagle's neck and talons are somewhat shallow. Each side is lightly marked but nonetheless eye-appealing. Housed in a former generation holder with a few unimportant edge cracks. Census: 67 in 64, 4 finer (8/14). NGC ID# 26CT, PCGS# 9040

1904 Double Eagle, MS66
Only Three Numerically Finer

- 5106 1904 MS66 PCGS.** The 1904 double eagle is far and away the most plentiful Type Three issue, and is often chosen for type representation. This Premium Gem example displays bold design definition and vibrant honey-gold luster. A few light grazes on the obverse are seemingly all that limit the grade. Housed in a green label holder. PCGS has certified only two numerically finer representatives (9/14). NGC ID# 26CY, PCGS# 9045

1905-S Twenty Dollar, MS64+
Lustrous and Sharply Detailed

- 5107 1905-S MS64+ PCGS.** From a mintage of 1.8 million coins, the 1905-S is scarce in Choice condition, and PCGS has awarded a Plus designation to only 11 examples. The same service has graded just 12 coins finer (8/14). This luminous representative features gorgeous orange-gold color with green and lilac accents. The strike is bold, with full star centers and minimally marked surfaces. NGC ID# 26D3, PCGS# 9048

1906-D Double Eagle, MS64
Conditionally Rare Any Finer

- 5108 1906-D MS64 NGC.** The 1906-D double eagle is most often seen in the MS62 and MS63 grade range; Choice examples are available, but hardly plentiful, and finer coins are decidedly rare. This near-Gem representative boasts sharp design definition and rich apricot-gold luster over frosty surfaces. A few abrasions on Liberty's cheek limit the grade, the most notable being a small cut near the mouth. NGC has seen just 15 numerically finer submissions (8/14). NGC ID# 26D5, PCGS# 9050

1906-S Double Eagle, MS64+
Exceedingly Rare Any Finer

- 5109 1906-S MS64+ PCGS.** The 1906-S double eagle is only marginally elusive in Choice condition, but the sheer rarity of finer examples drives strong demand for high-end MS64 coins. This Plus-graded representative displays radiant orange-gold luster and sharply impressed design elements. A few faint surface grazes on the obverse limit the grade, but hardly inhibit the overall appeal. PCGS has certified only six numerically finer examples (9/14). NGC ID# 26D6, PCGS# 9051

1907-S Double Eagle, MS64+
Attractive Cartwheel Luster

- 5110 1907-S MS64+ PCGS. CAC.** Similar to the 1906-S, the 1907-S double eagle is not overly challenging in Choice condition, but Gem-quality coins are rare. This Plus-graded representative displays frosty honey-gold luster and sharp motifs. A few faint grazes on the cheek are the grade-limiting factor, as usual, though the eye appeal is seemingly uninhibited. PCGS has seen just nine numerically finer submissions (9/14). NGC ID# 26D9, PCGS# 9054

PROOF LIBERTY DOUBLE EAGLE

1872 Double Eagle, PR64 Exceedingly Rare Proof Issue

5111 1872 PR64 PCGS. CAC. Proof Liberty double eagles are among the rarest and most sought-after gold coins in American numismatics, and this is especially true for the issues from the 1860s and 1870s. Profoundly low mintages are amplified by even lower survival rates, making many of these issues prohibitively rare in any condition.

The 1872 proof is an excellent representative of this; a paltry 30 coins were struck, all once part of complete gold proof sets. Virtually all of these sets have since been dispersed, and the individual double eagles trade hands only on a limit basis, drawing strong bidder attention when they appear at auction. The exact number known to survive is difficult to trace, though most estimates peg to count at only eight to 12 pieces, two of which are unattainably housed in the Smithsonian Institution and the American Numismatic Society Collection. The certified population reports suggest the existence of eight gradable examples in private hands (8/14), a total that seems in line with the overall survival estimates, though it is possible one or two of these are the result of resubmissions. The large value increases between succeeding grades makes them a favorite for upgrade attempts.

The typical piece, when found, exhibits moderate to bold cameo contrast, and while some coins are cleaned or impaired, a few are known with well-preserved surfaces, though these are exceedingly rare. The coin here offered, however, is such an example, displaying undeniably original apricot-gold patina over frosty devices and deeply mirrored fields. Housed in an old green label holder, the coin is not designated as a Cameo, though the field-motif contrast is obvious. A few wispy hairlines in the fields (not from cleaning) preclude a Gem grade assessment, though these are undetectable to the unaided eye. A small alloy stain in the dentils below the W in TWENTY serves as a possible pedigree identifier.

It is a rare occurrence when an example of this proof issue appears at auction, especially in Choice or finer condition. A numerically comparable piece, certified PR64 by NGC, but also featuring an Ultra Cameo designation, was offered in Heritage's January 2006 Signature Sale as lot 3578, and brought an impressive \$103,500. This piece is equally well-preserved and, displaying attractive cameo contrast, should draw similar attention from the advanced gold specialist. Population: 1 in 64, 1 finer (8/14).

From The La Jolla Lady's Collection. NGC ID# 26DR, PCGS# 9087

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty, XF Details Wire Rim, Collectible Example

- 5112** 1907 High Relief, Wire Rim — Edge Damage — NCS. XF Details. The bright yellow and orange-gold surfaces retain partial luster, and the devices show strong detail. Grade-consistent friction occurs over Liberty's breast and the eagle's plumage. The holder allows for inspection of the rim, which reveals myriad nicks and flattening of the wire rim in a number of places, but this hardly affects the overall beauty of the coin. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, Unc Details Wire Rim, Few Noteworthy Marks

- 5113** 1907 High Relief, Wire Rim — Cleaning — PCGS Genuine. Unc Details. The wire rim is fully intact around both sides. Light lemon-yellow color and subdued, satin luster blend over the surfaces of this High Relief Saint-Gaudens representative. A handful of wispy marks from the noted cleaning are scattered throughout, but they are minimally distracting. This is an excellent opportunity to acquire an Uncirculated example of one of the most well-known and in-demand coins ever produced. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS62 Wire Rim Variety

- 5114** 1907 High Relief, Wire Rim MS62 PCGS. Demand for High Relief double eagles was high from the moment they were first struck. Bags containing 250 coins each were shipped to sub-treasuries and banks, which distributed the coins to individuals. The limit was set at five coins per person (reminiscent of today's limited release Mint products), but this failed to prevent the new twenty dollar coins from selling out within hours. Mint officials worked longer hours and even Sundays to keep pace with the demand. By the end of December, the Mint had struck approximately 12,000 coins. This mint condition Wire Rim example features radiant honey-gold surfaces and razor-sharp definition over the devices. Marks are surprisingly scant for the grade, and they are generally limited to the outer edges. NGC ID# 26F2, PCGS# 9135

**1907 High Relief Double Eagle, MS64
Wire Rim, High-End for the Grade**

5115 1907 High Relief, Wire Rim MS64 PCGS. Struck between November and December under the authority of recently appointed Mint Director Frank Leach, the High Relief Wire Rim coins were among the first run of double eagles struck but perceived as defective because of the excess metal encompassing the edges. This was later corrected, resulting in the Flat Rim variety. Today, both the Wire Rim and Flat Rim variants are considered among the most beautiful coins ever produced. Medium yellow-gold color and satin luster blend over each side of this Choice example. The high relief design elements are sharply detailed from multiple strikes, and a small tick on Liberty's thigh is most likely the only flaw that prevents a higher grade. Beautifully preserved. Housed in a green label holder. NGC ID# 26F2, PCGS# 9135

**MCMVII High Relief Double Eagle, MS64+
Tack-Sharp Wire Rim Example**

5116 1907 High Relief, Wire Rim MS64+ NGC. Subjected to three to five blows from the dies, Saint-Gaudens' double eagles were produced with a beautiful medallion relief reminiscent of some of the ancient Greeks' coinage, and are widely considered to be the most majestic of all United State gold issues. The extreme force with which each coined was struck caused small amounts of metal from the planchet to be forced up between the die face and the collar, produced a thin "fin" of metal around the rim of the coin. Despite the Mint's efforts to remedy the "problem," the vast majority of the High Relief double eagles were produced with this Wire Rim.

The coin here offered exhibits a sharp fin around each side, with remarkable boldness across the central design features. Satiny honey-green luster engulfs each side, while the surfaces are free of all but the most minute grazes. This is an immensely appealing near-Gem example, and will be a cornerstone piece in a fine Saint-Gaudens date or type set. NGC ID# 26F2, PCGS# 9135

**MCMVII High Relief Twenty Dollar, MS62
Flat Rim Variant**

- 5117 1907 High Relief, Flat Rim MS62 PCGS.** After a series of unsatisfactory results from testing Saint-Gaudens' high relief design, President Roosevelt wrote to the sickly sculptor. The letter, dated May 8, 1907, requested Saint-Gaudens venture from Cornish, New York to Philadelphia to make the appropriate modifications to the models. In his reply, the artist expressed his regret for not being able to make the trip: "Greatly as I should like to please you, I feel that I cannot now model another design in profile for the Twenty Dollar gold piece." He continued, "I am grieved that the striking of the die did not bring better results. Evidently it is no trifling matter to make Greek art conform with modern numismatics." By the end of 1907, however, the matter would be resolved, as evidenced by the coin here offered.

This beautiful Flat Rim representative, which replaced the thought-to-be defective Wire Rim coins, offers lustrous orange-gold surfaces without any singularly distracting marks. Boldly impressed and highly appealing. PCGS# 9136

PROOF HIGH RELIEF DOUBLE EAGLES

**MCMVII High Relief Saint-Gaudens Twenty
Razor-Sharp Choice Proof**

- 5118 1907 High Relief PR64 NGC. CAC.** Mint records do not confirm the production of any High Relief double eagles in proof format (not counting, of course, the Ultra High Relief proofs), though a small number of examples have been so-designated by NGC. Among the diagnostics for a proof, outlined in Dr. Robert J. Loewinger's *Proof Gold Coinage of the United States*, are: the complete absence of die erosion, unusually pronounced die-polishing marks (appearing in swirling patterns in the fields), and a build-up of metal around the peripheries, just inside the outer-most rim (caused by the immense pressure sustained from multiple die impressions).

This coin is an exact match to these diagnostics. The devices are produced in full medallion relief, beautifully showcasing Saint-Gaudens' majestic designs. Satiny, yellow-gold luster engulfs each side, and grade-limiting surface grazes are faint and evenly dispersed overall. For the grade, this piece is highly appealing, and represents the closest thing to the designer's original models that most collectors will ever have the chance to acquire. Housed in a prior generation holder.

From The La Jolla Lady's Collection. PCGS# 9132

MCMVII High Relief Saint-Gaudens Double Eagle, PR67 ★
Wire Rim, Only Three Proofs Certified Finer

5119 1907 High Relief PR67 ★ NGC. Despite the economic hardships of the period, President Theodore Roosevelt remained committed to the process of completing the new, majestic ten and twenty dollar gold coins he and acclaimed sculptor Augustus Saint-Gaudens had worked on for over two years. Newly appointed Mint Director Frank Leach, in an effort to prove himself and to quell the president's anxieties, set his sights on expediting the design transition. According to Michael Moran, writing in *Striking Change* (2008):

"Frank Leach wasted no time. On that same Friday, by order of the president, he instructed the Mint to use every facility at its command to strike high-relief \$20 gold pieces using the second model as modified at Landis' suggestion... It was Leach's intention to strike five or six thousand of the new \$20 gold coins on the medal press by the first week in December to satisfy Theodore Roosevelt."

In total, the Mint struck 12,367 High Relief double eagles between late November and early December 1907, of which there are two varieties. The Wire Rim coins were struck with a "fin" of metal around the rim, a characteristic perceived as a defect by the Mint, which was later remedied by thickening the edges of the planchets. The second variety, struck after the modification, is referred to as the Flat Rim variant.

Much controversy exists as to whether or not some of the High Relief coins were struck as proofs or if all were coined as circulation strikes. While PCGS does not recognize the existence of High Relief proofs, approximately 10% of the certified population at NGC has been encapsulated with a Proof designation. Of these, only 15 examples are reported in PR67 (one in PR67+, two in PR67 ★), and just three are certified finer (8/14).

This amazing Superb Gem representative is an exact match to the proof characteristics described on page 77 of Dr. Robert J. Loewinger's *Proof Gold Coinage of the United States*. Among the attributes listed are unusually bold, swirling die polish lines, uniform satin surfaces with no signs of the usual radial flow lines, sharp inner borders, and a full strike on all relief details.

This piece is incredibly detailed with definition that is even more bold than is typically seen on the "regular" High Reliefs. Glowing luster emanates from the satiny, yellow-gold surfaces, and marks are essentially nonexistent. A minute tick on the right portion of the eagle's wing serves as a future pedigree marker. Overall, this is an excellent opportunity to acquire one of the most prized coins in American numismatics and, more broadly, an unparalleled work of art by one of the most famous sculptors in American history.

Ex: *The Southerly Collection* (Bowers and Merena, 3/2009), lot 4013.

From *The Pannonia Collection, Part Two*. PCGS# 9132

SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Twenty, MS66 Well-Struck and Appealing

- 5120 1907 Arabic Numerals MS66 PCGS.** This satiny example has a distinctly mattelike appearance, and lovely antique-gold and pale rose toning combined across each side. The design motifs are boldly struck, with Liberty's fingers, toes, and hair tresses fully defined. The first Saint-Gaudens twenty-dollar design type to be produced in large numbers, with 361,667 struck; and a fair number were saved by collectors. NGC ID# 26F5, PCGS# 9141

1907 Double Eagle, MS66 Lustrous, Frosted Bold Strike

- 5121 1907 Arabic Numerals MS66 NGC.** A two-year type with the No Motto design, just 361,667 of the 1907 Arabic numerals Saint-Gaudens double eagle were struck compared to more than 4 million of the 1908 No Motto Philadelphia issue. Still, both No Motto dates are readily available thanks to many hoarded survivors both domestically and in foreign hands. This example is an attractive and fully struck Premium Gem. Liberty's torch hand shows full details and the Capitol building is bold. The eagle displays sharp feather detail. Only a few small marks widely scattered across the lustrous, sun-gold surfaces prevent an even higher grade. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Twenty Splendid, High-End Premium Gem

- 5122 1907 Arabic Numerals MS66+ NGC.** This frosted, honey-gold example is aesthetically and technically pleasing in all ways. The smooth, unabraded surfaces are boldly struck and awash in coruscating luster. Reddish tints highlight the nearly unimprovable fields and devices. The Plus designation from PCGS suggests this Arabic numerals double eagle is close to the next highest grade, quite an achievement considering just 17 coins are certified numerically finer by PCGS from more than 14,500 submissions (8/14). NGC ID# 26F5, PCGS# 9141

1908 No Motto Twenty, MS67 Essentially Flawless, Two-Year Subtype

- 5123 1908 No Motto MS67 PCGS.** Short Rays Obverse. The 1908 No Motto issue is fairly plentiful in most grades, but not so in Superb Gem condition. Rich sun-gold coloration covers each side and shows splashes of lavender accents throughout. All design elements are well brought-up; the Capitol displays full columns, and Liberty's foot is sharply detailed. An essentially flawless two-year subtype representative. Population: 69 in 67 (2 in 67+), 2 finer (8/14). *From The Pannonia Collection, Part Two.* NGC ID# 26F6, PCGS# 9142

1908 No Motto Double Eagle, MS67 From 'The Wells Fargo Hoard'

- 5124 1908 No Motto, Wells Fargo Nevada MS67 PCGS.** Ex: Wells Fargo Nevada Gold. Some of the finest examples of this No Motto issue are from the famous Wells Fargo Hoard, and this Superb Gem is an excellent representative in that regard. Satiny honey-gold luster blankets beautifully preserved surfaces, while the central motifs are equally well-produced. An attractive, high-end type representative. PCGS# 99142

1908 No Motto Twenty Dollar, MS67 Wells Fargo Hoard Representative

- 5125 1908 No Motto, Wells Fargo Nevada MS67 PCGS.** Ex: Wells Fargo Nevada Gold. Short Rays obverse. The extraordinary preservation of the Wells Fargo hoard is mysterious, since gold coins struck for commerce typically left the Mint already bagmarked. This gorgeous Superb Gem features lustrous, olive-gold fields and devices that are essentially devoid of contact. The strike is intricate aside from the leg feathers. A wonderful representative of the two-year No Motto subtype. *From The Pannonia Collection, Part Two.* PCGS# 99142

1908 No Motto Double Eagle, MS67
Ex: Wells Fargo Nevada Gold

- 5126** 1908 No Motto, Wells Fargo Nevada MS67 PCGS. Ex: Wells Fargo Nevada Gold. Short Rays obverse. A sharply struck Superb Gem that displays coruscating luster and medium olive and caramel toning. The surface preservation is exemplary aside from minor contact on Liberty's chest. Although a surprising number of high grade examples emerged from the Wells Fargo hoard, all remain in strong demand as representatives of the No Motto design. *From The Pamponia Collection, Part Two.* PCGS# 99142

1909-D Double Eagle, MS63+
Elusive in Finer Grades

- 5127** 1909-D MS63+ PCGS. A more challenging Denver issue, the 1909-D is elusive in grades finer than MS63, and Gems are rare. Many of the Mint State survivors originate from South American and European banks hoards, with the result that they are heavily abraded from being transported loosely in bags. This piece is sharply struck, with satiny yellow-gold luster and minimal abrasions. NGC ID# 26FD, PCGS# 9152

1910 Double Eagle, MS65
Luminous Frosty Surfaces

- 5128** 1910 MS65 NGC. CAC. Readily available in lower grades, the 1910 Saint-Gaudens twenty becomes somewhat elusive at the Gem grade level, and finer pieces are exceedingly rare, with NGC having seen only five such pieces, and PCGS just four (8/14). This representative displays frosty deep golden luster that is virtually unblemished by detracting abrasions. Liberty's knee is not fully formed, though the strike is otherwise well-executed. NGC ID# 26FF, PCGS# 9154

1910-S Twenty Dollar, MS65
Rarely Seen in Higher Grades

- 5129** 1910-S MS65 PCGS. The 1910-S is plentiful up to and including Gem condition because of its 2.1 million-coin mintage. Collectors, however, would be hard-pressed to locate anything finer, as PCGS has certified just nine coins in higher grades (8/14). Frosty luster enlivens the well-struck, honey-gold surfaces. Slight softness occurs on the Capitol dome, and marks are minimally scattered throughout. NGC ID# 26FH, PCGS# 9156

1911 Saint-Gaudens Twenty, MS64+
Lustrous and Well-Preserved

- 5130** 1911 MS64+ PCGS. CAC. The 1911 Saint-Gaudens double eagle is an underrated issue in high grade. This high-end Choice specimen exhibits sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces display a light orange-gold patina, with ample eye appeal. NGC ID# 26FJ, PCGS# 9157

1911 Double Eagle, MS65
Upper-End for the Grade

5131 1911 MS65 ANACS. The 1911 Saint-Gaudens double eagle is one of the more elusive issues in the pre-1915 With Motto issues; it is only moderately available in MS64, with Gem examples being scarce and finer pieces decidedly rare. Bag marks a problem with this date, and even many of the high-grade survivors exhibit these to a certain extent. This representative is remarkably well-preserved, even for the Gem grade level, with close examination needed to detect any signs of even minor contact. Shimmering, satiny luster engulfs each side in rich honey-gold hues, and the strike is sharply impressed.

Ex: Baltimore Signature (Heritage, 7/2003), lot 328. NGC ID# 26FJ, PCGS# 9157

1912 Double Eagle, MS65
Only Five Numerically Finer at PCGS

5132 1912 MS65 PCGS. The Philadelphia Mint produced only 149,750 double eagles in 1912 and, as no other mint struck the denomination that year, this issue is mandatory for a complete date set. The 1912 Saint-Gaudens twenty is also a condition rarity at the Gem grade level, and is only marginally available in the next-lower grade of MS64. Premium Gem examples are extremely rare and proportionately difficult to find.

This MS65 example showcases vibrant mint frost in shades of honey and peach-gold, with surfaces that are free of all but a few scattered luster grazes. The strike is well-executed, boasting sharp definition on the gown lines and the eagle's feathers. Population: 37 in 65, 5 finer (8/14). NGC ID# 26FM, PCGS# 9160

**1913 Saint-Gaudens Double Eagle
Near-Gem, Orange-Gold Example**

- 5133 1913 MS64 PCGS.** Given the unavailability of fully Gem coins from this Philadelphia issue, near-Gems with eye appeal are always in demand. This example displays rich, orange-gold toning and deep underlying luster for strong visual impact. Moderate abrasions account for the assigned grade, yet the “flash” factor is high for this wonderfully patinated twenty. PCGS has seen just 11 coins in numerically finer grades (8/14). NGC ID# 26FN, PCGS# 9161

**1913-S Double Eagle, MS64
Low-Mintage, Above Average Appeal**

- 5134 1913-S MS64 PCGS.** Just 34,000 pieces were produced by the San Francisco Mint in 1913, its second-lowest mintage of double eagles for the entire series since the rare 1908-S issue. Collectors and gold specialists flock to the date when Choice examples are available. This lustrous, orange-gold twenty shows none of the copper spots or other distractions that often plague the small mintage. A few moderate marks define the assigned grade, but overall this coin displays great eye appeal and sharp detail. Only 24 examples are certified numerically finer by PCGS (8/14). NGC ID# 26FR, PCGS# 9163

**1915 Twenty, MS64
Lustrous, Attractive Type Coin**

- 5135 1915 MS64 PCGS. CAC.** Boldly struck with apricot-gold, mint-green, and traces of lilac coloration, this near-Gem also displays impressive, vibrant mint luster and decently preserved surfaces for the grade. Reasonably available as a date at MS64, this issue becomes very scarce at MS65, and virtually unobtainable finer. NGC ID# 26FV, PCGS# 9167
-

1921 Saint-Gaudens Twenty, MS61
Sought-After Series Rarity
Seldom Encountered in Any Grade

5136 1921 MS61 PCGS Secure. Two significant economic shocks contributed to the famous “melt rarities” that appear late in the Saint-Gaudens double eagle series. While the Great Depression is the well-known culprit involved in the issues of the late 1920s and early 1930s, two less-known economic setbacks immediately following World War I were at work for a pair of low-availability issues, the 1920-S and the 1921. After the end of World War I, many combatant nations experienced a degree of economic recession as wartime production wound down and veterans returned to the labor pool. The United States had a brief recovery but experienced a depression for 18 months from January 1920 to July 1921.

The double eagle was functionally an international trade coin by 1914, when World War I broke out, and with submarine warfare threatening transatlantic shipping channels, it is little surprise that the double eagle went on hiatus. Philadelphia stopped making the denomination in 1915, with San Francisco following the next year. Double eagle production restarted in 1920 but ran right into the worsening economic conditions. While a number of Philadelphia double eagles from 1920 went into the stream of global commerce, the 1920-S and 1921 issues found little such usage, and when demand came again for twenties, the coins paid out were 1922 and 1922-S instead of their predecessors. As a result, the 1920-S and 1921 double eagles remained in government hands and were the earliest dates to suffer near-total destruction in the melting pots.

This piece displays even, although slightly subdued mint luster, and similarly even reddish-gold color. Relatively few marks account for the grade. The 1921 is a prize in any grade and this Uncirculated example will surely be the centerpiece of an advanced collection. Population: 7 in 61, 37 finer (9/14). NGC ID# 26G2, PCGS# 9172

**1925-D Double Eagle, MS63
Heavily Melted Issue**

- 5137 1925-D MS63 PCGS.** The 1925-D was a victim of the mid-1930s gold melts, and many of the Mint State pieces known today can trace their origin to long-held European bank hoards. The issue is most often seen in MS63 and lower grades, with finer pieces being scarce. Soft rose and honey-gold luster blankets each side of this frosty representative, while the design elements exhibit overall sharp definition. NGC ID# 26GB, PCGS# 9181

**1926-S Double Eagle, MS64+
Ex: Simpson, Tantalizing Eye Appeal**

- 5138 1926-S MS64+ PCGS Secure.** Ex: Simpson. Though the 1926-S is more accessible than a number of its later mintmarked brethren, there is little dispute that the date was affected negatively by the mass meltings of the 1930s. This lustrous Choice example's tantalizing sun-gold and lavender coloration brings the eye appeal close to the Gem level. Well-struck with few significant abrasions. PCGS has graded 35 numerically finer pieces (8/14).
Ex: *Boston Signature* (Heritage, 8/2010), lot 6379.
From *The Pannonia Collection, Part Two*. NGC ID# 26GF, PCGS# 9185

**1929 Double Eagle, MS62
Scarce Late-Series Issue**

- 5139 1929 MS62 PCGS.** The 1929 Saint-Gaudens double eagle is the first of the late-series rarities that comprise the issues from 1929 to 1932 (plus the ultra rare 1933, of which only one example is legal to own). More than 1.7 million examples were coined, but the vast majority were claimed and melted in the mid-1930s. Only a limited number of pieces survived, mostly via small hoards kept tightly from the grasp of the gold confiscation. The typical piece has light to moderate abrasions, and grades in the MS62 to MS64 range. This coin displays scattered ticks and grazes, but is actually quite appealing for the grade level, with vibrant apricot-gold luster and well-defined motifs. An attractive representative of this sought-after Philadelphia issue. NGC ID# 26GL, PCGS# 9190
-

COMMEMORATIVE SILVER

1893 Isabella Quarter, MS66+ Varying Shades of Gold Toning

- 5140 1893 Isabella Quarter MS66+ PCGS. CAC.** A beautifully preserved, sharply struck example of this first commemorative quarter issue, this Plus-graded Premium Gem displays pale champagne toning over the central regions, with deeper amber color around the margins. Many examples of this issue were carefully preserved following their issuance, with the result that a number Gem-quality coins survive; higher-grade pieces, however, are only marginally available. PCGS has seen only 45 representatives numerically finer than this coin (9/14). NGC ID# 28HR, PCGS# 9220

1893 Isabella Quarter, Toned PR64 Deeply Reflective Fields

- 5141 1893 Isabella Quarter PR64 NGC.** Only 104 proofs were struck of the Isabella quarter. Unquestionable proofs, and high-grade ones especially are scarce. NGC has only certified 18 PR64 examples with 11 pieces finer. One of the features that distinguishes proof coins from prooflike strikes is the mirrored triangular field to the left of the staff on the reverse. The mirrored fields considerably brighten the medium density blue-gray patina that covers each side. PCGS# 9221

1900 Lafayette Dollar, MS65 Moderate Patina

- 5142 1900 Lafayette Dollar MS65 PCGS. CAC. DuVall 1-B.** A luminous and intriguingly toned example of the first U.S. commemorative silver dollar, blue-gray and gold through the interiors with dappled russet hues close to the rims. Better-defined than usually seen on the central figures with only a few shallow marks on the portraits. Numerically finer coins are seldom seen. NGC ID# 28N8, PCGS# 9222

1935 Arkansas Half Dollar, MS67 Very Rare in Superb Gem Condition

- 5143 1935 Arkansas MS67 PCGS. CAC.** The Philadelphia Mint struck 13,012 Arkansas commemorative half dollars in 1935, the highest mintage for any issue in the five-year series. Still, the 1935-P is very rare in Superb Gem condition. Softly frosted luster glistens over the largely brilliant surfaces. The design motifs are sharply struck, and marks are almost non-existent. Population: 20 in 67 (3 in 67+), 0 finer (8/14). NGC ID# 28HW, PCGS# 9233

1939-D Arkansas Centennial Half, MS67 Rare at This Grade Level

- 5144 1939-D Arkansas MS67 PCGS.** The 1939-D Arkansas Centennial half dollar had a low distribution of only 2,100 coins (plus 4 pieces for assay purposes), and is proportionately rare in Superb Gem condition. This example displays boldly pronounced motifs, with satiny luster and well-preserved surfaces. Silky lavender and lemon-gold hues surround the peripheries, while the centers exhibit just a trace of light champagne color. Population: 8 in 67 (1 in 67+), 1 finer (9/14). NGC ID# 28JB, PCGS# 9250

1939-S Arkansas Half Dollar, MS67 None Finer at NGC

- 5145 1939-S Arkansas MS67 NGC.** The 1939-S Arkansas half dollar claims a low distribution of 2,105 pieces. This extraordinary Superb Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces that show highlights of pale gold and lavender toning. Eye appeal is exceptional. Census: 5 in 67, 0 finer (9/14). NGC ID# 28JC, PCGS# 9251

1936 Cincinnati Music Center Half, MS67
Among the Finest Certified

5146 1936 Cincinnati MS67 PCGS. Intended to celebrate the 50th anniversary of Cincinnati's title as a center of music, the 1936 Cincinnati Music Center half dollar is a notable condition rarity at the MS67 grade level, where PCGS has encapsulated only eight coins (1 in 67+), with none receiving finer assessments (8/14). This well-struck, satiny representative displays soft champagne toning over the obverse, with subtle rainbow hues around the upper-right border; the reverse shows lightly dappled olive-gold color. NGC ID# 28JZ, PCGS# 9283

1892 Columbian Half Dollar, MS67
Frosty, Highly Lustrous Representative

5147 1892 Columbian MS67 PCGS. Well-saved following its issue in conjunction with the World's Columbian Exposition, held in Chicago in 1893, the 1892 Columbian half dollar is readily available in most grades, but becomes conditionally rare at the MS67 grade level. This frosty, nearly untuned example displays well-detailed motifs and beautifully undisturbed luster in the fields. Population: 27 in 67 (5 in 67+), 0 finer (8/14). NGC ID# 26H5, PCGS# 9296

1893 Columbian Half Dollar, MS67
Beautiful Rainbow Toning

5148 1893 Columbian MS67 PCGS. The 1893 Columbian half dollar is slightly more available than its 1892 counterpart in lower grades, but becomes somewhat scarcer at the finer Mint State levels. This Superb Gem example boasts sharp design definition and moderate semiprooflike mirroring in the fields. The obverse showcases vivid rainbow peripheral toning around a nearly brilliant center, while the reverse shows more dispersed hues of the same beneath a veil of dusky golden-gray patina. Population: 17 in 67 (2 in 67+), 0 finer (8/14). NGC ID# 26H6, PCGS# 9297

1922 Grant With Star Half Dollar, MS65
Only 4,256 Coins Distributed

5149 1922 Grant With Star MS65 NGC. The With Star variant was distributed in significantly few numbers than its later No Star counterpart. Only 4,256 With Star coins were sold, as compared to over 67,000 No Star examples, making it one of the most elusive issues in the early commemorative series. A layer of dusky patina covers this Gem representative with green and gold accents. The strike detail is decidedly above-average, and marks are minimal. NGC has certified 60 examples in higher numeric grades (8/14). NGC ID# 28KC, PCGS# 9307

1928 Hawaiian Sesquicentennial Half, MS66
Original Holder Toning

5150 1928 Hawaiian MS66 PCGS. CAC. The mintage of 9,958 business strikes and 50 sandblast proofs was an immediate sellout, with most coins distributed through the Bank of Hawaii, Ltd. in Honolulu to island residents. Many coins were packaged in five-coin cardboard holders of the insert type, with half of the coin exposed. This example displays the typical yellow toning with deeper iridescent margins often imparted to coins kept in the original holders. Brightly lustrous with frosty appeal, the upper half of the obverse is more extensively toned than the lower half, as is the lower half of the reverse. An obviously original Premium Gem with strong appeal. Just six coins are certified numerically finer by PCGS and NGC combined (9/14). NGC ID# 28KE, PCGS# 9309

**1921 Missouri, MS66
Tied for Finest at PCGS**

- 5151 1921 Missouri MS66 PCGS. CAC.** Mildly iridescent, frosted, and essentially unmarked, this Premium Gem Missouri half is at the top of the grade for the issue. The frontiersman is boldly struck and fully brought up. Likewise, the reverse motifs show full details. The entire coin is imbued with satiny silver luster that glows with wonderful eye appeal. A "double green" holdered coin, with the PCGS green label and the green CAC-approved sticker. Population: 38 in 66, 0 finer (8/14). NGC ID# 28KS, PCGS# 9330

**1921 Missouri 2x4 Half, MS66
Outstanding High-End Example**

- 5152 1921 Missouri 2x4 MS66 PCGS Secure. Ex:** Bruce Scher. One of the finest certified examples of this key commemorative half issue, this MS66 PCGS coin, pedigreed to the famous Bruce Scher Collection, is sure to make series enthusiasts take special notice. This piece is still visible in the retired Scher Collection Registry Set, or collectors can enter the PCGS certification number 06636037 to view the PCGS TrueView image. Impeccable surfaces feature amber-gold and powder-gray patina with daubs of jade, an outstanding coin. Population: 32 in 66 (1 in 66+), 0 finer (8/14). NGC ID# 28KR, PCGS# 9331

**1939-D Oregon Trail Half Dollar, MS68
None Numerically Finer**

- 5153 1939-D Oregon MS68 NGC.** By 1939, collector interest in the Oregon Trail commemorative half dollars was declining, as the Denver Mint produced only 3,000 pieces that year (plus for coins for assay purposes), these being sold in three-coin sets with an example each from the Philadelphia and San Francisco facilities. This satiny example displays an essentially bold strike, with the rear-most upright of the wagon being the only point of minor weakness. Iridescent ice-blue and pale champagne toning graces each side, while the surfaces are free of any perceptible flaws. Census: 28 in 68 (14 in 68 ★, 2 in 68+★), 0 finer (9/14). NGC ID# 28LA, PCGS# 9353

**1939-D Oregon Trail Half, MS68
Among the Finest Certified**

- 5154 1939-D Oregon MS68 PCGS.** An immensely appealing representative of this popular commemorative, this 1939-D Oregon Trail half dollar displays rich, satiny luster and beautiful iridescent toning in shades of ice-blue, olive-gold, and pale amber. The strike is crisp, save for the very rear upright of the wagon, which is frequently soft, and the surfaces are seemingly flawless. Population: 23 in 68 (3 in 68+), 0 finer (8/14). NGC ID# 28LA, PCGS# 9353

**1927 Vermont Sesquicentennial Half, MS67
Only One Numerically Finer at PCGS**

- 5155 1927 Vermont MS67 PCGS.** Iridescent light golden toning engulfs each side of this boldly struck Superb Gem. Seemingly perfect surfaces and satiny luster complete the eye appeal. While not overly elusive in lower grades, the Vermont Sesquicentennial half dollar, issued to commemorate the 150th anniversary of the Battle of Bennington and the independence of Vermont, becomes a notable rarity at the MS67 level. Population: 30 in 67 (2 in 67+), 1 finer (8/14). NGC ID# 28M6, PCGS# 9401

**1950 Booker T. Washington Half, MS67
Tied for Finest Certified**

- 5156 1950 Booker T. Washington MS67 PCGS.** Distribution of the 1950 Booker T. Washington commemorative half totaled only 6,000 coins (plus four pieces for assay purposes), and those surviving at the lofty MS67 grade level are decidedly rare. This piece displays satiny luster with just a suggestion of light golden color, while the devices are sharply impressed. The lower jaw exhibits some of the usual roughness, though actual abrasions are near nonexistent. Population: 9 in 67, 0 finer (8/14). NGC ID# 28MK, PCGS# 9420

1936 Wisconsin Half Dollar, MS68

5157 1936 Wisconsin MS68 NGC. Iridescent shades create a pearl-like sheen over the silver surfaces of this deeply struck, frost-covered Superb Gem. The badger is bold, and the miner's hand strongly struck. Thick, satiny luster imparts a luminescent glow over the immaculate fields and devices. Census: 36 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (8/14). NGC ID# 28N6, PCGS# 9447

COMMEMORATIVE GOLD

**1903 Louisiana Purchase/Jefferson MS67
None Are Graded Finer at PCGS**

5158 1903 Louisiana Purchase/Jefferson MS67 PCGS. This is a lovely example of America's first commemorative gold issue, struck to celebrate the centennial of the historically important Louisiana Purchase. Two varieties were released in equal distributions of 17,500 pieces each, and this was the first of the two: showing a portrait of Thomas Jefferson on the obverse. A well-struck specimen showing intense, shimmering mint frost over both sides and clean, untouched yellow-gold surfaces. Population: 90 in 67 (1 in 67+), 0 finer (9/14). NGC ID# 26HA, PCGS# 7443

**1903 Louisiana Purchase/McKinley Gold Dollar, MS67
Beautifully Toned and Flawlessly Preserved**

5159 1903 Louisiana Purchase/McKinley MS67 PCGS. CAC. A great Superb Gem example of this early gold commemorative type, featuring a portrait of the recently-martyred President William McKinley. The design motifs are struck with exacting precision, as usual, and warm hues of orange-gold, rose, and mint-green adorn lustrous, flawlessly preserved surfaces. Population: 95 in 67 (2 in 67+), 2 finer (8/14). NGC ID# 26HB, PCGS# 7444

**1915-S Panama-Pacific Gold Dollar, MS67
None Numerically Finer**

5160 1915-S Panama-Pacific Gold Dollar MS67 PCGS. One of the five commemorative coins issued in conjunction with the Panama-Pacific International Exposition, held in San Francisco in 1915, the 1915-S Panama-Pacific gold dollar was struck to the limited extent of only 15,000 pieces. These were primarily distributed individually, though many were sold as part of commemorative sets containing one or more examples of each Exposition issue. This Superb Gem boasts virtually flawless surfaces and satiny honey-gold luster. The design elements are produced to full definition, and the eye appeal is correspondingly high. Population: 60 in 67, 0 finer (8/14). NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Quarter Eagle
Frosty High-End Choice Example**

- 5161** 1915-S Panama-Pacific Quarter Eagle MS64+ NGC. Produced at the San Francisco Mint in conjunction with the Panama-Pacific International Exposition, held in that city in 1915, this commemorative quarter eagle displays frosty golden luster and sharp design definition. A few faint surface grazes preclude full Gem status, though the unaided eye finds no visual complaints. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS67
None Numerically Finer**

- 5162** 1915-S Panama-Pacific Quarter Eagle MS67 NGC. Depicting designs by Charles Barber and George Morgan, the 1915-S Panama-Pacific quarter eagle was distribute to the limited extent of only 6,749 pieces. High-grade survivors are offered at auction with some frequency, though the issue does become scarce at the MS67 grade level, and none have been certified numerically finer. This representative showcases frosty golden luster and seemingly perfect surfaces. The design elements are boldly impressed, despite the shallow relief with which this issue was produced. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS67
Tied for Finest Certified**

- 5163** 1915-S Panama-Pacific Quarter Eagle MS67 NGC. This Panama-Pacific design is one of only two quarter eagles in the classic U.S. gold commemorative set, along with the 1926 Sesquicentennial. Variegated yellow-gold and apricot patination resides on both sides of this Superb Gem, each of which displays strong luster. This latter attribute is significant because many examples are dull. A sharp strike and well-preserved surfaces further add to the coin's appeal. NGC ID# 26HK, PCGS# 7450

MODERN BULLION COIN

**1995-W American Silver Eagle, PR70 Deep Cameo
Certified in a Popular 'Doily' Holder**

- 5164** 1995-W Silver Eagle PR70 Deep Cameo PCGS. "The statistics are grim ..." is a popular saying on the news media; for many people, in fact, *most* statistics make for grim reading. But the statistics regarding the 1995-W American Silver Eagle certainly tell its tale: Of the 30,000-plus sold in those one-off five-piece proof sets in 1995, PCGS has certified nearly 2,000 in PR69 Deep Cameo — but only 45 have attained the ultimate PR70 Deep Cameo grade (9/14). Given the overwhelming popularity of the American Silver Eagle series — seemingly nearly as popular as Morgan dollars with many collectors — the future for this small coterie of top-grade 1995-W coins looks quite bright. This piece shows optimal silver-on-black contrast on perfectly preserved surfaces. Certified in an old-style PCGS "doily" holder, this piece ought to garner considerable extra attention therefrom. Population: 45 in 70 Deep Cameo (9/14). NGC ID# 28WZ, PCGS# 9887

TERRITORIAL GOLD

1852/1 K-8 Humbert Ten, Very Fine
Bisecting Reverse Crack

5165 1852/1 Humbert Ten Dollar VF20 PCGS. K-8, R.4. A diagonal die crack virtually bisects the reverse between 12 and 5 o'clock. This crack is present on most if not all examples of K-8, which indicates that the reverse die held together despite its break. This wheat-gold representative displays even wear, but the eagle's wings show some plumage detail. Listed on page 386 of the 2015 *Guide Book*. PCGS# 10190

1852 Assay Office Ten, MS61
Rare Kagin-12 Variety

5166 1852 Assay Office Ten Dollar MS61 PCGS. K-12, R.6. Two die varieties of 1852 Assay Office tens are known. K-12 places the O in OFFICE beneath the N in UNITED. On K-12a, the O is beneath the I in UNITED. Both varieties share the same obverse die, but K-12a was struck first, since K-12 (as seen on the present coin) exhibits advanced peripheral die cracks relative to K-12a. K-12a is approximately five times more available than the rare K-12. The present sharply struck pumpkin-gold example displays minor marks on the open fields but is devoid of singularly relevant contact. Bright luster illuminates the legends and motifs. Listed on page 387 of the 2015 *Guide Book*. PCGS# 10001

1852 Wass, Molitor & Co. Ten, AU53
Large Head, Wide Date, K-4

- 5167** 1852 Wass Molitor Ten Dollar, Large Head, Wide Date AU53 NGC. K-4, R.5. The 1852 Wass, Molitor & Co. ten dollar gold pieces were struck in response to petitions by local businessmen to help alleviate an acute shortage of circulating coinage in the region (the firm was primarily an assay office). This AU53 example offers well-detailed design elements with the extensive network of die cracks on both sides usually seen on this issue. Like almost all examples seen, the reverse strike is much weaker than the obverse. The orange-gold surfaces reveal the expected number of minor abrasions and show a few hints of lilac and red patina. Census: 7 in 53, 16 finer (9/14). PCGS# 10348

1854 Kellogg & Co. Twenty, AU53
K-1a, Short Arrows

- 5168** 1854 Kellogg & Co. Twenty Dollar AU53 NGC. K-1a, R.4. Short Arrows, KELLOGG centered on coronet. Prior to the opening of the San Francisco Mint in April 1854, a shortage of ingots on the West Coast led bankers to petition local assayers to strike gold coins. Kellogg & Co. took up the cause and struck an estimated 180,000 twenty dollar pieces. The design was a slightly modified version of the relatively new double eagle. The K-1a variety is likely the first struck, as the reverse is the same used to produce the 1853 Moffat & Co. twenty dollar coins. This lightly circulated example displays strongly detailed devices over partly lustrous, yellow-gold surfaces. Abrasions are lightly scattered throughout. PCGS# 10222

1849 Mormon Quarter Eagle, XF45 Details
Early Territorial Gold Issue, K-1

- 5169** 1849 Mormon Quarter Eagle — Mounts Removed, Damaged, Cleaned — ANACS. XF45 Details. K-1, R.5. Members of the Mormon Battalion, who served in California during the Mexican War, were among the first to discover gold along the American River in late 1848. The Mormon quarter eagles were struck from gold dust found by these soldiers after their return to Salt Lake City, where the local economy was suffering from an almost complete lack of circulating coinage. Unfortunately, the Mormons were not trained assayers, and their coins were found to be of low fineness and weight when examined by the assayers at the United States Mint. Reports of this low intrinsic value caused the Mormon coinage to be widely repudiated outside the Mormon community, and most of the coins were melted for recoinage at an early date.

This interesting example offers unusually sharp design details and the obverse presentation is most attractive. The reverse shows surface erosion in several places, caused by the noted removal from a mount and the antique-gold surfaces show signs of a light cleaning. PCGS# 10259

CALIFORNIA FRACTIONAL GOLD

1854 Octagonal Liberty Head Gold Dollar
Rare BG-507, MS64
The Only Example Certified by NGC

- 5170** 1854 Liberty Octagonal 1 Dollar, BG-507, High R.6, MS64 NGC. This piece is of a rare variety of the octagonal gold dollar produced by Frontier, Deviercy & Co. in 1854. The inscription FD at 6 o'clock on the reverse easily identifies the maker. Pierre Frontier and Eugene Deviercy were later arriviers in San Francisco, beginning production as late as mid-1853. This coin is lacking slightly in striking sharpness on portions of the borders and on the date, as is typical. The highly reflective fields complement medium green-gold color. This piece ranks as the only example of this variety certified by NGC (9/14). PCGS# 10484

PATTERNS

1849 Three Cent Pattern, Judd-114, PR64
'Six Cent Piece' Mule of Judd-111, Judd-112

- 5171** 1849 Three Cent Silver, Judd-114, Pollock-128, Low R.7, PR64 PCGS. An unusually crude and simple design, the Judd-114 shows one side with a large Arabic 3 and the other depicting a Roman III, a mule of the reverses for Judd-111 and Judd-112. The denticles are slanted and toothlike. Struck in copper-nickel with a plain edge. W. Elliot Woodward, in his catalog of the Mickley sale, referred to this design as "the ugliest of all known coins and certainly one of the rarest." This undisturbed medium golden-brown example is housed in an early PCGS holder. Population: 3 in 64, 2 finer (9/14). Ex: FUN Signature (Heritage, 1/2006), lot 4540. PCGS# 11498

1852 Gold Dollar Pattern, PR64
Judd-148, Pollock-176

- 5172** 1852 Gold Dollar, Judd-148, Pollock-176, Low R.7, PR64 PCGS. Simply designed with UNITED STATES OF AMERICA around the outer portion of the obverse with the date at the bottom. The reverse has DOLLAR at the top with a wreath around the lower margin. Struck in copper-nickel and perforated in the center, with a plain edge. Natural golden-tan surfaces have glimpses of proof surface when viewed at an angle. While not as valuable as the gold version of this early prototype, copper-nickel specimens are quite rare and infrequently offered. PCGS# 11614

(1853) Judd-151c Pattern Cent, PR65
Very Rare Small Cent Pattern

- 5173** (1853) Pattern Cent, Judd-151c, Pollock-180, R.7, PR65 PCGS. Ex: New Millenium Collection [sic]. Cent patterns were struck in 1853 in an effort to replace the cumbersome "large" cents then in circulation. On the Judd-149 through -151 pieces, the obverse is adapted from quarter eagle dies while the reverse has ONE CENT inside a laurel wreath. The Judd-151b, c, and d pieces are struck from an unfinished obverse die with dentils around the border, but no lettering or motifs. The reverse is the same as on the Judd-149 through -151 patterns. The Judd-151 pieces were struck in a 40% nickel, 60% copper composition with a plain edge. Fewer than half a dozen pieces are believed known of this seldom-seen pattern. The copper-nickel composition is still light in color with one reddish streak across the center of the obverse and two streaks across the reverse, undoubtedly from improper mixture of the alloy. Very rare.
Ex: November Signature (Heritage, 11/2008), lot 11008. PCGS# 62413

**1858 Flying Eagle Cent Pattern, PR65
Rare Judd-198 Variety**

- 5174** 1858 Flying Eagle Cent, Judd-198, Pollock-229, Low R.6, PR65 PCGS. The adopted Flying Eagle cent design with large letters on the obverse, while the reverse has a wide oak wreath with a broad, ornamental shield at the top. Struck in copper-nickel with a plain edge from slightly rotated dies. This well-struck Gem proof displays attractive chestnut-gold and olive color amid some streaky patina. A small mint-made planchet flaw appears below the eagle's claw, and the otherwise immaculate surfaces show a few minuscule carbon flecks. Certified in a green-label holder.
Ex: November Signature (Heritage, 11/2003), lot 11016. PCGS# 11856

**1858 Cent Pattern, PR66
Small Flying Eagle, Judd-204**

- 5175** 1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR66 NGC. The Small Flying Eagle obverse of 1858, by Anthony Paquet, is combined with the Oak Wreath With Shield reverse. Struck in copper-nickel with a plain edge. These coins were sold as part of twelve-piece sets of pattern and Flying Eagle cents circa 1858. This delightful Premium Gem displays sharply detailed design elements and reflective fields, and the well-preserved surfaces show a mix of original red and light brown patina. Census: 1 in 66, 4 finer (9/14). PCGS# 11871

**1859 Longacre Half Dollar, PR65
Judd-239, Silver, Reeded Edge**

- 5176** 1859 Half Dollar, Judd-239, Pollock-295, R.4, PR65 NGC. Longacre's "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse features the wreath of the issued 1860 Seated dime, though larger in scale commensurate with the diameter. The denomination is expressed as 1/2 DOLLAR within the wreath. Struck in silver with a reeded edge. This is a silver-gray representative with exceptional definition and minimal marks. PCGS# 11972

**1863 Indian Cent, PR65
Judd-300, Pollock-362**

- 5177** 1863 One Cent, Judd-300, Pollock-362, Low R.7, PR65 PCGS. The High Date variant of this elusive variety. This pattern was struck in the normal copper-nickel alloy with the regular working dies, but was produced with a reeded edge rather than a plain edge. Proof and business strike versions were produced. This example of the former displays razor-sharp design definition, with moderate mirroring in the fields. Intermingled hues of rose and bronze-gold grace each side, and only a few minute carbon specks are detected upon close examination. Population: 4 in 65, 0 finer (9/14). PCGS# 60455

**1865 Indian Cent Pattern, PR66
Repunched Date, Judd-406**

- 5178** 1865 One Cent, Judd-406, Pollock-475, Low R.6, PR66 PCGS. FS-301, Snow-1. From the Plain 5 repunched date Snow-1 dies, the remnants of the undertype numerals are visible below all four primary digits in the date, with the undertype 1 punched lower and the 5 higher than the primary numeral. The design is the one adopted for regular-issue coinage, struck in nickel with a plain edge. This spectacular Premium Gem offers well-detailed design elements and hazily reflective fields, with well-preserved copper-gold surfaces. Population: 4 in 66, 0 finer (9/14). PCGS# 60583

**1865 Shield Nickel Pattern, PR65
No Rays, Judd-418**

- 5179** 1865 Shield Five Cents, Judd-418, Pollock-490, High R.6, PR65 PCGS. The obverse is the traditional Shield nickel design used for regular-issue coinage in 1865. The reverse features the Without Rays design adopted in 1867. Struck in nickel with a plain edge. The reverse dies were polished to the extent that the letters S and D in the legends are incomplete at the top. USPatterns.com dates the striking of these pieces to circa 1870. This impressive Gem is sharply detailed, with slightly reflective fields under shades of pale gold toning. Housed in a green label holder. Population: 6 in 65, 4 finer (9/14). PCGS# 60600

**1866 Transitional Shield Nickel, PR65 Cameo
Judd-507, Pollock-591**

- 5180** 1866 Shield Five Cents, Judd-507, Pollock-591, R.5, PR65 Cameo PCGS. An important transitional pattern, dated 1866, but featuring the Without Rays reverse style of 1867. The pattern die, however, is from a different hub than the regular working dies of 1867, as evidenced by a slightly different orientation of the stars in relation to the surrounding legend. This piece displays razor-sharp design definition and deeply mirrored fields. Light amber-gold toning blankets each side. Population: 11 in 65, 1 finer (9/14). PCGS# 860703

**1867 Pattern Five Cents, PR63 Brown
Judd-572, Pollock-648**

- 5181** 1867 Shield Five Cents, Judd-572, Pollock-648, Low R.7, PR63 Brown PCGS. A regular issue With Rays die trial striking, produced in copper with a plain edge. Extensively mellowed with countless tiny carbon flecks found primarily on the reverse. As was pointed out in a previous sale: "The Proof 1867 With Rays Shield Nickel is a prohibitively expensive rarity, and the present pattern is not only more affordable, but is also even more rare than its famous copper-nickel counterpart." PCGS# 60782

**1868 Judd-648 Ten Cents Pattern in Copper
PR65 Red and Brown**

- 5182** 1868 Ten Cents, Judd-648, Pollock-721, High R.6, PR65 Red and Brown PCGS. The obverse uses the head of Liberty as seen on Braided Hair large cents, last produced in 1857, and is mated with a reverse that reads TEN CENTS in the center, surrounded by a laurel wreath. Struck in copper with a plain edge. This pattern was also coined in nickel, and the two variants are about equal in overall rarity, with only about two dozen examples of each known. Vivid purple and lavender-rose hues intermingle in the reflective fields beneath a thin veil of auburn-brown patina. The strike is razor-sharp throughout, and the surfaces are nearly pristine. PCGS# 70866

**1869 Half Dime Pattern, PR67
Judd-693, High R.7**

- 5183** 1869 Half Dime, Judd-693, Pollock-772, High R.7, PR67 NGC. An impression from the regular issues dies in aluminum with a reeded edge. This piece is dramatically double struck with about 10 degrees of separation. Only five or six examples of this pattern variety are known, and it is doubtful that any others are double struck like this piece.

The rotated double strike is dramatic and is equaled by the quality of this Superb Gem. Both sides have heavy field-to-device contrast on the light gray aluminum surfaces with deeply mirrored fields. A few lint marks and other Mint-made imperfections on each side are entirely as struck; otherwise, pristine surfaces and exceptional eye appeal. Census: 1 in 67, 0 finer (9/14). PCGS# 60918

**1870 Standard Silver Quarter, PR66 Deep Cameo
Judd-880, Sole Deep Cameo Graded**

- 5184** 1870 Standard Silver Quarter Dollar, Judd-880, Pollock-978, High R.7, PR66 Deep Cameo PCGS Secure. CAC. Ex: Stonewall Collection. William Barber's Seated Liberty design is paired here with a Standard Silver reverse showing 25 CENTS in the center, surrounded by a wreath of cotton and corn, with STANDARD above. Struck in aluminum with a reeded edge. These were issued in complete sets in 1870 with fewer than a half-dozen known today in aluminum. The surfaces show no signs of oxidation, and the fields are deeply mirrored with strongly contrasted, frosted devices resembling a silver coin. Outstanding quality and rarity. PCGS has certified only three specimens of Judd-880 with the present example tied for finest graded and the sole Deep Cameo (9/14). From *The Pannonia Collection, Part Two*. PCGS# 512788

**1880 Coiled Hair Stella Pattern, AU50 Details
Gilt Copper Piece, Judd-1661**

- 5185** 1880 Coiled Hair Four Dollar, Judd-1661 Gilt, Pollock-1861, R.6 — Whizzed — ANACS. AU50 Details. The reverse and the obverse periphery are the same as Flowing Hair stellas as struck in the various metals, but the center obverse features the George T. Morgan Coiled Hair design. Liberty's hair is braided, and a hair band in front reads LIBERTY. The inscription (each character separated by stars) 6 G .3 S .7 C 7 G R A M S runs around the obverse rim. On the reverse a five-pointed star occupies the center, bearing the legend ONE STELLA / 400 CENTS. In an inner circle are E PLURIBUS UNUM and DEO EST GLORIA ("God is glory"), with UNITED STATES OF AMERICA and FOUR DOL. around the outer rim. Struck in copper with a reeded edge, then gilt.

About a dozen examples of Judd-1661 are known in copper and many (including the present coin) have been gilt. This piece displays sharply detailed design elements with the slightest trace of high-point wear. Like most gilt coins, the luster is flat and mattelike, rather than flashy. No large or distracting abrasions are present, but the surfaces show slight evidence of whizzing. *The Valley View Life Collection, Part Three*. PCGS# 92046

1882 Pattern Liberty Nickel, Mirrored PR65
Judd-1690, No CENTS Reverse

5186 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR65 NGC. The obverse die is dated 1882 and is quite similar to the regular die for the 1883 Liberty Head nickel, but the stars are arranged slightly differently. The reverse is as the first variety of 1883, the nickel lacking CENTS on the lower portion. Struck in nickel with a plain edge. The surfaces are deeply mirrored, especially so for a coin struck from nickel product. Each side is covered with dusky gray patina complementing pale underlying rose and lilac accents. Census: 4 in 65, 0 finer (9/14). PCGS# 62095

HARD TIMES TOKENS

1864 Feuchtwanger Three Cent, MS64
Low-179A, HT-267, None Finer at NGC

5187 1864 Feuchtwanger Three Cent, Eagle, MS64 NGC. Low-179A, Fuld-NY630X-1j, HT-267, R.6.
The 1864 Feuchtwanger three cent token was struck in a German silver alloy of copper, nickel, and zinc. It is technically a Civil War issue, but it is die-linked to the earlier Hard Times-era tokens of 1837. The HT-267 variety is quite rare, and this is just the seventh time Heritage has offered an example. The design elements are sharply rendered and the slightly reflective fields show much evidence of die rust, but few signs of contact. The pleasing surfaces show a mix of pewter-gray and pale gold toning. Census: 3 in 64, 0 finer (9/14). PCGS# 20003

- 7013** 1724 Hibernia Halfpenny AU53 NGC. M. 4.51-K.4, W-13690, R.2. Jonathan Swift, among others, asserted that William Wood's Hibernia coppers were produced without Irish consent, and were notably underweight, causing Wood to relinquish his coinage patent to King George I in 1725. The last of the Hibernia halfpence bear the date, 1724, and are significantly scarcer in all grades than the typically encountered 1723 issue. This well-struck piece represents the 11 harp strings, two reverse dots variant, for which Martin lists six sub-varieties. The surfaces display a smooth auburn patina, with intermingled orange-brown accents. Only slight wear is present on the high points of the design, with overall outstanding visual appeal.

- 7067 1794 Talbot/Howard XF45 NGC. Lettered Edge, Breen-1049, W-8720, R.4.** The 1794-dated Fuld-3 Talbot, Allum & Lee cent obverse die is here paired with an undated reverse depicting a bust facing left with the inscription IOHN HOWARD F.R.S. PHILANTHROPIST surrounding. Howard, who lived from 1726 to 1790, was a prominent social reform figure who was well-known for his efforts toward the improvement of living conditions in prisons. Varieties of this mule are known with both plain and lettered edges, the latter being the more plentiful. This piece displays deep auburn-brown patina, smooth surfaces, and only light wear over the high points. Some minor lightness of strike is noted on the lower-central obverse.

- 9694** 1883 Hawaii Half Dollar AU50 PCGS. PCGS Population (60/390). NGC Census: (29/307). Mintage: 700,000. PCGS# 10991

PATTERNS

- 9695** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, — Scratched — ANACS. AU Details, Net AU50. NGC Census: (0/60). PCGS Population (3/116).
- 9696** circa-1967 General Motors Cent, Pollock-4060, MS61 Brown NGC. Test Code 9-R.
- 9697** (circa-1967) General Motors Cent, Pollock-4060, MS63 Red ANACS. Test Code 18-M. Roller dies.
- 9698** (1964) International Nickel Co. Inc., Pollock-5380, MS67 Prooflike NGC. Type III design. Nickel-silicon alloy, per Pollock.
- 9699** circa-1964 DuPont Franklin "Quarter", Pollock-5393, MS62 Red and Brown NGC. Copper.
- 9700** circa-1977 Gould Inc. Titanium "Dollar", Pollock-5445, MS67 NGC.
- 9701** 1987 Fred Zinkann "Half Eagle", Pollock-5465, MS61 NGC. Struck in tungsten.

ERRORS

- 9702** 1795 Plain Edge Early Cent — Off-Center — AG3 ANACS.
- 9703** 1901 Indian Cent — Off-Center — MS62 Brown ANACS.
- 9704** 1904 Indian Cent — Straight Clip — MS62 Brown ANACS.
- 9705** 1913-S Lincoln Cent — Struck 15% Off Center — MS61 Brown NGC.

- 9706** 1928-S Lincoln Cent — Rotated, Double Struck in Collar — XF40 PCGS.
- 9707** 1969-D Lincoln Cent — Struck on a 10C Planchet 2.2 Grams — MS60 NGC.
- 9708** 1977 Lincoln Cent — Struck on a 10C Planchet — MS63 ANACS.
- 9709** 1985 Lincoln Cent — Double Denomination on Struck 10C — MS65 PCGS.
- 9710** 1997 Lincoln Cent — Double Denomination on Struck 10C — MS63 PCGS.
- 9711** 1997 Lincoln Cent — Double Denomination on Struck 10C — MS66 PCGS.
- 9712** 1998 Lincoln Cent — Struck on a 1998-P 10C — MS65 ANACS.

- 9713** 1999 Lincoln Cent — Struck on a 1999-P 10C — MS67 NGC.
- 9714** 1883 No Cents Liberty Nickel Coin #1/2 — Obverse Half Of Split Planchet, After Strike 2.1 grams — AU53 NGC; 1883 No Cents Liberty Nickel Coin #2/2 — Reverse Half Of Split Planchet, After Strike 2.8 grams — AU53 NGC. (Total: 2 coins)
- 9715** No Date Jefferson Nickel — Reverse Die Cap — MS66 NGC.
- 9716** 1943 Jefferson Nickel — Obverse Half Of Split Planchet — AU55 NGC.
- 9717** 1977 Jefferson Nickel — Double Denomination on Struck 1C — MS64 PCGS.

- 9718** 1978 Jefferson Nickel — Struck on 1C Planchet — MS63 Red Brown PCGS.
- 9719** (1980-P) Jefferson Nickel — Struck on a Type-1 1C Planchet, 3 grams — MS63 Red and Brown NGC.
- 9720** 1980-P Jefferson Nickel — Struck on a 1C Planchet — MS64 Red NGC.
- 9721** 1981-P Jefferson Nickel — Struck on a Struck Cent — MS63 Red NGC.
- 9722** 1999-P Buffalo Nickel Mated Pair #1/2 — Double Struck — MS64 ANACS; 1999-P Buffalo Nickel Mated Pair #2/2 — Broadstruck, Indented — MS64 ANACS. (Total: 2 coins)
- 9723** 2000-D Jefferson Nickel — Struck on a 2000-D 1C — MS64 Red NGC.
- 9724** 1875-S Twenty Cent — 55 Degrees Counter Clockwise Rotated Dies — AU55 PCGS.
- 9725** (1956) Washington Quarter — Struck on a 10C Planchet, 2.4 grams — MS64 NGC.
- 9726** 1964 Washington Quarter — Struck on a 10C Blank Planchet, 2.5 Grams — MS64 NGC.
- 9727** 1964 Washington Quarter — Struck on a 5C Planchet — MS66 PCGS.
- 9728** 1972-D Washington Quarter — Double Struck on a 5C planchet, 5.1 grams — MS65 NGC.
- 9729** 1999-P Georgia Statehood Quarter — Double Struck, Second Strike 70% Off Center — MS62 PCGS.
- 9730** 1964 Kennedy Half Dollar — 6% Ragged End Planchet — MS62 PCGS.
- 9731** No Date-D Kennedy Half Dollar — Struck on a 25C Planchet, 6.08 Grams — AU55 NGC.
- 9732** No Date(1965-2011) Kennedy Half Dollar — Uniface Striking on Clad 10C Blank Planchet, 2.24 Grams — MS64 ANACS.
- 9733** 1972-D Kennedy Half Dollar — Struck on a Clad 25C Planchet — MS62 PCGS.
- 9734** 1905 — Curved Clip @ 3:00 — AU58 NGC.
- 9735** 1932 — Obverse Struck Thru — MS63 NGC.
- 9736** 1932 — Reverse Struck Thru — MS63 NGC.
- 9737** 2007-S Thomas Jefferson Presidential Dollar — Double Struck With Rotation — PR69 Ultra Cameo NGC.
- 9738** (2010) Franklin Pierce Presidential Dollar, Missing Edge Lettering — Double Struck In Collar — MS66 NGC.

- 9739 (2010) Millard Fillmore Presidential Dollar, Missing Edge Lettering — Clad Layer Missing On Reverse, 5.9 grams — MS66 NGC.
- 9740 (2010) Millard Fillmore Presidential Dollar, Missing Edge Lettering — Clad Layer Missing On Obverse, 5.9 grams — MS66 NGC.
- 9741 1999-W Tenth-Ounce Gold Eagle — Struck w/ Unfinished Proof Dies — MS68 PCGS.

WASHINGTONIA

- 9742 1808 Washington Benevolent Society — Mount Removed — NGC Details. AU. Baker-327, Julian-RF-23a. Silver, 42mm.
- 9743 1872 Washington Head 1/2 Gold California Charm AU58 NGC. Baker-505. Incorrectly designated by NGC as B-504, which is a 1/4 Gold.

U.S. MINT MEDAL

- 9744 1871 Emancipation Proclamation MS64 Brown NGC. Julian-CM-16. Bronze, 45mm.

SO-CALLED DOLLAR

- 9745 1896 Bryan Dollar, Uniface, Gorham Mfg. Co., MS61 NGC. HK-781, S-7. *The Valley View Life Collection, Part Three.*

EXPOSITIONS AND FAIRS

- 9746 1893 World's Columbian Exposition Medal Uncirculated Uncertified. Eglit-90. Awarded to Parish Schools. Dies by Charles Barber. Accompanied by its original metal box with velvet inset, Very Fine.
- 9747 1904 Louisiana Purchase Exposition, America Welcomes the World Medal, AU Uncertified. Hendershott-30-280. Bronze, 20 mm. Accompanied by its original round cardboard box with printed labels Monnaie De Paris and The Shakespeare Head Book-Shop.
- 9748 1904 Louisiana Purchase Exposition, Louisiana 1/4 Gold — Bent — NGC Details. Unc. Hendershott-61-320.
- 9749 1904 Louisiana Purchase Exposition, Louisiana 1/4 Gold, MS66 Prooflike NGC. Hendershott-61-320. 14 Stars. *The Valley View Life Collection, Part Three.*
- 9750 1904 Louisiana Purchase Exposition, Louisiana 1/2 Gold, MS63 NGC. Hendershott-61-330. 0.29 gm.
- 9751 1904 Louisiana Purchase Exposition, Louisiana 1/2 Gold, MS64 NGC. Hendershott-61-330.

- 9752 1904 Louisiana Purchase Exposition, Louisiana 1/2 Gold, MS65 Prooflike NGC. Hendershott-61-330. *The Valley View Life Collection, Part Three.*

- 9753 1905 Lewis & Clark Exposition, Oregon 1/4 Gold, MS64 Prooflike NGC. *The Valley View Life Collection, Part Three.*

- 9754 1905 Lewis & Clark Exposition, Oregon 1/4 Gold, MS64 NGC.

- 9755 1905 Lewis & Clark Exposition, Oregon 1/2 Gold, MS64 Prooflike NGC. *The Valley View Life Collection, Part Three.*

- 9756 1905 Lewis & Clark Exposition, Oregon 1/2 Gold, MS65 NGC.

- 9757 1909 Alaska-Yukon-Pacific Exposition, 1/4 DWT — Mount Removed — NGC Details. Unc. Hart's Coins of the West.

- 9758 1909 Alaska-Yukon-Pacific Exposition, 1/4 DWT, MS62 NGC. Hart's Coins of the West. *The Valley View Life Collection, Part Three.*

- 9759 1909 Alaska-Yukon-Pacific Exposition, 1/4 DWT, MS63 NGC. Hart's Coins of the West.

- 9760 1909 Alaska-Yukon-Pacific Exposition, 1/4 DWT, MS64 NGC. Hart's Coins of the West.

- 9761 1909 Alaska-Yukon-Pacific Exposition, 1/2 DWT, MS62 NGC. Hart's Coins of the West.

- 9762 1909 Alaska-Yukon-Pacific Exposition, 1/2 DWT, MS62 NGC. Hart's Coins of the West.

- 9763 1909 Alaska-Yukon-Pacific Exposition, 1/2 DWT, MS63 NGC. Hart's Coins of the West.

- 9764 1909 Alaska-Yukon-Pacific Exposition, 1/2 DWT, MS64 NGC. Hart's Coins of the West. *The Valley View Life Collection, Part Three.*

- 9765 1909 Alaska-Yukon-Pacific Exposition, 1 DWT, AU58 NGC. HK-360. Hart's Coins of the West.

- 9766 1909 Alaska-Yukon-Pacific Exposition, 1 DWT, MS63 NGC. HK-360. Hart's Coins of the West. *The Valley View Life Collection, Part Three.*

- 9767 1909 Alaska-Yukon-Pacific Exposition, 1 DWT, MS63 NGC. HK-360. Hart's Coins of the West.

- 9768 1909 Alaska-Yukon-Pacific Exposition, 1 DWT, MS63 NGC. HK-360. Hart's Coins of the West.

- 9769 1909 Alaska-Yukon-Pacific Exposition, 1 DWT, MS63 NGC. HK-360. Hart's Coins of the West.

HARD TIMES TOKENS

- 9770 1837 Feuchtwanger Cent MS63 NGC. Low-120, HT-268, Breen 2-A, R.5.
- 9771 1837 Feuchtwanger Cent MS64 NGC. Low-120, HT-268, Breen 3-B, R.3.
- 9772 1837 Feuchtwanger Cent MS62 NGC. Low-120, HT-268, Breen 3-E, R.3.
- 9773 1837 Feuchtwanger Cent MS64 NGC. Low-120, HT-268, Breen 3-E, R.3.
- 9774 1837 Feuchtwanger Cent MS63 NGC. Low-120, HT-268, Breen 4-E, R.3.
- 9775 1837 Feuchtwanger Cent MS63 NGC. Low-120, HT-268, Breen 5-G, R.2.
- 9776 1837 Feuchtwanger Cent MS62 NGC. Low-120, HT-268, Breen 5-H, R.1.
- 9777 1837 Feuchtwanger Cent MS64 NGC. Low-120, HT-268, Breen 6-G, R.1.

U.S. MERCHANT TOKENS (1845-1860)

- 9778 (1853) James, Clark & Co., Hudson, NY, MS65 NGC. Miller-NY-30. Brass, reeded edge.
- 9779 (1850s) Chesebrough Stearns & Co., New York, NY, MS64 Red and Brown NGC. Miller-NY-150A. Copper, plain edge. Incorrectly designated by NGC as M-NY-150, which has a reeded edge.
- 9780 (1850s) Malcolm & Gaul, New York, NY, MS66 NGC. Miller-NY-516. Brass, reeded edge.
- 9781 (1855) Scovill Manufacturing Co., New York, NY, MS64 Red and Brown NGC. Miller-NY-802. Copper, plain edge.
- 9782 "1792" William Idler Store Card, Philadelphia, PA, MS65 Brown NGC. Baker-544A, Miller-PA-211, W-15920. Copper, plain edge.

CIVIL WAR MERCHANTS

- 9783 1863 F.B. Orr, Mansfield, Ohio, MS63 NGC. Baker-564, Fuld-OH505B-2j.

CIVIL WAR TOKEN

- 9784 J.A. Garman, 54th Pennsylvania Volunteers, Sutler Token MS63 NGC. S-110Ba. Brass. PCGS# 661125

ALASKA TOKENS

- 9785** "1897" Head Right, 16 Stars, Round, Alaska Gold One Pinch, MS62 NGC. HK-838. Hart's Coins of the West. NGC has incorrectly listed the variety as Head Left, Octagonal. *The Valley View Life Collection, Part Three.*
- 9786** "1898" Head Left, 13 Stars, Octagonal, Alaska Gold One Pinch, MS65 NGC. HK-843. Hart's Coins of the West.
- 9787** "1899" Head Right, Round, Alaska Gold 1/2 Pinch, MS63 NGC. Hart's Coins of the West. *The Valley View Life Collection, Part Three.*
- 9788** "1901" Head Left, Round, Alaska Gold 1/4 Pinch, MS65 NGC. Hart's Coins of the West.
- 9789** "1902" Head Right, Octagonal, Alaska Gold 1/4 Pinch, MS63 NGC. Hart's Coins of the West. 0.40 gm.
- 9790** 1910 Alaska 2 TooWah, Five Stars, MS64 NGC. Gould-Bressett 108.

GOLD CHARMS

- 9791** "1849" British Columbia Gold MS62 NGC. G&L-620. Canada. *The Valley View Life Collection, Part Three.*
- 9792** 1914 Idaho Gold, One, AU58 NGC. Hart's Coins of the West. 0.73 gm.
- 9793** 1914 Idaho Gold, One, MS63 NGC. Hart's Coins of the West. *The Valley View Life Collection, Part Three.*
- 9794** 1914 Montana Gold, 1/4, MS63 NGC. Hart's Coins of the West.
- 9795** 1914 Oregon Gold, 1/4, MS64 NGC. Hart's Coins of the West.

CALIFORNIA GOLD CHARMS

- 9796** 1915 Minerva and Bear, Round, California Gold 1/4, MS64 NGC. Hart's Coins of the West.
- 9797** 1915 Minerva and Bear, Round, California Gold One, MS64 NGC. Hart's Coins of the West.
- 9798** 1915 Minerva and Bear, Octagonal, California Gold One, MS64 NGC. Hart's Coins of the West.

WORLD MEDAL

- 9799** (2004) Libertas Americana Medal, Paris Mint Restrike PR69 Ultra Cameo NGC. Silver, 40 mm.

MISCELLANEOUS MEDALS AND TOKENS

- 9800** Gunboat U.S.S. Nashville Medal, Struck In Silver. Oblong rectangular shape, 3" x 1.25". 60.1 grams. Produced in 1909 by the Chicago Numismatic Society under the leadership of Virgil M. Brand, in honor of the largest gunboat that could pass through the route from the St. Lawrence River to Chicago. Brand himself volunteered to pay cash for 50 of the 100 silver medals issued. No more were struck, and the dies destroyed. This is one of the 50 from Brand's group, in its somewhat worn original, velvet-lined box. *Ex: Virgil Brand Collection Part II (Bowers and Merena, 6/1984), lot 1164.*

MINT SETS

- 9835 Uncertified 1954 Double Mint Set.** Accompanied by the holders and inner envelope of Mint issue. No returns will be accepted on this lot. (Total: 30 coins)

- 9836 Uncertified 1955 Double Mint Set.** Accompanied by the holders and inner envelope of Mint issue. No returns will be accepted on this lot. (Total: 22 coins)
- 9837 Uncertified 1956 Double Mint Set.** Accompanied by the holders and outer envelope of Mint issue. No returns will be accepted on this lot. (Total: 18 coins)
- 9838 Uncertified 1957 Double Mint Set.** Accompanied by the holders and inner envelope of Mint issue. No returns will be accepted on this lot. (Total: 20 coins)
- 9839 Uncertified 1958 Double Mint Set.** Accompanied by the holders and inner envelope of Mint issue. No returns will be accepted on this lot. (Total: 20 coins)
- 9840 Uncertified 1958 Double Mint Set.** Accompanied by the holders and inner and outer envelopes of Mint issue. No returns will be accepted on this lot. (Total: 20 coins)

PROOF SETS

- 9841 Uncertified 1950 Proof Set.** The set is housed in the box and wrappers of Mint issue. No returns will be accepted on this lot. (Total: 5 coins)
- 9842 Uncertified 1951 Proof Set.** The set is housed in the box and wrappers of Mint issue. No returns will be accepted on this lot. (Total: 5 coins)
- 9843 Uncertified 1952, 1953, 1954 Proof Sets.** Each set has five coins and is housed in the box and wrappers of Mint issue. No returns will be accepted on this lot. (Total: 3 sets)

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
 - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
 - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
 - Twenty-two percent (22%) on Wine Auction lots;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments for Signature auctions; Internet-only auction bidding increments are approximately half of these amounts (see www.ha.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< - \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$29	\$2	\$20,000 - \$29,999	\$2,000
\$30 - \$49	\$3	\$30,000 - \$49,999	\$2,500
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$299	\$20	\$200,000 - \$299,999	\$20,000
\$300 - \$499	\$25	\$300,000 - \$499,999	\$25,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$50,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$4,999,999	\$100,000
\$2,000 - \$2,999	\$200	\$5,000,000 - \$9,999,999	\$250,000
\$3,000 - \$4,999	\$250	>\$10,000,000	\$500,000
\$5,000 - \$9,999	\$500		

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot considered by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1,500, and there is no sales tax on coins in Texas.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.

Terms and Conditions of Auction

30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

- 36B. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306993; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #0952360; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Paul Minshull #2001161-DCA; Andrea Voss, #1320558, Michael J. Sadler, # 1304630, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-4-2014
